Attention: Mr Andrew Stevenson

**RE: SYDNEY SOUTH WEST HOSPITAL EXPANSION– 40 BIGGE STREET LIVERPOOL  
MECHANICAL & ELECTRICAL SERVICES DOCUMENTATION  
CERTIFICATE OF DESIGN INTENT**

Dear Andrew,

Kuttner Collins understands and supports an Environmentally Sustainable Design approach to all our projects. ESD and Energy Efficiency concepts represent good design practice and intelligent, responsible engineering approaches that should be followed in all engineering design.

This letter confirms that Kuttner Collins and Partners (NSW) Pty Ltd intend to provide Mechanical and Electrical Services design documentation to the new extension area (excluding the existing Hospital Facility area) that will meet or exceed the requirements of the Building Code of Australia Section J and provide a level of sustainability and energy efficiency equivalent to a 4 star Greenstar rated Health Building.

It is not necessary to formally seek a Greenstar rating in order to provide that level of efficiency and sustainability, and can impose an unnecessary cost penalty on the Hospital. In our recent experience of two major hospital projects, we have met or exceeded these levels of performance whilst delivering highly effective services designs which continue to perform above expectation.

We trust this information is of assistance and await your further instructions.

Yours faithfully,

Clive Jones  
Director
