Dear Sir/Madam

RE: Modification 5 Galong lime kiln waste (DA317-7-2003-I-Mod-5)

Thank you for renotifying Council of the subject modification application.

It is understood that the modification application seeks to allow disposal of lime kiln wastes generated at the premises in overburden areas of the Galong Limestone mine. It is also understood the applicant is presently preparing expert reports to support the development proposal.

Council notes Graymont has obtained a waste exemption order under the Protection of the Environment Operations (Waste) Regulation 2014 for the supply of Graymont lime kiln dust for application to land within cementitious mixtures, road making activities and incorporation within biosolids as a dewatering agent.

The statement supporting the modification does not demonstrate how the application of lime kiln wastes in the overburden areas of the Galong Limestone mine would comply with the waste exemption order (type of waste, testing etc.) or the existing environmental protection licence for the premises. Given the documentation has not addressed these matters, Council cannot be satisfied based on the submitted information that the waste can be applied to the land under the existing consents that relate to the premises.

Council acknowledges that the applicant is preparing further information and reports and would appreciate the opportunity to provide further comment once this information is received by the Department.

Yours faithfully

Andrew Raines
