Your Ref:

Dear Ms Barnet

Property: 129 Mitchell Avenue, KURRI KURRI
Description: Weston Aluminium _ Modification 15 SSD LEC10397-1995 and DA 86-04-01 Modification 16

I refer to notice received by Cessnock City Council in respect to the above State Significant Development, requesting Council's comments for Modification 15 to Development Consents DA 10397 of 1995 and Modification 16 to DA 86-04-01 at Weston Aluminium.

Council understands that the modifications propose '*no increase in the annual processing tonnage limits, development footprint, hours of operation, traffic loads, air quality or noise limits is being sought. The proposed modification would not involve a change to the waste types or volumes received and processed at the facility. Traffic movements would remain unchanged and below existing approved limits.*'

Given the proposed modifications will not significantly alter operations, will not increase traffic, noise and odour, and will adhere to its Environmental Protection Licence, Council has no objection to the modifications.

Thank you for the opportunity to comment on the proposed modification. Should you have any further enquiries, please do not hesitate to contact me directly on telephone 02 4993 4112 or via email peter.giannopoulos@cessnock.nsw.gov.au.

Yours faithfully

Peter Giannopoulos
