

Environmental Impact Statement (EIS) for the Cobbora Solar Farm (SSD-29491142)

Background

- The NSW Police Force (NSWPF) received an information request to provide comments on the Environmental Impact Statement (EIS) for the Cobbora Solar Farm (SSD-29491142)
- The Cobbora Solar Farm is a significant renewable energy project which aims to generate up to 700 megawatts (MW) of electricity using photovoltaic (PV) solar panels. It also includes a 400 MW/1600 megawatt-hour (MWh) battery energy storage system (BESS) and the necessary infrastructure to connect to the national electricity market (NEM) (the Project).
- The Project involves the construction, operation and decommissioning of the Cobbora Solar Farm and BESS. The solar farm and BESS will connect to the CWO REZ grid infrastructure via the ELong Elong Energy Hub located directly to the south of the Project Area.

NSWPF comments

- NSWPF have reviewed the EIS and provide nil comments.
