Subject: RE: NB11302 - Gosford Central Coast Environmental Assessment - Traffic Correspondence 27.01.11

Tim, the cancer centre is located in the SE corner of the hospital site. The exit driveway to Holden Street is to be removed and this driveway will be entry only. This means additional exit movements to Ward Street from the southern car parking area and could affect the intersections of Ward Street / Holden Street and Ward Street/Cape Street. As long as the traffic impacts on Ward Street and the intersections at each end with Holden Street and Cape Street have been considered, the impacts on other intersections are not considered necessary as any impact would be minimal.

Robert

As discussed on 25 January 11 SKM are the Consulting Traffic Engineers commissioned by Health Infrastructure on the Central Coast Regional Cancer project at Gosford. We are in receipt of the attached letter dated 22 December 11 from the RTA (Scott Stapleton), which highlights the potential requirement for detailed intersection analysis.

I discussed the proposed development with Scott Stapleton and the potential impact to the existing road network. The nearest RTA State Roads are Central Coast Highway & Henry Parry Drive. Racecourse Road is a RTA Road, but it is a Regional Road, not a State Road. Under this classification it comes under Gosford City Council

management. Other roads (Holden Street, Ward Street & Cape Street) surrounding the Hospital are Council Roads.

Scott asked for the RTA EA assessment letter to be forward to you. RTA have the opinion that the impact of the development on State Roads is minimal. If Gosford City Council are satisfied with the level of detail contained within the Environmental Assessment documentation the RTA are prepared to withdraw the comment relating to detailed intersection analysis. Please can you confirm this is the case and we will be able to complete our detailed responses to NSW Planning.

If you have any queries on the above or would like to discuss the traffic aspects of the Gosford Cancer Centre development in more detail please contact me.

Regards

Tim
