Dear Peter,

**Re: Wallerawang BESS Landscape Concept Plan.**

Wallerawang proposed landscape concept drawings and design issued by Urbis on 24-06-2022 will meet the requirements of:

- Feasible of landscape concept
- Effective visual screening

The Landscape concept plan establishes a planting scheme that uses native species to form woodland clumps which uses a mix of planting stock to allow a progressive growth condition. This alongside the woodland clumps' placement, size, and spread across the site will provide a naturalised landscape character setting to the Coxs River, providing improved biodiversity and effective visual screening to BESS within three years of planting. Proposed planting on 1:2 batters will be viable.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Phil James". The signature is fluid and cursive, with a long horizontal stroke at the end.
