Subject: Tarrawonga Coal Mine (MP11_0047) - Water Management Plan Addendum

Dear Ms Martin

Thank you for submitting the Water Management Plan Addendum (Issue 1.2 dated September 2022). I note that the document describes the use of evaporator fans for mine water management.

As nominee of the Planning Secretary, I approve this addendum to the currently approved Water Management Plan (Revision 3 dated September 2020). Please ensure you make the document publicly available on the project website at your earliest convenience.

Notwithstanding the above, you are reminded that condition 5 of schedule 3 of the project approval requires management plans to be reviewed within 3 months of any modification to the project approval.

I note that the project approval has been modified twice since the current water management plan was approved, and that Modification 7 involved changes to water management and to the site water balance. Accordingly, you are required to update the water management plan. Please submit a revised water management plan that reflects current water management activities as soon as practicable, including undertaking any consultation as required under the approval.

If you wish to discuss the matter further, please contact Rose-Anne Hawkeswood on 9274 6324.

Yours sincerely

Stephen O'Donoghue
Director
