2A Gregory Place Rosehill Updated Aboriginal Cultural Heritage Assessment

Heritage NSW – detailed Aboriginal cultural heritage advice

Dear Raymond

Please find below our response to the detailed Aboriginal cultural heritage advice that has been provided by Heritage NSW (January 2026) from their review of our Updated Aboriginal Cultural Heritage Assessment Report (June 2025).

Aboriginal Community Consultation

- 1. Heritage NSW notes that the last recorded consultation with the Registered Aboriginal Parties (RAPs) was in 2022. Heritage NSW requires that consultation with RAPs is continuous and under our policy and guidelines, breaks in consultation of over six months may not constitute continuous consultation. Please outline how continuous consultation has been maintained with RAPs throughout this assessment.*
- 2. In accordance with the Aboriginal cultural heritage consultation requirements for proponents 2010 (Consultation Guidelines), please provide all consultation records (including all letters and email correspondence and a consultation log) undertaken for the project.*

We have developed our Aboriginal Cultural Heritage Assessment Report (ACHAR) in consultation with Aboriginal people in accordance with current guidelines (National Parks and Wildlife Regulation 2019; Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010. Part 6 National Parks & Wildlife Act 1974 [DECCW 2010]). Our ACHAR recommends the following proposed management of the potential Aboriginal archaeological resources at the site and these management recommendations have been reviewed by and endorsed by the Project RAPs.

- The findings and recommendations of future contamination assessment and building demolition planning for the 2A Gregory Place site be provided to the project RAPs.

- *An archaeological research design and test excavation methodology for the 2A Gregory Place site will be developed in consultation with the projects RAPs that is based on the results of contamination assessment and consideration of demolition planning.*

The Updated ACHAR (June 2025) was not sent to the Project RAPs at this time, as it accompanied a request to the Department of Planning, Housing and Infrastructure to Amend the project. This request to Amend the project was granted in December 2025. Due to this, we have subsequently provided each of the Project RAPs an outline of the current development planning status of the project and a copy of the Updated Aboriginal Cultural Heritage Assessment Report. We have also advised the RAPs of what HNSW have recently requested (as per this detailed Aboriginal cultural heritage advice) and our commitment to keeping the Project RAPs more regularly informed of project developments, given the considerable time delays that are inherent in the SSD design review and approval process.

A summary of the Aboriginal community consultation we have undertaken with the Project RAPs to develop the project ACHAR, a consultation log, and copies of the Aboriginal community correspondence we have received to support the ACHAR are appended (**Attachment A**).

Archaeological Assessment

3. *Please provide an updated Aboriginal Heritage Information Management System (AHIMS) search. AHIMS searches are only valid for a period of 12 months.*

Updated AHIMS searches for the 2A Gregory Place site and updated maps showing previous site locations have been completed and are appended **Attachment B** (Client Services ID 1087864, 2 February 2026).

4. *Heritage NSW understand that the level of subsurface disturbance within the project area is currently not fully understood, and that additional detailed contamination assessment is recommended to inform an updated assessment of archaeological potential. To inform the management of Aboriginal cultural heritage within the project area however, a preliminary assessment of archaeological potential is required, as informed by current understanding of disturbance and contamination.*

Accordingly, please update the ACHAR to include a map of areas of Potential Archaeological Deposit. The preliminary archaeological assessment should be updated following completion of additional contamination assessment and testing, with any PAD registered on AHIMS.

We agree that the ACHAR is to be updated following the completion of additional assessment and testing. The draft map of known disturbance and preliminary areas of PAD (**Attachment C**). This will be updated following the completion of additional contamination assessment and archaeological testing at the site, and registration of any PAD identified onto AHIMS.

5. *Based on the findings of the additional contamination assessment, the ACHAR should specify mitigation measures for areas with minimal or no disturbance and contamination, as well as tailored mitigation for areas identified as contaminated.*

When the findings of the additional contamination are available, we will consult with the Project RAPS to develop an archaeological research design and test excavation methodology that updates the ACHAR and outlines mitigation measures for areas with minimal or no disturbance and contamination and for contaminated area.

Aboriginal Cultural Heritage Management Plan

6. *Please update the ACHAR to include a recommendation for preparation of an Aboriginal Cultural Heritage Management Plan (ACHMP) to guide the management of Aboriginal cultural heritage within the project area, including any future archaeological investigations.*

When the findings of the additional contamination are available, we will update the ACHAR in consultation with the project RAPS with a recommendation that an Aboriginal Cultural Heritage Management Plan (ACHMP) be prepared to guide the management of Aboriginal cultural heritage at the site, including future archaeological investigations.

Sincerely

dominic steele

Attachment A

Aboriginal community consultation summary, consultation log, and correspondence

2A Gregory Place Aboriginal community consultation summary

The DPE in administering its statutory functions under Part 6 of the NPW Act requires that the Proponent consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within any given development area in accordance with Clause 80c of the NSW National Parks and Wildlife Regulation 2019.

Aboriginal community consultation aims to ensure that Aboriginal people have the opportunity to speak about the cultural significance and values of Aboriginal objects and/or places and by (DECCW 2010a):

- Influencing the design of the method to assess cultural and scientific significance of Aboriginal objects and/or places
- Contributing to the development of cultural heritage management options and recommendations for any Aboriginal objects and/or places within the proposed subject area
- Commenting on draft assessment reports before they are submitted by the Proponent to the DPE

The Aboriginal community engagement and consultation for this ACHAR have followed the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010) that outline a four-stage consultation process.

- Stage 1 – Notification of project proposal and registration of interest
- Stage 2 – Presentation of information about the proposed project
- Stage 3 – Gathering information about the cultural significance
- Stage 4 – Review of draft cultural heritage assessment report

The approach and outcomes of the Aboriginal community consultation that has been undertaken for the development of this ACHAR.

Stage 1 Consultation

Notifications and registrations of interest

At the initiation of the project (May 2022) a public notice for the proposal was placed in the Koori Mail) and a list of Aboriginal people and government agencies to notify of the project was also sought from and was provided by Heritage NSW.¹ Government agencies notified of the proposal included the Office of the Registrar, *Aboriginal Land Rights Act 1983*, National Native Title Tribunal, and Native Title Services Corp.

Ryde is situated within the administration boundaries of Deerubbin Local Aboriginal Land Council (DLALC). We also notified Metropolitan and Gandangara Local Aboriginal Land Councils. We also wrote to each of the sixty-four (64) groups and individuals on an Aboriginal consultation list provided by HNSW and invited expressions of interest from people about helping develop the Project ACHAR. Expressions of interest were received from nineteen (19) groups and individuals that are tabled in the consultation log.

¹ Received 21 April 2022.

Acknowledgement emails were sent to all respondents to confirm registration had been received. Each respondent was thanked for their expressions of interest and each were invited to attend a meeting to be convened by the Proponent to talk about the proposed development and the potential opportunities and constraints that development may have for Aboriginal cultural heritage.

Prior to convening an on-site meeting with the Aboriginal community, the Proponent provided the Project RAP's with information about the proposed redevelopment. This included concepts for future built form and communal open-space, landscape design and character concepts, and an environmental strategy for the site and its interface with Clay Cliff Creek.

Stage 2 and 3 Consultation

ACHAR consultation meeting

An on-site meeting with the Project RAP's to discuss the redevelopment project and start the dialogue about the Aboriginal cultural heritage values of the place was held on 12 May 2022.

This meeting gave the Proponent an opportunity to meet the community and to present to them the vision for the project and for the project team to overview their respective roles and to invite discussion around design and operational elements of the project.

Yerrabingin gave an Acknowledgement of Country to pay respect to the traditional custodians of the land and to recognise the continuing connection of Aboriginal people to Country. Yerrabingin also talked to the community about the future design framework for the land. The Fulcrum Agency talked with the community about their role in assisting in the projects response to the Connecting with Country Draft Framework which is a government initiative and its aims to increase awareness and understanding of the value of Aboriginal knowledge in the design and planning of places. The Fulcrum Agency also developed and invited discussion on design frameworks opportunities and Forward Thinking talked to the community about the social impact of the project.

DSCA talked with the community about the Aboriginal history and heritage of Parramatta and Harris Park and the Aboriginal heritage landscape position of the 2A Gregory Place site on the back plain of the Parramatta River and on the alignment of Clay Cliff Creek. The potential archaeological sensitivity of the site was discussed using geotechnical bore-logs that show the types of deposits that occur below ground across the site, and which also illustrate the nature of subsurface disturbance that occurred when the factory was built. The findings of preliminary contaminations assessment of the site were also discussed.

Key messages received from the Aboriginal groups during these discussions included:

Following the meeting, the project team compiled the notes summarised below into themes to capture conversations that were held during the discussions. Meeting minutes were provided to each of the Project RAP's following the meeting and provided to each of the RAPs who did not attend the meeting.

Key discussion points were:

- Housing affordability
- Project governance
- Economic development opportunities
- Design opportunities
- Caring for Country
- Cultural landscape and archaeology

Housing affordability

- Consensus on the importance of providing affordable housing for Aboriginal residents.
- Agreement that housing supply that caters for single man and women, and young families, and older generations on fixed incomes is an important initiative of the proposed redevelopment.
- Commitment sought for Proponent to enable development to provide percentage of affordable housing for Aboriginal people, to continue to work with Deerubbin Local Aboriginal Land Council on issue and consider partnerships with Aboriginal housing providers.

Project governance

- RAP's asked how best to ensure Aboriginal community input occurs across the project life cycle. Proponent confirmed decision making will occur at several points, including determination of housing mix as well as design decisions, use of Aboriginal Language, and cultural interpretation.
- Proponent to establish project task group that includes Aboriginal community representatives with decision-making capacity, and to resource group appropriately with administration support and with remuneration.

Economic development opportunities

- The project life cycle includes concept design, future construction and delivery, and ongoing care and maintenance and the RAP's expressed interest in training and employment opportunities that may be available to Aboriginal enterprises.

Design opportunities

- Develop a framework for inclusion of public art in design, landscape with planting to connect back with Country, and embed and tell cultural history and heritage stories within development.

Caring for Country

- When buildings are constructed, opportunities for ongoing care and maintenance of development by Aboriginal people be explored to facilitate access and care to Country.

Cultural landscape and archaeology

- RAP's noted site covered by buildings with no natural ground exposed, and unresolved contamination issues needed to be addressed.

- RAP's expressed consensus view that there was potential for proposal to impact Aboriginal objects protected by the NPW Act, and site should be test excavated.
- The Aboriginal history and heritage of the land should be acknowledged and respected.
- Aboriginal community request to be shown how the future open space within the development is to be designed and will appear when constructed.
- There should be opportunities in the new development to tell Aboriginal stories pertinent to the local area, and opportunities for the use of Aboriginal art in storytelling.

ACHAR review and outcomes

A draft of this report was provided to each of the Project RAPs for review and comment prior to finalization. The table below summarizes the key cultural advice and recommendations that were shared by the Project RAP's and the correspondence that has been received for this report is appended along with a schedule of the Aboriginal community stakeholder consultation that has been completed while preparing this ACHAR.

Aboriginal community group	Aboriginal cultural heritage values and advice
Corroboree Aboriginal Corporation	Corroboree Aboriginal Corporation believe soils under factory may contain Aboriginal artefacts and should be archaeologically tested. Develop with Project Raps test excavation methodology. Integration of Aboriginal recognition and interpretation into future design to acknowledge and respect our heritage. Explore opportunities in new development to display Aboriginal art with Aboriginal stories relevant to local area. Corroboree Aboriginal Corporation support ACHAR and its cultural heritage management recommendations.
Darug Custodian Aboriginal Corporation	Darug Custodian Aboriginal Corporation advise many researchers present Aboriginal history from colonial perspective and/or solely from archaeological evidence. These histories lack peoples stories and parts of important events and connections of Darug and other peoples that now call this area home. Parramatta is significant to Darug people because of evidence of continued occupation shown by significant archaeological sites in proximity. Landscapes and landforms are significant to Darug people because they hold information about how Aboriginal people's movement through country. Darug sites are all connected and hold knowledge about or heritage and past history. Many of our sites are thousands of years old but many have also been destroyed by historical land use since colonisation. Parramatta/Harris Park and surrounding areas are significant to Darug people, and by doing testing and salvage archaeological investigation, we get filling of gaps in knowledge about our past. Darug Custodian Aboriginal Corporation agree with the recommendations set out in the ACHAR.

Deerubbin Local Aboriginal Land Council	Deerubbin Local Aboriginal Land Council agrees and supports the ACHAR and recommendations for test excavation following resolution of contamination issues and demolition plans.
Didge Ngunawal Aboriginal Clan	Didge Ngunawal Aboriginal Clan support the ACHAR and for testing below factory with method developed with RAPs.
Ginninderra Aboriginal Corporation	Parramatta area has rich Aboriginal history and many culturally significant places; our history and heritage should be acknowledged and respected. Protection and preservation of cultural heritage of great value to whole community and education and awareness key step towards reconciliation. Ginninderra Aboriginal Corporation support ACHAR and recommendations. Recommend restoration of habitat and planting after development. Acknowledge this is Aboriginal land. Tell stories of the area as a culturally important place and use Aboriginal art and Language in storytelling. Ensure Aboriginal people are involved in the decision making and their input is values throughout project.
Kamilaroi Yankuntjatjara Working Group	Tangible, intangible, and aesthetic aspects of culture need to be considered when assessing land. By acknowledging Aboriginal stories of land, we continue our connection to country through passing on knowledge. Water ways play big part in cultural history and we have lost many due to European land use. Parramatta River - where fresh water meets salt water, is resource rich environment and nearby swampy wetlands used by Aboriginal peoples for food, medicine, and drinking water. Flora and fauna would have been thriving and Aboriginal people strategically look after land and plants and animals in a way that coexisted with the environment around them. Consider Aboriginal cultural practices to care for country, fire management a well-known tool to manage landscape, create ecosystems. Aboriginal people have knowledge of land and how ecosystems work. Our modern history - has affected Aboriginal people dramatically (and we are thriving despite this). Aboriginal cultural groups come from all over NSW, as Aboriginal people were moved due to stolen generation. Stolen generation at Parramatta was first where Aboriginal children away from families and placed in native institute and female factory to be raised like white people of time and is significant to our history of Parramatta. We recommend a cultural interpretation plan for project to educate community and continue passing down knowledge to younger generations achieved by native landscaping, edible gardens, art, digital displays, sound scape, water features. Kamilaroi Yankuntjatjara Working Group support ACHAR and recommendations.
Muragadi Indigenous Heritage Corporation	Muragadi Indigenous Heritage Corporation support ACHAR and recommendations for test excavation method to be developed with community to investigate and identify if Aboriginal objects are present.

Murrabidgee Mallangari Aboriginal Corporation	Murrabidgee Mallangari Aboriginal Corporation support ACHAR and recommendations.
Tocomwall	Tocomwall has taken the position with all projects that they do not support reports or methodologies that have not been involved them in field assessment
Woka Aboriginal Corporation	Woka Aboriginal Corporation recommend following demolition of structures Aboriginal artefacts may be present in underlying soils and archaeological test investigation is recommended to ascertain this. Request for findings of future contamination assessments and demolition planning to be provided to Project RAPs for feedback. Development with Project Raps an archaeological research design and test excavation methodology based on results of contamination assessment. Woka Aboriginal Corporation support ACHAR and approach for testing method to be developed with RAPs.

Stage 4 Consultation

A draft of this report was provided to each of the Aboriginal community groups and individuals for review and comment. Advice and recommendations provided by the RAPs were incorporated into a final iteration of the ACHAR and this was distributed to all RAPs for final review.

2A Gregory Place Aboriginal community consultation log

Consultation Stage	Notifications, Expressions of interest & Consultation
Stage 1: Notification & Registration of Expressions of Interest (April 2022)	
<u>Public Notice</u>	Public notice in Koori Mail (No expressions of interest received from advert)
<u>Agency Notifications</u>	Department of Premier and Cabinet (Heritage NSW) Office of the Registrar, Aboriginal Land Rights Act 1983 Native Title Services Corp Parramatta Council Aboriginal Advisory Committee Holroyd City Council Advisory Committee

Stage 4: Review of Draft Cultural Heritage Assessment Report (June 2022) Distribution of final version of ACHAR to RAPs and completion of Final ACHAR	Final ACHAR iteration with RAP advice and recommendations included distributed to all RAPs for review

2A Gregory Place Aboriginal community correspondence

CORROBOREE ABORIGINAL CORPORATION PRESERVING CULTURE AND HERITAGE

7 June 2022

Statement: 2A Gregory Place, Harris Park

We submit our recommendations and appreciate that Aboriginal consultation is included in the early stages of this project; at 2A Gregory Place, Harris Park. CAC recommends that upon demolition of the existing infrastructures there be soil testing as the soils under the factories concrete floor could likely hold Aboriginal artefacts, as such CAC would request that the site be excavated for such objects that may be under the existing buildings. We second Dom Steele – Archeologists, recommendations that site will also require remediation of impacted fill materials that have been identified to be present in locations beneath the factory and there is also a need for additional environmental assessment sampling and analysis at a number of locations to guide and enable the development.

We at CAC value the inclusion of being participants in early stages of the process, that is being undertaken with our Aboriginal community involvement, to develop this land. We appreciate our involvement in the Aboriginal Cultural Heritage assessment for this site. We hope to find further acknowledgment of our Ancestors history. We note that due to our experience working in the area, we believe the area to have the high possibility of subsurface profiles within the study area. We feel 2A Gregory Place will contain archaeological materials and environmental evidence that is uncommon and shall provide information to provide aspects of NSW's cultural and natural history. This is significant to display the principal characteristics of a class of NSW's cultural or natural places, or cultural or natural environments. Thereby this site could contain natural and cultural deposits that may potentially be of significance under this criterion by their ability to further demonstrate the principal characteristics of a class of NSW's cultural and natural places (ie. long-term Aboriginal use of the Parramatta River valley). Projects location 2A Gregory Place is on the edge of the PSB which makes this area a potentially sensitive archaeological landform context on Clay Cliff Creek. Sealed beneath the existing factory buildings and hard-surfaces covering the site there is an alluvial sedimentary profile that may contain Aboriginal objects and archaeological deposit with cultural and scientific value. However, the upper parts of the subsurface sedimentary sequence have been widely and in parts deeply disturbed.

We at Corroboree Aboriginal Corporation believe the subsurface soil profiles within the site have the potential to contain Aboriginal objects; as such would request further investigation and assessment. We know from our many years of working in the area that it has always been the case, in regard to the discovery of Aboriginal objects in this area. We therefore agree with Archeologists Dom Steele that the site has archaeological potential and once demolished we would appreciate being involved in testing..

As we feel certain there are artefacts in this project area there's a risk that the proposed redevelopment will impact on Aboriginal Cultural Heritage which is protected by the NPW Act, thereby there should be further investigations soil testing, etc.

We hope also that integration of Aboriginal recognition, and interpretation into the future design and we agree with the recommendations.

As Aboriginal stakeholders involved in ACHAR

1. Provide the findings of future contamination assessments and building demolition planning to the Project RAPs and invite feedback.
2. Develop with the Project Raps an archaeological research design and test excavation methodology for the site that is based on the results of contamination assessment and consideration of demolition planning.
3. Use the test excavation method developed with the community and supported by this ACHAR to accompany an application to HNSW for approval to test excavate the 2A Gregory Place site.

We agree with then recommendations

That's the Proponent invite the Project RAPS to assist in the development of an archaeological research design and test excavation methodology for the site based on the result of contamination assessment and consideration of demolition planning.

The Proponent use the test excavation methodology developed with the community and this ACHAR to support an application to HNSW for approval to test excavate the site to establish whether an Aboriginal Heritage Impact Permit (AHIP) is required under the National Parks and Wildlife Act 1974(NPW Act) for the proposal if it is determined that Aboriginal objects are present and likely harmed by the redevelopment.

We concur with all the recommendations by Archeologists Dom Steele regarding further investigations and see no issues with the project moving forward from a Aboriginal Cultural Heritage prospect. .

And further on in the project Aboriginal history and heritage of the project site we hope there to be displayed signage as an acknowledgement and of respect for the First Nations People on the site.

Subject: 2A Gregory Place Harris Park

Dear Dom

Our group is a non-profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history.

Our group promotes Darug Culture and works on numerous projects that are culturally based as a proud and diverse group. It has been discussed by our group and with many consultants and researches that our history is generic and is usually from an early colonists perspective or solely based on archaeology and sites. These histories are adequate but they lack the people's stories and parts of important events and connections of the Darug people and also other Aboriginal people that now call this area home and have done so for numerous generations.

This area is significant to the Darug people due to the evidence of continued occupation, within close proximity to this project site there is a complex of significant sites.

Landscapes and landforms are significant to us for the information that they hold and the connection to Darug people. Aboriginal people (Darug) had a complex lifestyle that was based on respect and belonging to the land, all aspects of life and survival did not impact on

the land but helped to care for and conserve land and the sustenance that the land provided. As Darug people moved through the land there were no impacts left, although there was evidence of movement and lifestyle, the people moved through areas with knowledge of their areas

and followed signs that were left in the landscape. Darug people knew which areas were not to be entered and respected the areas that were sacred.

Knowledge of culture, lifestyle and lore have been part of Darug people's lives for thousands of years, this was passed down to the next generations and this started with birth and continued for a lifetime. Darug people spent a lifetime learning and as people grew older they passed through stages of knowledge, elders became elders with the learning of stages of knowledge not by their age, being an elder is part of the kinship system this was a very complicated system based on respect.

Darug sites are all connected, our country has a complex of sites that hold our heritage and past history, evidence of the Darug lifestyle and occupation are all across our country, due to the rapid development of Sydney many of our sites have been destroyed, our sites are thousands of years old and within the short period of time that Australia has been developed pre contact our sites have disappeared.

The Aboriginal cultural heritage consultation requirements for proponents Section 4.1.8 refers to "Aboriginal organisations representing Aboriginal people who hold cultural knowledge". Recent consultation meetings have revealed that many of these Aboriginal organisations and individuals do not hold cultural knowledge of the Western Sydney area. The increasing involvement of such parties in cultural heritage management means that genuine local Aboriginal organisations are unable to properly care for our cultural heritage.

Many Aboriginal organisations listed in the OEH response letter do not contribute to the Aboriginal community of Western Sydney. Individuals listed in the OEH response letter do not represent the community and while they may be consulted with, should not be employed for their own personal financial benefit.

Our organisation is committed to providing benefits back to our local Aboriginal community through such measures as funding the local Aboriginal juniors' touch football team, painting classes for the local children and donating money to various charities. Employment in cultural heritage activities is source of income that organisations such as ours can use to contribute to beneficial activities and support within the community.

Darug custodian Aboriginal Corporation's site officers have knowledge of Darug land, Darug Culture, Oral histories, landforms, sites, Darug history, wildlife, flora and legislative requirements. We have worked with consultants and developers for many years in Western

Sydney (Darug Land) for conservation, site works, developments and interpretation/education strategie.

Darug Custodian Aboriginal Corporation have received and reviewed the Information supplied

.

Parramatta / Harris Park and surrounding areas are so significant to the Darug People as the area has high cultural value and by doing testing and salvage , we get a broader understand of movement and filling in the gaps of our past.

We hope in the future all development reports and information can be mapped to show how Durag people lived in and around Parramatta.

We support the recommendations set out by DSCA.

Please contact us with all further enquiries on the above contacts.

Regards

Justine Coplin

RE: 2A Gregory Place, Parramatta NSW

Dear Dominic,

Our Ginninderra Aboriginal Corporation members appreciate the opportunity to consult on this project.

The Parramatta area is very rich in Aboriginal history and full of culturally important places. As such we believe that the Aboriginal history and heritage of the land should be acknowledged and respected. We believe that the protection and preservation of as much cultural heritage as possible is of great value to both the Aboriginal and non-Aboriginal community looking towards the future; and education and awareness is key in the step towards reconciliation.

We have reviewed the draft cultural heritage assessment and agree with the recommendations outlined by DSCA.

Further to that, would like to add some recommendations for your consideration as the project continues. Particularly:

- Registered Aboriginal community members be involved in the test excavation.
- Proper clean-up of site throughout and after the development (especially as there are waterways nearby), and restoration of habitat (planting native plants/gardens to help local species).
- Acknowledge this is Aboriginal land (something as simple as an Acknowledgement of Country plaque in the foyer of the new building can make an impact).
- Tell the stories of the area as a culturally important place. There should be opportunities in the new development to tell Aboriginal stories pertinent to the local area, and opportunities for the use of Aboriginal art in story-telling. An example of this is the website set up after Thompson Square in Windsor was excavated for the new bridge. There are signs at the site containing information about the area, the local tribe, and photographs of the artefacts found. Each sign has a QR code that people can scan also making it interactive. I have added the link for your perusal and a couple of photographs to my email. Example: [Welcome to Darig Lands | Thompson Square](#)
- Language use within the new development (use and teaching of language and also signage).
- Ensure Aboriginal people are involved in the decision making and their input valued throughout the project.

We look forward to continued consultation on this project. Please don't hesitate to contact us should you require any further information.

Yours sincerely,

Krystle Carroll-Elliott
Ginninderra Aboriginal Corporation

Re: 2a Gregory Place Harris Park

Dear Dom,

Thank you for you ACHA for 2A Gregory Place, Harris Park, NSW. Our people have managed the land and cared for it for tens of thousands of years and continue to do so. we have a deep connection with the land, water, and sky this connection guides us when walking the land, we are one with mother nature.

There are tangible, intangible, and aesthetic aspects that our culture depends on, we must take theses into account when doing an assessment of the land. By acknowledging stories and creation stories of the land we work on today and continuing the connection to country through interpretation and passing on this knowledge. We follow the water ways as a giver of life without them we are not here; over the last two hundred years we have lost many water ways due to the arrival of Europeans.

There are major water ways that play a big part in our cultural history of the land and how it was utilised. For instance, the Parramatta River would be utilised daily, for resources and fresh water source. Aquaculture would have been undertaken and other practices also such as agriculture to help maintain the environment. The study area is close to the Parramatta River this suggest that the area is has potential for Archaeological deposits. The Parramatta River were the fresh water meets the salt water, and area that is a resource rich environment. The study area is also close to a swampy wetland which can be utilised by Aboriginal Peoples for food, medicine, and a fresh water source. The area is also significant due to how long Aboriginal peoples occupied the land; we are connected to it.

The flora and fauna would have been thriving and Aboriginal people utilised their environment to its full potential. Aboriginal people carried out their daily activities in this area, hence why it's so important to us. Aboriginal people have walked this land for tens of thousands of years and continue to do so today. They strategically look after the land, plant flora in a way that coexisted with the environment around them.

We must also consider practices that have taken place by Aboriginal people to care for country, fire management being a well-known tool of Aboriginal people to manage the landscape, creating ecosystems that today we may not see due to climate change and miss management by the Europeans. Aboriginal people have the knowledge of the land and how ecosystems work they recognised this and created landscapes that suited them and provide resource rich environments.

We must also consider burials within the area as Aboriginal people were majorly affected by colonisation and suffered from disposition of our land making it hard to be aware of where burials are today.

Our modern history that we must consider the last two hundred years has affected Aboriginal people dramatically and we are thriving considering the disposition and effects of colonization. Aboriginal

cultural groups come from all over NSW, as Aboriginal people were moved due to the stolen generation, this suggest that there are many cultural groups in this area. We must also consider the stolen generation as Parramatta being the first-place governor Macquarie started taking Aboriginal children away from families, place in the native institute near the town hall. Or the female factory and the children home these are all place that our young people were taken to and raised to be like the white people of the time, this is significant to our history of Parramatta.

The study area is highly significant to our people due to the location being in parramatta a culturally sensitive area. We would like to recommend a cultural interpretation plan for this project to educate the wider community and continuing the passing down of knowledge to our younger generations. This can be achieved through native landscaping, edible gardens, art, digital displays, sound scape, water features, with in your design and much more.

We would like to agree to your recommendation, and we support your report, we look forward to further consultation on this project.

Kind Regards

Kadibulla Khan

Dominic Steele

Dear Raymond & Dominic,

2a Gregory Place, Harris Park NSW

I have read the archaeological cultural heritage management plan for the above project; I agree with the recommendations made. I have also read and agree with The Proponent to use the test excavation methodology developed with the community and this ACHAR to support an application to HNSW for approval to test excavate the site to establish whether an Aboriginal Heritage Impact Permit (AHIP) is required under the National Parks and Wildlife Act 1974 (NPW Act) for the proposal if it is determined that Aboriginal objects are present and likely harmed by the redevelopment.

Kind regards

Jesse Johnson

2A Gregory Place Parramatta - Aboriginal Cultural Heritage Assessment - June 2022.pdf
5 MB

Dominic,

Thank you for reaching out to me. Tocomwall as a Registered party has taken the position with all projects with all firms the following.

Tocomwall dose not support any methodologies or reports that Tocomwall's field staff have not been able to or been involved in the field assessment .

Tocomwall has been engaged of 100's of projects in the Sydney basin and worked with all the Raps most of these parts never provided any cultural information on site or even in reports and most do not have an ability to identify Artifacts. It is for these reasons that I cannot support these recommendations for this project.

Regards
Scott Franks

Statement: 2A Gregory Place Harris Park

8 June 2022

Attention: Ray Raad

We appreciate our involvement with this project and to provide our recommendations as per Aboriginal Culture Heritage.
It is our thoughts that upon demolition of existing structures and demolition of the concrete floors that Aboriginal artefacts may be present in the underlying soils and as such we would recommend test excavations of these areas to ascertain this. The site require remediation of impacted fill materials that have been identified to be present in locations beneath the factory and there is also a need for additional environmental assessment sampling and analysis at a number of locations to guide and enable the development. We advice that environmental assessment sampling and analysis would be required at a number of locations to provide a guide and further enable the development process.

Subject area and surrounds is well known to contain Aboriginal artefacts as discovered on various cultural heritage projects previously undertaken by numerous Archaeological companies, many of which we have been involved with.

We ask that once demolition is completed to be provided the findings of future contamination assessments and building demolition planning to the Project RAPs and invite our feedback.

Development with the Project Raps an archaeological research design and test excavation methodology for the site that is based on the results of contamination assessment and consideration of demolition planning.

We support Archeologist, Dom Steele and his recommendations, proposal and methods. Using a test excavation method advised by Dom, and reviews by community, and supported by ACHAR to accompany an application to HNSW for approval to test excavations on the project area.

Use the test excavation method advised; with the community and supported by the ACHAR; to accompany an application to HNSW for approval to test excavate the 2A Gregory Place, Harris Park, site.

Advice:

We advise that the Proponent include the RAPS in the development of an archaeological research design and test excavation methodology for the site, based on the result of contamination assessment and consideration of demolition planning.

The Proponent use the test excavation methodology, developed with the community and ACHAR to support an application to HNSW for approval to test excavate the site to establish whether an Aboriginal Heritage Impact Permit (AHIP) is required under the National Parks and Wildlife Act 1974(NPW Act) for the proposal if it is determined that Aboriginal objects are present and likely harmed by the redevelopment.

Regards

Steve Johnson – Director WAC

Concord West New South Wales 2138
Attention: Eric Claxton
Email: eric.claxton.work@gmail.com

Date: 02 February 2026

Dear Sir or Madam:

AHIMS Web Service search for the following area at Address : 2A GREGORY PLACE HARRIS PARK 2150 with a Buffer of 1000 meters, conducted by Eric Claxton on 02 February 2026.

The context area of your search is shown in the map below. Please note that the map does not accurately display the exact boundaries of the search as defined in the paragraph above. The map is to be used for general reference purposes only.

A search of Heritage NSW AHIMS Web Services (Aboriginal Heritage Information Management System) has shown that:

46	Aboriginal sites are recorded in or near the above location.
0	Aboriginal places have been declared in or near the above location. *

If your search shows Aboriginal sites or places what should you do?

- You must do an extensive search if AHIMS has shown that there are Aboriginal sites or places recorded in the search area.
- If you are checking AHIMS as a part of your due diligence, refer to the next steps of the Due Diligence Code of practice.
- You can get further information about Aboriginal places by looking at the gazettal notice that declared it. Aboriginal places gazetted after 2001 are available on the [NSW Government Gazette](https://www.legislation.nsw.gov.au/gazette) (<https://www.legislation.nsw.gov.au/gazette>) website. Gazettal notices published prior to 2001 can be obtained from Heritage NSW upon request

Important information about your AHIMS search

- The information derived from the AHIMS search is only to be used for the purpose for which it was requested. It is not to be made available to the public.
- AHIMS records information about Aboriginal sites that have been provided to Heritage NSW and Aboriginal places that have been declared by the Minister;
- Information recorded on AHIMS may vary in its accuracy and may not be up to date. Location details are recorded as grid references and it is important to note that there may be errors or omissions in these recordings.
- Some parts of New South Wales have not been investigated in detail and there may be fewer records of Aboriginal sites in those areas. These areas may contain Aboriginal sites which are not recorded on AHIMS.
- Aboriginal objects are protected under the National Parks and Wildlife Act 1974 even if they are not recorded as a site on AHIMS.
- This search can form part of your due diligence and remains valid for 12 months.

** Site Status

Valid - The site has been recorded and accepted onto the system as valid

Destroyed - The site has been completely impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There is nothing left of the site on the ground but proponents should proceed with caution.

Partially Destroyed - The site has been only partially impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There might be parts or sections of the original site still present on the ground

Not a site - The site has been originally entered and accepted onto AHIMS as a valid site but after further investigations it was decided it is NOT an aboriginal site. Impact of this type of site does not require permit but Heritage NSW should be notified

Report generated by AHIMS Web Service on 02/02/2026 for Eric Claxton for the following area at Address : 2A GREGORY PLACE HARRIS PARK 2150 with a Buffer of 1000 meters.. Number of Aboriginal sites and Aboriginal objects found is 46
