

Ms Rachael Snape Planning and Development Manager NSW/ACT Boral Limited Triniti T2 Level 5 39 Delhi Road North Ryde NSW 2113

21/06/2021

Dear Ms Snape

## Marulan South Limestone Mine Continued Operations Project (SSD-7009) Request for Additional Information

I refer to the above application. To assist the Department in finalising its assessment of the Project, you are requested to provide the following additional information:

## Blasting

The EIS does not include an assessment of potential flyrock impacts. Please provide further detail in this regard, including an overview of how these risks are currently managed, and would continue to be managed, over the life of the Project.

The Department also requests confirmation as to:

- the minimum setback distance between blasting activities and the nearest privately-owned receivers (ie C3 and R9); and
- the location(s) at which blast impacts on commercial receivers (C1 to C3) were modelled.

## Noise Bunds

Both the Economic Assessment and Greenhouse Gas Assessment in the EIS refer to the establishment of noise bunds at the Roads Sales Stockpiling Area. The Department notes that these bunds do not appear to be included in the Project Description or discussed in the Noise Impact Assessment. The Department requests clarification in this regard.

## Figures

The Department requests that you provide high resolution copies of the following figures in JPEG format:

- Figures 4.12, 4.14, 4.16 and 4.18 of the Main EIS (Staging Plans);
- Figure 19.1 of the Main EIS (Predicted operational noise levels); and
- Figure 20.2 of the Main EIS (Viewpoint locations).

Please provide the requested information, or notification that the information will not be provided, by **Friday 30 July 2021**. If you cannot meet this timeframe, please provide and commit to an alternative timeframe for providing this information.

If you have any questions regarding this matter, please contact me on 02 9274 6311 or at <u>lauren.evans@planning.nsw.gov.au</u>.

Yours sincerely,

Lauren Evans Team Leader Resource Assessments (Coal & Quarries)
