Re: Advice on Modification Report - SSI-73202481-Mod-1

Dear Jack,

Liverpool City Council was invited to provide comments on the above modification application.

Council provides the following comments;

- 1. As the proposed modification does not involve any physical works and relies on existing supporting infrastructure, we have no comments to provide from a civil maintenance perspective.*
- 2. We note that the hazards and risks associated with the repurposed pipeline are below the acceptable threshold and are not anticipated to result in additional environmental impacts.*

Should you require further information or clarification, please feel free to be in contact.

Yours sincerely,

Tony Hadchiti
Austral Delivery Manager
