**EXHIBITION OF EIS – NEPEAN HOSPITAL REDEVELOPMENT PROJECT - STAGE 2 - 35-65 DERBY STREET, KINGSWOOD**

Dear Mr. Stanton,

Reference is made to your correspondence seeking comment from Transport for NSW (TfNSW) on the supplementary Response to Submissions (RtS) for the above-mentioned State Significant Development (SSD-16928008).

TfNSW has reviewed further documentation in response to comments provided by TfNSW on 18 February and advises the following additional comments and recommendations in TAB A.

If you have any further inquiries please contact Brett Morrison, Development Assessment Officer via email at [development.sydney@transport.nsw.gov.au](mailto:development.sydney@transport.nsw.gov.au).

Yours sincerely

Laura van Putten  
A/Senior Manager Land Use Assessment West & Central  
Greater Sydney

## TAB A - RECOMMENDATIONS

### Traffic Impact Assessment Report (TIA)

#### Swept paths

1. Comment

- The swept paths have been updated but appear to have incorrect attachment headings.
- The revised line marking plans do not include line marking;
- Confirm that swept path analysis referred to on page 2 is for Derby Street as previous Transport comments incorrectly referred to access road on Drawing #04T\_003 as Barber St.

Recommendation

TfNSW requests the abovementioned information to be addressed/provided for further assessment prior to the determination of the application. TfNSW will further review and provide response upon receipt of the additional information.

#### Traffic Modelling

2. Comment

As previously requested, the applicant is to submit an electronic copy of the SIDRA modeling files undertaken for TfNSW review and verification.

Recommendation

TfNSW will verify as to whether the modelling has been undertaken in accordance with the relevant practices and guidelines.
