Subject: Rehabilitation Management Plan for Consultation

Dear Ms Arancibia

I refer to the Rehabilitation Management Plan (RMP) for the Badgerys Creek Quarry and Brickworks submitted (MP10_0014-21) to the Department for consultation.

The Department has reviewed the RMP against the requirements of development consent MP10_0014 and provides the following feedback:

- the RMP should clearly describe the options for future use of the disturbed areas of the site and how these options address the strategic planning objectives of the Western Sydney Aerotropolis Plan;
- the RMP should clearly describe how replacement tree plantings will minimise wildlife attraction to the Western Sydney Airport;
- the RMP should clearly describe how the timing requirements of conditions 35A and 35B will be achieved;
- the RMP should include procedures for the use of interim stabilisation and temporary vegetation strategies to minimise the area exposed for dust generation;
- the RMP should identify key progressive rehabilitation milestones, with reference to the rehabilitation timing requirements of the consent, and link these to the progressive review protocol; and
- the RMP should clearly describe how the proposed intervention and adaptive management strategies will ensure compliance with the relevant conditions of consent, including that rehabilitation remains on a trajectory achieving the rehabilitation objectives and completion criteria within the timing requirements of the consent.

If you wish to discuss the matter further, please contact Jarrod Blane on 02 8275 1831 or jarrod.blane@dpie.nsw.gov.au.

Yours sincerely
