---

Dear Tegan,

Heritage NSW has reviewed DA305-11-01-Mod-8 Liddell Coal (Mod 8) - GRAWTS Stage 2 with respect to Aboriginal Cultural Heritage (ACH), and makes the following comments. I note that the additional ancillary infrastructure proposed by the Modification is largely located within approved disturbance areas, except for a short section of water pipelines. This section of the pipeline corridor has been defined as the Modification Study Area. The Modification Study Area is located within the Consent Boundary for the Mount Owen Continued Operations Project (SSD-5850).

Heritage NSW notes that an assessment of the Aboriginal heritage values within the Modification Study Area was conducted by OzArk Environment & Heritage. An archaeological survey of the Modification Study Area was undertaken on 9 July 2021. No heritage items were recorded within the Modification Study Area. The potential for subsurface archaeological deposits to be present within the Modification Study Area is low due to the lack of archaeologically sensitive landforms. Given that no heritage sites were recorded within the Modification Study Area, no additional management measures are required for the Modification. In the unlikely event that heritage items are encountered during the construction or operation of the pipeline, the contingency procedures in the approved MOC Aboriginal Cultural Heritage Management Plan will be implemented. Based on the information provided in the assessment – Heritage NSW has no additional comments or concerns in relation to the proposed modification proceeding. Please contact me directly if you require any additional information.

Kind Regards  
Nicole Davis
