Re: Hume North Battery Energy Storage System. (SSD-61842974) - Public Authority Consultation (PAE-61847470).

Dear Megan Ramsdale,

This letter provides Subsidence Advisory NSW's comments on the project referred to above.

The site of the proposal is located entirely outside of a declared Mine Subsidence District. A review of our records indicate that the site has not been previously undermined or impacted by historical coal mine activity. It is also located outside of a current coal exploration or coal mining title.

Subsidence Advisory NSW's concurrence or approval is not required for development of land located outside of declared Mine Subsidence Districts.

If you would like more information, please contact me on 4908 4300 or subsidedevelopment@customerservice.nsw.gov.au.

Sincerely,

Kieran Black
Technical Specialist
