Dear Mr Scott

**Glendell Continued Operations Project (SSD-9349)
Request for Additional Information**

The Department is nearing the end of its assessment for the Glendell Continued Operations Project and requests that you provide additional information to allow the Department to finalise its assessment:

1. Please provide further consideration of the Project's greenhouse gas emissions against the latest NetZero Plan Stage 1 2030, which includes a revised target of 50% emissions reduction by 2030 compared to 2005 levels.
2. The EIS states that it would be uneconomic to pre-drain the relevant coal seams in order to reduce fugitive emissions, however limited justification is provided for this conclusion. Given this, please provide further information on the following:
 - i. how the estimation of fugitive emissions based on actual on-site data was calculated (i.e. Method 2 approach), including additional information on average CH₄/CO₂ percentages; and
 - ii. further justification for why it is not reasonable or feasible to pre-drain the relevant coal seams prior to mining, including the potential of flaring methane emissions to reduce Scope 1 fugitive emissions.

If you have any questions, please contact Joe Fittell on 02 4908 6896 or via email at Joe.Fittell@planning.nsw.gov.au.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Joe Fittell'.
