Dear Mandana

**RE: Request for Advice - Tomingley Gold Extension Project (SSD-9176045) – our ref: EOTH22-00058**

I refer to your request for advice through the portal regarding State Significant Development proposal SSD-9176045.

A review of our records indicates that a coal mine subsidence risk is not present, as the proposal is located outside of a declared mine subsidence district, is located outside of a current coal title, and is not located in proximity to historic underground coal mine workings.

It is understood that the proposal is for an extension to an existing gold mine. Subsidence Advisory NSW (Subsidence Advisory) operate under the Coal Mine Subsidence Compensation Act, 2017 (the Act). Our functions and powers under the Act are in relation to impacts to surface development caused by the extraction of coal by underground mining methods.

Subsidence Advisory therefore has no comment on the above proposal.

Please contact me on (02) 4908 4300 or at [subsidedevelopment@customerservice.nsw.gov.au](mailto:subsidedevelopment@customerservice.nsw.gov.au) if you have any questions or wish to discuss.

Yours sincerely

**Kieran Black**
