Dinuka McKenzie - Noise walls on the George's river bridge.

Subject: Noise walls on the George's river bridge.

As a resident of the Links estate I would like to complain about the lack of installation of Noise walls on the Georges River Bridge at Casula.

The traffic noise from the bridge is very disturbing particularly during the night. Why is it that this is apparently the only bridge on the M4 M7 and the M5 that is or will not be filtered with suitable barriers. As there are moves to increase the number of lanes on the M5 this can only make the noise worse and lead to most local residents being unable to have a good night's sleep. This in turn will lead to ongoing medical problems the cost of which will be passed onto the government through Medicare. Please may I have a reason for this unfair further pressure on my general health and wellbeing.

Dear plan comments collector

As a resident of the Links estate I would like to complain about the lack of installation of Noise walls on the Georges River Bridge at Casula.

The traffic noise from the bridge is very diturbing particularly during the night.

Why is it that this is apparently the only bridge on the M4 M7 and the M5 that is or will not be filtered with suitable barriers.

As there are moves to increase the number of lanes on the M5 this can only make the noise worse and lead to most local residents being unable to have a good night's sleep. This in turn will lead to ongoing medical problems the cost of which will be passed onto the government through Medicare.

Please may I have a reason for this unfair further pressure on my general health and wellbeing.
