Subject: New Request for Advice - Residential development with in-fill affordable housing - Reid Street and Woodside Avenue, Lindfield (SSD-79261463) (Ku-ring-gai)

Dear Justin,

In preparing this advice the Marine Coast Estuary and Flood branch (MCEF) of DCCEEW's Conservation Programs, Heritage and Regulation (CPHR) group has reviewed the following documents:

- Flood Emergency Response Plan (Water Technology, June 2026)
- The Flood Impact and Risk Assessment (HCE, June 2026)

The information provided in the Flood Emergency Response Plan (Water Technology, June 2026), particularly Section 4.3 'Shelter in Place' and Section 4.4 'Flood Risk Management Features', has addressed MCEF's comments dated 26 February 2026 (attached).

Thank you for the opportunity to provide comments. No further input is required regarding flood risk management.

Yours sincerely,

Daylan Cameron
