Dear Daniel

City of Ryde Submission - Greater Parramatta and Olympic Peninsula Water Resource Recovery Facility by Sydney Water - SSI-74258485

Reference is made to the State Significant Infrastructure Development Application (SSI-74258485) proposed by Sydney Water.

Thank you for the opportunity for City of Ryde to make a submission. Council has reviewed the Application and provides its **Comment** to the development included in **Attachment 1**.

After review of detailed proposal Council staff have identified several issues, that require clarification and resolution. Council believes these can be resolved collaboratively between the applicant, DPHI and Council.

While Council acknowledges the strategic need to service growth within the GPOP corridor and manage capacity constraints in the Northern Suburbs Ocean Outfall Sewer network, the proposed piping alignment through Meadowbank Park presents notable operational and environmental risks. Submission seeks clarification regarding details of piping and affected areas in Meadowbank, particularly methodology and nature of pipe installation (trenching and trenchless), with full analysis of site-specific impact on Council managed park as well as any risk to Council.

Subject to the resolution of issues raised in this submission, Council would be able to provide its recommended conditions to DPHI later.

Should you wish to discuss the matters raised in the submission or require further information and clarification, please contact, Sanju Reddy - Senior Coordinator Development Advisory Service on 9952 8187 or email to sanjur@ryde.nsw.gov.au.

Yours sincerely

Kandace Lindeberg
Director Development and Regulation
