Hi Sarah,

Thank you for your referral dated 15 June 2022 - in relation to the Ravensworth South - Landform Amendment (DA86-51-Mod-1) (Singleton Shire). Heritage NSW has reviewed the proposed modification with respect to Aboriginal cultural heritage (ACH) and notes the following.

I note that the modification report references 6.9 Heritage - stating that 'Surveys and test excavations associated with the original development application revealed a considerable number of Aboriginal artifacts at several sites. The Aboriginal artifacts were found to be located predominantly within the soil A horizon of terraces along the course of Bayswater Creek. An application for consent to destroy all locations affected by the original development were lodged under Section 90 of the NPW Act by the owner at the time'.

I also note that the modification report 'states that following approval of DA 86/51, strip mining to a depth of approximately 85m followed by mine spoil emplacement has occurred across all areas affected by works forming part of the Proposed Modification. As such, the Proposed Modification impact area is considered to be completely disturbed with all heritage potential removed', and that in relation to any Potential impacts - 'All ground disturbance as part of the Proposed Modification would be limited to areas of prior approved and completed disturbance. As such no additional heritage impacts are considered likely. The Proposed Modification is considered to remain substantially the same as the original development from a heritage impact perspective.'

Based on the information provided in the modification report, Heritage NSW has no additional comments or concerns with respect to the management of ACH in relation to the proposal. If you require any further information please contact me directly. I will upload this email to the MPP.

Kind Regards
Nicole Davis
