

Calala Battery Energy Storage System

The Department of Planning and Environment – Crown Lands has reviewed the proposal.

No Crown land is contained within the project footprint, however Crown land Lot 1 DP 1137483 adjoins the project footprint to the east.

The adjacent Crown land forms part of the Department of Primary Industries research station, and there is potential for this development to impact some activities taking place on the research station. The Department recommends that the proponent make direct contact with the agencies utilising this facility to discuss what the impacts may be and ways to mitigate if required. This office can assist with directing the proponent to relevant staff if required.

If the proponent requires further information, or has any questions, please contact Anna Cronin, NRM Projects in Crown Lands, at anna.cronin@crownland.nsw.gov.au.

Yours sincerely

Michelle Read
