The project should provide much more parking.

I have often taken my wife for day chemotherapy treatment and it is impossible to park anywhere close to the hospital. Patients suffering from cancer are often not able to travel on public transport which means family or friends must drive them and park then wait while the treatment is done.

There should also be more parking available in the building for visitors and support people for those who are admitted to wards.

The usual desire to reduce parking is completely opposite to the need to provide support for very sick people and those who care for them.

There should be an allocated parking space in the building for every chair in the chemotherapy day treatment room plus additional parking spaces for those waiting for a chair to become available during the crossover period.

I support the project as a whole but a much greater provision of parking is very important if the community wants to help those suffering from major illness.
