Against - Annex Website Submissions for job City East Zone Substation Project Application 2A(i)

With its giant atrium, the previously proposed approval for this site would have brought life and light back to Richard Johnson Square. With its 8 storey blank wall, the current proposal will kill Richard Johnson Square forever. What a disgrace.

No developer would get away with such an inactive street front in such an important part of the CBD and nor should Energy Australia. Perhaps its time Energy Australia contribute something to the city other than electricity.

I do not wish my name to be made available to the Proponent, other authorities, or on the Department's website.
