Dear Mr Hobbs

Proposed Rozelle Village Development Possible Bus Stop Facility

I have undertaken an investigation into the potential for a bus stop to be introduced on the Victoria Road frontage of the subject development.

At present there are existing bus stops located for westbound buses on Victoria Road on the eastern side of Darling Street and near Terry Street a distance of some 500m apart. I am advised by State Transit officers that these existing stops:

- have an ideal separation
- provide for the concentration of passenger accessibility along Darling Street and the high density residential area accessed along Terry Street

The STA officers advised that the provision of another bus stop at Wellington Street would not be acceptable due to the very short distances which would result between the stops. The existing stops were considered to be within easy walking distance of each other and the provision of another stop would only act to increase bus travel times.

Yours faithfully
