

13 October 2023

Department of Planning & Environment
Locked Bag 5022
Parramatta NSW 2124

APPLICATION NO: MP06_0050-Mod-3 (Our Ref. 25-2023-14-1)
PROPOSAL: Tomago Potliner Facility Modification 3
PROPERTY: 638 Tomago Road, TOMAGO, (LOT: 3 DP: 808004)

Attention: Sam Burns

Dear Sir,

Thank you for your correspondence dated 29 September 2023 requesting Council's advice for the above modification. Council has reviewed the Modification Report and makes the following comments.

Air Quality

The site is located within a predominately industrial area with a small number of residential receivers. The Air Quality Impact Assessment prepared by AECOM dated 06 December 2022, identifies that an increase in the EPL air quality limit for cyanide is proposed from 1mg/m³ to 10mg/m³. It is understood that the NSW EPA are supportive of the proposed change, provided air quality and human health impacts are determined as acceptable.

The air quality assessment demonstrates through air quality modelling that an increase in the EPL limit will have a minor impact to the surrounding land. It is understood that cyanide is included in 6 monthly monitoring under the EPL. Council does not object to the proposed EPL limit increase provided routine air quality monitoring is continued.

Substantially the same development

Council is satisfied the proposed modification is substantially the same development and can be assessed per Section 4.55(2) of the Environmental Planning and Assessment Act 1979.

Thank you for the opportunity to comment on the SSD modification. If you wish to discuss the matters raised above or have any questions, please contact me on the number below and I will be happy to help.

Yours Faithfully

Isaac Lancaster
Senior Development Planner
