PARRAMATTA NSW 2150

24/03/2022

Dear Sir,

**Eastern Creek Resource Recovery Facility (SSD-9774)
Request for Information**

The Department refers to your Response to the Department's Request for Information (RFI) dated 8 March 2022 and requests you provide further information.

Blacktown Council provided comments dated 21 January 2022 which included concerns regarding flooding from overland storm flows over the sag drainage point in Hanson Place. Council requested information on the overland flow within the site to ensure the proposed recycling shed is protected against flooding. Please submit this information to allow further assessment.

The NSW Environment Protection Authority (EPA) provided comments on 22 April 2021 and 21 January 2022 raising concerns about sediment tracking from the premises. EPA requested installation of a wheel wash, however this appears not to have been included in the response. Please submit details of a wheel wash and ensure it is included on site plans.

The Department requires you to formally respond to these matters by 24 May 2022. If you are unable to provide the information within this timeframe, you are requested to propose, and commit to, a timeframe detailing the provision of this information. Please lodge your response by progressing the application on the major projects planning portal at <https://majorprojects.planningportal.nsw.gov.au/>.

Should you have any enquiries, please contact Chris Fraser on (02) 9995 6321 or at Christopher.Fraser@planning.nsw.gov.au.

Yours sincerely,

Sheelagh Laguna
