23/04/2021

Dear Ms Snape

**Marulan South Limestone Continued Operations Project (SSD-7009)
Request for Additional Information**

I refer to the above application. To assist the Department in finalising its assessment of the Project, you are requested to provide additional information:

- A figure showing the existing local surface water environment (on an aerial base) and the catchment boundaries in the vicinity of the Project site. The figure should be a consolidation of the information on Figures 1.2 (Local Context) and 4.4 (Catchment Areas) of the Surface Water Assessment at Appendix G of the EIS. Please ensure the watercourses to the north (including Marulan Creek and Tangarang Creek) are shown, as well as the Shoalhaven River.
- A consolidated summary of the groundwater extraction (take) sources and volumes associated with the Project, including those associated with pit inflows, reduction in base flows and/or extraction from groundwater bores for water supply.
- Confirmation of whether the current groundwater access licences held by Boral are sufficient for overall groundwater take of the Project.

The Department would appreciate your response to these matters by **14 May 2021**.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'LE', with a stylized flourish at the end.
