

Mr Rob Beckett
FRV Development Australia
Level 22
6 O'Connell Street
SYDNEY NSW 2000
27/01/2022

Dear Mr Beckett

**Walla Walla Solar Farm Mod 1 (SSD-9874-Mod-1)
Request for additional information**

I refer to the assessment of the Walla Walla Solar Farm Mod 1 (SSD-9874-Mod-1) application. The Department is requesting you provide additional information to assist in finalising the assessment of the modification application.

You are requested to submit the following additional information:

- Consolidated details of how the proposed mitigation measures would achieve the advice provided by Moir Landscape Architecture in a letter dated 21 January 2022, including the recommendation that planting 'will be undertaken at (or prior to) the commencement of the construction phase of the project'; and
- Detail how the proposed mitigation measures would effectively reduce visual impacts within the timeframes required by the consent where the recommendations in the advice cannot be achieved.

The Department considers this further information is required to assess the proposed approach to minimising visual impacts within three years of the commencement of operation, given both the proposal to modify the conditions of consent to defer the commencement of landscaping until up to 6 months following commencement of construction and the potential incremental impacts of the proposed modification.

The Department requests that the additional information be provided by Friday 4 February 2022.

Should you require further time to submit this information, or if you have any further queries, please contact Dominic Crinnion, on 02 9274 6495 or at dominic.crinnion@planning.nsw.gov.au.

Yours sincerely,

Nicole Brewer
Director
Energy Assessments
