Submission regarding "The Expansion of the M5 Corridor"  
Application no 10\_0052

Dear Sir or Madam

Thanks for your recent letter and information regarding the M5 west widening. However after searching through your plans and other information on the internet I have failed to see any of my concerns addressed. One has to ask why there are no plans to install noise barriers on the M5 Georges River Bridge at Liverpool when there seems to be great concern to provide protection for Golf courses / Commercial and Industrial Areas. This Bridge with homes less than 20m from the M5 would be the only section without any noise barriers. The road surface in this area also needs urgent attention as it creates massive tyre on road noise.

A large number of homes on the southern and northern sides of the M5 suffer very High Noise Levels..Could someone please let us know if any plans are been considered or drawn up to address the very high levels of noise pollution suffered by the people living in this area  
Regards,

W H Rooney
