Subject: Myuna Colliery Mining Project (MP10_0080) – Noise Management Plan

Dear Ms White

I refer to your submission of the revised Noise Management Plan (Version 6, dated November 2021) for the Myuna Colliery Mining Project (MP 10_0080). I note that the updates to the Management Plan are part of Centennial's Regional Management Plan framework wherein management plans for Mandalong Mine, Myuna Colliery, Northern Coal Services and Newstan Colliery have been consolidated.

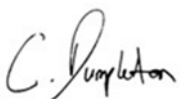

The plan has been updated in response to the Independent Environmental Audit (IEA) prepared for Centennial Northern Coal Services dated August 2021 which is as follows:

- IMP REC 1: Update TARP in the Regional Noise Management Plan to reflect current operations and alarm triggers for Newstan Coal Services (remove reference to "yellow" alarm within 2dB). The TARP should also have more defined actions to be completed by Centennial.

Given the above, I approve the Noise Management Plan (Version 6, dated November 2021) for the Myuna Colliery Mining project.

If you wish to discuss this matter further, please contact Kevin Reid on (02) 9274 6209 or kevin.reid@dpie.nsw.gov.au.

Yours sincerely,

Carl Dumbleton
