St Leonards NSW 2065

6 April 2022

Subject: Request for Additional Information for Section 4.55(1A) Modification Application, Tweed Valley Hospital Stage 2 (SSD-10353-Mod-3)

Dear Ms Muir

I refer to proposed modification 3 of the approval for Tweed Valley Hospital Stage 2 detailing amendments to the approved multi-deck carpark design (SSD-10353-Mod-3). After careful consideration the Department is requesting that you provide the following additional information:

- the architectural report within the original Environmental Impact Statement (EIS) for the Stage 2 application detailed that the multi-deck carpark would have planting that would climb the facades of the structure. As this was considered an important aspect of the carpark's visual presentation in design development, clarification is sought on whether it is still your intent to incorporate the planting into the revised carpark design.

You are requested to provide the information to the Department by 14 April 2022. If you cannot meet this deadline please advise the Department via the NSW planning portal.

If you have any enquiries, please contact Tom Stanton at 02 9585 6411 or via email tom.stanton@dpie.nsw.gov.au.

Yours sincerely

David Gibson
