Dear Lara

Sydney Modern – Art Gallery of NSW – SSD 6471 Modification 8

Thank you for your correspondence dated 24 March 2022 which invites the City of Sydney (“the City”) to provide comment on the proposed modifications to approval SSD 6471 which largely comprise minor architectural and landscape design changes.

The City have reviewed the proposed modifications and can confirm we have no issues with the changes.

It is positive to see that the bollards to the AGNSW forecourt are finally aligned as the City had requested as part of the consultation done in accordance with Condition B20 New Steps, Ramp and Pedestrian Control Structures and Hostile Vehicle Management.

In this regard our recommended spacing between the bollards is 1400mm, as this would allow the forecourt to still feel open, inviting and more permeable to those on foot. Furthermore, our City Design unit are currently working with the original designers of the City’s Street furniture suite to provide design options for a shroud that can be installed over existing structures such as the EZI security truck stopper footing, and there is willingness to share that with you to ensure aesthetic uniformity.

Should you wish to speak with a Council officer about this, please contact the undersigned on (02)9265 9333 or at arees@cityofsydney.nsw.gov.au

Yours sincerely

Andrew Rees
Area Planning Manager – Major Projects
