Re KIMBRIKI TIP

We have the letter from Chris Ritchie advising of changes to the Kimbriki Tip.

We wish to strongly object to this redevelopment as we already suffer regular days of mal odours emanating from the tip due to the processes currently undertaken. This is in spite of the current management asking to be advised if odours are noticed so they can be fixed.

What is currently being proposed can only add to the odours emanating from the plant and so far the management has not demonstrated that they care about how they effect the current residents. They may say they do but they are only paying lip service to continuous complaints.
