Dear Mr Fraser

Subject: Major Projects – New Request for Advice - (SSD-5300-Mod-3) (Wollongong City)

Thank you for your email of 8 September 2021, notifying the Department of Planning, Industry and Environment – Environment, Energy & Science (EES) of the public exhibition of the Modification Application and Report for the Kembla Grange Resource Recovery Facility (SSD-5300-Mod-3).

We have reviewed the above documents and have no comments on the proposed modification to extend the operating hours of the facility, which also involves changes to the distribution of traffic and the receipt of additional waste categories to the facility, as well as upgrades to lighting for the roadway, carpark and outdoor work area.

If you have any questions about this advice, please do not hesitate to contact Haley Rich, Senior Conservation Planning Officer, via haley.rich@environment.nsw.gov.au or 4224 4166.

Yours sincerely

Chris Page
