Deana Burn NSW Department of Planning, Industry and Environment Locked Bag 5022 PARRAMATTA NSW 2124

Dear Deana Burn

Re: Comment on Environmental Impact Statement (EIS) – BlueScope Steel (AIS) Pty Ltd Port Kembla Steelworks- Blast Furnace 6 Reline (SSI-22545215)

Fire & Rescue NSW (FRNSW) acknowledge correspondence received on 23 March 2022, requesting comment on the EIS for the BlueScope Steel (AIS) Pty Ltd - Port Kembla Steelworks Blast Furnace 6 Reline (SSI-22545215).

In relation to the use and storage of class 1.1 explosives, such incidents requiring FRNSW intervention, whether it be a HAZMAT or fire, present unique risks to attending firefighters.

FRNSW have reviewed the EIS and Appendix G Hazard and Risk Assessment and make the following recommendations:

- 1. That the site ERP is updated to incorporate the use and storage of Class 1.1 explosives.
- 2. That two copies of the ERP are stored in a prominent 'Emergency Information Cabinet' which is located in a position directly adjacent to the site's main entry point/s.
- 3. An Emergency Services Information Package is to be developed/updated as detailed in FRNSW guideline - Emergency Services Information Package and Tactical Fire Plans for use by responding firefighters. It is to be stored along with the ERP in an 'Emergency Information Cabinet' which is located in a position directly adjacent to the site's main entry point/s.

For further information please contact the Operational Liaison and Special Hazards Unit, referencing FRNSW file number BFS22/1237. Please ensure that all correspondence in relation to this matter is submitted electronically to firesafety@fire.nsw.gov.au.
