Re – DA Arborist Report

I refer to your request to update the information in regards to trees being removed and retained within St John of God Richmond Hospital.

The redevelopment of Richmond Hospital will require the removal of trees that are within the new building footprint. In addition to these trees being removed, trees identified as hazardous in the Tree Risk Survey will also be removed.

Wherever possible trees will be retained. Trees that are required to be removed will have replacement tree plantings undertaken. This is to help retain the existing canopy cover of the site.

The total count of trees to be removed is 97. Trees for removal have been highlighted in Tree Removal Markup_STH_220208.
