

15 December 2010

DN. TONY KELLY, THE MINISTER FOR PLANNING
Parliament House, Macquarie Street, Sydney 2000

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated $\frac{2}{3}$ of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
- Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

Yours Sincerely,

- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

15 December 2010

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated 3/4 of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated ⅓ of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
- Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

Yours Sincerely,

TO: HON. TONY KELLY, THE MINISTER FOR PLANNING
Parliament House, Macquarie Street, Sydney 2000

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated 2/3 of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
- Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.

Parliament House, Macquarie Street, Sydney 2000

15 December 2010

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated $\frac{2}{3}$ of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
 Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated 2/3 of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

Yours Sincerely,

Name JOHN MILNICH OAM Address 102/15 Pirrama Rd, Pyrmont.

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated $\frac{2}{3}$ of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.

- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:

- We believe the increase in the workforce to be more like 143%. The developer estimate was 70%. This is not supported.
- Parking for some 40 to 50 vehicles cannot be accommodated on site. The developer proposes they park in the Promontory Car Park. Promontory Car Park cannot accommodate for this increase given the number of permanent parkers and the Dolton House leasing.
- Parking on the apron/ promenade on the wharf for some 10 temporary servicing vehicles requires the consent of the owners. This consent has not been granted.
- The increased use of the apron for vehicular use will affect pedestrian safety. This increase is estimated to be 132 vehicles per day on the apron.
- Improved public access to the wharf has not been addressed.
- The impact of the vessels heights and scale on the loss of views from suites and the local area has not been addressed and misrepresented in Toga Development No. 27 Pty Ltd supplied photomontages.
- Environmental issues associated with the anti-fouling of vessels have not been assessed.

Because this proposed development will seriously alter this historic Pyrmont precinct we do not support the proposed development of the marina on Jones Bay Wharf.

Parliament House, Macquarie Street, Sydney 2000

15 December 2010

Dear Minister,

Re: Jones Bay Wharf Marina Development Pyrmont, Jones Bay Wharf, Pyrmont (MP09_0205)

Pyrmont needs to preserve what remains of its marine heritage. We believe the proposed marina with its increase of vessels from approx. 35 to 73 would seriously impact on this heritage. It is not supported.

We believe this proposal reflects the refusal of Elisabeth Bay residents to have an enlarged marina on its door step, adjacent to Bear Park. They rightly opposed the enlarged marina due to the adverse effects it would have on resident amenity.

If the proposal goes ahead this historic wharf and surrounding area will be subject to:

- an increase in vessel numbers from approx. 35 to 73. An estimated 2/3 of the water within the eastern bay will be covered by vessels/ pontoons and nearly half on the west. The plan provided by developers Toga Development No. 27 Pty Ltd showing the "dynamic" nature of the vessels is incorrect and misleading as current vessels are primarily stationed. This will cause a virtual marine boat park.
- amplified noise pollution from an increase in vessels, vessel maintenance, waste management and servicing vehicles.
- amplified noise pollution from an increase in evening-use vessels. This noise will critically affect residents between 7 p.m. and early hours of the morning.
Traffic related noises will also increase with additional servicing vehicles.
- potential risk on concentrated spillage of fuel, bilge water, sewerage, litter and rubbish associated with commercial use in the confined Bays.
- a negative visual impact on the views from the offices on the wharf, surrounding public parks and residences due to the scale and number of vessels. Pyrmont Park, 25 Pirrama Rd and 3 Darling Island will be seriously affected with a wall of boats wiping out historic views to the wharf and harbour.
- an increase in traffic congestion. Traffic in the surrounding area is already congested. This development will compound the problem. At peak times public transport has difficulty passing the wharf on Pirrama Rd due to current servicing vehicles and taxis stationed at the end of the wharf.
- a decrease in the value of property due to increased pressure on parking availability and restricted views
- a increase in strata levies to cover increased public liability insurance, garbage removal and general maintenance
- a decrease in overall water quality within the two confined bays. Propeller and jet wash action will disturb aquatic inhabitants.
- a decrease in road side parking

Further issues that are misleading or have not been addressed:
