14 November 2022

Dear Mr. Hand,

RE: Approved Concept Development Application - Residential Flat Building development at 242-244 Beecroft Rd, Epping (SSD 8784 MOD 1)

The City of Parramatta Council thanks you for the opportunity to comment on the Environmental Impact Statement for the proposed modification to the approved residential development SSD 8584 Mod 1 at 242-244 Beecroft Rd, Epping.

Council previously provided comments on the Environmental Impact Statement for SSD 8784 on 18 September 2019 and then provided comment on the Response to Submission Report on the proposal on 21 February 2020. Council staff have undertaken a preliminary review of SSD 8784 Mod 1 in order to provide preliminary comment via the Major Projects Portal. As agreed via email on 9 November 2022 Council will have the opportunity to provide a more detailed response via email by 28 November 2022.

Key concerns raised in Council's previous comments on the proposal have not been adequately addressed as part of SSD 8784 MOD 1 and therefore Council strongly maintains its objection to the proposal. In summary the points of concern in relation to the modification are as follows:

1. The provision of commercial floorspace on the site is consistent with Epping's role as a Strategic Centre as identified in the Greater Sydney Commission's (GSC's) Metropolitan Region Plan and Central City District Plan, and this Government owned site provides Government with an excellent opportunity to lead in delivering employment opportunities in accordance with the GSC's plans. As such, the proposal should provide a significant level of additional commercial floorspace. (business, office, retail) floorspace to support the existing and future populations of Epping Town Centre.
2. Council's Epping Town Centre Traffic Study identified the provision of a link road through the site will take pressure of key intersections in the peak periods in the long term, coupled with a suite of traffic improvements. Council requests that the link road be provided as previously requested.
3. Other issues to be discussed in the detailed response include increase height, relocation of basement service entry, building reorientation, communal open space building setbacks.
