SSD-55968733 – Burroway Solar Farm – Response to amendment report and draft conditions of consent – December 2025

Dear Rita,

Transport for NSW (TfNSW) is responding to the referral sent by DPHI through the NSW Major Projects Portal dated 5 December 2025 requesting comment on the Workforce Accommodation Amendment Report dated 5 December 2025, addendum to the Traffic Impact Assessment dated 19 November 2025 and the draft conditions of consent.

TfNSW acknowledges that the rationale for the change is based on feedback from local Councils and DPHI to reduce the impact of staff accommodation on the local area during the project's construction phase.

TfNSW reiterates advice provided on 7 August 2025 regarding the high-risk OSOM route. As per previous discussions, DPHI requested that the resolution of the final routes be completed through a condition of consent, which TfNSW has included in the draft conditions.

TfNSW has provided recommended conditions to address the assessment requirements for the high-risk OSOM route and provided advice on the draft condition set for the project in relation to TfNSW requirements. Refer to **Attachment 1** and the recommended changes (in red text) within the draft conditions for Burroway Solar Farm.

If you have any questions, please contact Glen Hanchard, Development Services Case Officer, on 1300 019 680 or email development.renewables@transport.nsw.gov.au.

Kindest Regards,

Alexandra Power
