Dear Carl,

Heritage NSW has reviewed the modification report for the Bringelly Brickworks Extension Project, Modification 2, Prepared for PGH Bricks & Pavers Pty Ltd, dated 8 September 2022, with respect to Aboriginal cultural heritage, and make the following comments.

The proposed modification includes areas of land that were not included in the approved study area for SSD 5684. I note that an Aboriginal cultural heritage due diligence assessment was conducted of those additional areas, inclusive of a site inspection by a qualified archaeologist. The due diligence assessment identified a potential archaeological deposit (PAD) in the north-east corner of the site near Thompsons Creek. The relocated driveway was initially proposed within the PAD, however the design was changed to avoid the PAD in its entirety. Ground disturbance associated with the remainder of the proposed modification will be within soil profiles which have been subject to previous ground disturbance which has removed the archaeological potential of these areas. The proposed modification will not result in harm to Aboriginal objects and can proceed with no requirement for further investigation. Heritage NSW concurs with this assessment, and as such has no additional concerns or comments in relation to Modification 2 proceeding. If you require any further information please contact me directly.

Kind Regards
Nicole Davis
