Dear George

Proposed Supermarket Development Wolli Creek

I have considered the findings of the Road Safety Audit undertaken by Geo Transport Solutions and the Corrective Action Requests.

It is apparent from the Audit assessment that:

- * a 3.5 metres wide footway needs to be retained along the length of the left-turn lane
- * there is a need for linemarking and left-turn arrows along the lane
- * the pedestrian crossing should be deleted but kerb ramps added across the lane
- * GIVE WAY, ONE WAY and NO ENTRY signs should be added along with a GIVE WAY line at the point of entry.

A sketch incorporating the proposed modified access arrangement incorporating the corrective actions is attached for your to formalise and return for 'closing off' of the Corrective Action Requirements.

Yours faithfully
