1 INTRODUCTION

The Mount Pleasant Operation (MPO) is located in the Upper Hunter Valley of New South Wales (NSW), approximately 3 kilometres (km) north-west of Muswellbrook and approximately 50 km north-west of Singleton (Figure 1). The village of Aberdeen and locality of Kayuga are also located approximately 5 km north-northeast and 1 km north of the MPO boundary, respectively (Figure 1). The proponent of the MPO is MACH Energy Australia Pty Ltd (MACH Energy), which purchased the MPO from Coal & Allied Operations Pty Ltd (Coal & Allied) in 2016.

MACH Mount Pleasant Operations Pty Ltd is the manager of the MPO as an agent for, and on behalf of, the unincorporated Mount Pleasant Joint Venture between MACH Energy (95 per cent [%] owner) and J.C.D. Australia Pty Ltd (5% owner). This Aboriginal Cultural Heritage Management Plan (ACHMP) is implemented at the MPO by MACH Energy.

The initial development application for the MPO was made in 1997. This was supported by an Environmental Impact Statement (EIS) prepared by Environmental Resources Management (ERM) Mitchell McCotter (ERM Mitchell McCotter, 1997). On 22 December 1999, the then Minister for Urban Affairs and Planning granted Development Consent DA 92/97 to Coal & Allied. This allowed for the "Construction and operation of an open cut coal mine, coal preparation plant, transport and rail loading facilities and associated facilities" at the MPO. The consent allowed for operations 24 hours per day seven days per week and the extraction of 197 million tonnes (Mt) of run-of-mine (ROM) coal over a 21 year period, at a rate of up to 10.5 million tonnes per annum (Mtpa).

The Mount Pleasant Project Modification (MOD 1) was submitted on 19 May 2010 with a supporting Environmental Assessment (EA) prepared by EMGA Mitchell McLennan (EMGA Mitchell McLennan, 2010). MOD 1 included the provision of an infrastructure envelope for siting the mine infrastructure, the provision of an optional conveyor/service corridor linking the MPO facilities with the Muswellbrook-Ulan Rail Line and modification of the existing Development Consent DA 92/97 boundaries to accommodate the optional conveyor/service corridor and minor administrative changes. MOD 1 was approved on 19 September 2011.

The MPO South Pit Haul Road Modification (MOD 2) was submitted on 30 January 2017 with a supporting EA prepared by MACH Energy (MACH Energy, 2017a). MOD 2 proposed to realign an internal haul road to enable more efficient access to the South Pit open cut, with no other material changes to the approved MPO. MOD 2 was approved on 29 March 2017.

The MPO Mine Optimisation Modification (MOD 3) was submitted on 31 May 2017 with a supporting EA prepared by MACH Energy (MACH Energy, 2017b). MOD 3 comprised an extension to the time limit on mining operations (to 22 December 2026) and extensions to the South Pit Eastern Out of Pit Emplacement to facilitate development of an improved final landform. MOD 3 was approved on 24 August 2018.

The MPO Rail Modification (MOD 4) was submitted on 18 December 2017 with a supporting EA prepared by MACH Energy (MACH Energy, 2017c). MOD 4 proposed the following changes:

- duplication of the approved rail spur, rail loop, conveyor and rail load-out facility and associated services;
- duplication of the Hunter River water supply pump station, water pipeline and associated electricity supply that followed the original rail spur alignment; and
- demolition and removal of the redundant approved infrastructure within the extent of the Bengalla Mine, once the new rail, product loading and water supply infrastructure has been commissioned and is fully operational.

MOD 4 was approved on 16 November 2018 by the Secretary of the Department of Planning and Environment (DPE) (under Delegation). Appendix 2 of the modified Development Consent DA 92/97 illustrates the Conceptual Project Layout Plan of the approved MPO at 2021 and 2025, Approved Surface Disturbance Plan and Conceptual Final Landform (Attachment 1) incorporating the MOD 4 infrastructure relocations.

Modification 5 (MOD 5) was submitted to rectify an administrative error in Development Consent DA 92/97 and was approved by DPE (now the NSW Department of Planning, Housing and Infrastructure [DPHI]) on 29 June 2022.

Modification 6 (MOD 6) was submitted to modify Development Consent DA 92/97 and was approved on 6 November 2023. MOD 6 will allow for the construction and operation of a re-transmission facility including a tower or mast, shed and associated transmission infrastructure to re-transmit local digital television signals from the Broadcast Australia site at Rossgole Lookout. Appendix 2 of the modified Development Consent DA 92/97 illustrates the Revised Approved Surface Disturbance Plan incorporating the MOD 6 infrastructure (Attachment 2).

On 22 January 2021, MACH Energy submitted the Mount Pleasant Optimisation Project (the Project) EIS in support of State Significant Development (SSD) 10418 under Part 4 of the NSW *Environmental Planning and Assessment Act, 1979* (EP&A Act). Key aspects of the Project generally involve (among other things):

- increased open cut extraction within the MPO's existing Mining Leases (MLs);
- a staged increase in extraction, handling and processing of ROM coal up to 21 Mtpa;
- upgrades to existing infrastructure and new infrastructure to support mining of the proposed Project; and
- an extension to the time limit on mining operations to 22 December 2048.

The Project was approved by the NSW Independent Planning Commission on 6 September 2022. Part A, Condition A14 of Development Consent SSD 10418 requires the surrender of Development Consent DA 92/97 within 12 months of the date of commencement of development under Development Consent SSD 10418, or an alternative timeframe agreed with the Planning Secretary of the DPE (now DPHI). Attachment 2 describes the development layout of the Project in accordance with Development Consent SSD 10418.

The Project EIS was supported by an Aboriginal Cultural Heritage Assessment (ACHA) (South East Archaeology Pty Ltd [South East Archaeology], 2020a and 2020b). The ACHA findings and mitigation measures relevant to the preparation of this ACHMP have been incorporated into this ACHMP and the associated MPO Aboriginal Heritage Site Database has been updated.

Following the commencement of development under Development Consent SSD 10418 and prior to the surrender of Development Consent DA 92/97, MACH Energy will comply with the requirements of both consents (Section 1.1).

This ACHMP has been prepared to satisfy the relevant conditions of both Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender). Where relevant, this ACHMP builds on the components of the existing/approved ACHMP, including previous feedback from government stakeholders and recommendations.

Figure 2 shows the indicative Project general arrangement and existing/approved surface development areas that would continue to comprise as part of the Project and the areas that would be relinquished.

MOUNT PLEASANT OPERATION

General Arrangement of the Project

Figure 2

1.1 PURPOSE AND SCOPE

This ACHMP has been prepared by MACH Energy to satisfy the requirements of Part B, Condition B69 under Development Consent SSD 10418. It also satisfies Schedule 3, Condition 36 under Development Consent DA 92/97 (prior to its surrender).

The purpose of this ACHMP is to describe the management of Aboriginal cultural heritage associated with construction and operation of the MPO, in accordance with the requirements of Part B, Condition B69 (and other relevant conditions and requirements) of Development Consent SSD 10418 and Schedule 3, Condition 36 (and other relevant conditions and requirements) of Development Consent DA 92/97 (prior to its surrender) (Section 2.2.1).

In accordance with Part B, Condition B69(b) of Development Consent SSD 10418, this ACHMP has been prepared and reviewed by MACH Energy and Jamie Reeves of Niche Environmental and Heritage Pty Ltd (Niche), who was endorsed by the Planning Secretary as a suitably qualified and experienced person on 17 May 2023 (Attachment 3).

The ACHMP applies to the life of the MPO, including (but not limited to) the period of mining operations specified in Development Consent SSD 10418, which permits mining until 22 December 2048, and Development Consent DA 92/97 (until its surrender). As required by Part A, Condition A5 of Development Consent SSD 10418, the ACHMP will continue to apply (excluding mining operations) beyond 22 December 2048, as required, until the rehabilitation and any additional undertakings (required by the Planning Secretary of DPE (now DPHI), or the NSW Resources Regulator) have been carried out satisfactorily.

The provisions of this ACHMP apply to the MPO area. For the purposes of this ACHMP, the MPO area reflects the extent of the Development Consent Boundary[1] (as shown on Figure 3).

It is further noted that this ACHMP applies to valid sites of Aboriginal origin only. Should possible Aboriginal cultural heritage evidence be identified (or have been previously recorded) which is then subsequently determined not to be of an Aboriginal origin by a suitably qualified archaeologist (in relation to material evidence), anthropologist (in relation to cultural values) or arborist or forestry specialist (in relation to scarred trees [in conjunction with a suitably qualified archaeologist]) in consultation with the attending Registered Aboriginal Parties (RAPs), a technical report would be prepared. This report would be provided to Heritage NSW within the DPE (former Office of Environment and Heritage [OEH]) and made available to the RAPs.

A copy would also be forwarded to Heritage NSW Aboriginal Heritage Information Management System (AHIMS) registrar so that the status of the evidence can be appropriately recorded (as necessary). In the event that a previously identified site is determined to not be of an Aboriginal origin, no further management would be required.

As required by Part B, Condition B69 of Development Consent SSD 10418, MACH Energy will not commence construction of the Northern Link Road or extract more than 10.5 Mt of ROM coal in a calendar year until the ACHMP has been approved by the Planning Secretary.

MACH Energy commenced of development under Development Consent SSD 10418 on 12th February 2024. In accordance with Part A, Condition A14 of Development Consent SSD 10418, within 12 months of the date of commencement of development under Development Consent SSD 10418, or any timeframe agreed by the Planning Secretary, MACH Energy will surrender the existing Development Consent DA 92/97 (and relevant Aboriginal Heritage Impact Permits (AHIPs) #C0002092, #C0004783 and #C0002053) in accordance with the EP&A Act.

[1] Approximate graphical representation of the Schedule of Land presented as Appendix 1 of Development Consent SSD 10418.

In accordance with Part A, Condition A15 of Development Consent SSD 10418, upon the commencement of development of Development Consent SSD 10418 and before the surrender of Development Consent DA 92/97, the conditions of Development Consent SSD 10418 prevail to the extent of any inconsistency with the conditions of those consents.

In accordance with Part B, Condition B72 of Development Consent SSD 10418, MACH Energy will implement the ACHMP onced approved by the Planning Secretary.

1.1.1 Previous Versions

The initial version of the ACHMP (Version 1) was prepared on behalf of MACH Energy by Peter Kuskie of South East Archaeology and was approved on 5 July 2017 to satisfy the requirements under Development Consent DA 92/97 and AHIPs #C0002053 and #C0002092.

Version 2 of the ACHMP was updated following the approval of MOD 4 and granting of associated AHIP #C0004783.

1.1.2 Current Version

This version (Version 3) of the ACHMP has been prepared following the grant of the Project under Development Consent SSD 10418. Following the commencement of development under Development Consent SSD 10418 and prior to the surrender of Development Consent DA 92/97, MACH Energy will comply with the requirements of both consents. Section 2.3 details the surrender of Development Consent DA 92/97 and the notification of commencement under Development Consent SSD 10418.

All conditions and statutory requirements under Development Consent DA 92/97 will become null and void after its surrender where the MPO will operate under Development Consent SSD 10418 and other relevant legislation listed in Part A, Condition A2 of Development Consent SSD 10418.

1.2 STRUCTURE OF THE ABORIGINAL CULTURAL HERITAGE MANAGEMENT PLAN

The remainder of this ACHMP is structured as follows:

Section 2: Outlines the statutory requirements applicable to this ACHMP.

Section 3: Outlines the protocols for the ongoing involvement of the Aboriginal community at the MPO.

Section 4: Describes the Aboriginal Heritage Conservation Strategy for the MPO.

Section 5: Outlines management measures for Aboriginal cultural heritage at the MPO.

Section 6: Describes the protocols for heritage inductions and training.

Section 7: Describes the performance measures applicable to the management of Aboriginal cultural heritage at the MPO.

Section 8: Provides a contingency plan to manage any unprecedented impacts and their consequences.

Section 9: Provides details for the review and improvement of environmental performance process.

Section 10: Describes the management and reporting of incidents, complaints and non-compliances.

Section 11: Provides the references cited in this document.

1.3 CONSULTATION FOR THE ABORIGINAL CULTURAL HERITAGE MANAGEMENT PLAN

1.3.1 Historical Development of the Aboriginal Cultural Heritage Management Plan

A previous version of this ACHMP was prepared by Rio Tinto Coal Australia Pty Ltd (Rio Tinto) (Rio Tinto, 2014) and was approved by the Secretary of the DPE (now DPHI) on 14 August 2015. Consultation was undertaken with the local Aboriginal community and the OEH (now Heritage NSW) as documented by Rio Tinto (2014).

The initial version of the ACHMP prepared on behalf of MACH Energy by Peter Kuskie of South East Archaeology was approved by the Secretary of the DPE (now DPHI) on 5 July 2017. Consultation was undertaken with the OEH (now Heritage NSW) and the RAPs in accordance with Development Consent DA 92/97.

Version 2 of this ACHMP was provided to Heritage NSW and the RAPs for their review and comment in accordance with Development Consent DA 92/97 on 30 June 2019. One comment was received from a RAP on 18 July 2019 requesting that cultural cool burns within the Aboriginal Conservation Area be considered within the ACHMP (refer to Appendix J). This comment was out of the scope of the ACHMP and was addressed in the *Conservation Area A – Conservation Management Plan,* which is currently being developed in consultation with the RAPs. Heritage NSW verbally indicated that they will not be able to comment on the ACHMP due to resource constrains. No comments were provided by Heritage NSW.

1.3.2 Consultation for this Aboriginal Cultural Heritage Management Plan

As required under Part B, Condition B69 of Development Consent SSD 10418 and Schedule 3, Condition 36 of Development Consent DA 92/97 (prior to its surrender), a draft version of this ACHMP has been provided to Heritage NSW and the RAPs for the purpose of consultation.

In accordance with Part A, Condition A22 of Development Consent SSD 10418, MACH Energy will provide details of the consultation undertaken and the outcome of consultation (Appendix J).

2 STATUTORY REQUIREMENTS

MACH Energy's statutory obligations that relate to this ACHMP are contained in (but not limited to):

- conditions of Development Consent SSD 10418 (Section 2.2);
- conditions of Development Consent DA 92/97 (prior to its surrender) (Section 2.3);
- NSW *Environmental Planning and Assessment Act 1979* (EP&A Act) (Section 2.2 and 2.3);
- NSW *National Parks and Wildlife Act 1974* (NP&W Act) (Section 2.1);
- AHIPs #C0002053, #C0002092 and #C0004783 (Section 2.4); and
- other relevant legislation.

In addition to the above, activities associated with the MPO will be undertaken within the licences, permits and leases described in the MPO Environmental Management Strategy (EMS).

Obligations relevant to this ACHMP are described below.

2.1 NP&W ACT REQUIREMENTS

The NP&W Act provides the primary basis for the legal protection and management of Aboriginal cultural heritage within NSW. Implementation of the Aboriginal cultural heritage provisions of the NP&W Act is the responsibility of Heritage NSW (formerly OEH). The rationale behind the NP&W Act is to prevent unnecessary or unwarranted destruction of Aboriginal objects and to protect and conserve objects where such action is considered warranted (DECCW, 2009a, 2009b).

With the exception of some artefacts in collections, the NP&W Act generally defines all Aboriginal objects to be the property of the Crown. The Act then provides various controls for the protection, management and destruction of these objects. An 'Aboriginal object' is defined as:

> *'any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises New South Wales, being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, and includes Aboriginal remains' [Section 5(1)].*

In practice, archaeologists generally subdivide the legal category of 'object' into different site types, which relate to the way Aboriginal cultural heritage evidence is found within the landscape. The archaeological definition of a 'site' may vary according to survey objectives, however it should be noted that even single and isolated artefacts are protected as objects under the NP&W Act.

Under the terms of the NP&W Act, it is an offence for a person to:

- harm or desecrate an object that the person knows is an Aboriginal object; and
- harm an Aboriginal object ('strict liability offence').

Penalties for infringement of the NP&W Act vary in relation to the nature of the offence but include up to 10,000 penalty units for a corporation, and up to 5,000 penalty units or imprisonment for 2 years, or both for an individual.

Consents regarding harm to Aboriginal objects are managed through Heritage NSW (formerly OEH) AHIP system. AHIPs are typically required (apart from Part 3A Major Projects and Part 4 Division 4.1 State Significant Developments) to allow any impacts to an Aboriginal object or Aboriginal place.

Under Section 89A of the NP&W Act, a person who is aware of the location of an Aboriginal object that is the property of the Crown or, not being the property of the Crown, is real property, and does not, in the prescribed manner, notify the Director-General thereof within a reasonable time after the person first becomes aware of that location is guilty of an offence against this Act unless the person believes on reasonable grounds that the Director-General is aware of the location of that Aboriginal object.

Under Section 85A of the NP&W Act, the Director-General may "dispose" of Aboriginal objects that are the property of the Crown:

a) *by returning the Aboriginal objects to an Aboriginal owner or Aboriginal owners entitled to, and willing to accept possession, custody or control of the Aboriginal objects in accordance with Aboriginal tradition, or*

b) *by otherwise dealing with the Aboriginal objects in accordance with any reasonable directions of an Aboriginal owner or Aboriginal owners referred to in paragraph (a), or*

c) *if there is or are no such Aboriginal owner or Aboriginal owners – by transferring the Aboriginal objects to a person, or a person of a class, prescribed by the regulations for safekeeping (commonly known as a Care Agreement that is implemented between OEH and the Aboriginal person or community 11rganization).*

Under Section 85A(3) of the NP&W Act, the regulations may make provision as to the manner in which any dispute concerning the entitlement of an Aboriginal owner or Aboriginal owners to possession, custody or control of Aboriginal objects for the purposes of this section is to be resolved.

2.2 DEVELOPMENT CONSENT SSD 10418

The conditions of Development Consent SSD 10418 relevant to the content and structure of this ACHMP are described in Sections 2.2.1 and 2.2.2 below. Addititional Aboriginal cultural heritage conditions from Development Consent SSD 10418 are described in Appendix A.

2.2.1 Aboriginal Cultural Heritage Management Plan Requirements

Part B, Condition B69 of Development Consent SSD 10418 requires the preparation of an ACHMP. Table 1 presents the specific ACHMP requirements including reconciliation of where each requirement is addressed within this ACHMP.

Table 1
Specific Development Consent SSD 10418 Conditions

MPO Development Consent SSD 10418 Part B	Section where addressed in this ACHMP document
Aboriginal Cultural Heritage Management Plan	
B69. The Applicant must prepare an Aboriginal Cultural Heritage Management Plan for the development. The plan must:	This ACHMP.
(a) be submitted for approval within six months of the commencement of development under this consent;	Noted.
(b) be prepared by suitably qualified and experienced person/s whose appointment has been endorsed by the Planning Secretary;	Section 1.1
(c) be prepared in consultation with Heritage NSW and Registered Aboriginal Parties;	Section 1.3

Table 1 (continued)
Specific Development Consent SSD 10418 Conditions

MPO Development Consent SSD 10418 Part B	Section where addressed in this ACHMP document
(d) describe the measures to be implemented on the site to:	
(i) comply with the Aboriginal cultural heritage-related operating conditions of this consent;	This ACHMP.
(ii) ensure all workers receive suitable Aboriginal cultural heritage training/inductions prior to carrying out any activities which may cause impacts to Aboriginal objects or Aboriginal places, and that suitable records are kept of these inductions;	Section 6
(iii) protect, monitor and manage identified Aboriginal cultural heritage conservation areas (Areas B and C), or otherwise agreed alternative conservation areas, or other agreed conservation measures, within 12 months of commencement of development under this consent;	Section 4
(iv) establish alternative Aboriginal cultural heritage conservation areas (Areas A, B and C), or otherwise agreed alternative conservation areas, or other agreed conservation measures, within 12 months of commencement of development under this consent;	Section 4.1
(v) maintain all Aboriginal cultural heritage conservation areas (Areas A, B and C), or otherwise agreed alternatives, throughout the life of the project;	Section 4
(vi) undertake further archaeological investigations, test excavations and analysis of scarred trees in accordance with the commitments made in the document/s listed in condition A2(c) (including the documents in the MACH response dated 9 September 2021);	Section 5.6
(vii) protect Aboriginal objects and Aboriginal places located outside the approved disturbance area from impacts of the development;	Section 5.8
(viii) manage the discovery of suspected human remains over the life of the development;	Section 5.11
(ix) manage the discovery of any new Aboriginal objects or Aboriginal places, including provisions for burials, over the life of the development;	Section 5.10
(x) maintain and manage reasonable access for relevant Aboriginal stakeholders to Aboriginal objects and Aboriginal places (outside of the approved disturbance area); and	Section 5.15
(xi) facilitate ongoing consultation and involvement of Registered Aboriginal Parties in the conservation and management of Aboriginal cultural heritage on the site and in the area, in accordance with the commitments made in the document/s listed in condition A2(c); and	Section 3
(e) include a strategy for the care, control and storage of Aboriginal objects salvaged from the site, both during the life of the development and in the long term.	Section 5.12
***Note:** Areas A, B and C are defined in EIS – Appendix G.*	
B70. The Applicant must not commence construction of the Northern Link Road or extract more than 10.5 Mt of ROM coal in a calender year until the Aboriginal Cultural Heritage Management Plan is approved by the Planning Secretary.	Section 1.1
B71. The Applicant must not undertake disturbance of Aboriginal objects not covered by a valid Aboriginal Heritage Impact Permit prior to approval of the Aboriginal Cultural Heritage Management Plan by the Planning Secretary.	Section 2.4
B72. The Applicant must implement the Aboriginal Cultural Heritage Management Plan approved by the Planning Secretary.	Section 1.1

Other conditions contained in Development Consent SSD 10418 that are relevant to the management of Aboriginal cultural heritage at the MPO are included below.

Blasting Operating Conditions

Part B, Condition B22 of Development Consent SSD 10418 requires that blasting on the site does not damage heritage items (outside the approved disturbance area) and develop specific measures to protect heritage items from any blasting damage associated with the development.

The consideration of blasting impacts on items of Aboriginal cultural heritage is outlined in the MPO Blast Management Plan as required by Part B, Condition B24 of Development Consent SSD 10418 where a a strategy to monitor, mitigate and manage the effects of blasting on heritage items, including details of baseline (i.e. pre-blasting) and ongoing risk-based dilapidation surveys (subject to landowner access arrangements) is implemented. Blasting impacts are also briefly described in Section 5.9.2 of this ACHMP.

Biodiversity Management Plan

Part B, Condition B63 specifically Condition B63(k) of Development Consent SSD 10418 requires that the MPO Biodiversity Management Plan contains a description of how potential conflicts with Aboriginal cultural heritage values will be addressed throughout the life of the MPO. Additional Aboriginal cultural heritage related conditions from Development Consent SSD 10418 are described in Appendix A.

Relevant Commitments and Recommendations

Table 2 provides a consolidated summary of commitments and recommendations from the Project EIS (MACH Energy, 2021a) and the Project Submissions Report (MACH Energy, 2021b).

Table 2
Relevant Commitments and Recommendations from the Project EIS

Relevant Commitments and Recommendation	Section where addressed in this ACHMP document
Project EIS	
Surface Disturbance	
Continued implemented of a Ground Disturbance Permit process, as detailed in the approved Mount Pleasant Operation ACHMP.	Section 5.8.2
All potential direct disturbance areas (e.g. for ancillary infrastructure) that have not yet been subject to systematic survey sampling would be subject to supplementary survey.	Section 5.8.1
Progressive surface collection of Aboriginal objects/site potentially impacted by surface development.	Section 5.2
Test excavation, broad area hand excavation and surface scrapes with localised hand excavation for relevant open artefact sites detailed in Appendix G.	Section 5.3
Consideration of the location of known Aboriginal heritage sites during final detailed engineering designs of road alignments and ancillary infrastructure.	Section 5.8.1
Implementation of a protocol for surface disturbance works to reduce the risk of accidental damage to known and unknown Aboriginal cultural heritage sites.	Section 5.10
For any possible scarred trees that may be subject to surface disturbance, verification of the precise location of the tree, the nature of the scar and a reassessment of significance would occur.	Section 5.6
Following final design of relevant Project elements, determine significance of sites in the disturbance area not previously assigned a significance rating, to determine the most appropriate management strategy under the Project ACHMP.	Section 5.8.1

Table 2 (Continued)
Relevant Commitments and Recommendations from the Project EIS

Relevant Statement of Commitments Requirement	Section where addressed in this ACHMP document
General Measures	
Documenting all heritage mitigation measures and management strategies undertaken for the Project with reference to Heritage NSW guidelines.	This ACHMP.
Providing reports to relevant stakeholders such as the DPE, Heritage NSW and RAPs within appropriate timeframes.	Section 3
Curation of all heritage evidence salvaged under the Project in an appropriate manner, as determined in consultation with the RAPs and Heritage NSW during preparation of the revised ACHMP.	Section 5.14
Implementation of site-specific precautionary measures, such as informing relevant staff and contractors of the nature and location of heritage items and the need to avoid impacts, potentially along with temporary fencing and demarcation, would be implemented for known Aboriginal heritage sites in close proximity to Project works.	Section 5.8.3 and 6
Investigation and assessment of alternative conservation measures for provisional Aboriginal Conservation Areas B and C for the existing approved Mount Pleasant Operation in consultation with the RAPs.	Section 4
Heritage awareness training of all relevant contractors and staff engaged for the Project who may have interactions with Aboriginal heritage, prior to commencing work on-site. The current training package at the Mount Pleasant Operation would be reviewed in consultation with the RAPs.	Section 6
Continuing to update and maintain the Mount Pleasant Operation Aboriginal Site Database established for the Project regularly, with copies of data made available to any RAPs and the updated database made available to Heritage NSW for their records.	Section 5.14
Lodging Aboriginal Site Impact Recording Forms in a timely manner with Heritage NSW for any site that is subject to salvage or development impacts.	Section 5.7
Lodging Aboriginal Site Recording forms in a timely manner with Heritage NSW for any previously unrecorded Aboriginal heritage evidence that is identified during the course of operations and/or further heritage assessments over the life of the Project.	Section 5.10
Ongoing consultation with the RAPs over the life of the Project, including Aboriginal representation during archaeological fieldwork (e.g. salvage of artefacts prior to disturbance).	Section 3
Permitting access for Aboriginal community representatives for cultural purposes to known sites or areas within MACH-owned land upon request, subject to safety and operational requirements at the time.	Section 5.15
Developing a communication protocol that describes notification and response times between MACH and the RAPs on site Aboriginal heritage matters.	Section 3
Provisions would be included in the ACHMP to guide the management of any previously unrecorded Aboriginal heritage sites that may be identified during future investigations or works.	Section 5.10
Should any skeletal remains be detected, ceasing relevant Project work immediately and reporting the find. Subject to the NSW Police requiring no further involvement, the management of any Aboriginal skeletal remains would be determined in consultation with the DPE, Heritage NSW and the RAPs.	Section 5.11
Provisions relating to Aboriginal heritage would need to be included in an SSD ACHMP, which subsequent to SSD Approval and approval of the ACHMP, would guide all management of Aboriginal heritage within the SSD Area in lieu of the existing AHIPs and NP&W Act requirements.	This ACHMP.
The existing AHMP (MACH Energy, 2017) could form an adequate basis for development of an SSD ACHMP, however critical revisions would be needed to reflect the significant change in the heritage management process (from the AHIPs and NP&W Act to the SSD Approval and ACHMP). A revised SSD ACHMP should be prepared by an appropriately qualified heritage practitioner with significant expertise in Aboriginal heritage with significant expertise in Aboriginal heritage.	Section 1.1

Table 2 (Continued)
Relevant Commitments and Recommendations from the Project EIS

Relevant Statement of Commitments Requirement	Section where addressed in this ACHMP document
Project Submissions Report	
Survey Coverage	
Heritage NSW recommended completion of some small areas of further systematic heritage surveys, in particular: • *Small portions of the additional primary impact areas of SSD Zones B3 and B4, including the alternative alignment of the Northern Link Road that may be adopted that were unable to be surveyed due to property access restrictions.* • *Potential surface impact areas associated with works subject to future detailed design within SSD Zone C*	Section 5.8.1
Conservation Areas B and C	
Heritage NSW noted that MACH may seek an alternative to provisional Aboriginal heritage conservation areas B and C. Heritage NSW recommended that suitable alternative conservation area(s) should be evaluated to ensure any proposed conservation options will appropriately mitigate the impacts of the Project.	Section 4
General Measures	
Policies and actions required to manage Aboriginal heritage within the Project area should be included in an updated AHMP for the Project. These policies and actions should be developed by an appropriately qualified heritage practitioner with expertise in Aboriginal heritage, in consultation with RAPs, and should take into account the results of the additional assessment and consultation recommended above.	This ACHMP.
The AHMP should include procedures for further management and mitigation measures to be implemented prior to any impacts occurring to specific sites, values and areas. This should include management strategies for all identified Aboriginal heritage sites as listed in Appendix 7 of the ACHA.	Section 5
Provisions related to the management and curation of all salvaged Aboriginal objects from within the Project area should be developed in consultation with the RAPs and included within the AHMP.	Section 5.3
Appropriate management and mitigation measures, as outlined in the AHMP, should be implemented, as per the recommendations of the ACHA, prior to the commencement of any ground disturbing works within the Project area. All mitigation measures should be undertaken in consultation with RAPs.	Section 2

2.2.2 Management Plan (General) Requirements

Part D, Condition D5 of Development Consent SSD 10418 outline general management plan requirements. Table 3 presents these requirements and indicates where each is addressed within this ACHMP.

Table 3
General Development Consent SSD 10418 Conditions

MPO Development Consent SSD 10418 Part D	Section where addressed in this ACHMP document
D5. Management plans required under this consent must be prepared in accordance with relevant guidelines, and include:	-
(a) summary of relevant background or baseline data;	Section 2
(b) details of:	
(i) the relevant statutory requirements (including any relevant approval, licence or lease conditions);	Section 2
(ii) any relevant limits or performance measures and criteria; and	Section 7
(iii) the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation of, the development or any management measures;	Section 7
(c) any relevant commitments or recommendations identified in the document/s listed in condition A2(c);	Section 2
(d) a description of the measures to be implemented to comply with the relevant statutory requirements, limits, or performance measures and criteria;	Sections 4, 5, 6 and 7
(e) a program to monitor and report on the:	Sections 9 and 10
(i) impacts and environmental performance of the development; and	
(ii) effectiveness of the management measures set out pursuant to condition D4(c);	
(f) a contingency plan to manage any unpredicted impacts and their consequences and to ensure that ongoing impacts reduce to levels below relevant impact assessment criteria as quickly as possible;	Section 7
(g) a program to investigate and implement ways to improve the environmental performance of the development over time;	Section 8
(h) a protocol for managing and reporting any:	
(i) incident, non-compliance or exceedance of any impact assessment criterion or performance criterion;	Section 10.1
(ii) complaint; or	Section 10.2
(iii) failure to comply with other statutory requirements;	Section 10.3
(i) public sources of information and data to assist stakeholders in understanding environmental impacts of the development; and	Section 10.4
(j) a protocol for periodic review of the plan.	Section 9
***Note**: The Planning Secretary may waive some of these requirements if they are unnecessary or unwarranted for particular management plans.*	

2.3 DEVELOPMENT CONSENT DA 92/97

The conditions of Development Consent DA 92/97 (prior to its surrender) relevant to the content and structure of this ACHMP are described in Sections 2.3.1 and 2.3.2 below. Additional Aboriginal cultural heritage related conditions from Development Consent DA 92/97 are described in Appendix B.

2.3.1 Aboriginal Cultural Heritage Management Plan Requirements

Schedule 3, Condition 36 of Development Consent DA 92/97 (prior to its surrender), requires the preparation of an ACHMP. Table 4 presents the specific ACHMP requirements including a reconciliation of where each requirement is addressed within this ACHMP.

Table 4
Specific Development Consent DA 92/97 Conditions

MPO Development Consent DA 92/97 Schedule 3	Section where addressed in this ACHMP document
Aboriginal Heritage Management Plan	
36. The Applicant must prepare a Aboriginal Heritage Management Plan for the development to the satisfaction of the Secretary. This plan must:	
(a) be prepared in consultation with OEH and the Registered Aboriginal Parties by suitably qualified and experienced persons whose appointment has been endorsed by the Secretary;	Sections 1.2 and 1.3
(b) be submitted to the Secretary for approval by 30 June 2019, unless otherwise agreed by the Secretary;	-
(c) include:	
• *a detailed plan for the implementation of the approved Aboriginal Heritage Conservation Strategy (required under condition 34);*	Section 4
• *a description of the measures that would be implemented to:*	
– *comply with the requirements of any Aboriginal Heritage Impact Permit issued for the development, including any approved archaeological testing and salvage program;*	Sections 2.4 and 5
– *store the Aboriginal objects salvaged, both during construction and in the long-term;*	Section 5.12
– *protect, monitor and/or manage all Aboriginal objects on site until the impacts of the development on these objects is unavoidable;*	Section 5.8
– *minimise the blasting impacts of the development on Aboriginal objects in the vicinity of the site;*	Section 5.9.2
– *manage the discovery of any human remains or previously unidentified Aboriginal objects on site;*	Sections 5.10 and 5.11
– *enable Registered Aboriginal Parties to get reasonable access to the site during the development;*	Section 5.15
– *ensure Registered Aboriginal Parties are consulted about the conservation and management of Aboriginal cultural heritage on site; and*	Section 3
– *ensure construction personnel receive suitable heritage inductions prior to carrying out any development on site, and that suitable records are kept of these inductions.*	Section 6
The Applicant must implement the management plan as approved by the Secretary.	

Table 4 (Continued)
Specific Development Consent 92/97 Conditions

MPO Development Consent DA 92/97 Schedule 3	Section where addressed in this ACHMP document
Notes: • *The Aboriginal Heritage Management Plan must be consistent with the requirements of any Aboriginal Heritage Impact Permit(s) issued by OEH relevant to the development.* • *The Applicant must ensure that Aboriginal site recording forms for newly recorded sites and Aboriginal site impact recording forms for salvaged sites are submitted to OEH for inclusion on the Aboriginal Heritage Information Management System database.*	Section 2.4 Sections 5.7 and 5.10

Other conditions contained in Development Consent DA 92/97 (prior to its surrender), that are relevant to the management of Aboriginal cultural heritage at the MPO include the following:

Blast Operating Conditions

Schedule 3, Condition 15 of Development Consent DA 92/97 requires:

15. The Applicant must:

(a) implement best blasting management practice on site to:

….

- *Minimise blasting impacts on heritage items in the vicinity of the site;*

…

The consideration of blasting impacts on items of Aboriginal cultural heritage is outlined in the MPO Blast Management Plan and is briefly described in Section 5.9.2 of this ACHMP.

Oral History

Schedule 3, Condition 35 of Development Consent DA 92/97 requires:

35. By the end of December 2013, the Applicant must prepare a detailed history of the Mount Pleasant locality to the satisfaction of the Secretary. This history must:

(a) be prepared by suitably qualified and experienced persons whose appointment has been endorsed by the Secretary;

(b) be prepared in consultation with the OEH, the local history society, local community (including former residents as far as is practicable), and Registered Aboriginal Parties;

(c) be prepared in accordance with the relevant the relevant Heritage Council of NSW guidelines; and

(d) include detailed historical research as well as an oral history.

The Oral History Report was prepared in 2004 (and subsequently reviewed in 2014). On 20 January 2014, then NSW Department of Planning and Infrastructure approved the report and advised that Schedule 3, Condition 35 of Development Consent DA 92/97 had been satisfied.

Statement of Commitments

Appendix 3 of Development Consent DA 92/97 provides a consolidated Statement of Commitments, which summarises the key management and mitigation measures for the MPO as documented in the EA prepared for MOD 1 (EMGA Mitchell McLennan, 2010). The undertakings made in the Statement of Commitments that pertain to Aboriginal cultural heritage are listed in Table 5. Cross references to where each is addressed in this ACHMP are also included.

Table 5
Relevant Statement of Commitments in Appendix 3 of Development Consent DA 92/97

Relevant Statement of Commitments Requirement	Relevant ACHMP Section
Aboriginal cultural heritage management will continue to be undertaken in accordance with relevant Applicant procedures.	This ACHMP.
Where site avoidance is impossible, cultural heritage management approaches that are set out in the CHMP for the Mount Pleasant Project area will be applied. This will include lodging an application for the relevant AHIPs under section 90 of the NPW Act.	This ACHMP.
Aboriginal cultural heritage sites that cannot be avoided will be mitigated by standard salvage collection measures in accordance with the Aboriginal Heritage Management Plan, following the issue of an AHIP (section 90, NPW Act).	Sections 2.4 and 5
The Aboriginal Heritage Management Plan will be revised to include the proposed modifications and any requirements specified by the regulator.	Section 9.2
Any mitigation salvage will be staged over time based upon mine operation plan requirements and the zoning regime of the Aboriginal Heritage Management Plan.	Section 5
All cultural materials collected will be stored in a storage facility to be established at the Mount Pleasant Project or VCA under an approved Care and Control Permit.	Section 5.12
All cultural heritage sites not affected by the proposed development will be managed in situ in accordance with the Aboriginal Heritage Management Plan procedures for long-term protective management and to minimise future development disturbance.	Section 5.8
Sites that are assessed as vulnerable to damage due to the proximity to roads and tracks or other operational infrastructure will be appropriately buffered and barricaded in accordance with existing site protection protocols including monitoring protocols.	Section 5.8

2.3.2 Management Plan (General) Requirements

Schedule 5, Conditions 2 of Development Consent DA 92/97 outlines the general requirements that are applicable to the preparation of all environmental management plans. Table 6 presents these requirements and indicates where each is addressed within this ACHMP.

Table 6
General Development Consent DA 92/97 Conditions

Development Consent DA 92/97 Schedule 5 Requirement	Relevant ACHMP Section
Management Plan Requirements	
2. The Applicant must ensure that the management plans required under this consent are prepared in accordance with any relevant guidelines, and include:	-
(a) detailed baseline data;	Section 2
(b) a description of:	
• *the relevant statutory requirements (including any relevant consent, licence or lease conditions);*	Section 2
• *any relevant limits or performance measures/criteria;*	Section 7
• *the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation of, the development or any management measures;*	Section 7
(c) a description of the measures that would be implemented to comply with the relevant statutory requirements, limits, or performance measures/criteria;	Sections 4, 5, 6 and 7
(d) a program to monitor and report on the:	Sections 9 and 10
• *impacts and environmental performance of the development;*	
• *effectiveness of any management measures (see c above);*	
(e) a contingency plan to manage any unpredicted impacts and their consequences;	Section 8
(f) a program to investigate and implement ways to improve the environmental performance of the development over time;	Section 9
(g) a protocol for managing and reporting any:	Section 10
• *incidents;*	
• *complaints;*	
• *non-compliances with statutory requirements; and*	
• *exceedances of the impact assessment criteria and/or performance criteria; and*	
(h) a protocol for periodic review of the plan.	Section 9
Note:	
The Secretary may waive some of these requirements if they are unnecessary or unwarranted for particular management plans.	

2.4 ABORIGINAL HERITAGE IMPACT PERMITS

In accordance with Part B, Condition B71 of Development Consent SSD 10418, MACH Energy will not undertake disturbance of Aboriginal objects not covered by a valid AHIP prior to approval of the ACHMP by the Planning Secretary.

MACH Energy holds three separate AHIPs relevant to the MPO area for the management of Aboriginal heritage, including:

- AHIP #C0004783 – approved by the OEH (now Heritage NSW) on 10 June 2019 for a period of 20 years.
- AHIP #C0002053 – approved by the OEH (now Heritage NSW) on 25 August 2016 for a period of 10 years.
- AHIP #C0002092 – approved by the OEH (now Heritage NSW) on 23 December 2011[2] for a period of 5 years. Transferred to MACH Energy on 8 September 2016 and varied on 3 December 2020 to extend the time period of the AHIP until 23 December 2026.

Under section 4.41 of the EP&A Act, an AHIP is not required for activities approved under Development Consent SSD 10418. However, while AHIPs #C0004783, #C0002053 and #C0002092 remain in force (prior to the surrender), MACH Energy must comply with all outstanding conditions of these AHIPs which includes site management requirements, consultation with RAPs and the submission of relevant reports and site recording forms. As discussed in Section 1.1, the surrender of Development Consent DA 92/97 will also include the surrender of AHIPs #C0002092, #C0004783 and #C0002053. This ACHMP will be revised and distributed for consultation within six months of the surrender of Development Consent DA 92/97 and the associated AHIPs (Section 1.1).

The extent of AHIPs #C0004783, #C0002053 and #C0002092 are presented on Figure 4.

As described in Schedule C2 of AHIPs #C0004783 and #C0002053, the permit applies to "*all Aboriginal objects in, on or under the land which is identified on the Figure (1) The lands to which this AHIP applies – AHIP extent for the Mount Pleasant Coal Mine Lease – ML 1645, Wybong and Kayuga Roads, MOUNT PLEASANT NSW 2333*". Although the AHIPs allow for the harm of Aboriginal cultural heritage objects, Schedule A of AHIP #C0004783 specifies those objects which must not be harmed.

Part A of AHIPs #C0004783 and #C0002053 authorises "*harm to all unknown Aboriginal objects within the AHIP application area*". However, Condition 6 of the AHIP requires that all human remains in, on or under the land must not be harmed (Section 5.11). Part B and C of AHIP #C0002092 authorises "harm of certain Aboriginal objects through certain actions" and "*harm of certain Aboriginal objects through proposed works*", respectively. However, Condition 7 of the AHIP requires that all human remains in, on or under the land must not be harmed (Section 5.11).

It is noted that by preference, works are currently being undertaken under AHIPs #C0004783 and #C0002053, however a brief mention of AHIP #C0002092 has also been provided for completeness. Notwithstanding, this ACHMP reflects the requirements of AHIPs #C0004783 and #C0002053 only. Note, works can occur with AHIP #C0002092 as long as management of Aboriginal cultural heritage is undertaken consistent with the conditions of AHIP #C0002092 and this ACHMP.

[2] Originally issued to Coal and Allied Operations as AHIP #11311247.

Figure 4

MAC-18-03A MP2024_ACHMP_202B

Table 7 presents a reconciliation of the key requirements of AHIPs #C0004783 and #C0002053 and indicates where each is addressed within this ACHMP. Table 7 provides a quick reference summary only and it is noted that prior to undertaking any actions affecting an Aboriginal cultural heritage site, the requirements and conditions of AHIPs #C0004783, #C0002053 and/or #C0002092 (or other relevant AHIP[s]) should be reviewed. Copies of AHIPs #C0004783, #C0002053 and #C0002092 are provided in Appendix I.

Table 7
Key Requirements of AHIPs #C0002053 and #C0004783

AHIP #C0002053 Condition	AHIP #C0004783 Condition	Key AHIP Requirement	Relevant ACHMP Section
7-10	N/A	Salvage excavation requirements	Section 5.3
11-14	9-12	Community collection requirements	Section 5.2
17-19	15-17	Temporary storage of certain Aboriginal objects	Section 5.12
6, 26	6, 21	Management of human remains	Section 5.11
27-29	22-24	Incidents and breaches	Sections 5.13 and 8
31-33	N/A	Salvage reporting requirements	Section 5.7

2.5 OTHER LEGISLATION AND REQUIREMENTS

Obligations from relevant guidelines, protocols, Australian Standards, codes or policies will be addressed in this ACHMP, in accordance with Part A, Condition A34 of Development Consent SSD 10418 and Schedule 2, Condition 13 of Development Consent DA 92/97 (prior to its surrender).

Aboriginal and Torres Strait Islander Heritage Protection Act, 1984

The Minister for the Environment and Water, responsible for the *Aboriginal and Torres Strait Islander Heritage Protection Act, 1984* (ATSIHP Act), has received an application pursuant to section 10 of the ATSIHP Act of relevance to the MPO ('the section 10 application'). The section 10 application seeks long-term preservation and protection of a claimed significant Aboriginal area being the areas known as the MPO and The Pocket, near Muswellbrook.

The specified area outlined in the section 10 application overlies the MPO Development Application area, as well as areas of the Mt Arthur Coal Mine and Bengalla Mine. MACH Energy opposes the making of any declaration in relation to the section 10 application and the Minister for the Environment and Water is currently in the process of reviewing relevant documentation to inform a decision in response to the section 10 application.

2.6 PREVIOUS ARCHAEOLOGICAL SURVEYS CONDUCTED AT THE MOUNT PLEASANT OPERATION

An updated Aboriginal Heritage Site Database was developed for the MPO by South East Archaeology in 2020 (and has since been updated). The Aboriginal Heritage Site Database is based on numerous archaeological surveys and assessments undertaken at the MPO and is updated after each cultural heritage assessment and archaeological survey. Previous investigations undertaken at the MPO, and immediate surrounds include (but are not limited to):

- Aboriginal cultural heritage assessments and archaeological surveys for the MPO:
  - *Mt Pleasant Coal Lease, New Muswellbrook, NSW: Archaeological survey for Aboriginal sites* (Rich, 1995).
  - *Mt Pleasant Mine EIS North-West Emplacement Area Archaeological Investigations* (ERM Mitchell McCotter, 1996).

  - *Mt Pleasant Mine EIS Fine Rejects Emplacement Area Archaeological Investigations* (ERM Mitchell McCotter, 1997b).
  - *Aboriginal Heritage Assessment: Mount Pleasant Block 1* (HLA-Envirosciences, 2007).
  - *Mount Pleasant Indigenous Archaeological Assessment Stage 2* (McCardle Cultural Heritage Management, 2007).
  - *Aboriginal Cultural Survey Stage 3 Mount Pleasant, NSW* (Roberts, 2007).
  - *Coal & Allied Stage 4 Mount Pleasant Aboriginal Cultural and Heritage Report* (Nur-Run-Gee, 2007).
  - *Technical Advisor Report: Cultural Heritage Investigations Stage 5 Mount Pleasant Mine, Hunter Valley* (Scarp Archaeology, 2009).
  - *Technical Advisor Report: Cultural Heritage Investigations, Conveyor Easement Survey, Mount Pleasant Mine, Hunter Valley* (Scarp Archaeology, 2010a).
  - *Technical Advisor Report: Cultural Heritage Investigations of the Proposed Broomfield Aboriginal Cultural Heritage Conservation Area for the Mount Pleasant Coal Mine, Hunter Valley, Muswellbrook LGA* (Scarp Archaeology, 2010b).
  - *Mount Pleasant Project Modification Aboriginal Cultural Heritage Assessment* (Central Queensland Cultural Heritage Management, 2010).
  - *Technical Advisor Preliminary Advice: Cultural Heritage Investigations – Mount Pleasant Mine, Hunter Valley Stage 6* (Scarp Archaeology, 2011).
  - *Cultural Heritage Investigation of the Mount Pleasant Over land Conveyor – Additional Assessment, Hunter Valley, Muswellbrook LGA* (Scarp Archaeology, 2015).
  - *Aboriginal Cultural Heritage Assessment Report for the Mount Pleasant Coal Mine (DA 92/97) 2016 Aboriginal Heritage Impact Permit Application* (Cameron and Deacon, 2016).
  - *Report on Aboriginal Heritage Due Dilligence Assessment of Proposed Water Supply Pipeline at Mount Pleasant Operation, Hunter Valley, NSW* (Kuskie, 2016).
  - *Mount Pleasant Operation Rail Modification – Aboriginal Cultural Heritage Assessment* (Niche, 2017).
  - *Aboriginal Objects Due Dilligence Assessment Mount Pleasant Operations ETL Realignment Muswellbrook, NSW* (Niche, 2019a).
  - *Aboriginal Objects Due Dilligence Assessment Mount Pleasant Operations Clean Water Diversion Muswellbrook, NSW* (Niche, 2019b).
  - *Mount Pleasant Optimisation Project – Aboriginal Cultural Heritage Assessment* (South East Archaeology, 2020a).
  - *Mount Pleasant Optimisation Project – Aboriginal Cultural Heritage Assessment – Addendum Report to Address Minor Amendments* (South East Archaeology, 2020b).
  - *Mount Pleasant Optimisation Project – Supplementary Desktop Analysis Report* (Niche, 2021).
- Various scarred tree reassessments undertaken for the MPO (Kuskie, 2017a, 2017b, 2017c and 2019; Burns, 2017a, 2017b and 2017c; Global Soil Systems, 2019).
- Various archaeological assessments and surveys and salvages undertaken for the Bengalla Coal Mine (Rich, 1993; Environmental Resources Management Australia, 2007a; White, 1998; AECOM, 2013, 2017).
- Various archaeological salvage reports (Environmental Resources Management Australia, 2007b; ENSR Australia, 2008; RPS, 2018; Kuskie, 2020; Niche, 2023).
- Ongoing salvage, investigations and Aboriginal cultural heritage management activities at the MPO.

2.7 ABORIGINAL CULTURAL HERITAGE SITES

Known Aboriginal cultural heritage sites within Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender) boundary are summarised in Table 8, and all sites and the associated management requirements are listed in Appendix E. Note, the sites located within the Aboriginal Heritage Conservation Area A, will be managed separately, as detailed in the Aboriginal Conservation Area A Conservation Management Plan (CMP). This is discussed further in Section 4.4.1.

Table 8 includes the sites that are located to the south of Wybong Road and are also outside the approved AHIP boundaries. These sites are located within or in close proximity to disturbance associated with the Bengalla Mine and therefore are managed by the New Hope Group (Appendix E).

As well as the known Aboriginal cultural heritage sites listed in Appendix E, this ACHMP (and associated AHIPs) also addresses any previously unknown Aboriginal heritage evidence within the MPO area. The location of all known Aboriginal cultural heritage sites within and adjacent to the MPO ML boundary are illustrated on Figure 3. This figure also includes sites previously reported sites that have been verified as not being of Aboriginal origin (Appendix E).

Table 8 summarises all known Aboriginal cultural heritage sites (current as at August 2024) associated with the MPO area (Figure 3).

Table 8
Summary of Known Aboriginal Cultural Heritage Sites

Site Type	Approximate Number of Sites
Artefact Scatter	938
Artefact Scatter and PAD	28
Isolated Artefact	968
Isolated Artefact and PAD	9
Non-site (re-assessed to not be a site)	41
Scarred Tree	13
Scarred Tree and Isolated Artefact	1
Spiritual Place	1
Total	**1999**

Source: MPO Aboriginal Heritage Site Database (current as at August 2024), South East Archaeology (2020a and 2020b), AHIMS database.
PAD = Potential Archaeological Deposit.

As a result of previous assessments and archaeological salvage investigations at the MPO, approximately 1,105 previously recorded Aboriginal cultural heritage sites have already been salvaged or impacted under permitted impacts associated with AHIPs #C0002092, #C0002053 and #C0004783 or under the Bengalla Mine ACHMP and require no further management (as at August 2024). The status of all known AHIMS registered Aboriginal cultural heritage sites at the MPO is indicated in Appendix E.

The MPO Aboriginal Heritage Site Database (Appendix E) has been updated in accordance with the management measures from the Project ACHA (South East Archaeology, 2020a and 2020b). Changes to the management of known Aboriginal cultural heritage sites listed in Appendix E may be required as a result of progressive updates to the MPO Aboriginal Heritage Site Database or as the results of any actions or management undertaken in accordance with this ACHMP.

For example, an increase to the spatial extent of a site may result in a change in the level or type of impact, and hence require an update to the proposed management of the site. Any changes to the management proposed for any of the sites described in Appendix E will be undertaken based on advice from a suitably qualified archaeologist and in consultation with the attending representatives of the RAPs. Certain changes to the proposed management of known Aboriginal cultural heritage sites that result in a revision to this ACHMP (i.e. where there is a reduction in the level of management required for a given site due to change in significance as what was detailed in the Project ACHA [South East Archaeology, 2020a and 2020b]) will also require DPHI review and approval (Section 9.2).

MPO Aboriginal Heritage Site Database Audit

Following an audit of the MPO Aboriginal Heritage Site Database against the AHIMS database and the management measures outlined in the Project ACHA (South East Archaeology, 2020a and 2020b), Appendix E has been updated to ensure that the management actions of the sites contained within these datasets are consistent and reflect those specified in the Project ACHA (South East Archaeology, 2020a and 2020b).

In the future, if there are any change to the management measures compared to those specified in the Project ACHA (South East Archaeology, 2020a and 2020b), justification of the change to the management action (e.g. site no longer impacted, site reassessed as per Project ACHA) will be recorded in Appendix E. Additionally, any new management activities proposed have been clearly documented and reviewed by a suitably qualified archaeologist.

A number of sites will require the submission of an Aboriginal Site Impact Recording Form to update either the site location or site status. The Aboriginal Site Impact Recording Forms will be submitted to Heritage NSW by the end of August 2024. The MPO Aboriginal Heritage Site Database and Appendix E of the ACHMP will be updated as needed.

2.8 ABORIGINAL CULTURAL HERITAGE VALUES

The Aboriginal Cultural Heritage Assessments prepared in support of the 1997 EIS (Rich, 1995; ERM Mitchell McCotter, 1996; ERM Mitchell McCotter, 1997b) concluded that generally, "*the study area has low archaeological potential to provide specific information on regional issues of past Aboriginal use of the landscape as it was consistent with other archaeological resources in the region*" (ERM Mitchell McCotter, 1996). Based on the level of disturbance, limited ground exposure, landforms and topography it was concluded that the area was generally of low archaeological potential.

Aboriginal community representatives have expressed the view that cultural heritage material and sites of all types are of cultural significance as they provide a tangible link to their ancestry and to Country (Central Queensland Cultural Heritage Management, 2010). MACH Energy acknowledges the cultural significance of all Aboriginal cultural heritage sites and objects to the local Aboriginal community.

The Aboriginal Cultural Heritage Assessment prepared in support of the Project EIS includes an Aboriginal Cultural Values Report by Environmental & Cultural Services (2020), commissioned by South East Archaeology (2020a) to conduct a further assessment of intangible Aboriginal cultural values. The Aboriginal Cultural Values Report (Environmental & Cultural Services, 2020) was prepared based on:

- review of relevant background resources, including various ethnographic data, heritage registers and relevant literature;
- consultation with selected RAPs via telephone interviews and emails; and
- consultation data analysis.

The Aboriginal Cultural Values Report (Environmental & Cultural Services, 2020) highlighted key cultural heritage themes associated with the MPO and the surrounding landscape, including the important cultural connections held by Aboriginal people today to the ancestral past through archaeological objects such as open artefact sites. Several cultural values associated with the Wanaruah[3] people were identified:

- the resistance of Wanaruah ancestors to colonisation is valued;
- the past acts are an integral part of contemporary Wanaruah cultural identity and form part of people's attachment to place;
- the customary right to care for and make decisions about one's traditional land is important; and
- the ongoing cultural use of natural resources across the landscape is an important cultural practice.

Environmental & Cultural Services (2020) did not identify any specific sites or areas of cultural significance that require Aboriginal Place Declaration under the NP&W Act or scheduling as an Aboriginal Heritage Conservation Area in the Muswellbrook Local Environmetnal Plan under the EP&A Act. Environmental & Cultural Services (2020) did not identify any specific sites or cultural areas that require specific mitigation recommendations.

The mitigation, management and monitoring measures detailed in the Project EIS were developed in consultation with the RAPs, in consideration of the cultural and archaeological significance of the Aboriginal cultural heritage sites predicted to be impacted, and the cultural significance of the area. South East Archaeology (2020a and 2020b) provided recommended management measures for each known Aboriginal cultural heritage site of relevance to the Project and these recommendations have been incorporated into this ACHMP. The recommended management measures for all known Aboriginal cultural heritage sites are included in Appendix E.

[3] It is understood that both "Wonnarua" and "Wanaruah" have been used to describe population groups in different contexts. The spelling variations can be attributed to oral histories and limited written documentation that identifies traditional population groups and sub-communities. The Wanaruah language group was reportedly the largest in the region pre-European settlement (South East Archaeology, 2020a).

3 PROTOCOL FOR ONGOING INVOLVEMENT OF THE ABORIGINAL COMMUNITY

MACH Energy acknowledges that Aboriginal cultural heritage is of primary interest to the Aboriginal community and that Aboriginal people have the right to be consulted and involved in relation to the management of their heritage. MACH Energy recognises that the Aboriginal community has a paramount role in identifying cultural significance and cultural heritage values.

3.1 REGISTERED ABORIGINAL PARTIES

The RAPs for the MPO have been identified through previous consultation undertaken for the original EIS (ERM Mitchell McCotter, 1997a), the MPO Modification EA (EMGA Mitchell McLennan, 2010), the applications for AHIPs #C0004783, #C0002053 and #C0002092, the consultation regarding the Project EIS (South East Archaeology, 2020a and 2020b) and the ongoing management of Aboriginal cultural heritage on-site.

A list of the 87 RAPs for the MPO (at the time of preparation of this ACHMP) is provided in Appendix D. This list may be updated from time to time as needed.

3.2 ONGOING CONSULTATION WITH REGISTERED ABORIGINAL PARTIES

MACH Energy is committed to maintaining ongoing consultation with RAPs throughout the life of the MPO. However, it is the responsibility of RAPs to ensure that any changes to contact details (e.g. full name, postal address, telephone number, email address etc.) are provided in a timely manner to MACH Energy. These details will be updated on the register of RAPs which will be maintained by MACH Energy over the life of the MPO.

Ongoing consultation with RAPs will occur via meetings (as well as all other correspondence and communications required by this ACHMP) throughout the life of the MPO. Meetings will be open to all RAPs and will provide a forum for RAPs to raise any issues they may have regarding the MPO and the ongoing management of Aboriginal heritage, and for MACH Energy to provide updates.

Meetings with RAPs will be convened at least annually by MACH Energy. Issues and matters that may be discussed in the meetings include (but are not limited to):

- mine progress;
- proposed heritage fieldwork;
- review of this ACHMP;
- key results of any heritage investigations (including the outcomes of salvage activities); and
- updates on the Aboriginal Heritage Conservation Strategy.

RAPs will be notified of upcoming meetings with a minimum of 10 business days notice provided. Aboriginal community members other than RAPs may attend individual meetings, if agreed by MACH Energy prior to the meeting.

Additional meetings with RAPs may be held on an as required/requested basis if agreed by MACH Energy.

3.3 FIELD INVESTIGATION INVOLVEMENT OF REGISTERED ABORIGINAL PARTIES

MACH Energy acknowledges that Aboriginal heritage is of primary interest to the Aboriginal community and that Aboriginal people have the right to be consulted and involved in relation to the management of their heritage.

MACH Energy recognises that under the NSW *Aboriginal Land Rights Act 1983*, the Wanaruah Local Aboriginal Land Council (LALC) is the representative (and statutory) body responsible for the provision of advice and knowledge in relation to Aboriginal matters in relation to the area within the extent of the Wanaruah LALC boundary. The MPO area is located within the Wanaruah LALC boundary. Further, MACH Energy acknowledges that consultation with and the input of Registered Native Title Claimants (under the Commonwealth *Native Title Act 1993*) and other RAPs is also important to the assessment, management and preservation of Aboriginal cultural heritage values at the MPO.

3.3.1 Administrative Coordinators

A previously approved Aboriginal Heritage Management Plan (Rio Tinto, 2014) described the use of a number of 'administration coordinators' for the provision of administrative services associated with the management of Aboriginal cultural heritage at the MPO. These persons/groups have been identified as RAP representatives that facilitate employment for local Aboriginal people.

Administration coordinators will continue to be used by MACH Energy as necessary to facilitate the provision of skilled personnel to undertake works including (but not limited to) Aboriginal cultural heritage survey/field work/salvage (and/or other heritage management works required by this ACHMP), supervising survey work rosters, payment of wages to attending representatives, organisation of community meetings (as required) and providing assistance with community consultation regarding the management of Aboriginal cultural heritage at the MPO.

However, the administration coordinators may be subject to change and update, as required. For example, MACH Energy may update the list of administration coordinators as per DCCEW [2010] guideline *Aborignal cultural heritage consultation requirements for proponents 2010*). Administrative coordinators will be required to have the necessary skills and experience such as demonstrated qualifications in cultural heritage, skills or experience in the conduct of heritage studies in the local area, specific cultural knowledge of the MPO area and/or ability to report the results to the broader Aboriginal community and may be commissioned to provide any of the following services:

- administration, such as organising meetings and arranging venues, transport, etc.;
- facilitating aspects of the consultation on behalf of MACH Energy; and
- assisting RAPs to contribute to the consultation process (e.g. assisting in writing submissions).

It is noted that regardless of representing the Wanaruah LALC or being a member of a Registered Native Title Claimant group, all RAP representatives who satisfy the requirements as identified in the administration coordinator application form are eligible to be considered for engagement. A copy of an example administration coordinator application form is provided in Appendix H.

3.3.2 Involvement of RAPs in Field Investigations

The following process will be undertaken for the involvement of the RAPs in field investigations at the MPO:

- With the assistance of the administrative coordinators, MACH Energy will engage representatives of the RAPs (where available[4]) to carry out field activities (post, current and future) according to any commercial agreements they have entered into with MACH Energy to participate in archaeological survey, collection, excavation, monitoring and/or management required under this ACHMP.

[4] Subject to suitable notification requirements being met by MACH Energy (i.e. five business days), the fieldwork/salvage (and/or other heritage management works required by this ACHMP) may commence to avoid unnecessary delays to operations at the MPO.

- Where the methodology is consistent with that already approved by the RAPs for the MPO or in this ACHMP, MACH Energy will provide the RAPs engaged for any field investigation with a minimum of five business days notice of the date of commencement of the field investigation, unless a shorter period is agreed to by the engaged stakeholders. MACH Energy will provide safe access to the investigation area and induct representatives to an appropriate level for Workplace Health and Safety purposes.
- Where the methodology is different from that already approved by the RAPs for the MPO or in this ACHMP, MACH Energy will:
  - provide the attending RAPs with a copy of the Proposed Methodology for any forthcoming archaeological salvage collection or excavation and allow a minimum of 14 calendar days for the RAPs to provide comment, including identification of issues or areas of cultural significance that might affect, inform or allow refinement of the methodology. The Proposed Methodology will include relevant mapping and figures; and
  - MACH Energy will document and consider all comments received from the attending RAPs in the finalisation of the methodology.
- The RAPs will provide suitably qualified and/or experienced representatives to participate in archaeological survey, collection, excavation or monitoring required under this ACHMP. The representatives will comply with all reasonable requirements of MACH Energy at all times when at the MPO.
- All reports produced in regard to surface collection, test excavation and/or analysis will include comments provided by the attending RAPs in the field in regard to cultural significance, values or features of the sites and/or area. All attending RAPs will be provided draft copies of the salvage reports for review and comment prior to finalisation. MACH Energy will then provide all RAPs with final copies of all heritage reports produced under this ACHMP.
- All reports produced in regard to additional survey work and/or assessment will be provided to all RAPs for their review and comment prior to finalisation. All comments received within 15 business days will be considered by MACH Energy.

The MPO Workplace Health and Safety and insurance requirements are subject to periodic review and updates by MACH Energy outside of the requirement for this ACHMP to be revised. All contractors, including participating archaeologists and RAPs, will be notified of any relevant changes to fieldwork workplace health and safety and/or insurance requirements and it is the responsibility of attending RAPs to ensure that current insurances are provided prior to commencement of any works.

Notwithstanding the above, in the event that the relevant administration coordinators are unable to assist as required, MACH Energy retains the right to engage other RAPs to provide these services as needed. The above process does not exclude any Aboriginal person or party, regardless of their association with either of these groups or not, from being consulted in relation to the MPO and the management of heritage under this ACHMP.

4 ABORIGINAL HERITAGE CONSERVATION STRATEGY

As described in Section 2.2.1, Part B, Condition B69(d)(xi) requires the facilitation of ongoing consultation and involvement of RAPs regarding the conservation and management of Aboriginal cultural heritage on the site and in the area.

Further, as described in Section 2.3.1, Schedule 3, Condition 33 of Development Consent DA 92/97 (prior to its surrender), requires the preparation and implementation of an Aboriginal Heritage Conservation Strategy for the MPO.

The following conditions provide for the establishment of a strategy for the conservation and management of Aboriginal cultural heritage values within a defined conservation area and/or the establishment of other conservation measures and/or a combination of the two:

- Part B, Condiition B69 of Development Consent SSD 10418:

  …

  (d) describe the measures to be implemented on the site to:

  …

  (iv) establish alternative Aboriginal cultural heritage conservation areas (Areas B and C), or otherwise agreed alternative conservation areas, or other agreed conservation measures, within 12 months of commencement of development under this consent;

  (v) maintain all Aboriginal cultural heritage conservation areas (Areas A, B and C), or otherwise agreed alternatives, throughout the life of the project;

  …

  (xi) facilitate ongoing consultation and involvement of Registered Aboriginal Parties in the conservation and management of Aboriginal cultural heritage on the site and in the area, in accordance with the commitments made in the document/s listed in condition A2(c); …

- Schedule 3, Condition 33 of Development Consent DA 92/97:

  33. The Applicant must prepare an Aboriginal Heritage Conservation Strategy for the development to the satisfaction of the Secretary. This strategy must:

  (a) be prepared by suitably qualified and experienced persons whose appointment has been endorsed by the Secretary;

  (b) be prepared in consultation with Heritage NSW and the Registered Aboriginal Parties;

  (c) be submitted to the Secretary for approval prior to carrying out any development on site;

  (d) provide for the establishment and conservation of an off-site Aboriginal cultural heritage conservation area/s that has comparable Aboriginal cultural heritage values (both cultural and archaeological) to the areas that would be developed on site;

  (e) describe the measures that would be implemented to provide appropriate long term security for the proposed Aboriginal cultural heritage conservation areas; and

  (f) include an action plan for the implementation of the strategy.

  The detailed measures for the implementation of the strategy are to be outlined in the Heritage Management Plan (see condition 36).

  The Applicant must implement the approved strategy as approved from time to time by the Secretary. Note: The Aboriginal cultural heritage conservation area/s may be combined with any similar offset/conservation area required for the development under Commonwealth legislation, subject to suitably offsetting the cultural heritage impacts of the development.

An overview of Section 4 is detailed below:

- Section 4.1: Provides an overview of the Aboriginal Heritage Conservation Area at the MPO.
- Section 4.2: Describes the Aboriginal Cultural Heritage Conservation measures.
- Section 4.3: Describes the long-term security of the Aboriginal Heritage Conservation Area.
- Section 4.4: Describes the action plan for the implementation of the Aboriginal Heritage Conservation Strategy.

4.1 ABORIGINAL HERITAGE CONSERVATION AREA FOR THE MOUNT PLEASANT OPERATION

A draft Aboriginal Heritage Conservation Strategy was initially prepared in consultation with the RAPs and the OEH (now Heritage NSW) in 2010, and since that time has been the subject of extensive and ongoing consultation.

The originally proposed Aboriginal Heritage Conservation Areas consisted of Areas A, B and C, which extended over an area of approximately 714 hectares (ha) (including a portion of the Broomfield property) and are located to the west of the MPO (i.e. immediately adjacent to the western boundary of ML 1645) (refer to Figure 4). Aboriginal Heritage Conservation Area A comprises two separate areas, a southern portion measuring 79.8 hectares, and a northern portion measuring 248.2 hectares, for a total of 328 hectares (Figure 4).

An existing CMP for Aboriginal Heritage Conservation Area A has been prepared to address relevant aspects of Schedule 3, Conditions 33 and 34 of Development Consent DA 92/97. The Conservation Area A CMP outlines specific measures for the management and protection of Aboriginal heritage, including in regard to:

- Bushfire management and mitigation measures.
- Weed control.
- Cultural cool burns.
- Pest fauna control.
- Sediment and erosion control.
- Fencing and signage of sites as required.
- Aboriginal community access to Aboriginal cultural heritage sites or areas.
- Natural values.
- Scientific research values.
- Educational use.
- Recreational use.

The Project EIS proposed alternative conservation measures for the provisional Aboriginal Conservation Areas B and C in consultation with the RAPs and Heritage NSW. MACH Energy will establish an alternative to Aboriginal Conservation Areas B and C, in the form of other agreed conservation measures, within 12 months of the commencement of development under Development Consent SSD 10418.

Prior to any future impacts to any sites previously proposed under the provisional Aboriginal Conservation Areas B and C (Appendix E), the sites will require a reassessment of potential impacts, with detailed design. This will be undertaken in consultation with the RAPs and Heritage NSW.

The appropriate management strategy for these sites is dependent on level of impacts, site type and significance. The management strategy for these sites is included in Appendix E.

The alternative to Conservation Areas B and C is described further in Section 4.2.

4.2 ABORIGINAL CULTURAL HERITAGE CONSERVATION MEASURES

In accordance with Part B, Condition B69(d)(iv), MACH Energy has elected to establish alternative conservation measures which includes the Keeping Place (Lot 1, DP 192121) (Section 4.2.1) and the Munmurra River Grinding Groove site (Section 4.2.2).

4.2.1 Keeping Place

Following extensive consultation with RAPs and Heritage NSW, MACH Energy has established a permanent Keeping Place, cultural hub and 'Yarning Circle' (Figure 5 and Plate 1).

Under section 85A(1)(c) of the NSW *National Parks and Wildlife Act 1974*, an application for the transfer of Aboriginal objects within AHIPs #C0002053, #C0004783 and #C0002092 from the Broomfield Homestead Complex to the Keeping Place (Lot 1, DP 192121) for safe keeping was lodged by MACH Energy to Heritage NSW on 1 June 2022. MACH Energy satisfied the requirements set by Heritage NSW and the application was approved on 2 November 2022 to transfer the Aboriginal objects from the Broomfield Homestead Complex to the Keeping Place under Care Agreement 4892.

The Keeping Place is located on Kayuga Road, approximately 4 km from Muswellbrook, owned by MACH Energy and is currently leased for grazing. The Keeping Place includes a boundary with the Hunter River and therefore has potential for cultural interactions with Country. Various works have already been completed on the Keeping Place such as installation of internal and external property fence lines allowing access to Hunter River. An existing, secure shed stands on the property and is the Keeping Place location. There are proposed works scheduled to improve the infrastructure and provide a long-term and secure facility to enable gatherings to be held at the property.

The Keeping Place is a neutral location that is not owned or closely linked with any one party. It is also close to the MPO and Muswellbrook, which provides more opportunities for the facility to be used. These opportunities could include increased site tours and opportunities to participate in relevant celebrations onsite.

Plate 1: Entrance to the Keeping Place

MACH Energy will continue to consult with RAPs and Heritage NSW to provide updates on ongoing and future works to the Keeping Place through the Annual RAPs meetings (Section 3.2).

MOUNT PLEASANT OPERATION

Keeping Place

Figure 5

4.2.2 Munmurra River Grinding Grooves

A site inspection held on 2 May 2023 within the MPO biodiversity offset area north-east of Cassillis, NSW identified an extensive grinding groove site along the bank of the Munmurra River. The inspection was conducted by a representative of Niche, MACH Energy and Mudgee LALC. With the support of the RAPs and Heritage NSW, MACH Energy proposed the identified Munmurra River Grinding Grooves as an *in situ* Conservation Area (Figure 6). The Munmurra River Grinding Grooves site is proposed to be registered and protected in perpetuity as part of the Conservation Agreement under the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999*, through its registration on AHIMS and by demarcation (fencing) the site and excluding cattle.

The site is approximately 150 metres (m) x 30 m in size and runs parallel to the southern bank of the Munmurra River (Figure 6). The site consists of large flat sandstone outcrops with approximately eighty– seven (87) grinding grooves recorded across four sandstone outcrops (Plate 2). The sandstone outcrops, identified as sandstone outcrops 1 – 4, running east to west respectively, are located along the river's edge and were all covered by moderately dense leaf litter (Plate 3).

Plate 2: Sandstone outcrop.

Plate 3: General location shot of Munmurra River.

The Munmurra Grinding Grooves site has been assessed to have high cultural, scientific and aesthetic values (Niche, 2024), noting:

- The site is notable for a high number of grooves (total = 87).
- It is situated within an archaeologically sensitive landform (waterways i.e. Munmurra River) and the area was likely a high-activity area.
- The site has research value as grinding groove analysis could be undertaken on a number of the grooves with potential research investigating use-wear and residues.
- The site contains elevated outcrops that allow for a view of mountain ranges and landscape feature focal points within the broader landscape in addition to the vista of the upstream and downstream of the Munmurra River.

The Munmurra River Grinding Groove site was unregistered and unknown prior to the May 2023 inspection commissioned by MACH Energy in response to direct feedback from Heritage NSW regarding the additional conservation measures.

The surrounding area has been historically disturbed through vehicular access, associated tracks and farming (cattle). The demarcation (fencing) of the site and registration with AHIMS by MACH Energy as a result of its identification, will increase the protection of this site both immediately and in the long-term.

The site has teaching and educational value that would not be realised through protection of the area for biodiversity alone.

MACH Energy will investigate options to update the current lease agreement to enable controlled access to the site for the RAPs.

MACH Energy will provide supervised access for RAPs to visit this site for teaching and research purposes. MACH Energy is committed to facilitating reasonable access consistent with personnel Workplace Health and Safety requirements in addition to constraints within the existing lease agreement. RAPs access to this site is discussed further in Section 5.15.

4.2.3 Long-term Protection and Management of Sites

The long-term protection and management of Aboriginal Heritage Conservation Area A has been developed in a separate document (Aboriginal Heritage Conservation Area A CMP) in consultation with Heritage NSW and the RAPs. Currently, the security of Aboriginal Heritage Conservation Area A is being finalised with DPHI. The management measures may include (but are not limited to) the following:

- All relevant databases for cultural heritage (e.g. the MPO Aboriginal Heritage Site Databases) would make appropriate note of the boundaries of the Aboriginal Heritage Conservation Area, including geospatial co-ordinates and shape files, and clear statements of heritage significance for each site.
- Erection of signs (where appropriate) in the vicinity of the Aboriginal Heritage Conservation Area that state that the area is environmentally sensitive, and that unauthorised access is prohibited.
- Access to Aboriginal Heritage Conservation Area would be restricted by appropriate means (e.g. access will be required to be authorised by the Environmental Superintendent [or relevant equivalent], appropriate fencing and locks etc.).
- The prohibition of unauthorised entry (e.g. entry will only be authorised by the MACH Energy Environmental Superintendent [or relevant equivalent] for the purposes of environmental management or cultural reasons).
- The prohibition of ground disturbance without the consultation of the relevant management measures applicable to the Aboriginal Heritage Conservation Area described in either this plan or other Aboriginal Heritage Conservation Area document.
- Inclusion of the Aboriginal Heritage Conservation Area within the cultural awareness training and site induction program.
- Ongoing consultation with the RAPs in the conservation and management of Aboriginal cultural heritage within the Aboriginal Heritage Conservation Area.
- Maintenance of an Aboriginal sites database for any sites identified within the Aboriginal Heritage Conservation Area.
- Any other reasonable request from the RAPs.

The management of Aboriginal Heritage Conservation Area A is discussed further in Section 4.1.1.

The above management will also be considered for the Munmurra River Grinding Grooves site and is discussed in Section 4.4.1.

4.2.4 Enhancement and Conservation of Aboriginal Heritage

Additional options that will be considered by MACH Energy for enhancing and conserving Aboriginal cultural heritage values include:

- Consideration of a program for undertaking an Aboriginal cultural heritage educational documentation for use as an educational tool/resource by the local and wider Aboriginal community.
- Consideration of the development of educational displays or materials of local plants and animals and traditional materials to enhance education and connection to Country.
- Additional site inspections to allow the Aboriginal community to experience connection with Country and to view a selection of the recorded sites.
- Any other reasonable request from the RAPs.

These options would be evaluated, and if considered warranted, may be incorporated into this ACHMP or other Aboriginal Heritage Conservation Area document. This would occur at least annually at the Annual RAPs meeting and upon receipt of an appropriate application or proposal from a RAP.

4.3 LONG-TERM SECURITY OF THE ABORIGINAL HERITAGE CONSERVATION AREA

In accordance with Schedule 3, Condition 34 of Development Consent DA 92/97 (prior to its surrender), within 2 years of the approval of the Aboriginal Heritage Conservation Strategy, MACH Energy will demonstrate to the satisfaction of the Planning Secretary of the DPHI that it has made suitable arrangements to provide appropriate long-term security for the Aboriginal Heritage Conservation Area.

An application was submitted in July 2019 to DPE (now DPHI) to place a covenant under section 88(3) of the NSW *Conveyancing Act, 1919* over Aboriginal Heritage Conservation Area A. Currently, the security of Aboriginal Heritage Conservation Area A is being finalised with DPE (now DPHI). MACH Energy will continue to progress this process with DPHI. An Aboriginal Heritage Conservation Area A CMP was also developed in consultation with the RAPs.

4.4 ACTION PLAN FOR THE IMPLEMENTATION OF ABORIGINAL HERITAGE CONSERVATION STRATEGY

The following key steps will be undertaken by MACH Energy in order to implement the Aboriginal Heritage Conservation Strategy:

1. Currently, the security of Aboriginal Heritage Conservation Area A is being finalized with DPE (now DPHI). MACH Energy will continue to progress this process with DPHI. The draft Aboriginal Heritage Conservation Area A CMP, which was developed in consultation with the RAPs, will also be reviewed and updated to allow for land use consistent with the objective of preserving cultural heritage values. In addition to allowing low impact land use such as grazing to control vegetation and fire risk.
2. Ongoing infrastructure works associated with the Keeping Place in addition to determining the entity which will be managing regular access with RAPs.
3. Registration of the Munmurra River Grinding Groove site in the AHIMS registrar, in addition to being secured, cattle excluded and protected in perpetuity as part of the Conservation Agreement under the Commonwealth *Environment Protection and Biodiversity Conservation Act, 1999.*

4.4.1 Management of Aboriginal Heritage Conservation Area A

As described above, as part of establishing Aboriginal Heritage Conservation Area A, MACH Energy has developed specific management measures for the management of Aboriginal cultural heritage as required by Condition 33, Schedule 3 of Development Consent DA 92/97 and relating to the protection of cultural values.

The management measures have been incorporated into a separate Aboriginal Heritage Conservation Area document (i.e. the CMP that was lodged with the application for a convenant under section 88(3) of the NSW *Conveyancing Act, 1919*) and includes the following:

- Bushfire management and mitigation measures.
- Weed control.
- Cultural cool burns.
- Pest fauna control.
- Sediment and erosion control.
- Fencing and signage of sites as required.
- Aboriginal community access to Aboriginal cultural heritage sites or areas.
- Natural values.
- Scientific research values.
- Educational use.
- Recreational use.

The Aboriginal Heritage Conservation Area A will be managed in a separate CMP. The Conservation Area A CMP includes the management measures for a total of 73 Aboriginal sites[5] are reported wholly or partially within Conservation Area A, comprising 49 open artefact sites and 18 open artefact sites/PADs and six scarred trees. Once the Conservation Area A CMP is approved, a separate database of the sites within Conservation Area A will be created and maintained by MACH Energy (in consultation with the RAPs and Heritage NSW).

In accordance with Part B, Condition B69 of Development Consent SSD 10418, MACH Energy will progress the Keeping Place and the Munmurra River Grinding Grooves site as the replacement to Aboriginal Heritage Conservation Areas B and C. Once the management measures of the Keeping Place are established in consultation with the RAPs and Heritage NSW, the management measures of the Keeping Place will be incorporated into a separate Aboriginal Heritage CMP document (similar to the Aboriginal Heritage Conservation Area A CMP). As the Munmurra River Grinding Groove site is located on the MPO biodiversity offset area, the protection of this site will be managed in accordance with Heritage NSW *Due Diligence Code of Practice of the Protection of Aboriginal Objects in New South Wales* (DECCW, 2010b). The location and information relating to cultural heritage sites will be stored and accessed from the online Biodiversity Offsets Portal.

[5] Includes 6 sites subsequently reassessed not to be Aboriginal Sites, in accordance with the Aboriginal Heritage Conservation Area A CMP.

5 MANAGEMENT OF ABORIGINAL HERITAGE

This section outlines the management and mitigation measures[6] for identified and potential Aboriginal cultural heritage sites at the MPO, consistent with the requirements of Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender) and the requirements of the approved AHIPs #C0004783 and #C0002053 (or other relevant approved AHIP[s]).

At all times all relevant Conditions of AHIPs #C0004783, #C0002053 and #C0002029 will be adhered to. As such, prior to undertaking any actions affecting an Aboriginal cultural heritage site within the AHIP area, the requirements and conditions of AHIPs #C0004783, #C0002053 and #C0002029 (or other relevant AHIP[s]) should be reviewed.

5.1 ADDITIONAL SURVEY REQUIREMENTS

For all potential direct disturbance areas (e.g. for ancillary infrastructure) or where potential impacts will occur within the MPO and the area has not previously been subject to heritage survey or assessment, MPO will engage a suitably qualified archaeologist and representatives of the RAPs to undertake a heritage survey of that area prior to undertaking any ground disturbance works.

The Project EIS assessed two alternative Northern Link Road realignments; however, the detailed design of the preferred realignment is still being refined, pending property constraints. Additional surveys are required to be undertaken to assist with the final design of the Northern Link Road realignment. This is discussed futher in Section 5.8.1.

Heritage surveys will be undertaken in a manner consistent with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a), utilising a landform sampling approach. Proportional emphasis will be placed on obtaining survey coverage within those landform units considered within an occupation model and predictive model to hold a higher potential for Aboriginal cultural heritage evidence.

Where required, a report will be prepared with reference to the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a) and the requirements of this ACHMP, documenting the results of any additional archaeological survey and management outcomes, and copies will be distributed to the RAPs, DPHI and Heritage NSW after completion.

In the event that previously unidentified Aboriginal objects[7] are found, the protocol outlined in Section 5.10 will be implemented.

5.2 RECORDING AND SURFACE COLLECTION

5.2.1 Procedures for Site Recording

Where not already undertaken, Aboriginal cultural heritage sites scheduled for surface collection and/or test excavation will be subject to recording according to archaeological best practice, as outlined in the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a) and the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (OEH, 2011). Recording will be undertaken:

- by a suitably qualified archaeologist experienced in detailed recording of the relevant site type; and

[6] The implementation of all management measures described in this ACHMP are subject to landowner consent where the Aboriginal heritage site (or portion of an Aboriginal heritage sites) is located on land not controlled by MACH Energy.

[7] Other than new evidence identified during heritage mitigation works in a location where evidence has previously been recorded (for example, new stone artefacts identified during the surface collection or excavation of a known site).

- in consultation with attending RAPs.

Upon conclusion of the detailed recording:

- all data collected will be submitted to Heritage NSW for inclusion in the relevant AHIMS site record;
- a reassessment of the site's significance will be undertaken, if warranted (based on recommendations from a suitably qualified archaeologist); and
- the MPO Aboriginal Heritage Site Database and Appendix E will be updated as required.

5.2.2 Protocols for Surface Collection

In accordance with Conditions 9 and 10 of AHIP #C0004783 and Conditions 11 and 12 of AHIP #C0002053, the RAPs will be provided an opportunity to collect Aboriginal sites/objects where practicable and safe to do so across the AHIP area, prior to any impacts occurring to those specific sites/objects.

The objective of the surface collection component of the salvage program is to record and recover a representative sample of visible surface artefacts from within all identified open artefact sites described in Appendix E[8].

Surface collection will be undertaken by a combined team of suitably qualified archaeologist(s) and representative(s) of the RAPs, and will involve systematic collection procedures selected by the suitably qualified archaeologist(s) with respect to the nature and extent of the evidence and collection area, including:

- delineation of the collection area and the flagging of all visible artefacts within each site;
- the recording of artefact locations using a Global Positioning System (GPS) (and other techniques where appropriate such as using measurements offset from baselines, or within a grid such as 5 x 5 m squares);
- photography of the site; and
- collection and bagging of identified artefacts (with a unique sequential number for each artefact within each site recorded and labelled on the bag containing the item).

Written notification of sites cleared for ground disturbance works will be provided by the attending archaeologist to MACH Energy on a progressive basis as sites are salvaged. All surface collected artefacts will be assigned a unique sequential number for data analysis purposes (if required). Analysis of surface artefacts will be conducted offsite on a progressive basis (Section 5.4).

The above process may be augmented as needed in the field by the suitably qualified archaeologist (e.g. depending on the nature/extent of the site or the on-ground conditions).

Should a previously recorded site (or previously recorded evidence within a site) not be able to be located after a reasonable search (to be determined by the suitably qualified archaeologist in consultation with the attending RAPs) then the site will be considered to have been salvaged for the purposes of this ACHMP (i.e. no further work required). The MPO Aboriginal Heritage Site Database and Appendix E will be updated to note that the site was not recovered.

[8] In relation to any newly identified Aboriginal heritage evidence (i.e. not listed in Appendix E) refer to the protocols described in Section 5.10 of this ACHMP.

5.3 ARCHAEOLOGICAL EXCAVATION

Requirements in relation to salvage excavations are outlined in Conditions 7 to 10 of AHIP #C0002053. In accordance with the conditions of AHIP #C0002053, salvage (or archaeological) excavations may be carried out at the Aboriginal cultural heritage sites listed in Table 9 below, with excavation and analysis to be conducted in accordance with this ACHMP. Excavation has been completed for all sites listed in Table 9.

Table 9
Aboriginal Cultural Heritage Sites Subjected to Archaeological Excavations

AHIMS Site ID	Site Name	Site Type	Easting[1]	Northing[1]
37-2-0596	B27	Artefact Scatter[2]	294005	6427739
37-2-1467	A1-A4	Artefact Scatter	293605	6429299
37-2-1468	A7-A8	Artefact Scatter	293955	6429159
37-2-1474	B29	Artefact Scatter	295265	6430659
37-2-1475	B32	Artefact Scatter	295055	6430049
37-2-1464	C1	Artefact Scatter	297145	6429379
37-2-3597	MTP-1019	Artefact Scatter	291614	6431195

Source: MPO Aboriginal Heritage Site Database (Appendix E).

[1] The relevant datum is GDA94.

[2] This site has also been previously recorded as a knapping floor.

South East Archaeology (2020a and 2020b) recommended that if impacts are to occur at the following sites, the appropriate management strategy is test excavation and then management for the site type, levels of impacts and significance:

- AHIMS ID #37-2-2427;
- AHIMS ID #37-2-2428;
- AHIMS ID #37-2-2445;
- AHIMS ID #37-2-2446;
- AHIMS ID #37-2-2447;
- AHIMS ID #37-2-2448;
- AHIMS ID #37-2-2449;
- AHIMS ID #37-2-2450;
- AHIMS ID #37-2-2451; and
- AHIMS ID #37-2-2453.

In addition to the sites listed above and in Table 9, archaeological excavation may be considered at additional sites where development activities lead to the identification of sub-surface deposits of potential significance (as determined in consultation with a suitably qualified archaeologist).

This program will include an initial exploratory phase followed, when warranted, by a more targeted investigation of the site's research potential as follows:

1. initial sub-surface testing using one or more linear transects of hand excavated, regularly-spaced shovel test pits (Section 5.3.1); and
2. controlled salvage excavation of areas with high research potential as identified through Phase 1 (the initial sub-surface testing) (Section 5.3.2).

If the initial program of testing determines that the site does not hold high scientific significance in accordance with the *Burra Charter* (Australia ICOMOS, 2013) and the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (OEH, 2011), then the second phase of investigation (i.e. open area excavation) will not be undertaken[9].

5.3.1 Initial Sub-Surface Testing

The objective of the initial phase of the archaeological excavation program is to determine the nature, extent and composition of each Aboriginal cultural heritage site. Data collected during this phase will be used to inform the need for a further controlled salvage excavation phase (where required), which is designed to target *in situ* concentrations of sub-surface cultural deposits of potential research value or high cultural significance.

Following the initial sub-surface testing (shovel test pits), only sites that are evaluated by the suitably qualified archaeologist in consultation with the RAPs onsite, as containing or having further potential for deposits of high significance (i.e. high research value or cultural significance)[10,11,12] will be subject to the second phase of more detailed excavation. For all other sites and deposits (i.e. of low or moderate significance) further sub-surface investigation or controlled salvage excavation will not occur and the site will have been subject to sufficient levels of excavation.

Initial sub-surface testing will be undertaken as follows, in accordance with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a):

- One or more transects of shovel test pits will be excavated along the length and/or width of the site, at a minimum of 5 m apart (DECCW, 2010a). Areas of grossly modified terrain (e.g. dams) will be excluded from the sampling process.
- Approximately 0.5 m x 0.5 m (0.25 square metres [m²]) test pits will be dug by hand (shovel) at each designated shovel test pit point.
- For the initial sub-surface testing, all excavated material will be sieved through maximum 5 millimetre (mm) aperture screens (or a smaller size screen as deemed appropriate by the suitably qualified archaeologist).
- The number of transects and shovel test pits may be varied depending on the nature and scale of the site being assessed, subject to advice from a suitably qualified archaeologist and in consultation with the attending RAPs.

---

9 For instance, if initial sub-surface testing revealed evidence of poor spatial integrity at the site (e.g. high levels of ground disturbance) or few sub-surface artefacts, there may remain little value in a more detailed scientific investigation of the site through controlled salvage excavation.

10 Research value or research potential refers to the potential for information derived from further investigation of the evidence to be used for answering current or future research questions. Research questions may relate to any number of issues concerning past human culture, human behaviour generally or the environment. Numerous locations of heritage evidence have research potential. The critical issue is the threshold level, at which the identification of research potential translates to significance/importance at a local, regional or national level. Assessing research potential relies on comparison with other evidence in local and regional contexts. The criteria used for assessing research potential include the a) Potential to address locally specific research questions; b) Potential to address regional research questions; c) Potential to address general methodological or theoretical questions; d) Potential deposits; and e) Potential to address future research questions.

11 An Aboriginal heritage sites will generally be considered to be of high research value where there is little or no previous disturbance to the site, good preservation, evidence of a stratified deposit, a large and diverse amount of cultural material and items of a unique or rate nature. Comparatively, Aboriginal heritage sites will generally be considered to be of low or moderate research value where there is a higher level of disturbance or little evidence to suggest cultural material and items of a unique or rate nature.

12 Cultural value refers to the spiritual, traditional, historical or contemporary associations and attachments the place or area has for Aboriginal people. Cultural value is how people express their connection with a place and the meaning that place has for them. There is not always consensus about a place's cultural value. Because people experience places and events differently, expressions of cultural value do vary (*Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (OEH, 2011)).

- The spacing of transects and shovel test pits may be varied depending on the nature and scale of the site being assessed, subject to advice from a suitably qualified archaeologist and in consultation with the attending RAPs.

The research value, archaeological significance, and cultural significance of a deposit will initially be discussed with the RAPs in the field as excavation progresses, and decisions will be made regarding subsequent salvage excavation based on these discussions. Should disparity between cultural significance and archaeological significance hamper the decision-making process, additional consultation with the RAPs will be conducted; the subsequent management action will be based on whichever significance is deemed to be the highest if agreement cannot be reached.

The above requirements may be modified for any particular site based on advice from a suitably qualified archaeologist in consultation with the RAPs onsite (e.g. based on the on-ground conditions, nature of the soils, site safety requirements etc.). Following sub-surface testing, an Aboriginal Site Impact Recording Form will be completed and submitted to Heritage NSW.

5.3.2 Controlled Salvage Excavation

Where controlled salvage excavation is determined to be warranted (based on advice from a suitably qualified and experienced archaeologist and in consultation with the attending RAPs), the following process will generally be implemented at a level appropriate to the extent and nature of the site:

- Controlled salvage excavation will be undertaken by a suitably qualified archaeologist(s), with assistance provided by the attending RAPs.
- All excavation will be carried out manually using trowels, shovels and mattocks (where appropriate).
- Implementation of broad area hand excavation for relevant open artefact sites detailed in Appendix E.
- Open area excavation will proceed in 1 m^2 units.
- All excavation units (i.e. shovel test pits and open area 1 x 1 m^2 squares) will be assigned a unique identifier.
- The first excavation unit will be excavated and documented in 5 centimetres (cm) spits (or other suitable spit size as deemed appropriate by the suitably qualified archaeologist) at each area – either PAD or site – being investigated. Based on the evidence of the first excavation unit, 10 cm spits or sediment profile/stratigraphic excavation (whichever is smaller) may then be implemented.
- Excavation will cease at culturally sterile units or bedrock in all instances – the identification of sterile stratigraphic units will draw upon a geomorphological understanding of the wider MPO area.
- Photographic and/or scale-drawn records of exposed soil profiles in open area excavations will be made.
- If specific archaeological features (e.g. hearths) are identified, the entire feature will be excavated and recorded. Features will be photographed, and scale plans drawn.
- All excavated soils will be wet or dry-sieved (dependent on composition) through 5 mm and/or 3 mm sieves, as deemed appropriate by a qualified archaeologist, and in accordance with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a).
- All material remaining in the sieve will be sorted by a qualified archaeologist to identify and retain all cultural items. All remaining non-cultural material will be discarded.
- Artefacts recovered from sieving will be retained in plastic zip-lock bags and labelled with appropriate provenance data and assigned a unique reference number.

- A standard data recording form will be used for each 1 x 1 m² excavation unit and will include (as a minimum) site name, date, recorder, square identifier, volume of deposit excavated per spit and number of spits.
- Upon completion of excavation, the location of all excavation units will be incorporated into the topographic survey plan for the site.
- All excavation units will be backfilled upon conclusion of excavations at the site.
- The maximum area of salvage excavation will be defined on a site-by-site basis based on artefact density (expansion to cease when artefacts <50/m^2), the proposed impacts to the site, and in consultation with the RAPs.
- Should the salvage excavation encounter high significance archaeological deposits, it will be possible to commence larger scale manual excavation at that location, the extent of which will be determined by the suitably qualified and experienced archaeologist, and in consultation with the attending RAPs. Deposits or features that would characterise high value deposits include:
  - Undisturbed deposits showing discernible archaeological stratigraphy;
  - Any exceptional finds (unusual materials, rare preservation, rare artefact type) believed to have archaeological context; and
  - A high density of artefacts[13] (more than 50 per m²) in largely undisturbed contexts.

The above requirements may be modified for any particular site based on advice from a suitably qualified archaeologist in consultation with the RAPs onsite (e.g. based on the on-ground conditions, nature of the soils, site safety requirements etc.).

Requirements in relation to archaeological savalge reporting are outlined in Section 5.7.

5.3.3 Surface Scrapes of Open Artefact Sites

Surface scrapes using mechanical excavation will be undertaken where required for identified open artefact sites or any previously unrecorded open artefact sites that may be identitied and subject to impacts and for which surface scrapes are identified as appropriate. The purpose of surface scrapes is to identify the broader nature and spatial distribution of archaeological evidence at a site.

The following process will be followed for surface scraping activities:

- Surface scrapes would only occur after any required surface collection, test excavation and broad area handcontrolled salvage excavation. Surface scrapes will be supervised by a qualified archaeologist with assistance from representatives of the RAPs. Surface scrapes will be conducted when a high density of artefacts (more than 50 per m²) has been identified during the test excavation or salvage excavation. The area to be scraped will be defined by the onsite archaeologist and RAPs in consideration of below point.
- The surface scrape area will be of a size that is commensurate with the significance and area of the site being investigated and responsive to local topography and soil conditions.
- The surface scrape area will be identified and clearly delineated prior to scraping and may consist of individual linear scrapes in transects, or broader continuous areas of exposure with multiple adjoining scrapes.
- An appropriate machine (such as an excavator, grader, small bulldozer, or similar) will be used to progressively expose the surface under the direction of the archaeologist.

[13] An artefact is defined here as being larger than 15 millimetres. Therefore, a concentration of small debitage or shatter would not constitute an “artefact concentration” unless the archaeologist and RAPs present felt that this had archaeological merit.

- Following each pass of the machinery, there will be physical inspection of the exposed area and windrowed/displaced soils to identify, record and collect visible archaeological evidence.
- The artefacts' provenance will be recorded, and photographs taken of each surface scrape location.
- Surface scrapes will discontinue when known artefact bearing soils (usually the A horizon or top soil only) within the delineated area have been excavated by scraping and inspected as above.
- In the event that surface scrapes expose archaeological features that are determined by the supervising archaeologist to be of high research potential and/or of high significance-controlled salvage will (re)commence (Section 5.3.2).

The above requirements may be modified for any particular site based on advice from a suitably qualified archaeologist (e.g. based on the on-ground conditions, nature of the soils, site safety requirements etc.).

Requirements in relation to archaeological savalge reporting are outlined in Section 5.7.

5.4 ARTEFACT ANALYSIS

Consistent with the requirements of AHIPs #C0002053 and #C0004783 (i.e. Conditions 8 and 13 and Condition 11, respectively), Aboriginal objects recovered during salvage activities will be subject to further analysis and may be taken offsite if required (based on advice from a suitably qualified archaeologist).

All salvage activities will be professionally recorded, artefacts catalogued, and results reported in a way that allows future generations to understand where Aboriginal sites were salvaged, what they included and how they contribute to the story of past Aboriginal life. A report will be formulated that provides the results of the approved salvage works, including the results of the artefact analysis. Following the approved salvage works, a technical report will be prepared in accordance with the *Code of Practice for the Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a). This report would be provided to Heritage NSW within the DPE (former Office of Environment and Heritage [OEH]) and made available to the RAPs.

Artefact analysis may include (based on advice from a suitably qualified archaeologist) radiocarbon dating (for features where dating is considered suitable) and/or residue and use-wear analysis. Prior to any artefact analysis being undertaken, the suitably qualified archaeologist will develop a research design program including appropriate research questions and the proposed analysis methodology.

Consistent with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a), analysis of collected and salvaged artefacts will seek to further the knowledge of past human societies in the MPO area.

Post-excavation analyses will not delay mining (or associated) activities within the boundaries of any salvaged sites, once salvage activities have been completed in accordance with the relevant AHIP (and the salvage activities [as described in Sections 5.3.1 and 5.3.2] undertaken have confirmed that there are no further excavation activities required at that particular site).

5.5 ARTEFACT MANAGEMENT

Any Aboriginal objects (to the extent that they are stone artefacts) that are collected from the MPO area will be managed in accordance with the recording procedures outlined in Requirement 26 'Stone Artefact Deposition and Storage' and the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a), including the following:

- Artefact attributes will be recorded for completion of the AHIMS site card, including as a minimum artefact stone material, lithic type, size and comments on other relevant attributes (e.g. presence and nature of use-wear or residues) as determined by the suitably qualified archaeologist.
- Artefacts recovered during excavation activities will, initially, be bagged in excavation units, then individually after recording (apart from lithic fragments, which may be bagged together for each excavation unit spit).
- Following surface collection, artefacts will be bagged and assigned a unique sequential number. The location of collection will be recorded in GDA by handheld GPS (Section 5.2.2).
- The stone artefacts will be stored in good quality, plastic zip-lock bags (or similar) with labels.
- The bags will be externally labelled using permanent marker, and an 'independent' label on robust material (e.g. yvek) written with permanent marker must be placed inside each bag for the overall excavation unit or site.
- Any Aboriginal objects salvaged may be temporarily stored at the office of the MACH Energy Aboriginal heritage consultant or laboratory during artefact analysis (should it be required) and recording. A chain of custody will be used to record the location of any assemblage that leaves site for further analysis.
- Any Aboriginal objects salvaged will be stored at the long-term storage facility at the Keeping Place (Lot 1, DP 192121), as per the procedure described in Section 5.12.

5.6 SCARRED TREE MANAGEMENT

Scarred Tree Conservation

Where scarred tree conservation is feasible, the site will be fenced off and managed *in situ* in accordance with Section 5.8.3.

In the event that scarred trees are identified and required to be salvaged and removed, the relocation procedure below will be employed.

Scarred Tree Removal Protocol

In the event that scarred trees are identified and require salvage and removal, a methodology has been developed based on an industry best practice scarred tree removal and relocation procedure and will be employed to remove and store any scarred trees directly impacted by the MPO.

The removal methodology for any Aboriginal scarred trees is outlined in Appendix G.

The identification of trees as 'scarred trees' may include the involvement of an arborist or forestry specialist with relevant experience. The determination of the origin of the tree's scarring may also involve an archaeologist with relevant experience. If considered to be of likely cultural origin, the archaeologist and/or arborist or forestry specialist will offer advice on the tree's removal, in consultation with the attending RAPs.

The removal of a confirmed Aboriginal scarred tree will follow the four-step procedure outlined below:

1. Pre-removal preparation.
2. Removal/relocation.
3. Storage.
4. Management/preservation.

If a scarred tree is subject to surface disturbance, verification of the precise location of the tree, nature of the scar and a reassessment of its significane will be undertaken.

As described in Section 1.1, should a possible scarred tree be identified and then later be determined not to be of Aboriginal origin by a suitably qualified archaeologist and arborist or forestry specialist in consultation with the attending RAPs, a technical report would be prepared. This report would be provided to Heritage NSW and made available to all RAPs. A copy would also be forwarded to the AHIMS registrar so that the status of the tree can be appropriately updated (as necessary). In the event that a previously identified scarred tree is determined to not be of Aboriginal origin, no further management according to the principles outlined in this document (including salvage or removal) would be required.

Scarred Tree Reassessment

In accordance with Part B, Condition B69(d)(vi), MACH Energy will undertake further archaeological investigations, test excavations and analysis of scarred trees in accordance with the commitments made in the document/s listed in Condition A2(c). This includes the documents in the Project Submissions Report (MACH Energy, 2021b).

From the Project Submissions Report (MACH Energy, 2021b), Heritage NSW recommended the re-assessment of 'possible scarred trees', specifically Zone A1 and SSD Zone C to determine the origins of the scars and assess the significance of these sites. Review of the 'possible scarred trees' indicate that they are primarily locayed within the Bengalla Mine approved disturbance boundary (SSD-5170) or outside of the potential Project disturbance area (Figure 7). A number of potential scarred trees are proximal to the approved water pipeline corridor associated with the Mount Pleasant Discharge Dam (DW1) that is to be constructed by Bengalla Mine as compensation for its clean water dam being located within the MPO site. This construction is already authorised by the Bengalla Mine approvals and would occur following detailed engineering design.

As the locations of these potential scarred trees is on Bengalla Mine land and largely within the authorised disturbance area of the Bengalla Mine, further assessment of the origin of the scars is not required. Notwithstanding, should the detailed design of this water management infrastructure indicate that a scarred tree cannot be avoided, then it would be reassessed as necessary and managed in accordance with Section 5.6 and Appendix G.

5.7 ARCHAEOLOGICAL SALVAGE PROGRAM REPORTING

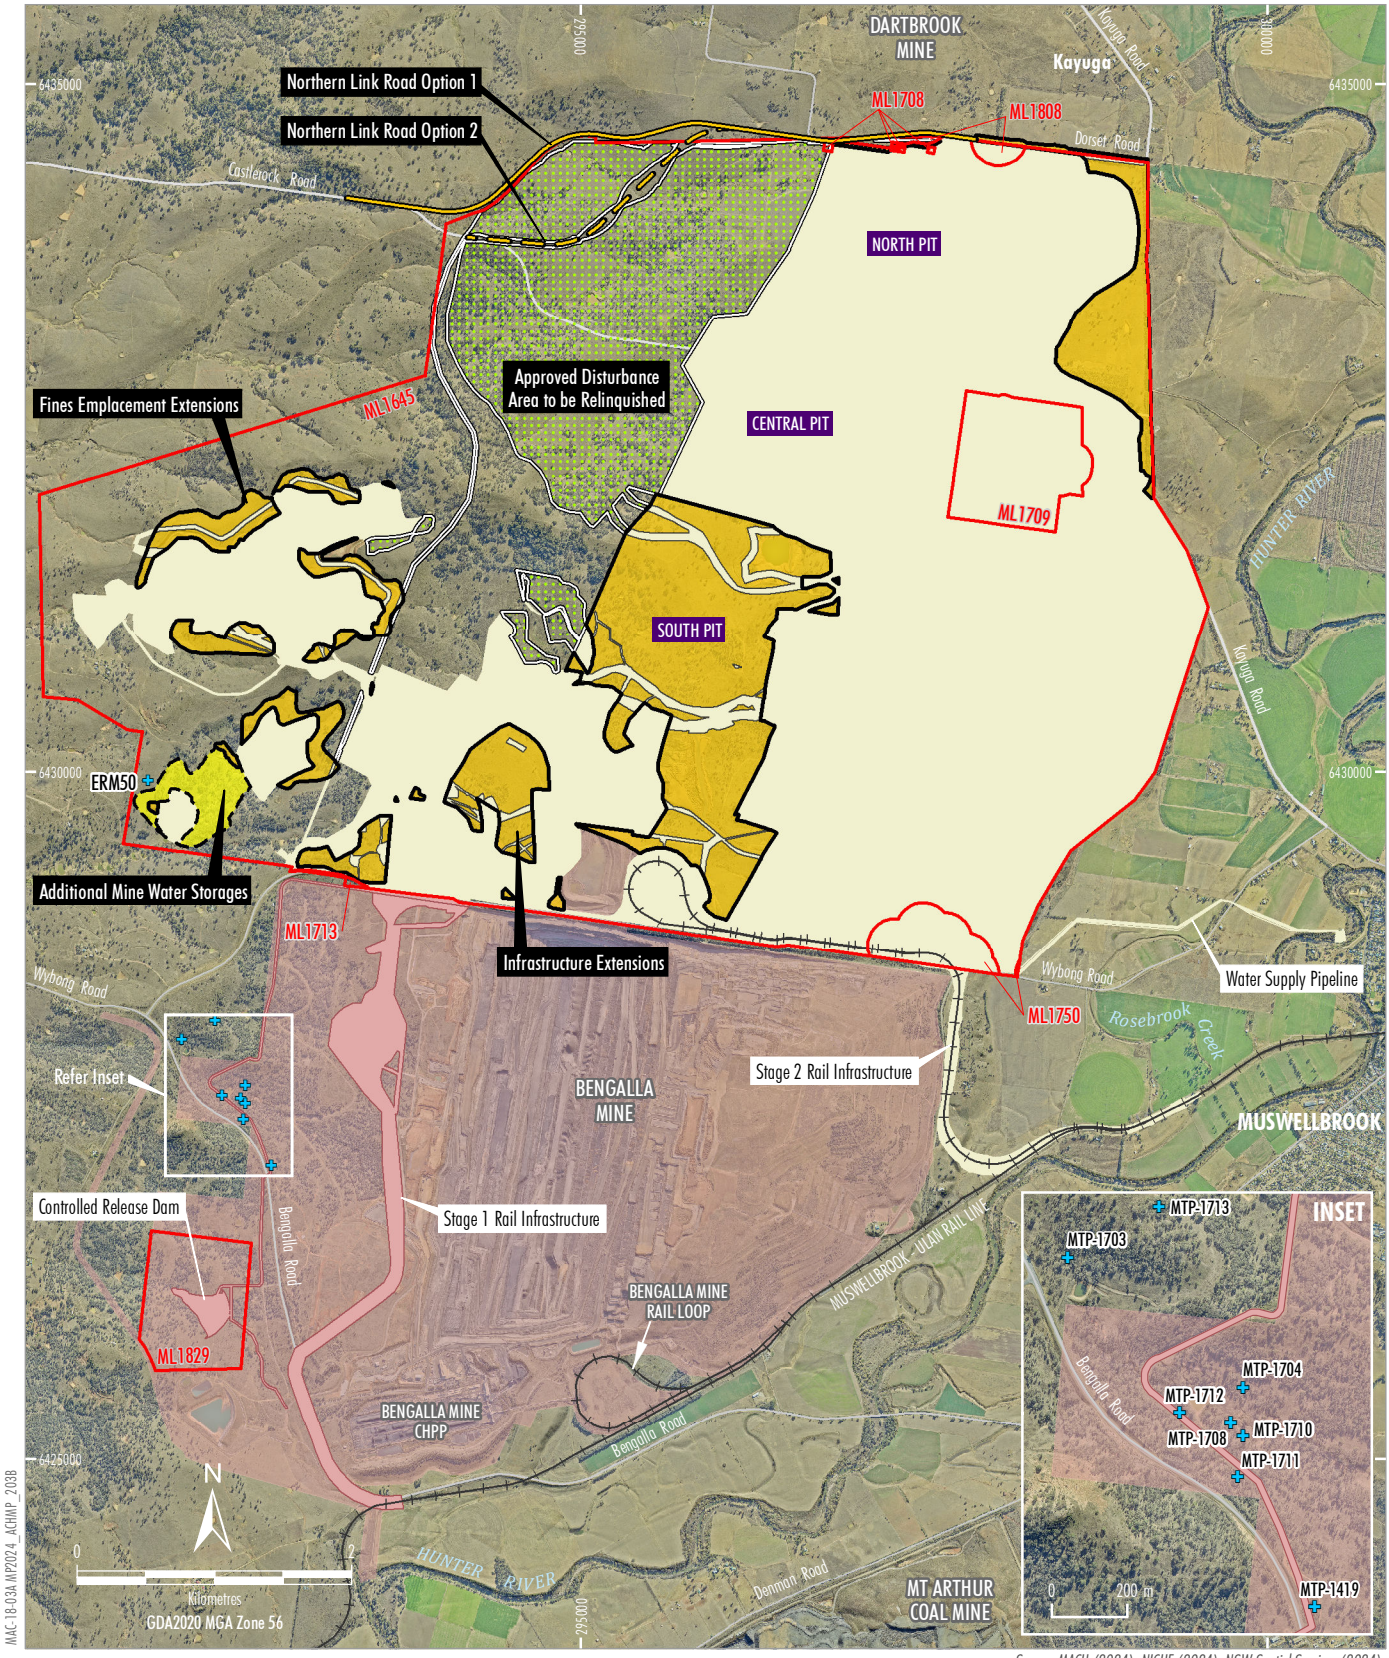
In accordance with the requirements of AHIPs #C0004783 and #C0002053, an Aboriginal Site Impact Recording Form will be completed and submitted to Heritage NSW (via the AHIMS registrar) for each site salvaged and/or subject to development impacts (as per Schedules B and C of AHIPs #C0004783 and #C0002053) within 6 months of the completion of the actions authorised by the AHIP.

In accordance with the requirements of AHIP #C0002053 (i.e. Condition 31), a detailed report of the results of the archaeological salvage program undertaken (including the results of any post-excavation artefact analyses [should they occur]) will be prepared and submitted to Heritage NSW within 2 years of the completion of the actions authorised by the AHIP.

A copy of the salvage report (described above), including a summary report in plain English, will be sent via registered post to each RAP within 14 days of the report being submitted to Heritage NSW, consistent with the requirements of AHIP #C0002053 (i.e. Condition 33).

Once Development Consent DA 92/97 is surrendered (Section 1.1) and following the surrender of AHIPs #C0002092, #C0004092 and #C0004783 (Section 2.4), a detailed report of the results of the archaeological salvage program undertaken (including the results of any post-excavation artefact analyses [should they occur]) will be prepared and submitted to Heritage NSW within 2 years of the completion of each staged portion of the actions authorised by the Development Consent SSD 10418.

A summary of the results of the archaeological salvage program undertaken (including the results of any post-excavation artefact analyses [should they occur]) is to be completed and included in the Annual Review for the MPO (Section 9). A copy of the Annual Review (or relevant sections of the Annual Review) will be provided to any RAPs when requested.



LEGEND

- Railway
- Mining Lease Boundary (Mount Pleasant Operation)

Figure 7

5.8 MANAGEMENT OF SITES OUTSIDE MAJOR SURFACE DEVELOPMENT AREAS

For the purpose of this ACHMP, the surface components are herein referred to as the major surface development areas. This excludes any ancillary infrastructure, which is considered in further detail in Section 5.8.1.

Ancillary infrastructure at the MPO is approved under Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender). Any ancillary infrastructure to be developed outside of this approval will be subject to separate development applications.

Following the final detailed engineering designs of Development Consent SSD 10418, the significance of sites not previously assigned a significance rating within the disturbance area will be assigned a rating to determine the most appropriate management strategy.

5.8.1 Ancillary Infrastructure

Although the nature and general location of the components of the MPO is known, the specific design and placement of ancillary facilities is determined progressively over the life of MPO and may be subject to change.

In addition to the major surface development areas at the MPO (e.g. open cut pits, overburden emplacements, major surface facilities, major water management structures) ancillary infrastructure may also be required.

Ancillary infrastructure may include (but is not limited to), for example:

- firebreaks;
- water diversion and management structures;
- water supply pump station;
- minor contour banks;
- temporary stockpiles and lay down areas;
- access tracks and roads;
- tracks along pipelines;
- environmental management and monitoring equipment;
- explosives storage facilities;
- powerlines;
- fences;
- sediment and erosion control structures; and
- rail spur, rail loop and rail load-out facility.

Consistent with Part A, Condition A1 of Development Consent SSD 10418 and Schedule 2, Condition 1 of Development Consent DA 92/97 (prior to its surrender), MACH Energy will endeavour to avoid all Aboriginal cultural heritage sites when planning and designing the ancillary infrastructure and road alignments, however there may be circumstances where impacts cannot be avoided. In this event such evidence will be managed in a manner consistent with the management requirements described in this ACHMP.

For areas not previously subjected to heritage survey, MACH Energy will engage a suitably qualified archaeologist and representatives of the RAPs to undertake a heritage survey of such area in a manner consistent with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a). In the event that previously unidentified Aboriginal objects are found, a protocol for the management of previously unrecorded Aboriginal cultural heritage evidence would be implemented (Section 5.10).

Following approval of final design for ancillary infrastructure and road alignments, the significance of sites in the disturbance area not previously assigned a rating will be determined in order to advise the most appropriate management strategy.

Proposed ancillary surface infrastructure areas will be subject to the MPO Ground Disturbance Permit process (Section 5.8.2).

Where ancillary works require harm to Aboriginal heritage sites that have been previously recorded and have an existing requirement to be managed *in situ* in accordance with this ACHMP, then the identified cultural heritage site will be managed as described in Section 5.8.3.

Northern Link Road

As part of the conduct of the Project ACHA, South East Archaeology (2020a and 2020b) conducted survey of Project additional disturbance areas that had not already been subject to previous archaeological survey, including portions of the provisional Northern Link Road. The Project EIS assessed two alternative Northern Link Road realignments; however, the detailed design of the preferred realignment is still being refined, pending property constraints. From the Project ACHA, the potential impacts on Aboriginal cultural heritage associated with the Project comprise (South East Archaeology, 2020a and 2020b):

- *SSD Zone A - Direct surface impacts involving existing Approved Areas where the SSD disturbance would not comprise additional primary disturbance.*
- *SSD Zone B - Direct surface impacts involving areas in which additional SSD primary disturbance is proposed.*
- *SSD Zone C - Remainder of the SSD Area in which potential minor future disturbance may occur subject to detailed infrastructure engineering design. This includes existing Approved Areas (Zones A1R, A2R, A3R and A4R) in which the disturbance areas are to be relinquished under the SSD.*

Additionally, South East Archaeology (2020b) stated the following:

> *Additional field survey of Zone C in relation to the SSD Project was not considered to be warranted at present, as minimal impacts are proposed and these have not yet been subject to detailed design (ie. the precise locations of any potential impact areas are not currently known, for example, for any alternative alignment of the Northern Link Road). Any such potential impact areas are likely to be minor in extent and can be satisfactorily addressed subsequent to SSD approval through the inclusion of appropriate requirements (specifying the need for heritage survey and procedures for managing any identified Aboriginal heritage evidence) in the revised AHMP…*

Pending final detailed design of the Northern Link Road, any ancillary disturbance associated with infrastructure detailed design within areas not previously subject to systematic survey will be suitably surveyed and addressed by an updated MPO ACHMP, as recommended by South East Archaeology (2020a and 2020b). This process will be consistent with the additional survey requirements for areas not previously subject to heritage survey, consistent with Section 4.3 of this ACHMP.

5.8.2 Ground Disturbance Permit Process

The MPO Ground Disturbance Permit process is an internal process that applies to all surface disturbance works at the MPO. A copy of the Ground Disturbance Permit is provided in Appendix F. The Ground Disturbance Permit process is as follows:

- Prior to any direct ground disturbance activities commencing in a proposed work area, relevant site personnel (or the relevant Project Manager) will prepare a MPO Ground Disturbance Permit for approval by the MACH Energy Environmental Superintendent (or relevant equivalent).
- Approval of the Ground Disturbance Permit must be obtained prior to the commencement of direct ground disturbance activities.
- MACH Energy will identify whether the proposed impact area is located within the extent of the approved AHIP boundaries.
- If the proposed impact area is located within the extent of the approved AHIP boundaries, the following protocols will apply:
    - MACH Energy will determine whether any known heritage sites, as identified by a suitably qualified archaeologist, may be subject to impacts (by checking the MPO Aboriginal Heritage Sites Database, and where the subject land is not owned or directly controlled by MACH Energy, by undertaking an updated search of the AHIMS register).
    - In locations where an archaeological survey has been undertaken and has identified no Aboriginal cultural heritage evidence, the proposed works can progress with no additional action required.
    - In locations where impacts are proposed and a known Aboriginal cultural heritage site requiring salvage or archaeological excavation (or any other management required by this ACHMP) (refer to Appendix E) will be impacted, MACH Energy will engage a suitably qualified archaeologist to undertake the required management in accordance with the relevant AHIPs and this ACHMP prior to surface disturbance occurring.
    - In locations where impacts are proposed and a newly identified Aboriginal cultural heritage site cannot be avoided, these sites will be managed in a manner consistent with the management required by the relevant AHIP and Section 5.10 of this ACHMP.
- No direct surface disturbance works can occur outside of the extent of the approved AHIPs without being subject to a due diligence assessment in accordance with the NSW *Minerals Industry Due Diligence Code of Practice for the Protection of Aboriginal Objects* (NSW Minerals Council, 2010) and/or Heritage NSW *Due Diligence Code of Practice of the Protection of Aboriginal Objects in New South Wales* (DECCW, 2010b), or subject to approval under the EP&A Act and subsequent AHIP. Should such disturbance be required, MACH Energy would seek a new AHIP and/or a variation to the existing AHIP(s) as needed, in accordance with Development Consent DA 92/97 (prior to its surrender). Refer to Section 5.10.2 for further details.
- Once Development Consent DA 92/97 is surrendered (Section 1.1), the application for a new AHIP will not be required and MACH Energy will manage surface disturbance works in accordance with the approved ACHMP under Development Consent SSD 10418.
- Notwithstanding, MACH Energy will undertake general land management activities (e.g. grass seed harvesting, slashing access tracks/fire breaks) on land within the MPO area that may be outside the extent of the approved AHIP(s). These works will avoid known Aboriginal cultural heritage sites. In the event that a new Aboriginal cultural heritage site is identified during these works, the protocol described in Section 5.10 would be implemented.

5.8.3 Fencing of Certain Aboriginal Heritage Sites

In accordance with the Statement of Commitments provided in Table 2 for Development Consent SSD 10418 and Appendix 3 of Development Consent DA 92/97 (prior to its surrender), all Aboriginal cultural heritage sites not directly affected by the MPO are to be managed *in situ,* with procedures in place for their long-term protection and to minimise any future development disturbance.

Fencing is not required to occur for any Aboriginal cultural heritage sites that have been approved for direct harm as per the requirements of the relevant AHIP(s).

Temporary fencing of Aboriginal cultural heritage sites will occur when the site is located within 50 m of a development disturbance area, or where it is identified that there is potential for the site to be adversely impacted (e.g. through inappropriate access, livestock activity etc.) as determined in consultation with a suitably qualified archaeologist.

Temporary fencing will comprise (at a minimum) star pickets and high visibility construction fencing (or similar suitable materials e.g. poly-tag line/flag bunting or high visibility mesh).

The extent of the fencing will encompass the entire Aboriginal cultural heritage site, and will generally include a buffer of approximately 10 m from the centre (of an isolated artefact) or around the boundary extent (of an artefact scatter). The extent of fencing may be subject to change as determined by a suitably qualified archaeologist. Existing access tracks within Aboriginal cultural heritage site boundaries are to be maintained. Traffic and/or upgrading of roads will be managed or limited within these areas to reduce additional impacts to sites.

Metal signs attached to fencing may include (for example) the following words:

ENVIRONMENTALLY SENSITIVE AREA

NO UNAUTHORISED ENTRY

ENVIRONMENTAL TEAM CONTACT DETAILS

Temporary fences will be removed at the end of the MPO life, or when disturbance is further than 50 m from the site and/or the site is deemed to be no longer at risk of potential adverse impacts.

The monitoring of fenced sites (as a component of the annual monitoring program) is described in Section 5.9.1.

5.9 MONITORING OF ABORIGINAL ARCHAEOLOGICAL SITES

5.9.1 Annual Monitoring Program

In accordance with the Statement of Commitments provided in Appendix 3 of Development Consent DA 92/97 (prior to its surrender), annual inspection of all fenced Aboriginal cultural heritage sites at the MPO will be undertaken with attending RAPs. Inspections will involve, at a minimum, recording of the following:

- condition assessment of the Aboriginal cultural heritage site;
- condition assessment of fencing; and
- evidence of nearby disturbance that has the potential to impact the fenced site.

A report will be prepared on completion of the annual monitoring program and the findings of this report will also be presented within the Annual Review for the MPO (Section 9).

In the event that potential impacts are suspected to have occurred to the fenced sites, then the protocol for damage to a known Aboriginal cultural heritage site described in Section 5.13 will be implemented.

5.9.2 Blast Vibration Monitoring

As required by Part B, Condition B22 of Development Consent SSD 10418 and Schedule 3, Condition 15 of Development Consent DA 92/97 (prior to its surrender), MACH Energy will ensure that blasting on the site does not damage heritage items (outside the approved disturbance area) and develop specific measures to protect heritage items from any blasting damage associated with the MPO. The measures developed are detailed in the MPO Blast Management Plan.

Site types present within the MPO area include isolated finds, artefact scatters, knapping floors and a spiritual place. These site types are not considered to be susceptible to impacts from blasting (as these sites do not have an inherent structural component).

If any site types are identified during the life of the MPO that are more likely to be susceptible to blast vibration (e.g. grinding grooves), a monitoring program would be developed, implemented and included in a subsequent revision of this ACHMP.

5.10 PROTOCOL FOR THE MANAGEMENT OF PREVIOUSLY UNRECORDED ABORIGINAL CULTURAL HERITAGE EVIDENCE

5.10.1 Aboriginal Cultural Heritage Evidence Located within the AHIP Boundaries

As described in Schedule C2 of AHIPs #C0004783 and #C0002053, approval has been granted for harm to all Aboriginal objects in or under the land to which the AHIP applies (apart from human remains). In the event that a previously unrecorded Aboriginal cultural heritage site (new location of heritage evidence) is identified[14] over the life of the development (Section 1.1), management actions will be implemented (including surface collection and/or archaeological excavation) consistent with the requirements of AHIPs #C0004783 and #C0002053 as well as this ACHMP. In the first instance:

- Work will stop immediately in the vicinity of the Aboriginal cultural heritage evidence, and the new site will be reported to the MACH Energy Environmental Superintendent (or relevant equivalent) as soon as practicable.
- MACH Energy will identify an appropriate course of action with respect to the identified Aboriginal cultural heritage site, in consultation with relevant specialists (e.g. the suitably qualified archaeologist) and attending RAPs as necessary. MACH Energy will ensure that the extent of the identified and/or potential heritage evidence is immediately identified by a suitably qualified archaeologist in consultation with representatives of the attending RAPs and protected from any further inadvertent impact until the procedures below are implemented.

Where impacts are proposed to an open artefact site/PAD, and avoidance of impacts is not feasible:

- Where the site is assessed by a suitably qualified archaeologist as being of low archaeological significance and impacts cannot be avoided, following detailed recording of the heritage evidence, impacts will be permitted to occur without further action.
- Where the site is assessed by a suitably qualified archaeologist as being of moderate archaeological significance, where impacts are substantial, the evidence within the impact area will be subject to surface collection before impacts are permitted to occur.

[14] Excludes new evidence identified in a location where evidence has previously been recorded (for example, new stone artefacts identified during the surface collection or excavation of a known site) and excludes human skeletal remains (refer to Section 5.11).

- Where the site is assessed as by a suitably qualified archaeologist as being of moderate to high, or high archaeological significance, and impacts cannot be avoided, following detailed recording of the evidence, MACH Energy will determine in consultation with a suitably qualified archaeologist the extent of proposed impacts:
  - Where the impacts are considered to be substantial, the evidence within the impact area will be subject to surface collection and any other management and/or mitigation measures, such as hand excavation, as determined in consultation with the attending RAPs before impacts are permitted to occur (and/or as required by the relevant AHIP[s]).
  - Where the impacts are considered to be minimal, impacts will be permitted to occur after the evidence within the impact area has been subject to surface collection (and/or as required by the relevant AHIP[s]).

In the event of a newly identified scarred tree, the procedures in Section 5.6 will be implemented, including initial consideration as to whether the scar is likely to be of cultural origin, potentially involving input from a suitably qualified archaeologist and/or arborist or forestry specialist.

In the event of a newly identified site type other than open artefact sites or scarred trees (e.g. grinding grooves, rock shelters), a suitably qualified archaeologist will propose specific management actions (suitable to the nature and scientific significance of the site and level of potential impacts) for discussion with attending RAPs. Following these discussions, specific management actions will be proposed (depending on the site type) in consultation with the RAPs and Heritage NSW. Correspondence will be provided to all RAPs (including those not attending in the field) and Heritage NSW to advise of the new site type and to document the undertaken and/or proposed management measures for their review and comment.

An Aboriginal Site Recording Form (and an Aboriginal Site Impact Recording Form, where relevant) will be completed and submitted to Heritage NSW in relation to any newly identified Aboriginal cultural heritage sites. The MPO Aboriginal Heritage Site Database and the ACHMP will be updated as soon as practicable (noting that this update is not required to occur prior to the implementation of the agreed/relevant management measure). Any newly recorded sites will also be reported in the Annual Review.

In the event that MACH Energy wishes to deviate from the above-described protocol and the deviations result in a reduced level of management being applied to the site(s), MACH Energy would seek DPHI review and approval prior to implementation of any such measures (Section 9.2).

5.10.2 Aboriginal Cultural Heritage Sites Located Outside of AHIP Boundaries

In the event that previously unidentified Aboriginal objects are discovered prior to the commencement of development under Development Consent SSD 10418 in locations outside of the extent of the approved AHIPs (#C0004783, #C0002053 and #C0002092), the following procedure (in consideration of the *Guide to Investigating, assessing and reporting on Aboriginal cultural heritage in NSW* [OEH, 2011]) is to be adopted:

1. All works must cease immediately in the area to prevent any further impacts to the Aboriginal object(s).
2. Notify the MACH Energy Environmental Superintendent (or relevant equivalent) immediately. The Environmental Superintendent (or relevant equivalent) will assess whether works can continue in the area with safeguards in place (e.g. temporary fencing and signage) to ensure that impacts do not occur to the identified heritage evidence.

3. A suitably qualified archaeologist will (in consultation with attending RAPs, when the object is determined to be of Aboriginal origin[15]) determine the nature, extent and significance of the object(s) (including the procedures outlined in Section 5.3.1 (initial sub-surface testing), in accordance with *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* [DECCW, 2010a], where relevant).
4. The suitably qualified archaeologist will prepare an Aboriginal Site Recording Form for the newly identified site and submit to Heritage NSW. The MPO Aboriginal Heritage Site Database and Appendix E of the ACHMP will be updated as needed.
5. MACH Energy will ensure that impacts to the site are avoided until approval/permits in place (e.g. a variation to an existing AHIP or the issue of a new AHIP under Development Consent DA 92/97 [prior to its surrender] or the update of this ACHMP under Development Consent SSD 10418).
6. In the event that the site has been potentially unintentionally impacted, the procedure described in Section 5.13 would be implemented.

Any variation to an existing AHIP or the issue of a new AHIP under Development Consent DA 92/97 (prior to its surrender) or the update of this ACHMP under Development Consent SSD 10418, will require additional consultation with the RAPs and Heritage NSW regarding appropriate site management.

5.11 PROTOCOL FOR DISCOVERY OF HUMAN REMAINS / POTENTIAL BURIAL SITES

Human remains tended to be placed in hollow trees, caves or sand deposits (South East Archaeology, 2020a). The potential for burial sites to occur at the MPO was assessed by South East Archaeology (2020a) as being very low, but cannot be discounted.

Condition 6 of AHIPs #C0004783 and #C0002053, and Condition 7 of AHIP #C0002092 require that all human remains in, on or under the land (to which the AHIP applies) must not be harmed. Part B, Condition B67 of Development Consent SSD 10418 requires work to cease immediately, and the area secured if suspected human remains are discovered on the site. Further, MACH Energy is required to notify DCCEEW, NSW National Parks and Wildlife Service, NSW Police Force and Heritage NSW. Work may not recommence until authorised by NSW Police Force and Heritage NSW.

In the event that human remains (skeletal material) are discovered over the life of the development (Section 1.1), the following procedure is to be followed:

1. When suspected human remains are exposed, all work is to cease immediately in the near vicinity of the find location and the area is to be secured so as to avoid any potential harm to the remains.
2. The MACH Energy Environmental Superintendent (or relevant equivalent) is to be notified immediately.
3. The MACH Energy Environmental Superintendent (or relevant equivalent) is to notify the NSW Police Force immediately.
4. The MACH Energy Environmental Superintendent (or relevant equivalent) is to contact the DPHI Environment line on 131 555 and Heritage NSW, DCCEEW and NSW National Parks and Wildlife Service to notify that possible skeletal remains have been discovered and advise that the NSW Police Force have been notified. MACH Energy will facilitate, in cooperation with the NSW Police Force, DPHI and Heritage NSW, the identification of the skeletal remains by an appropriately qualified person.
5. An area (to be determined following advice from Heritage NSW and the Police) is to be cordoned off by temporary fencing around the exposed suspected human remains – work can continue outside of this area as long as there is no risk of interference to the human remains or the assessment of human remains.

[15] As defined under the NP&W Act.

6. Should the remains be identified as Aboriginal and the Police require no further involvement, MACH Energy will manage the remains in consultation with the RAPs and Heritage NSW, with advice from a suitably qualified heritage expert.
7. Work will not recommence at the location until all legal requirements and the reasonable requirements of Heritage NSW and the RAPs have been adequately addressed. As required by Condition 21€ of AHIP #C0004783 and Condition 26(e) of AHIP #C0002053, works cannot recommence at the location unless authorised in writing by the Police and Heritage NSW.

5.12 STORAGE OF ABORIGINAL OBJECTS

In accordance with the requirements of AHIPs #C0004783 and #C0002053 (i.e. Conditions 15 to 17 and 17 to 19, respectively) and Part B, Condition B69 (e) of Development Consent SSD 10418, any salvaged Aboriginal objects (removed from the MPO area by actions authorised by the AHIP conditions) will be moved as soon as practicable to the secure storage location.

The long-term storage location is a secure, locked facility at the Keeping Place (Lot 1, DP 192121) and is discussed in Section 4.2.1. Access to the secure storage location will be managed/controlled by the MACH Energy Environmental Superintendent (or relevant equivalent). While access to the artefact storage will be monitored, access to the general facility will be open to the public. The facility is to be clearly signed with conditions for access and a contact number for the MACH Energy Environmental Superintendent (or relevant equivalent).

As described in Section 5.5, any Aboriginal objects that are stone artefacts that are collected from the MPO area will be managed in accordance with the recording procedures outlined in Requirement 26 ‘Stone Artefact Deposition and Storage’ and the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a).

The Keeping Place will store all salvaged Aboriginal objects collected and excavated as part of the Project. Copies of all associated reports and associated records in bound hard copy and digital form will be stored in the same location as the artefacts.

Where objects are too large for inside storage, such as scarred trees, they will be kept in a suitable area protected from weather, as agreed following consultation with the RAPs.

5.13 PROTOCOL FOR UNAUTHORISED DAMAGE TO AN ABORIGINAL CULTURAL HERITAGE SITE

In the event that a known Aboriginal cultural heritage site located outside an approved disturbance area (i.e. located outside the extent of the relevant AHIP[s] or located within an AHIP area but for which specified salvage procedures have not yet been implemented) or any Aboriginal cultural heritage evidence (including previously unknown objects) without approval for harm (ie. not covered by and managed in accordance with an AHIP), is unintentionally damaged, the following procedure will apply consistent with Section 8 of this ACHMP:

- Work will stop immediately in the vicinity of the Aboriginal cultural heritage evidence, and the incident will be reported to the MACH Energy Environmental Superintendent (or relevant equivalent) as soon as practicable once becoming aware of the incident.
- In the event that the incident has caused, or threatens to cause, impacts to Aboriginal cultural heritage not approved under an AHIP, the MACH Energy Environmental Superintendent (or relevant equivalent) will report the incident to the DPHI and Heritage NSW immediately.

- MACH Energy will identify an appropriate course of action with respect to the identified impact(s) or incident, in consultation with relevant specialists (e.g. heritage practitioner), attending RAPs and relevant agencies, as necessary. MACH Energy will ensure that the extent of the identified and/or potential heritage evidence is immediately identified by a suitably qualified archaeologist in consultation with representatives of the attending RAPs and protected from any further inadvertent impact.
- MACH Energy will, on request, submit the proposed course of action to the DPHI for approval.
- MACH Energy will implement the approved course of action to the satisfaction of the DPHI.
- MACH Energy will provide a detailed report on the exceedance of the performance measures to the DPHI and Heritage NSW within 7 days of the date of becoming aware of the exceedance.
- MACH Energy will report the exceedance of the performance measure and the success of the approved course of action as a component of the MPO Annual Review (Section 9).

The approval to harm and unintentionally damage any Aboriginal cultural heritage site is not limited to the conditions of the AHIPs (#C0002092, #C0004783 and #C0002053), but also includes approved harm conducted in accordance with the provisions of this ACHMP (once approved).

5.14 MANAGEMENT OF ABORIGINAL HERITAGE SITE DATABASE

As described in Section 2, a comprehensive MPO Aboriginal Heritage Site Database is maintained by MACH Energy. This database includes the following information for Aboriginal cultural heritage sites located at the MPO:

- The unique identifier number and AHIMS register number where applicable.
- Site type (e.g. isolated find/s, artefact scatter, scarred tree etc).
- Brief site description (e.g. number/density and attributes).
- Statement of scientific significance.
- Site extent (e.g. 10 m diameter).
- Date recorded and technical advisor recording.
- Grid reference coordinates (GDA94 Zone 56).
- Relevant management measure(s).

The information within this database will be made available to all relevant MACH Energy staff and contractors when developing maps/drawings/figures to ensure that any proposed disturbance works consider the location of known Aboriginal cultural heritage sites.

Updates to the MPO Aboriginal Heritage Site Database will be undertaken as required, including when new Aboriginal sites are identified within the MPO area, when Aboriginal cultural heritage sites within the MPO area are subject to salvage or further heritage investigation, when Aboriginal cultural heritage sites within the MPO area are subject to development impacts, and when previously recorded locations within the MPO area are subsequently determined through further investigation not to be an Aboriginal heritage site.

It is noted that changes to the management status of the known Aboriginal cultural heritage sites listed in Appendix E will be required as a result of the progressive conduct of heritage salvage activities and other actions on-site and consequent progressive updates to the MPO Aboriginal Heritage Site Database. Also, in some circumstances (for example, an increase to the spatial extent of a site may result in a change in the level or type of impact or revised level of significance), updates may be required in Appendix E to the proposed management measure for a site.

Any changes to the proposed management measure for any of the Aboriginal cultural heritage sites listed in Appendix E will be undertaken based on advice from a suitably qualified and experienced archaeologist and in consultation with the attending RAPs. Certain changes to the proposed management of known Aboriginal cultural heritage sites that result in a revision to this ACHMP (i.e. where there is a reduction in the level of management required for a given site due to change in significance) will also require DPHI review and approval (Section 9.2).

5.15 ABORIGINAL COMMUNITY ACCESS

Throughout the life of the MPO, RAPs may wish to access sites and/or areas at the MPO (including any Aboriginal objects and places outside of the approved disturbance area) for cultural purposes (e.g. education, ceremony). MACH Energy is committed to facilitating reasonable access consistent with personnel Workplace Health and Safety requirements. RAPs wishing to access the MPO area should contact the MACH Energy Environmental Superintendent (or equivalent) in writing at PO Box 407, Newcastle NSW 2300. If a written request is unable to be made, RAPs should contact MACH Energy via telephone on 1800 886 889.

The request for access should include, at a minimum, the following details:

- Purpose of the visit(s).
- The area or Aboriginal cultural heritage sites to be visited.
- The names of all persons proposed to take part in the visit(s).
- The intention (or not) to record the visit using audiovisual equipment (including video footage, photographs or audio recordings) (noting that specific permission for this remains at the discretion of MACH Energy).

A minimum of five business days written notice is required and access will be permitted by MACH Energy once an agreement has been reached between the RAP representatives and MACH Energy regarding the conditions of access. Access, in all instances, will be subject to relevant operational and safety considerations and cannot be guaranteed. There will be no unauthorised access to the MPO. Access to some sites and areas may be restricted during periods of mining due to safety concerns.

5.16 EXEMPTIONS FOR EMERGENCY VEGETATION MANAGEMENT

Should an emergency situation arise that requires vegetation clearance (e.g. fire-fighting, hazardous materials spill) in the vicinity of protected Aboriginal cultural heritage sites, vegetation clearance will be undertaken with minimum possible disturbance to the topsoil and in consideration of known Aboriginal cultural heritage sites where possible. Activities relating to maintenance, construction or operational activities do not comprise emergency situations.

6 HERITAGE INDUCTIONS

6.1 INDUCTIONS

Suitably qualified, competent and experienced persons shall be involved in the design, planning and implementation of this plan and related procedures.

All MPO site-specific employee and contractor inductions (including those inductions for construction personnel) will include an Aboriginal cultural heritage component and training will be conducted prior to commencement of work onsite. This will outline current protocols and responsibilities with respect to the management of Aboriginal cultural heritage for the MPO, including the Heritage Conservation Areas (Section 4), as outlined within this ACHMP. It will also provide an overview of the general Aboriginal cultural heritage site types present, relevant legal obligations in relation to Aboriginal heritage, responsibility and duty of care of persons in relation to Aboriginal heritage, and procedures for reporting the identification of Aboriginal cultural heritage sites.

The training package at the MPO will be reviewed with the RAPs at the 2024 Annual RAP meeting (Section 3.2). Preparation of the review of the training package with the RAPs will be delivered by a suitably qualified and experienced external expert(s) who will be engaged as required by MACH Energy specifically for this task.

The induction process also includes a description of the MPO Ground Disturbance Permit process and relevant protocols prior to any surface disturbance activities. From time to time, workforce communication and toolbox talks allow for discussion of the objectives and requirements of this and any other relevant Management Plans.

MACH Energy will maintain an accurate record of all employee and contractor inductions in accordance with Part B, Condition B69(d) of Development Consent SSD 10418 and Schedule 3, Condition 36(c) of Development Consent DA 92/97 (prior to its surrender).

6.2 ROLES AND RESPONSIBILITIES

The Environmental Superintendent is primarily responsible for implementing the suite of environmental management plans across the MPO, with assistance provided by the Managing Director and Department Managers/Supervisors.

A combination of MACH Energy employees and mining contractor staff are responsible for environmental management at the MPO. The roles and responsibilities of members of the site, including the environmental management team, are provided in MACH Energy's EMS.

It is the responsibility of MACH Energy to employ people that are appropriately trained, competent and have an appropriate level of experience and understanding to undertake their work in a manner that minimises impacts on the environment and community. In addition, a component of the site-specific induction is to promote and provide all employees and contractors with general environmental awareness training. In accordance with Part A, Condition A33 of Development Consent SSD 10418, MACH Energy will ensure that any of its employees or contractors are made aware of, and are instructed to comply with, the conditions of Development Consent SSD 10418 relevant to activities they carry out in respect of the development. A description of training requirements is provided in MACH Energy's EMS.

7 PERFORMANCE MEASURES

The performance measures listed in Table 10 will be used to assess the performance of the MPO in relation to the management of Aboriginal cultural heritage onsite.

Table 10
Performance Measures – Aboriginal Heritage

Performance Measure	Relevant Indicator
In accordance with Part B, Condition B24(c) of Development Consent SSD 10418 and Schedule 3, Condition 15(a) of Development Consent DA 92/97, minimisation of blasting impacts on heritage items.	Negligible environmental consequences[1]
No unauthorised impacts on Aboriginal cultural heritage sites without prior approval under the relevant AHIP(s) or Development Consent SSD 10418.	Nil

[1] In relation to sites not already approved for disturbance under the relevant AHIP(s).

MACH Energy will report on progress against these performance indicators in the Annual Review (Section 9.1). A contingency plan will be followed in the event of an unintended impact on Aboriginal cultural heritage (i.e. an incident or non-compliance with this ACHMP – Refer to Section 8).

8 CONTINGENCY PLAN

8.1 POTENTIAL CONTINGENCY MEASURES

In the event that a performance measure described in Section 7 is considered to have been exceeded, MACH Energy will implement the following Contingency Plan:

- The Project Manager will report the likely exceedance to the MACH Energy Environmental Superintendent (or relevant equivalent) within 24 hours of becoming aware of the exceedance or incident.
- In the event that the incident has caused, or threatens to cause, material harm to the environment, or impacts to Aboriginal cultural heritage not approved under an AHIP, the MACH Energy Environmental Superintendent (or relevant equivalent) will report the exceedance of the performance or incident to the DPHI and Heritage NSW immediately. All other incidents will be reported to the DPHI and Heritage NSW as soon as practicable after MACH Energy becomes aware of the incident.
- MACH Energy will identify an appropriate course of action with respect to the identified impact(s) or incident, in consultation with relevant specialists (e.g. suitably qualified archaeologist), RAPs and relevant agencies, as necessary. For example, identification of proposed contingency measure(s) and a program to review the effectiveness of the contingency measures. Contingency measures will be developed in consideration of the specific circumstances of the exceedance or incident and the assessment of environmental consequences.
- MACH Energy will, on request, submit the proposed course of action to the DPHI for approval.
- MACH Energy will implement the approved course of action to the satisfaction of the DPHI.
- MACH Energy will provide a detailed report on the exceedance of the performance measures to the DPHI and Heritage NSW within seven days of the date of becoming aware of the exceedance.
- MACH Energy will report the exceedance of the performance measure and the success of the approved course of action as a component of the MPO Annual Review (Section 9).

8.2 ADAPTIVE MANAGEMENT

In accordance with Part D, Condition D4 of Development Consent SSD 10418 and Schedule 5, Condition 1A of Development Consent DA 92/97 (prior to its surrender), MACH Energy will assess and manage risks to comply with the criteria and/or performance measures outlined in Section 7.

Where any non-compliance with the criteria and/or performance measures occurs, at the earliest opportunity, MACH Energy will:

- take all reasonable and feasible steps to ensure that the exceedance ceases and does not recur;
- consider all reasonable and feasible options for remediation and submit a report to the DPHI describing these options and preferred remediation measures; and
- implement remediation measures as directed by the Planning Secretary.

9 ANNUAL REVIEW AND IMPROVEMENT OF ABORIGINAL HERITAGE MANAGEMENT PLAN

9.1 ANNUAL REVIEW

In accordance with Part D, Condition D11 of Development Consent SSD 10418 and Schedule 5, Condition 3 of Development Consent DA 92/97 (prior to its surrender), MACH Energy will review and evaluate the environmental performance of the MPO by the end of March each year (for the previous calendar year).

In relation to the management of Aboriginal cultural heritage at the MPO, the Annual Review will:

- include a comprehensive review of the monitoring results and complaints records relating to the MPO over the past year, which includes a comparison of these results to evaluate compliance against the:
  - relevant statutory requirements, limits or performance measures/criteria;
  - monitoring results of the previous years; and
  - relevant predictions in accordance with Mount Pleasant Operation EIS and MOD 1, MOD 2, MOD 3 and MOD 4 EAs (prior to the surrender of Development Consent DA 92/97);
- identify any Aboriginal cultural heritage non-compliance over the past year, and describe what actions were (or are being) taken to ensure compliance;
- identify any trends in the blast monitoring data over the life of the MPO;
- identify any discrepancies between the predicted and actual impacts of the MPO, and analyse the potential cause of any significant discrepancies; and
- describe what blast-related measures will be implemented over the next year to improve the environmental performance of the MPO.

Copies of the approved MPO Annual Review will be submitted to Muswellbrook Shire Council and made available to the Community Consultative Committee and any interested person upon request, in accordance with Part D, Condition D12 of Development Consent SSD 10418 and Condition 11, Schedule 5 of Development Consent DA 92/97 (prior to its surrender). The MPO Annual Review will also be made publicly available on the MACH Energy website (https://machenergyaustralia.com.au/).

As mentioned in Part D, Condition D11 of Development Consent SSD 10418 (above) relating to MPO Annual Reviews, MACH Energy will include a comprehensive review of environmental performance at the MPO in accordance with Part A, Condition A2 of Development Consent SSD 10418 requires that:

> *A2. The development may only be carried out:*
>
> *(a) in compliance with the conditions of this consent;*
>
> *(b) in accordance with all written directions of the Planning Secretary;*
>
> *(c) generally in accordance with the EIS and EAs;*
>
> *(d) generally in accordance with the Development Layout in Appendix 2.*

9.2 ABORIGINAL CULTURAL HERITAGE MANAGEMENT PLAN REVIEW

9.2.1 Development Consent SSD 10418

In accordance with Part D, Condition D7 of Development Consent SSD 10418, this ACHMP will be reviewed, and if necessary revised (to the satisfaction of the Planning Secretary), within 3 months of the submission of:

- the submission of an incident report under Part D, Condition D9 or D10 of Development Consent SSD 10418;
- the submission of an MPO Annual Review under Part D, Condition D11 of Development Consent SSD 10418;
- the submission of an Independent Environmental Audit (IEA) under Part D, Condition D13 of Development Consent SSD 10418;
- the approval of any modification of the conditions of Development Consent SSD 10418; or
- notification of a change in development phase under Part A, Condition A12 of Development Consent SSD 10418.

This ACHMP will also be reviewed and revised at any time when, in the view of MACH Energy, it is necessary and convenient to review this ACHMP for the effective administration of Aboriginal cultural heritage matters connected with the MPO. This ACHMP will be reviewed and revised if MACH Energy elects to surrender an AHIP or an AHIP expires.

In accordance with Part D, Condition D8 of Development Consent SSD 10418, within 6 weeks of conducting any such review, the Planning Secretary will be advised of the outcomes of the review and any revised documents submitted to the Planning Secretary for approval.

In accordance Part A, Condition A24 of Development Consent SSD 10418, MACH Energy may submit a revised ACHMP for the approval of the Planning Secretary at any time and may also submit any revision to this ACHMP on a staged basis.

In accordance with Part A, Condition A25 of Development Consent SSD 10418, if agreed with the Planning Secretary, a revision to this ACHMP required under Development Consent SSD 10418 may be prepared without undertaking consultation with all parties nominated under the relevant conditions of Development Consent SSD 10418.

9.2.2 Development Consent DA 92/97

In accordance with Schedule 5, Condition 4 of Development Consent DA 92/97 (prior to its surrender), this ACHMP will be reviewed, and if necessary revised (to the satisfaction of the Planning Secretary of the DPHI), within 3 months of the submission of:

- an Annual Review (Schedule 5, Condition 3 of Development Consent DA 92/97);
- an incident report (Schedule 5, Condition 7 of Development Consent DA 92/97);
- an IEA (Schedule 5, Condition 9 of Development Consent DA 92/97); and/or
- any modification to the conditions of Development Consent DA 92/97.

Within 4 weeks of conducting any such review, the Planning Secretary of the DPHI will be advised of the outcomes of the review and any revised documents submitted to the Planning Secretary for approval.

In accordance with Schedule 5, Condition 4A of Development Consent DA 92/97 (prior to its surrender), MACH Energy may submit a revised ACHMP for the approval of the Planning Secretary at any time and may also submit any revision to this ACHMP required under Development Consent DA 92/97 on a staged basis.

Subject to agreement by the DPHI, MACH Energy may submit a revised ACHMP for approval without undertaking consultation with the RAPs in instances where the changes proposed to this ACHMP are not material in nature. In the context of this ACHMP, changes that would not be considered material in nature may include (for example) updates to the project description of the MPO (Section 1.1), updates to the list of RAPs (Appendix D), or updates to the salvage status of known sites and/or the incorporation of additional sites in Appendix E (for example those recorded during ongoing salvage works and recording during future modifications where the impact to and management of the sites has been discussed in consultation with the RAPs). Note that the intention would be to only provide revised ACHMP documents with updates to Appendix E to the DPHI on an as needed basis (e.g. annually). Substantive changes in the ACHMP such as changes to proposed management strategies, changes to project impact footprint or changes to consultation approach will be undertaken in consultation with the RAPs and Heritage NSW.

Following review and revision of this ACHMP, the resulting revised ACHMP will be submitted to the DPHI for approval by the Planning Secretary.

This ACHMP will be made publicly available on the MACH Energy website (http://www.machenergyaustralia.com.au), in accordance with Part D, Condition D17 of Development Consent SSD 10418 and Schedule 5, Condition 11 of Development Consent DA 92/97 (prior to its surrender).

9.3 INDEPENDENT ENVIRONMENTAL AUDIT

Within one year of commencement of development under Development Consent SSD 10418, and every 3 years after, an IEA will be undertaken and submitted as required, in accordance with Part D, Condition D13 of Development Consent SSD 10418.

In accordance with Part D, Condition D14 of Development Consent SSD 10418, within 3 months of commencing the IEA, MACH Energy will submit a copy of the audit report to the Planning Secretary, and other NSW agency that requests it, together with its response to any recommendations contained in the audit report, and a timetable for the implementation of the recommendations. MACH Energy will ensure that the recommendations will be implemented and the findings and compliance with the IEA will be reported in the MPO Annual Reviews.

Once Development Consent DA 92/97 is surrendered, all subsequent Internal Environmental Audits commissioned by MACH Energy will be in accordance with Part D, Condition D13 and D14 of Development Consent SSD 10418.

Subsequent versions of the IEA will be provided to the Planning Secretary of the DPHI and made available on the MACH Energy website. The IEA will be conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Planning Secretary of the DPHI.

10 REPORTING PROCEDURES

In accordance with Part D, Condition D5(h) of Development Consent SSD 10418 and Schedule 5, Condition 2 of Development Consent DA 92/97 (prior to its surrender), MACH Energy has developed protocols for managing and reporting the following:

- incidents;
- complaints;
- non-compliances with statutory requirements; and
- exceedances of the impact assessment criteria and/or performance criteria.

These protocols are described in detail in the MPO EMS.

In accordance with Part D, Condition D17(vi) of Development Consent SSD 10418 and Schedule 5, Condition 8 of Development Consent DA 92/97 (prior to its surrender), MACH Energy will provide regular reporting on the environmental performance of the MPO on the MACH Energy website (https://machenergyaustralia.com.au/).

In accordance with Part D, Conditions D15 and D16 of Development Consent SSD 10418, any conditions of Development Consent SSD 10418 that require the carrying out of monitoring or an environmental audit, whether directly or by way of a plan, strategy or program, is taken to be a condition requiring monitoring or an environmental audit under Division 9.4 of Part 9 of the NSW EP&A Act. These conditions include incident notification (Part D, Condition D9 of Development Consent SSD 10418); non-compliance notification (Part D, Condition D10 of Development Consent SSD 10418); reporting and response; compliance reporting; and IEA (Part D, Condition D13 of Development Consent SSD 10418).

10.1 INCIDENT REPORTING

An incident is defined as an occurrence or a set of circumstances that causes or threatens to cause material harm to the environment and/or breaches or exceeds the limits or performance measures/criteria in Development Consent SSD 10418.

In the event that review of monitoring data, or a complaint indicates an incident has occurred, the incident will be reported in accordance with Part D, Condition D9 of Development Consent SSD 10418 and Schedule 5, Condition 7 of Development Consent DA 92/97 (prior to its surrender). The Planning Secretary will be notified in writing via the Major Projects website immediately after MACH Energy becomes aware of an incident. The notification will identify the Project name and development application number and set out the location and nature of the incident.

In accordance with Part D, Condition D10 of Development Consent SSD 10418, within 7 days of becoming aware of a non-compliance MACH Energy will notify DPHI of the non-compliance.

The notification must be made in writing via the Major Projects Website and will:

- identify the MPO (including the Development Application number and name);
- set out the condition of Development Consent SSD 10418 that the incident is non-compliant with;
- describe the location and nature of the incident;
- the reason for the non-compliance (if known); and
- what actions have been, or will be, undertaken to address the non-compliance.

10.2 COMPLAINTS

MACH Energy maintains a Community Hotline (1800 886 889), which is dedicated to the receipt of community complaints. The Community Hotline is publicly advertised in a variety of MACH Energy's public communication tools and is available during operating hours (i.e. 24/7), to receive any complaints. Communication received from the hotline is recorded in a Community and Stakeholder Engagement Database.

MACH Energy has developed a procedure that outlines its commitment to receiving, responding to and maintaining a record of phone calls from the community. This procedure is supported by a Community and Stakeholder Engagement Register. This is described in MPO EMS.

In accordance with Part D, Condition D17 of Development Consent SSD 10418 and Schedule 5, Condition 11 of Development Consent DA 92/97 (prior to its surrender), a complaints register will be made available on the MACH Energy website (https://machenergyaustralia.com.au/) and updated monthly.

10.3 NON-COMPLIANCE WITH STATUTORY REQUIREMENTS

In accordance with Part D, Condition D5(h) of Development Consent SSD 10418 and Schedule 5, Condition 7A of Development Consent DA 92/97 (prior to its surrender), a protocol for managing and reporting non-compliances with statutory requirements has been developed as a component of MPO EMS and is described below.

Compliance with all approval plans and procedures is the responsibility of all personnel (staff and contractors) employed on or in association with MACH Energy and the Project. In accordance with Part A, Condition A2 of Development Consent SSD 10418 and Schedule 2, Condition 2 of Development Consent DA 92/97 (prior to its surrender), MACH Energy will carry out the development in accordance with:

- the conditions of Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender)[16];
- all written directions of the Planning Secretary;
- Statement of Commitments (Appendix 3 of Development Consent DA 92/97);
- the 1997 EIS, EA (MOD 1), EA (MOD 2), EA (MOD 3), EA (MOD 4), the Project EIS; and
- with the Development Layout in Appendix 2 of Development Consent SSD 10418 (Appendix D).

MACH Energy will undertake regular inspections, internal audits and initiate directions identifying any remediation/rectification work required, and areas of actual or potential non-compliance.

As described in Section 10.1, MACH Energy will report incidents in accordance with Part D, Condition D9 of Development Consent SSD 10418 and Schedule 5, Condition 7 of Development Consent DA 92/97 (prior to its surrender).

A review of compliance with all conditions in Development Consent SSD 10418, Development Consent DA 92/97 (prior to its surrender) and relevant MLs will be undertaken prior to (and included within) each Annual Review (Section 9.1).

Additionally, in accordance with Part D, Condition D13 of Development Consent SSD 10418 and Schedule 5, Condition 9 of Development Consent DA 92/97 (prior to its surrender), an IEA (Section 9.3) will be conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Planning Secretary to assess whether MACH Energy is complying with the requirements in Development Consent SSD 10418 and Development Consent DA 92/97 (prior to its surrender).

10.4 ACCESS TO INFORMATION

In accordance with Part D, Condition D17 of Development Consent SSD 10418 and Schedule 5, Condition 11 of Development Consent DA 92/97 (prior to its surrender), the MACH Energy website will be maintained as a tool for the provision of information to stakeholders and interested parties about the operation and environmental performance of the MPO. Information required by MACH Energy to be available on the website is outlined in MPO EMS.

[16] In accordance with Part A, Condition A4 of Development Consent SSD 10418, the conditions in Development Consent SSD 10418 and directions of the Planning Secretary prevail to the extent of inconsistency, ambiguity or conflict between them and any document/s listed in condition A2(c). In the event of an inconsistency, ambiguity or conflict between any of the document/s listed in condition A2(c), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict.

ENDORSEMENT OF JAMIE REEVES

Department of Planning and Environment

Our ref: SSD-10418-PA-1

Mariah Lane
Environmental Advisor
Mach Energy Australia Pty Ltd
PO Box 407
Newcastle, NSW,2300

17/05/2023

Subject: Endorsement of Suitably Qualified and Experience Specialists for Mount Pleasant Optimisation Project

Dear Ms. Lane

I refer to your request for the Planning Secretary's endorsement of suitably qualified and experienced specialists to prepare management plans for the Mount Pleasant Optimisation Project (SSD-10418) and Mount Pleasant Coal Mine DA (92/97 until its surrender).

The Department has reviewed the nominations and information you have provided and is satisfied that the following specialists are suitably qualified and experienced. Accordingly, I can advise that the Planning Secretary approves/endorses the appointment of the following specialists:

- Dr Colin Driscoll of Hunter Eco for preparation of the Biodiversity Management Plan
- Chloe Annandale of Landroc for preparation of the Rehabilitation Strategy
- John Wassermann of RWDI for the preparation of the Blast Management Plan and Noise Management Plan
- Jamie Reeves of Niche Environment and Heritage for the preparation of the Aboriginal Cultural Heritage Management Plan
- Aleks Todoroski of Aleks Air Sciences for the preparation of the Air Quality and Greenhouse Gas Management Plan
- Dr Andrew Sneddon of Extent for the preparation of the Historic Heritage Management Plan
- Penny Dalton of TTPP for the preparation of the Traffic Management Plan
- Camilla West of ATC Williams and Bryce McKay of AGEC for the preparation of the Water Management Plan

If you wish to discuss the matter further, please contact Wayne Jones on (02) 6575 3406.

Yours sincerely

Stephen O'Donoghue
Director
Resource Assessments
As nominee of the Planning Secretary

ABORIGINAL CULTURAL HERITAGE RELATED CONDITIONS – DEVELOPMENT CONSENT SSD 10418

Table A-1
Aboriginal Cultural Heritage Related Conditions – Development Consent SSD 10418

MPO Development Consent SSD 10418 Part B	Section where addressed in this ACHMP document
Protection of Aboriginal and Historic Heritage	
B66. The Applicant must ensure that the development does not cause any direct or indirect impact on any identified aboriginal sites, conservation areas or heritage items located outside the approved disturbance area, beyond those predicted in the document/s listed in condition A2(c).	Section 5.8
***Note:** identified Aboriginal sites, conservation areas and heritage items are shown in the figures in Appendix 5.*	
B67. If suspected human remains are discovered on the site, then all work surrounding the area must cease, and the area must be secured. The Applicant must immediately notify the Department of Climate Change, Energy, the Environment and Water, NSW National parks and Wildlife Service, NSW Police Force and Heritage NSW, and work must not recommence in the area until authorised by NSW Police Force and Heritage NSW.	Section 5.11
B68. The Applicant must ensure that all known Aboriginal objects or Aboriginal places on the site, are properly recorded and those records are kept up to date, in the Aboriginal Heritage Information Management System (AHIMS) Register.	Sections 5.2 and 5.14

APPENDIX B

ABORIGINAL CULTURAL HERITAGE RELATED CONDITIONS – DEVELOPMENT CONSENT DA 92/97

Table B-1
Aboriginal Cultural Heritage Related Conditions – Development Consent DA 92/97

Development Consent DA 92/97 Requirement	Section where addressed in this ACHMP document
Aboriginal Heritage Conservation Strategy *33. The Applicant must prepare an Aboriginal Heritage Conservation Strategy for the development to the satisfaction of the Secretary. This strategy must:* *(a) be prepared by suitably qualified and experienced persons whose appointment has been endorsed by the Secretary;* *(b) be prepared in consultation with OEH and the Registered Aboriginal Parties;* *(c) be submitted to the Secretary for approval prior to carrying out any development on site;* *(d) provide for the establishment and conservation of an off-site Aboriginal cultural heritage conservation area/s that has comparable Aboriginal cultural heritage values (both cultural and archaeological) to the areas that would be developed on site;* *(e) describe the measures that would be implemented to provide appropriate long-term security for the proposed Aboriginal cultural heritage conservation areas; and* *(f) include an action plan for the implementation of the strategy.* *The detailed measures for the implementation of the strategy are to be outlined in the Heritage Management Plan (see condition 36).* *The Applicant must implement the approved strategy as approved from time to time by the Secretary.* *Note:* • *The Aboriginal cultural heritage conservation area/s may be combined with any similar offset/conservation area required for the development under Commonwealth legislation, subject to suitably offsetting the cultural heritage impacts of the development.*	The Aboriginal Heritage Conservation Strategy, including the staged approach to the long-term security of the conservation areas, is discussed in further detail in Section 4.
34. Within 2 years of the approval of the Aboriginal Heritage Conservation Strategy, the Applicant must demonstrate to the satisfaction of the Secretary, that it has made suitable arrangements to provide appropriate long-term security for the Aboriginal cultural heritage conservation area/s in the Aboriginal Heritage Conservation Strategy.	
Oral History *35. By the end of December 2013, the Applicant must prepare a detailed history of the Mount Pleasant locality to the satisfaction of the Secretary. This history must:* *(a) be prepared by suitably qualified and experienced persons whose appointment has been endorsed by the Secretary;* *(b) be prepared in consultation with the Heritage NSW, the local history society, local community (including former residents as far as is practicable), and Registered Aboriginal Parties;* *(c) be prepared in accordance with the relevant Heritage Council of NSW guidelines; and* *(d) include detailed historical research as well as an oral history.*	Section 2.3

APPENDIX C

GLOSSARY OF KEY TERMS

Table C-1
Glossary of Key Terms

Term	Definition
Aboriginal object	Any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises New South Wales (NSW), being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, including Aboriginal remains (NP&W Act, section 5[1]).
Aboriginal cultural heritage site	Location of evidence of Aboriginal occupation (typically, Aboriginal objects, but also places of traditional or historical cultural value for which no Aboriginal objects exist).
AHIP	Aboriginal Heritage Impact Permit, issued by Heritage NSW under Section 90 of the NP&W Act to allow impacts to Aboriginal objects.
AHIMS	Aboriginal Heritage Information Management System, administered by Heritage NSW.
PAD	Potential Archaeological Deposit, archaeological evidence (typically stone artefacts buried in a sub-surface context within rock shelters or in open contexts) that are predicted to occur in a specific place through application of a predictive model of site location.
Registered Aboriginal Party (RAP)	Members of a Local Aboriginal Land Council, registered holders of Native Title, Aboriginal organisations or other Aboriginal people who have expressed an interest in the Mount Pleasant Operation.
Suitably qualified archaeologist	All references to a 'suitably qualified archaeologist' in this document are taken to be references made in accordance with Heritage NSW policy *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010a). That is, to an appropriately skilled and experienced person with a minimum of a Bachelor's degree with Honours in archaeology or relevant experience in the field of Aboriginal cultural heritage management, and the equivalent of two years full-time experience in Aboriginal archaeological investigation (including involvement in a project of similar scope) and a demonstrated ability to conduct a project of the scope required through inclusion as an attributed author on a report of similar scope.

APPENDIX F

MOUNT PLEASANT OPERATION GROUND DISTURBANCE PERMIT

MACHEnergy

GROUND DISTURBANCE PERMIT

Permit to be completed with reference to Ground Disturbance Permit Procedure ME-EMS-PRO-02

Permit Criteria

This permit must be completed for all surface disturbance work including slashing, fencing, tree clearing, removal of topsoil, demolition and access to rehabilitation areas

Part 1 – Task Details *(to be completed by the person requesting the permit)*

Site	Mount Pleasant Operation	Permit ID Number:	**MPO-GDP-**
Company Name:		Date:	
Permit Holder:		Plan provided?	☐Yes ☐No

Note

A plan must be provided, unless otherwise agreed to with the Environmental Superintendent (or Delegate), which includes the entire area to be disturbed, access areas and park-up areas, for approval of this permit. Where applicable erosion and sediment control, and stockpile and rehabilitation information must also be included. A change in the conditions of this Permit may require a reassessment of this Permit.

Proposed start date		Expected duration:	(weeks)
Job location:			

Job description:

☐ Slashing ☐ Vegetation clearing ☐ Topsoil removal ☐ Demolition ☐ Other

Details of activities:
Include summary of task, reason, purpose, size of disturbance (ha), boundaries and the expected duration, including rehabilitation

Is demarcation or pegging of the work area required? *(Demarcation is mandatory except for routine slashing)*	☐No	☐Yes -	Entire area is to be clearly demarcated Demarcation to be confirmed by pre-clearing survey *- Part 9 to be completed*
Is the task area within approval boundaries? *(Where demarcation of an external approval boundary is required it must be performed by a qualified surveyor – Part 10 to be completed)*	☐No	☐Yes -	Describe below how boundaries are identified?
Is the specific task permitted under any existing approvals?	☐No	☐Yes -	If no, additional approval required, discuss with the Environmental Superintendent.
Will infrastructure be removed or decommissioned as part of this Permit? *Includes fences, powerlines, pipelines, cables and similar, houses, yards etc.*	☐No	☐Yes -	List affected infrastructure in consultation with Land and Property Superintendent.
Will topsoil and/or vegetation be removed, relocated or stockpiled as part of this Permit?	☐No	☐Yes -	Pre-disturbance survey required – *Part 5 and 6 to be completed.* Clearing & Stockpiles required – *Part 7 to be completed*
Are water courses located within or near work area? *Includes designated water courses, creeks, tributaries or drainage lines*	☐No	☐Yes -	Erosion and sediment control required Details must be included on plan For designated water courses, additional approval is required – consult with Environmental Superintendent
Is erosion and sediment control required for this task?	☐No	☐Yes -	Erosion and sediment control required – *Part 3 to be completed*
Will the works impact on any statutory environmental points? *Includes potential impacts on air quality monitoring equipment and discharge points etc.*	☐No	☐Yes -	Include details in comments below

All rights reserved, including all rights relating to the use of this document or its contents.

Is drilling or excavation required as part of this task?	☐No	☐Yes -	Additional permits maybe required – discuss requirements with Environmental Superintendent, including liaison with Survey Team and Dial Before You Dig.
Is the disturbance to be conducted on land owned by the operation?	☐No	☐Yes -	If No, seek guidance from the Environmental Superintendent to confirm if further approvals are required.
Are access tracks required to the area and included in this disturbance permit?	☐No	☐Yes -	Include details in comments below

Part 2a – Land and Property Superintendent (or Delegate) Infrastructure Disturbance *(mandatory for all permits)*

Will any infrastructure be removed as part of this permit? Including fences, powerlines, pipelines, cables and similar, houses, yards etc. If yes, undertaken relevant management and mitigation measures to ensure no impact to land and property.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Part 2b – Environmental Superintendent (or Delegate) Work Area Visit *(mandatory for all permits)*

Environmental Superintendent (or Delegate) – Initial inspection
I have physically visited the proposed disturbance work area and I am aware of the scope and requirements of the proposed work.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Part 3 – Erosion and Sediment Control *(to be completed by the person requesting the permit)* ☐ Required ☐ Not Required

Only applicable if Erosion and Sediment control is required from Part 1, to be completed by the Permit Holder

Note

All erosion and sediment plan requirements must be completed prior to any disturbance activity commencing

Erosion and sediment plan	☐ Not Required ☐ Required – *all elements below must be completed* Sediment and erosion control plans attached Scale map of affected areas and details included on site plan
Sediment dam(s)	☐ Not Required ☐ Required – *all elements below must be completed*

Sediment dam calculations				
Area (ha) *(Total catchment area)*	*Setting zone vol (m^3)*	*Sediment storage vol (m^3)*	*Total basin vol (m^3)*	*Flocculant (if required)*

Controls *List all required controls to manage erosion and sediment for permit approval. Specific Permit Conditions must be listed in Part 8*	

All rights reserved, including all rights relating to the use of this document or its contents.

Part 4 – Community Interaction *(to be completed by the Environmental Superintendent or Delegate in consultation with External Relations Manager)*			
Is the proposed area within 2 km of sensitive receivers?	☐No – go to Part 5	☐Yes -	List details and include on final plan
Does any member of the public need to be contacted?	☐No	☐Yes -	List contact details
Are there any additional requirements from public contact?	☐No	☐Yes -	List Specific Permit Conditions in Part 8
Controls *Details of any procedures, operating hour limits or contact information. Specific Permit Conditions must be listed in Part 8.*			

Part 5 – Cultural/European Heritage *(to be completed by the Environmental Superintendent or Delegate)*		
If any response is unknown, complete required level of due diligence to enable a response.		
Has a Cultural Heritage/European clearance been obtained within the proposed disturbance area?	☐Yes	Verify location on plan and provide details, list any controls below
	☐No	Conduct due diligence of proposed disturbance area
Are Cultural/European Heritage sites located within the disturbance area, including access tracks?	☐Yes	Identify all known European or Cultural Heritage sites on plan, list any controls below
	☐No	Verify against existing site data
Controls *List all required controls to manage Cultural/European heritage for Permit approval. Specific Permit Conditions must be listed in Part 8.*		

Part 6 – Ecology *(to be completed by the Environmental Superintendent or Delegate)*		
If any response is unknown, complete required level of due diligence to enable a response.		
Is any significant flora or fauna located in the area to be disturbed?	☐Yes	List controls below
	☐No	No further action required?
Are any sensitive wildlife habitats located in the area to be disturbed?	☐Yes	List controls below
	☐No	No further action required?
Are there any site specific ecology requirements for the area to be disturbed? *Includes tree or habitat clearing restrictions etc. Wildlife spotter / catcher required*	☐Yes	List controls below
	☐No	No further action required?
Controls *List all required controls to manage ecology for permit approval. Specific Permit Conditions must be listed in Part 8.*		

Part 7 – Clearing and Stockpiles *(to be completed by the person requesting the permit)*	☐ Required	☐ Not Required
Is vegetation to be cleared and/or topsoil to be stripped?	☐Yes	Complete relevant section(s) below
	☐No	This part not applicable, go to Part 8
Topsoil management *(only applicable if stripping topsoil)*		
Is topsoil strip depth known?	☐Yes	Enter strip depth: 100-300 millimetres
	☐No	Confirm strip depth with Environmental Superintendent
Can topsoil be directly placed on rehabilitation areas?	☐Yes	Include location details on plan and Specific Permit Requirements in Part 8
	☐No	

All rights reserved, including all rights relating to the use of this document or its contents.

Part 7 – Clearing and Stockpiles *(continued)*		
Topsoil stockpiles *(only applicable if stockpiling topsoil)*		
Maximum topsoil stockpile height permitted:	Maximum Height:	Metres(<3metres)
Is the topsoil stockpile(s) location included on the plan?	☐Yes	Confirm correct location details on plan
	☐No	Update plan to include details
Is stockpile drainage adequate?	☐Yes	Environmental Superintendent to confirm erosion and sediment plan
	☐No	Update erosion and sediment plan to include topsoil stockpile
Are there site specific conditions / requirements for topsoil stockpiles?	☐Yes	Update Specific Permit Conditions in Part 8
	☐No	No further action
Vegetation management *(only applicable if clearing vegetation)*		
Can vegetation be directly placed on rehabilitation areas?	☐Yes	Include location details on plan and Specific Permit Requirements in Part 8
	☐No	Complete vegetation stockpile sub-section below
Vegetation stockpiles *(only applicable if stockpiling vegetation)*		
Maximum vegetation stockpile height permitted:	Maximum Height:	Metres(<3metres)
Is the vegetation stockpile(s) location included on the plan?	☐Yes	Confirm correct location details on plan
	☐No	Update plan to include details
Is stockpile drainage adequate?	☐Yes	Environmental Superintendent to confirm erosion and sediment plan
	☐No	Update erosion and sediment plan to include vegetation stockpile
Are there site specific conditions / requirements for vegetation stockpiles?	☐Yes	Update Specific Permit Conditions in Part 8
	☐No	No further action
Controls *List all required stockpile controls for permit approval. Specific Permit Conditions must be listed in Part 8.*		

Part 8 – Specific Permit Conditions *(to be completed by the Environmental Superintendent)*	
1.	All disturbance must remain within the GDP application area, no disturbance or machinery is to be outside the peg/survey line. If GDP markers have been removed/knocked over, supervisor must be notified and area must be re-surveyed and markers re-instated before disturbance proceeds.
2.	Dust shall be kept to a minimum in accordance with the Air Quality Management Plan.
3.	Should archaeological sites be discovered, works are to stop immediately and MACH Energy notified.
4.	Works to be undertaken in progressive manner and disturbance minimised where practical.
5.	Erosion and sediment controls to be installed prior to stripping of topsoil/disturbance. All controls to be installed and maintained in accordance with Blue Book principles and in accordance with ESCP outlined in GDP.
6.	
7.	
8.	
9.	
10.	

All rights reserved, including all rights relating to the use of this document or its contents.

Part 9 – Survey (Boundary Check) Signoff *(to be completed by the person requesting the permit)*

Approval Boundaries Check: ☐

Survey Inspection
The proposed disturbance area is within approved disturbance limits and has been clearly demarcated, relevant to the tasks, and clearly identifies required boundaries to meet the requirements of this permit.
A survey has been completed, for the requirements detailed above and confirmed that demarcation and construction of controls identified in Part 3 have been constructed to design.

Date	*Time*	*Contact number (mobile)*	*Name (must be qualified surveyor)*	*Signature*

Part 10 – Permit Approval

Environmental Superintendent (or Delegate) Approval

I have reviewed the contents of this Permit and confirm that all information, where applicable, is correct and has been completed to site requirements.
I have inspected the work area and pre-disturbance controls and all pre-disturbance activities, where applicable, have been completed to the Permit requirements.
The Permit Issuer is aware of the approved scope, all Part 8 – Specific Permit Conditions and any other aspects for completion of work related to this Permit
I Authorise approval of this Permit to the defined scope, and additional conditions listed in Part 8 – Specific Permit

Pre-Clearance inspection completed including the following:	☐ Erosion and sediment controls (not confirmed by survey) are installed ☐ Habitat trees have been identified and any controls specified are in place ☐ Area is adequately demarcated ☐ Access to the site is adequate and where applicable covered by the permit ☐ Any site specific controls (where identified) have been installed
Comments:	Refer to Part 8 for comments.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Caution

No further on the ground works can proceed until Part 10 is completed. All pre-disturbance controls must be in place.

Permit Holder

I am authorised to perform the role of Permit Holder for this Permit.
I have read and understood the contents and conditions of this permit and any related procedures, and I agree to abide by these requirements. I have communicated the requirements of this permit to those working under the approval of this permit.
Any proposed change to the scope or conditions of this permit will be discussed with the Environmental Superintendent (or Delegate) first. I will comply with all requirements, including reporting requirements.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Part 11 – Attachments *(to be completed by the person requesting the permit)*

All attached documents, directly related to this Permit, are to be listed below. These will include a risk assessment and an Erosion and Sediment Control Plan at a minimum.

Date	*Reference number*	*Title*

All rights reserved, including all rights relating to the use of this document or its contents.

Part 12 – Task Monitoring and Inspections *(includes Permit Holder, Environmental Superintendent etc.)*

Record of planned and unplanned task monitoring and inspections

Date	*Time*	*Name (printed)*	*Signature*	*Comments*

Part 13 – Worker Sign-on – Review and Re-sign Weekly

Date	*Time*	*Name (printed)*	*Signature*	*Comments*

All rights reserved, including all rights relating to the use of this document or its contents.

Part 14 – Amendments *(completed by the Permit Holder and Environmental Superintendent (or Delegate), if required)*	☐ Required	☐ Not Required

Amendment:	☐ Updated job description and site plan, including expected duration ☐ Update survey of work area, if required ☐ Confirm area within approval boundaries ☐ Update DBYD, if required ☐ Update erosion and sediment control works, if required ☐ Confirm no impact to community ☐ Confirm no impact to cultural or European heritage ☐ Confirm no impact to ecology ☐ Complete site visit, if required ☐ Confirm updated topsoil and/or vegetation clearing and stockpiles, if required
Comments *Including additional specific permit conditions.*	

Environmental Superintendent (or Delegate) Amendment Assessment				
An assessment of the amendment/s has been completed, as per the above checklist. Additional works outlined in the amendment/s can now be completed.				
Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Permit Holder Amendment Assessment				
An assessment of the amendment/s has been completed, as per the above checklist. Additional works outlined in the amendment/s can now be completed.				
Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

All rights reserved, including all rights relating to the use of this document or its contents.

Part 15 – Post-Disturbance Assessment *(completed by the Permit Holder and Environmental Superintendent (or Delegate) on permit completion/cancellation, if required)*	☐ Required	☐ Not Required

Post-Disturbance Assessment completed including:	☐ All rubbish removed from work area(s) ☐ All pegs and flagging tape removed ☐ All plant and equipment removed from the work area(s) ☐ Erosion and sediment controls completed to plan ☐ All rehabilitation work completed to requirements *(including access tracks)* ☐ Landholder satisfied with rehab works *(where applicable)* ☐ Stockpiles constructed to requirements *(where applicable)* ☐ Site plan updated to reflect any changes *(stockpiles, dams etc. where applicable)* ☐ Has clearing been completed in accordance with the permit? ☐ Has survey completed an "as constructed pick up"?
Comments *Instructions or requirements relevant to post-disturbance inspections.*	

Environmental Superintendent (or Delegate) Post Disturbance Assessment

A post-disturbance assessment has been completed for the area of disturbance authorised by this Permit. All works have been inspected, as noted above, and have been completed to site requirements. This Permit can now be completed/cancelled.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Permit Holder Post Disturbance Assessment

A post-disturbance assessment has been completed for the area of disturbance authorised by this permit. All works have been inspected, as noted above, and have been completed to site requirements. This permit can now be completed/cancelled.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Part 16 – Permit Completion / Cancellation *(all signatures required)*	
☐ Permit Complete	☐ Permit Cancelled *(comments required)*
The task activities authorised by this permit are complete, or no longer required. All required inspections have been completed *No further work is permitted under the authority of this permit*	
Comments *Cancellation must include reasons.*	

Environmental Superintendent (or Delegate)

All Environmental aspects of this permit have been completed (including cancelled) to site requirements.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

Permit Holder

All work has been completed (or cancelled) to satisfy the requirements of this permit.

Date	*Time*	*Contact number (mobile)*	*Name (printed)*	*Signature*

All rights reserved, including all rights relating to the use of this document or its contents.

APPENDIX G

SCARRED TREE REMOVAL PROTOCOL

The removal of an Aboriginal scarred tree site will follow the below four step procedure:

1. Pre-removal preparation;
2. Removal/relocation;
3. Storage; and
4. Management/preservation.

Pre-removal Preparation

A qualified arborist will be engaged to plan, conduct and direct the tree removal works. The arborist is responsible for assessing the most appropriate method of removing each tree based on specific factors such as species, condition and location.

A qualified archaeologist will be engaged to attend the removal in order to address potential archaeological issues such as exposure of artefacts during topsoil disturbances.

A pre-removal planning meeting will be held onsite that includes MACH Energy Pty Ltd (MACH Energy) representatives, the arborist, attending Registered Aboriginal Parties (RAPs) and the qualified archaeologist. This allows all parties to discuss the works program and any logistical issues. The pre-removal planning meeting may be held on the day of the tree removal or before.

The following equipment may be required:

- Backhoe.
- Large front-end loader.
- Excavator.
- 25 tonne all-terrain crane.
- 50 tonne crane.
- Tipper (for hay bales for bedding).
- Elevated work platform.
- 20 tonne soft slings.
- Water truck.
- Wool bags or similar for bedding.
- Concrete blocks for plinths.
- Chain saws.
- Carpet or similar for wrapping scar and bole of tree.
- Hazard cones, bunting signage etc.

Removal/Relocation

The following steps provide a guide for the tree removal. This process will be subject to modification based on the arborist's recommendations.

1. Prepare access and safe work area, including a barricaded exclusion zone.
2. Wrap carpet or similar around scar for protection.
3. Erect an elevated platform in order to remove overhanging branches and limbs (if required).

4. Attach lift swing.
5. Use backhoe to trench around the tree in order to expose the base of the bole (trunk) above the roots.
6. Once the trench has been excavated and the base of the bole cut, the crane can begin removing the tree from the trench.
7. Load the tree on the truck for transportation and relocate the tree to a keeping place or storage area.
8. Tree can then be cleaned and cared for including application of pest control.

Storage

This section describes the process for storage of the trees. This process will be subject to modification based on the arborist's recommendations.

Trees will be placed on non-timber based sleepers such as a high strength concrete block or plinths. The storage facility must be of sufficient size to adequately store and maintain the number and sizes of all removed trees. The facility must be suitable for enabling cleaning and maintenance of the trees. A tag, identifying the tree, including the Aboriginal Heritage Information Management System (AHIMS) reference number and Site Name will be placed on the tree.

In addition, a barrier layer of acrylic resin at the base or other suitable area of the tree and an indelible pigment based pen will be used to apply the registration number of the scarred tree.

Preservation – Cleaning

This section describes the process for preservation (including cleaning) of the trees. This process will be subject to modification based on the arborist's recommendations.

Many trees suffer from termite activity and rotting which subsequently hollows the tree's trunk. Therefore, all termite detritus will be attempted to be cleared from the inside of the trunk and the outer surface as far as practical without damaging the scar for which the tree has been salvaged for. Termite detritus will be removed using brushes and probes and then vacuumed. Insects recovered during this process will be identified to determine an appropriate eradication procedure. Insect traps such as glue pads will be placed throughout the storage container or shed as required.

Preservation – Seasoning

This section describes the process for preservation (including seasoning) of the trees. This process will be subject to modification based on the arborist's recommendations.

Should the scarred tree that is to be removed be a living or 'green' tree it must be stored indoors until the moisture content is below 20 per cent (%). Trees with moisture content less than 20% are unlikely to support decay fungi degradation and should also be relatively physically stable. In dry conditions, the trees will age and season readily.

Once seasoned, high temperatures should not affect the trees, however 'green' humidity may obstruct the drying process. Humidity indicators and moisture detection strips may be used as a guide to ventilation requirements. Such requirement may be as simple as opening the container or shed doors on a dry day. The scarred trees will be monitored regularly (monthly) during the initial stages of their storage.

APPENDIX H

EXAMPLE ADMINISTRATION COORDINATOR APPLICATION FORM

APPENDIX H
ADMINISTRATION COORDINATOR APPLICATION FORM

If you wish to be considered as an administration coordinator for the management of Aboriginal heritage at the Mount Pleasant Operation, please address the following criteria:

1. What is the name of your Registered Aboriginal Party?

   _____

2. Are you a member of a Native Title group?

   ☐ Yes ☐ No

   If yes, please provide further details:

   _____

   _____

3. Are you a member of any of the Wanaruah Local Aboriginal Land Council?

   ☐ Yes ☐ No

4. Do you have any specific cultural knowledge of the investigation area or of any Aboriginal place(s) or object(s) within it?

   ☐ Yes ☐ No

   If yes, please provide further details:

   _____

   _____

   _____

5. How many adult members does your Registered Aboriginal Party represent?

   _____

6. Please provide documented verification of your response to Question 4 (above) (e.g. please list all adult members).

   _____

   _____

   _____

7. How many years of experience does each of your proposed fieldworker(s) have in Aboriginal cultural heritage surveys? Please provide the corresponding name and projects previously involved in.

_____

_____

8. Does your Registered Aboriginal Party provide employment opportunities for the local (or wider) Aboriginal community? If so, please describe below.

_____

_____

_____

_____

_____

9. Does your proposed fieldworker(s) have any specialist skills or knowledge which might assist in the investigation?

☐ Yes ☐ No

If yes, please specify:

_____

_____

_____

10. Is your proposed fieldworker(s) 'fit for duty', including the ability to survey rugged terrain, all day in various weather conditions?

☐ Yes ☐ No

(Please note that MACH Energy may require a medical certificate if MACH Energy considers that an individual may not be fit for work).

11. Are your proposed fieldworker(s) willing to undertake random Drug and Alcohol testing (including the provision of mouth swabs and urine samples) at their induction and/or at any time during the field survey?

☐ Yes ☐ No

12. Do you hold the following Certificates of Currency (if yes, please attach them to your application):

☐ Public Liability ☐ Workers Compensation

(Please note that registered groups will need to provide Certificates of Currency for both public liability and workers compensation. Registered individuals will only need to provide a Certificate of Currency for public liability).

Please provide any further details below that you think may be relevant to your selection to participate in the field surveys:

_____

_____

_____

_____

_____

ABORIGINAL HERITAGE IMPACT PERMITS

Issue of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT Office of Environment & Heritage

Your reference:	MACH ENERGY Mount Pleasant Coal Mine AHIP Application
Our reference:	AHIMS No. 4005 /EF16/6784 DOC16/321438-865
Notice number:	C0002052
Contact:	Nicole Davis (02) 49273156

Mr Chris Lauritzen
General Manager – Resource Development
MACH Energy Australia Pty Ltd
2/179 Grey Street
Brisbane, QLD 4101

NOTICE OF THE ISSUE OF

ABORIGINAL HERITAGE IMPACT PERMIT # C0002053

Issued pursuant to section 90C (4) of the *National Parks and Wildlife Act 1974*

BACKGROUND

A. MACH Energy Australia Pty Ltd (the applicant) with assistance from Rio Tinto Coal Australia (RTCA), has applied to the Office of Environment and Heritage (OEH) under section 90A of the *National Parks and Wildlife Act 1974* (NPW Act) for an Aboriginal Heritage Impact Permit (AHIP). MACH Energy Australia Pty Ltd has submitted an AHIP application in relation the proposal to commence, in late 2016, the development of the Mount Pleasant (Mining Lease 1645) Coal Mine (the Project) near Muswellbrook NSW 2333.

B. The Project was the subject of an Environmental Impact Statement (EIS) in 1996. The EIS was approved in 1997, with a Development Control Plan (DCP) - DA92/97 - issued in 1999. The DCP noted that the proposed mine site had been the subject of cultural heritage investigations in 1995. In 2010 RTCA submitted a Modification application for DCP DA92/97 to accommodate proposed changes in mine design and infrastructure layout. The modified DCP was approved by the Department of Planning and Infrastructure in 2011. At this time, RTCA was planning to commence the development of the Project and an AHIP application was submitted to the OEH. OEH granted AHIP #11311247 for the Project Stage 1 Development Area in December 2011 with a term of five years (expiring on 23 Dec 2016).

C. Due to a number of business and market circumstances the Project did not proceed in 2011 and has since been subject to internal RTCA review and feasibility studies. As a result of these studies RTCA has refined and changed some of the aspects of the mine design and infrastructure. These design changes have altered the originally planned development footprint with some additional areas not included in the 2011 AHIP consent boundary being required and other areas within the 2011 AHIP area not being required for development before 2020 when the DCP DA92/97 expires.

D. RTCA and MACH consulted with OEH in March 2016 to seek advice on their requirements for a variation to the 2011 AHIP #11311247 or for a new AHIP consent application and RAP

consultation requirements to support either a variation or new AHIP consent assessment process. OEH advised that to accommodate the variations in the planned 2016 development footprint a new AHIP consent application will need to be submitted for assessment and approval.

E. The Project area encompasses is 5083 ha with the 2016 AHIP application area {AA} covering 2,780 hectares or approximately 54.7% of the total Project area. The Project's existing Aboriginal Heritage Management Plan (AHMP) (and its schedules) are the key tool for the management of harm to Aboriginal objects/sites and has been developed to address the conditions of the DCP. The AHMP Schedule 2 Cultural Heritage Management Measures Database prescribes specific management actions for each of the 765 AHIMS registered sites to be impacted within the 2016 AHIP AA. The AHMP has been formally endorsed by OEH and approved by DP&E (August 2015).

F. The 2016 AHIP application area provides for Project early works and construction activities, preparation of infrastructure and mining areas and mining operations.

G. OEH supports the AHIP Application and range of management recommendations which include '*harm*' by means of:

- Phased Salvage Excavations, as required;
- Community Collection, as required;
- Harm to certain Aboriginal objects through the proposed works; &
- Harm to all unknown Aboriginal objects within the AHIP application area.

H. OEH received the application on 11 July 2016.

ISSUE OF ABORIGINAL HERITAGE IMPACT PERMIT

1. OEH has considered the application and supporting information provided, and matters under section 90K of the NPW Act and has decided to issue an **AHIP C0002053** subject to conditions.
2. The AHIP is attached.
3. You should read the AHIP carefully and ensure you comply with its conditions. It is an offence under section 90J NPW Act to fail to comply with the conditions of the AHIP. The maximum penalty that a court may impose on a corporation for failing to comply with this AHIP $1.1m. OEH can also issue penalty notices for this offence.

Date: 25 August 2016

INFORMATION ABOUT THIS NOTICE

- Details provided in this notice will be available on OEH's Public Register in accordance with section 188F of the NPW Act.

Variation of this AHIP

- This AHIP may only be varied on application by the AHIP holder or by OEH to correct typographical errors or resolve inconsistencies between conditions of the AHIP. A permit can only be varied by subsequent variation notices.

Appeals against this decision

- You can appeal to the Land and Environment Court against this decision. The deadline for lodging the appeal is 21 days after you were given notice of this decision.

Additional details for public register

a) Name of development or project	Mount Pleasant Coal Mine Lease – ML 1645
b) Location	Wybong and Kayuga Roads MOUNT PLEASANT NSW 2333
c) Local Government Area(s)	MUSWELLBROOK
d) Description of harm authorised	• Phased Salvage excavations as required; • Community collection as required; • Harm to certain Aboriginal objects through the proposed works; & • Harm to all unknown Aboriginal objects within the AHIP Application Area.
e) AHIP commencement date and duration	*Commencement:* 25 August 2016 *Duration:* 10 years

AHIP TO HARM ABORIGINAL OBJECTS

A. Background

(i) On 11 July 2016 an application was made to the Chief Executive of the Office of Environment and Heritage (OEH) for an Aboriginal Heritage Impact Permit (AHIP) pursuant to s.90 of the *National Parks and Wildlife Act 1974* (the Act). MACH Energy Australia Pty Ltd (MACH), with assistance from Rio Tinto Coal Australia (RTCA) has submitted an AHIP application was in relation the proposal to commence, in late 2016, the development of the Mount Pleasant (Mining Lease 1645) Coal Mine (the Project) near Muswellbrook NSW 2333.

(ii) The Project was the subject of an Environmental Impact Statement (EIS) in 1996. The EIS was approved in 1997, with a Development Control Plan (DCP) - DA92/97 - issued in 1999. The DCP noted that the proposed mine site had been the subject of cultural heritage investigations in 1995. In 2010 RTCA submitted a Modification application for DCP DA92/97 to accommodate proposed changes in mine design and infrastructure layout. The modified DCP was approved by the Department of Planning and Infrastructure in 2011. At this time, RTCA was planning to commence the development of the Project and an AHIP application was submitted to the OEH. OEH granted AHIP #11311247 for the Project Stage 1 Development Area in December 2011 with a term of five years (expiring on 23 Dec 2016).

(iii) Due to a number of business and market circumstances the Project did not proceed in 2011 and has since been subject to internal RTCA review and feasibility studies. As a result of these studies RTCA has refined and changed some of the aspects of the mine design and infrastructure. These design changes have altered the originally planned development footprint with some additional areas not included in the 2011 AHIP consent boundary being required and other areas within the 2011 AHIP area not being required for development before 2020 when the DCP DA92/97 expires.

(iv) RTCA and MACH consulted with OEH in March 2016 to seek advice on their requirements for a variation to the 2011 AHIP #11311247 or for a new AHIP consent application and RAP consultation requirements to support either a variation or new AHIP consent assessment process. OEH advised that to accommodate the variations in the planned 2016 development footprint a new AHIP consent application will need to be submitted for assessment and approval.

(v) The Project area encompasses is 5083 ha with the 2016 AHIP application area {AA} covering 2,780 hectares or approximately 54.7% of the total Project area. The Project's existing Aboriginal Heritage Management Plan (AHMP) (and its schedules) are the key tool for the management of harm to Aboriginal objects/sites and has been developed to address the conditions of the DCP. The AHMP Schedule 2 Cultural Heritage Management Measures Database prescribes specific management actions for each of the 765 AHIMS registered sites to be impacted within the 2016 AHIP AA. The AHMP has been formally endorsed by OEH and approved by DP&E (August 2015).

(vi) The 2016 AHIP application area provides for Project early works and construction activities, preparation of infrastructure and mining areas and mining operations.

(vii) OEH supports the AHIP Application and range of management recommendations which include '*harm*' by means of:

- Phased Salvage Excavations, as required;
- Community Collection, as required;
- Harm to certain Aboriginal objects through the proposed works; &

- Harm to all unknown Aboriginal objects within the AHIP application area.

(viii) OEH received the application on 11 July 2016.

(ix) OEH considered the application and supporting information provided, and matters under section 90K of the Act and decided to issue an AHIP subject to conditions.

B. AHIP issued subject to conditions

An AHIP is issued to harm Aboriginal objects identified in Schedules B and C, in accordance with the conditions of this AHIP.

This AHIP is issued pursuant to section 90 of the Act.

C. Commencement and duration of AHIP

This AHIP commences on the date it is signed unless otherwise provided by this AHIP.

Unless otherwise revoked in writing, this AHIP remains in force for:

(i) 10 years from the date of commencement, that is, until **25 August 2026**.

D. Proposed Works

The AHIP AA is located some 5.5km northwest of Muswellbrook. In general terms, it extends north from Wybong Road (although portions to the west extend to the south linking in to the existing Bengalla Mine) to just south of Castlerock Road in the easternmost section and approximately 1.6km south in the centre portion. At its widest point it extends west from Kayuga Road for approximately 8.5km. The Project area encompasses is 5083 ha with the 2016 AHIP application area covering 2,780 hectares or approximately 54.7% of the total Project area.

The 2016 AHIP application area provides for Project early works and construction activities, preparation of infrastructure and mining areas and mining operations. These works and development phases are summarised below:

Early Works and Construction Activities:

- Upgrade of Wybong Road from Bengalla Link Road to the Project area;
- Construction office, storage, lay down areas and associated facilities;
- Mine infrastructure area including access roads and workshops;
- ROM coal stockpile and stacker/reclaimers, coal handling and preparation plant;
- Rail spur and loop and loader infrastructure;
- Water and sewerage plant, water diversion channels, dams and water pipelines; and
- Powerlines and substations.

Initial Mining Areas Development Activities:

- Construction of interim and long-term access roads, haul roads, lay down areas, parking areas and equipment assembly pads;
- Clearing of mining pre-strip, top soil and overburden dump areas;
- Bulk water management works including diversion channels, drains, dams and pipelines;
- Environmental bunds;
- Mine coal fines tailings dam construction and overburden stockpiles;
- Heavy mobile equipment construction pads and access easement roadway; and

• Mine power lines, fixed and mobile substation pads.

Operational Mining Areas

• Development of open cut pits for mining area;
• Construction of pit ramps (locations vary over time) and access haul roads;
• Blasting areas and over burden stockpiles and associated dump roads (locations vary over time);
• Associated pit dumps, temporary/permanent rehabilitation areas, powerlines, pipelines, drainage, pit water dams and pumps; and
• Heavy mobile machinery access roads and maintenance pads.

Note: A Dictionary at the end of the AHIP defines terms used in this document. Further information about this AHIP is also set out after the Dictionary.

Schedule C: Aboriginal objects which may be harmed through the proposed works 47
DICTIONARY 84
INFORMATION ABOUT THIS AHIP 86

LAND TO WHICH THIS AHIP APPLIES

The land to which this AHIP applies is shown in Figure (1) The lands to which this AHIP applies - AHIP extent for the Mount Pleasant Coal Mine Lease – ML 1645, Wybong and Kayuga Roads, MOUNT PLEASANT NSW 2333 (page 83 of this AHIP).

CONDITIONS

The conditions of this AHIP specify the actions that are permitted and/or required in relation to areas and Aboriginal objects, which are detailed in the Schedules that follow.

Administrative Conditions

Responsibility for compliance with conditions of AHIP

1. The AHIP holder must ensure that all persons involved in actions or works covered by this AHIP (whether employees, contractors, sub-contractors, agents or invitees) are made aware of and comply with the conditions of this AHIP.

Project manager to oversee the actions relating to this AHIP

2. A suitably qualified and experienced individual must be appointed as a project manager who is responsible for overseeing, for and on behalf of the AHIP holder, all the actions relating to this AHIP.
3. The individual appointed as project manager must be the Mount Pleasant Environment and Community Manager (or equivalent).
4. If an alternative to the nominated project manager is appointed, OEH must be notified of their contact details within 14 days of this appointment.

Actions must be in accordance with AHIP application

5. All actions on the land must be carried out in accordance with the application except as otherwise expressly provided by a condition of this AHIP.

Operational Conditions

Certain Aboriginal objects must not be harmed

6. All human remains in, on or under the land must not be harmed.

Salvage excavations

7. Salvage excavations may be carried out at the six (6) AHIMS registered sites listed in Table B2 (page 11 of this AHIP), and described in Schedule B2.
8. Aboriginal objects that are recovered during the excavations may be analysed on-site and/or may be taken off-site for further analysis.
9. The excavations and analysis of Aboriginal objects must be carried out in accordance with *"Aboriginal Cultural Heritage Assessment Report for the Mount Pleasant Coal Mine (DA*

92/97) 2016 Aboriginal Heritage Impact Permit Application, Rio Tinto Australia", that was provided with the application, and/or The Aboriginal Heritage Management Plan required under Condition 36, Schedule 3 of the Mount Pleasant Approval DA 92/97.

10. The excavations must be completed in an area before any harm of Aboriginal objects described in Schedule C can commence in that same area.

Community collection

11. The Registered Aboriginal Parties may be provided with an opportunity to collect Aboriginal objects where practicable and safe to do so across the AHIP AA and described in Schedule B3.

12. The opportunity for community collection must be provided:

    (a) in accordance with *"Aboriginal Cultural Heritage Assessment Report for the Mount Pleasant Coal Mine (DA 92/97) 2016 Aboriginal Heritage Impact Permit Application, Rio Tinto Australia"*, that was provided with the application, and/or The Aboriginal Heritage Management Plan required under Condition 36, Schedule 3 of the Mount Pleasant Approval DA 92/97, and

    (b) before any harm of Aboriginal objects described in Schedule C can commence in the area.

13. Aboriginal objects that are recovered during the community collection may be analysed on-site and/or may be taken off-site for further analysis as decided by the Registered Aboriginal Parties.

14. If an opportunity for community collection has been provided and this collection does not occur, the AHIP holder may proceed with any actions to harm Aboriginal objects described in Schedule C, in accordance with the conditions of this AHIP.

Harm of certain Aboriginal objects through the proposed works

15. The Aboriginal objects described in Schedule C may be harmed. Nothing in this condition authorised harm to Aboriginal objects described in Schedule A (whether human remains, Aboriginal objects or 'no-harm areas').

16. Aboriginal objects described in Schedule C must not be harmed unless:

    (a) all excavations described in Schedule B2 have been completed in the area, and

    (b) all opportunities for community collection of Aboriginal objects described in Schedule B3 have been provided in the area.

Temporary storage of certain Aboriginal objects

17. Any Aboriginal objects that are removed from the land by actions authorised by this AHIP, must be moved as soon as practicable to the temporary storage location in the table below, pending any agreement reached about the long term management of the Aboriginal objects.

18. The temporary storage location is as follows:

Location name:	Broomfield Homestead Complex
Address:	Broomfield Homestead Complex, via Wybong Road
Storage particulars:	Secure, Locked facility

19. Any Aboriginal objects stored at the temporary storage location must not be further harmed, except in accordance with the conditions of this AHIP.

Long term management of certain Aboriginal objects

20. Requirement 26 "Stone artefact deposition and storage" in the *Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (24 September 2010, available online at: http://www.environment.nsw.gov.au/licences/archinvestigations.htm) must be complied with.

Access routes

21. Where practicable, existing access routes to parts of the land where actions relating to this AHIP are to be carried out must be used.

Notification and Reporting Conditions

Notification of commencement and completion of actions

22. Written notice and/or email notification must be provided to the OEH office at least 7 days prior to the commencement of actions authorised by this AHIP.

23. Written notice and/or email notification must be provided to the OEH office within 7 days of the completion of actions authorised by this AHIP.

Copy of this AHIP and notices to be provided to Registered Aboriginal Parties

24. A copy of this AHIP must be provided to each Registered Aboriginal Party, within 14 days of receipt of the AHIP from OEH.

25. Where this AHIP is varied or transferred, a copy of the AHIP variation or transfer notice must be provided to each Registered Aboriginal Party, within 14 days of receipt of the notice.

Human remains

26. If any human remains are discovered and/or harmed in, on or under the land, the AHIP holder must:

    (a) not further harm these remains
    (b) immediately cease all work at the particular location
    (c) secure the area so as to avoid further harm to the remains
    (d) notify the local police and OEH's Environment Line on 131 555 as soon as practicable and provide any available details of the remains and their location, and
    (e) not recommence any work at the particular location unless authorised in writing by OEH.

Incidents which may breach the Act or AHIP

27. The AHIP holder must notify the OEH office in writing as soon as practicable after becoming aware of:

    (a) any contravention of s.86 of the Act not authorised by an AHIP, and/or
    (b) any contravention of the conditions of this AHIP.

Reports about incidents which may breach the Act or AHIP

28. Where OEH suspects that an incident has occurred which may have breached the Act or AHIP, OEH may request a written incident report, which includes the following:
    (a) the nature of the incident
    (b) the actual or likely impact of the incident on Aboriginal objects and/or Aboriginal places
    (c) the nature and location of these Aboriginal objects and/or Aboriginal places, referring to and providing maps and photos where appropriate
    (d) any conditions of an AHIP which may have been breached, and
    (e) the measures which have been taken or will be taken to prevent a recurrence of the incident.
29. The incident report must be provided to the OEH office within the timeframe specified in the request.

Provision of Aboriginal Site Impact Recording Form

30. An Aboriginal Site Impact Recording Form must be completed and submitted to the AHIMS Registrar, for each AHIMS site identified in Schedules B and C, within 6 months of the completion of the actions authorised by this AHIP.

    Note:
    (i) The Aboriginal Site Impact Recording Form can be found on the OEH website: http://www.environment.nsw.gov.au/licences/DECCAHIMSSiteRecordingForm.htm
    (ii) Contact details for the AHIMS Registrar can be found on the OEH website: http://www.environment.nsw.gov.au/contact/AHIMSRegistrar.htm

Report about harm to Aboriginal objects (Salvage Report)

31. A Salvage Excavation Report must be prepared about the actions relating to the harm of Aboriginal objects (as permitted by this AHIP). The report must:
    (a) include a short summary of the report
    (b) describe any ongoing consultation with or involvement of representatives of Registered Aboriginal Parties in relation to this AHIP
    (c) describe how any Aboriginal objects or 'no-harm areas' described in Schedule A were managed during the period covered by the AHIP
    (d) provide details of the Aboriginal objects which were fully or partially harmed in the course of undertaking the actions
    (e) if any salvage excavations were authorised by this AHIP, provide a description of the methods and results of the salvage excavation
    (f) detail any community collection of Aboriginal objects undertaken by the Registered Aboriginal Parties
    (g) comment on the effectiveness of any mitigation measures that were implemented
    (h) comment on the effectiveness of any management plan which was in place
    (i) if any Aboriginal objects were moved to a temporary storage location, a description of the nature and types of Aboriginal objects which are now at that location
    (j) detail the results of any analysis of Aboriginal objects
    (k) detail the long term management arrangements for any Aboriginal objects, and
    (l) include a statement confirming that all Aboriginal Site Impact Recording Forms have been completed and submitted to the AHIMS Registrar.

32. The Salvage Excavation Report must be submitted to the OEH office within 2 years of the completion of the actions authorised by this AHIP.

33. A copy of the Salvage Excavation Report, including a summary of the report in plain English, must be sent by registered post to each Registered Aboriginal Party within 14 days of the report being submitted to OEH

General Conditions

Indemnity

34. The AHIP holder agrees to indemnify and keep indemnified, the Crown in right of NSW, the Minister administering the Act, the Chief Executive of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from and against all actions, demands, claims, proceedings, losses, damages, costs (including legal costs), charges or expenses suffered or incurred by them resulting from:

    (a) any damage or destruction to any real or personal property; and

    (b) injury suffered or sustained (including death) by any persons arising out of or in connection with any actions undertaken pursuant to this AHIP.

Release

35. The AHIP holder agrees to release to the full extent permitted by law, the Crown in right of NSW, the Minister administering the Act, the Chief Executive of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from all suits, actions, demands and claims of every kind resulting from:

    (a) any damage or destruction to any real or personal property; and

    (b) injury suffered or sustained (including death) by any persons arising from or in connection with any actions undertaken pursuant to this AHIP.

Written notice

36. Any requirement to provide written notice to the OEH Newcastle office in this AHIP may be complied with by emailing the notice to the OEH office's email address or by sending by registered post to the OEH office's address. The OEH office's contact details are specified at the front of this AHIP.

SCHEDULES

The following schedules identify the areas and Aboriginal objects that are subject to the conditions of this AHIP.

Schedule A: Aboriginal objects which must not be harmed

A1 Human remains

All human remains in, on or under the land must not be harmed, as specified by the conditions of this AHIP.

A2 Aboriginal objects that are identified on AHIMS

Not applicable

A3 No-harm areas

Not applicable

Schedule B: Aboriginal objects that may be harmed through the certain actions

B1 Movement only

Not applicable

B2 Salvage excavations

Salvage excavations may be carried out at the six (6) AHIMS registered sites identified in the Table B2 below, but only in accordance with the conditions of this AHIP.

The salvage excavation area comprises the following known Aboriginal objects, as identified on AHIMS (excluding any Aboriginal objects described in Schedule A):

Table B2

Portion of Site (whole or part)	AHIMS Site ID	Site Feature	Site Name	Information access restriction? (Y/N)	Easting	Northing	Datum
Whole	37-2-0596	AFT/PAD	B27	*No*	294005	6427739	GDA
Whole	37-2-1467	AFT/PAD	A1-A4	*No*	293605	6429299	GDA
Whole	37-2-1468	AFT/PAD	A7-A8	*No*	293955	6429159	GDA
Whole	37-2-1474	AFT/PAD	B29	*No*	295265	6430659	GDA

Whole	37-2-1462	AFT/PAD	C1	*No*	297145	6429379	GDA

B3 Community collection

Community collection may be carried out where practicable and safe to do so across the AHIP AA and in accordance with the conditions of this AHIP (see Figure 1 Page 83 of this AHIP).

The community collection area includes the following known Aboriginal objects, as identified on AHIMS (excluding any Aboriginal objects described in Schedule A):

Portion of Site (whole or part)	AHIMS Site ID	Site Feature	Site Name	Information access restriction? (Y/N)	Easting	Northing	Datum

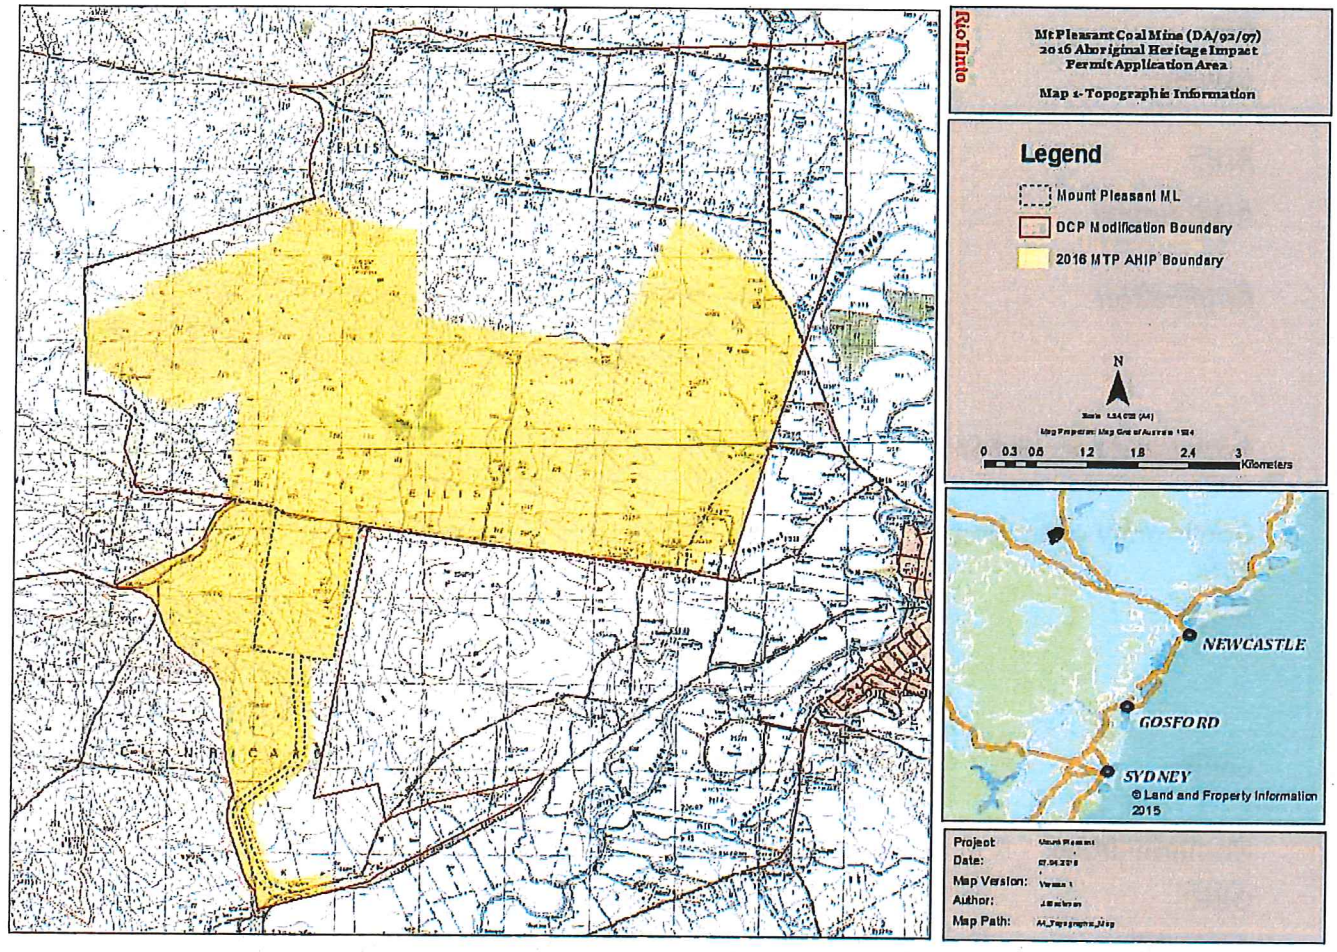
C2 Areas where harm of Aboriginal objects is authorised

All Aboriginal objects in, on or under the land which is identified on the Figure (1) The lands to which this AHIP applies - AHIP extent for the Mount Pleasant Coal Mine Lease – ML 1645, Wybong and Kayuga Roads, MOUNT PLEASANT NSW 2333 (page 83 of this AHIP).

Figure (1) The lands to which this AHIP applies - AHIP extent for the Mount Pleasant Coal Mine Lease – ML 1645, Wybong and Kayuga Roads, MOUNT PLEASANT NSW 2333, shaded yellow below.



DICTIONARY

In this AHIP, unless the contrary is indicated the terms below have the following meanings:

Aboriginal object	has the same meaning as in the Act.
Act	means the *National Parks and Wildlife Act 1974*.
AHIMS	means the Aboriginal Heritage Information Management System maintained by OEH, as defined in s.90Q of the Act.
AHIP	means Aboriginal Heritage Impact Permit
AHIP holder	means the entity or person listed on the cover page under the heading "AHIP issued to".
Application	means the completed application form and all other documents in written or electronic form which accompanied the application when it was lodged or which were subsequently submitted in support of the application.
Community collection	means the collection of Aboriginal objects by one or all Registered Aboriginal Parties or their representatives.
Community collection area	means an area described as a community collection area in Schedule B3
Harm	has the same meaning as in the Act. In relation to Aboriginal objects, harm means the movement, damage, defacement and/or destruction of Aboriginal objects. In relation to an Aboriginal place, harm means the damage, defacement and/or destruction of the Aboriginal place.
Land	means the land described under the heading "Land to which this AHIP applies".
No-harm areas	means those areas described in Schedule A3.
OEH	Office of Environment and Heritage (NSW).
OEH office	means the office listed on the cover page of this AHIP.
Proposed works	means the works described under the heading "D. Proposed Works" at the front of this AHIP.
Public register	means the public register established under s.188F of the Act, that contains details of AHIPs issued by the Chief Executive of OEH, as described under the heading "Information about this AHIP".
Registered Aboriginal Parties	means the Registered Aboriginal Parties listed in the application.
Salvage excavation	means an archaeological excavation carried out in accordance with the methodology accompanying the application, as modified by the conditions of this AHIP. The purpose of salvage excavation is to recover a sample of Aboriginal objects as an archival record of Aboriginal life from a site that will be destroyed.
Salvage excavation area	means any area described as a salvage excavation area in Schedule B2.
Test excavation	means an archaeological excavation carried out in accordance with methodology accompanying the application, as modified by the

	conditions of this AHIP. The purpose of test excavation is to collect a sample of Aboriginal objects, in order to establish the nature and extent of sub-surface Aboriginal objects and to assist in the assessment of management options for the site.
Test excavation area	means any area described as a test excavation area in Schedule B2

INFORMATION ABOUT THIS AHIP

Public Register

Under section 188F of the Act, the Chief Executive of OEH is required to keep a public register containing the details of each AHIP issued. The details of this AHIP that will be published on the public register are outlined on the front page of this AHIP.

The public register is available online at www.environment.nsw.gov.au

Appeals

Under section 90L of the Act, the AHIP holder may appeal to the Land and Environment Court if they are dissatisfied with any condition of this AHIP. The appeal must be lodged within 21 days of the date this AHIP was issued.

Penalties for breach of the Act or AHIP condition

Significant penalties can be imposed by the Land and Environment Court for harm to an Aboriginal object or Aboriginal Place other than as authorised by a condition of an AHIP, or for a breach of an AHIP condition. OEH can also issue penalty notices for a breach of the Act or AHIP condition.

Responsibility for obtaining all approvals and compliance with applicable laws

The AHIP holder is responsible for obtaining and complying with all approvals necessary to lawfully carry out the work referred to in this AHIP, including but not limited to development consents.

Other relevant provisions of the *National Parks and Wildlife Act*

Newly identified Aboriginal objects must be notified to the Chief Executive of OEH under s.89A of the Act using the form available online at www.environment.nsw.gov.au

Stop work orders, interim protection orders and remediation directions may be issued in certain circumstances to protect Aboriginal objects or places.

Obligation to report Aboriginal remains under Commonwealth laws

The AHIP holder may have additional obligations to report any discovery of Aboriginal remains under the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*.

Exercise of investigation and compliance powers

Officers appointed or authorised under the Act may exercise certain powers and functions, including the power to enter land.

Duration of AHIP

This AHIP remains in force for the period specified in the AHIP.

Variation of AHIP

The AHIP holder may apply to the OEH office for a variation of any conditions of an AHIP, using the AHIP variation application form available online at www.environment.nsw.gov.au. Requests for significant variations must be accompanied by evidence of further consultation with Registered Aboriginal Parties and may include payment of fees.

The conditions of an AHIP may be varied at any time by the Chief Executive of OEH in order to correct a typographical error or to resolve an inconsistency between conditions. The AHIP holder may appeal a decision of the Chief Executive of OEH to vary the conditions of the AHIP.

Transfer of AHIP

The AHIP holder may apply to transfer this AHIP to another person by using the AHIP transfer application form available online at www.environment.nsw.gov.au.

Surrender of AHIP

The AHIP holder may apply to surrender this AHIP by using the AHIP surrender application form available online at www.environment.nsw.gov.au. The surrender must be approved by the Chief Executive of OEH and may be subject to conditions.

Suspension and revocation of AHIP

An AHIP may be suspended or revoked at any time at the discretion of the Chief Executive of OEH. Prior to suspending or revoking the AHIP, the AHIP holder will be given notice and an opportunity to make submissions. The AHIP holder will be notified in writing of the final decision. The AHIP holder may appeal a decision to revoke the AHIP.

Entry to land

An AHIP does not automatically entitle its holder to enter land for the purpose of conducting work related to the AHIP. The AHIP holder is responsible for obtaining permission to enter land from the owner and/or occupier of the land.

Disclosure of information pursuant to lawful requirement

This AHIP does not prevent the disclosure of any information or document in OEH's possession in accordance with any lawful requirement.

Making copies of reports

By providing a report, the AHIP holder acknowledges that OEH can use the information in that report to inform its regulatory functions, note details of that report in AHIMS and include a copy of the report in its library which may be available to members of the public.

OEH is able to make copies of any reports provided to OEH under this AHIP.

COAL & ALLIED OPERATIONS PTY LTD,
Trading as COAL & ALLIED OPERATIONS PTY LTD,
ABN 16 000 023 656,
PO BOX 315,
SINGLETON NSW 2330
STANDARD POST

NOTICE OF THE ISSUE OF
ABORIGINAL HERITAGE IMPACT PERMIT 11311247

Issued pursuant to section 90C(4) of the *National Parks and Wildlife Act 1974*

BACKGROUND

A. COAL & ALLIED OPERATIONS PTY LTDCOAL & ALLIED OPERATIONS PTY LTD (the applicant) applied to the Office of Environment and Heritage, Department of Premier and Cabinet (OEH) under section 90A of the *National Parks and Wildlife Act 1974* (the NPW Act) for an Aboriginal Heritage Impact Permit (AHIP). The AHIP application was in relation to authorising impact to Aboriginal sites contained within the Mount Pleasant Coal Mine Lease ML1645.

B. OEH received the application on 17-Aug-2011 and further information was received on 20/9/11, 22/09/11, 30/9/11 and 23/11/11.

C. Coal and Allied Operations Pty Ltd (Coal and Allied) is a subsidiary of Rio Tinto Australia, which owns Mount Pleasant Coal Mine. Mt Pleasant Mine is located approximately 3km northwest of Muswellbrook in the Upper Hunter Valley. The Mine has a Ministerial development consent (DA92/97) issued in 1999, with a subsequent modification approved on 19 September 2011.

D. Conditions of consent require Coal and Allied to provide an offset area of comparable cultural heritage value, and provision of long term security. The area currently proposed has been determined to have more sites than those being impacted, and

E. No mine operations have commenced in this project area to date, but Coal and Allied are proposed to commence works shortly. Before commencing ground disturbance works associated with the proposed project, Coal and Allied must ensure that the Aboriginal Cultural heritage is managed in an appropriate manner.

F. The AHIP application requested an area of 2580 ha of the Mount Pleasant Mine Lease (ML1645) which is comprised of 59% of the ML area. Within that area there are 784 Aboriginal sites which are to be collected and or salvaged according to a Aboriginal cultural heritage management plan which was developed in consultation with the registered Aboriginal parties.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

G. No objections to the project were received by the proponent for this project from the registered Aboriginal parties.

H. The AHIP application has a graduated impact program, which seeks to only impact sites where avoidance is unavoidable, and that all such sites will be managed and protected until collection or salvage methodologies are necessary.

ISSUE OF ABORIGINAL HERITAGE IMPACT PERMIT

1. OEH has considered the application and supporting information provided, and matters under section 90K of the NPW Act and has decided to issue an AHIP 1131247 subject to conditions.

2. The AHIP is attached.

3. You should read the AHIP carefully and ensure you comply with its conditions. In particular please note the following conditions:

   - Condition 1
   - Condition 9 (b)
   - Conditions 10 (a), (b), (c) and (d)
   - Conditions 13 (a) and (b)
   - Conditions 24 and 25, and
   - Condition 37

It is an offence under section 90J NPW Act to fail to comply with the conditions of the AHIP. The maximum penalty that a court may impose on a corporation for failing to comply with this AHIP is $1.1m. OEH can also issue penalty notices for this offence.

(by Delegation)

Date: 23-Dec-2011

Notice number 1131246

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Issue of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974 (NPW Act)

NSW GOVERNMENT | Office of Environment & Heritage

INFORMATION ABOUT THIS NOTICE

- Details provided in this notice will be available on OEH's Public Register in accordance with section 188F of the National Parks and Wildlife Act 1974.

Variation of this AHIP

- This AHIP may only be varied on application by the AHIP holder or by OEH to correct typographical errors or resolve inconsistencies between conditions of the AHIP. A permit can only be varied by subsequent variation notices.

Appeals against this decision

You can appeal to the Land and Environment Court against this decision. The deadline for lodging the appeal is 21 days after you were given notice of this decision.

Additional details for public register

a) Name of development or project	Mount Pleasant Coal Mine Stage 1
b) Location	The Stage 1 AHIP is located approximately 5.5km NW of Muswellbrook; is bounded in the north by Dorset Road, Wybong Road in the south with portions linking in to the existing Bengalla Mine, and it extends discontinuously west from Kayuga Road for approximately 8.5km.
c) Local Government Area(s)	Muswellbrook
d) Description of harm authorised	• Certain Aboriginal objects must not be harmed • Salvage excavations • Community collection • Harm to certain Aboriginal objects through the proposed works
e) AHIP commencement date and duration	*Commencement:* 23-Dec-2011 *Duration:* 5 years

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

AHIP TO HARM ABORIGINAL OBJECTS

A. Background

(i) On 17-Aug-2011 an application was made to the Director-General of the Department of Premier and Cabinet (OEH) for an Aboriginal Heritage Impact Permit (AHIP) pursuant to s.90 of the *National Parks and Wildlife Act* 1974 (the Act).

(ii) Coal & Allied Operations Pty Ltd (Coal & Allied), a subsidiary of Rio Tinto Coal Australia, owns the Mt Pleasant coal mine, located approximately 3 kilometres (km) northwest of Muswellbrook in the Upper Hunter Valley.

(iii) Mt Pleasant mine is adjacent to other mining operations, including Bengalla and Mt Arthur coal mines to the south, and Dartbrook underground coal mine to the north. The Hunter River and associated alluvial farmlands are located to the east of the mine, while the land to the west is generally dominated by agricultural grazing land.

(iv) Mt Pleasant mine was granted a development consent on DA 92/97 which was granted on 22 December 1999 and is scheduled to expire in 2020. A subsequent modification was granted on 19 September 2011. Under its consent, Coal & Allied is allowed to extract up to 10.5 million tonnes of run-of-mine (ROM) coal a year for a period of 21 years using open cut mining methods.

(v) To date, Coal & Allied has not commenced mining operations at the site, however, Coal & Allied has proposed to commence operations at the beginning of 2012.

(vi) The Aboriginal cultural heritage assessment for this project have been conducted by a variety of consultants over 6 stages, and the majority of those have been in the recent few years.

(vii) The sites types recorded within the Stage 1 AHIP area is comprised of stone artefacts (isolated finds, artefact scatters), potential archaeological deposits, scarred trees, hearths and Aboriginal resource gathering areas. Further scientific assessments were conducted and clarified that three of the 'sites' were not culturally created sites, and as such are not covered by this AHIP.

(viii) Over 30 potential archaeological deposits were identified by the previous assessments, including in the impact footprint area and within the proposed conservation area. The potential archaeological deposits within the mine lease (excluding the conservation area) were investigated in June 2011 in accordance with the *Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW* (OEH 2010). A total of 94 test pits were conducted within the identified PADs. Only six of the 94 test pits contained Aboriginal objects, and three of those six test pits (TP 55, TP 18 and TP 68) are likely to be impacted by the works associated with this AHIP.

(ix) The low density of artefacts within the PADs and the low surface density scatters/isolated finds within the area considered under this AHIP concurs with the conclusions drawn in the original EIS and then again in the more recent studies.

(x) This AHIP relates to 'Stage 1' works. Stage 1 includes the construction and mining development requirements for the first five years of the Mt Pleasant Mine. These works include the initial earth works construction activities, initial mining activities and operation mining activities, as outlined in pages 3 and 4 of the ACH assessment report for the *Mt Pleasant Coal Mine Stage 1 AHIP application* dated 8 August 2011.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

(xi) Within this AHIP there are 747 'artefact sites', 25 potential archaeological deposits, 10 modified trees, 2 Aboriginal resource and gathering sites.

(xii) The methods for managing Aboriginal heritage values for each classified site type has been developed in consultation with the Registered Aboriginal Parties and is outlined in the *Aboriginal Cultural Heritage Management Plan Mount Pleasant Coal Mine (DA92/97)* (ACHMP). These include strategies for scarred trees, subsurface investigations, cultural sites, spiritual sites, monitoring and site management (for no impact areas, or areas not to be impacted immediately).

(xiii) The ACHMP is a living document which can be revised and agreed from time to time between RTCA, the Registered Aboriginal Parties and OEH, with such revisions subsequently submitted and approved by Department of Planning and Infrastructure. The consent conditions of the modified DA92/97 (19 September 2011) and in this AHIP require revisions to the ACHMP.

(xiv) Coal & Allied has committed to an approach which seeks to only impact the Aboriginal sites that are within the proposed footprint, and conserve all other sites in situ, which is supported by OEH as good practice.

(xv) Coal & Allied will only impact the sites within the areas where disturbance is considered unavoidable for the first 5 years of the life of the mine.

(xvi) OEH considered the application and all supporting information provided, and matters under section 90K of the Act and decided to issue an AHIP subject to conditions.

B. AHIP issued subject to conditions

An AHIP is issued to harm Aboriginal objects identified in Schedules B and C, in accordance with the conditions of this AHIP.

This AHIP is issued pursuant to section 90 of the Act.

C. Commencement and duration of AHIP

This AHIP commences on the date it is signed unless otherwise provided by this AHIP.

Unless otherwise revoked in writing, this AHIP remains in force for:

(i) 5 years from the date of commencement, that is, until 23 December 2016; or

(ii) until the date on which the Mount Pleasant Coal Mine Stage 1 Salvage Report, is submitted,

D. Proposed Works

The proposed works required by this project include:

Early Works Construction Activities:

- Western Link Road connecting Wybong and Castlerock to Dorset Roads;
- Construction office, storage, lay down areas and associated facilities;
- Mine infrastructure area including access roads and workshops;
- ROM coal stockpile and stacker/reclaimers, coal handling and preparation plant;
- Rail or overland conveyor and loader;
- Water and sewerage plant, water diversion channels, dams and water pipelines; and
- Powerlines and substations.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Initial Mining Areas Development Activities:

- Construction of interim and long-term access roads, haul roads, lay down areas, parking areas and equipment assembly pads;
- Clearing of mining pre-strip, top soil and overburden dump areas;
- Bulk water management works including diversion channels, drains, dams and pipelines;
- Eastern environmental bunds;
- Mine coal fines tailings dam construction and overburden stockpiles;
- Dragline construction pad and access easement roadway; and
- Mine power lines, fixed and mobile substation pads.

Operational Mining Areas

- Development of open cut pits for mining area years 1 through 5;
- Construction of pit ramps (locations vary over time) and access haul roads;
- Blasting areas and over burden stockpiles and associated dump roads (locations vary over time);
- Associated pit dumps, temporary rehabilitation areas, powerlines, pipelines, drainage, pit water dams and pumps; and
- Dragline and shovel machine access roads and maintenance pads.

Note: A Dictionary at the end of the AHIP defines terms used in this document. Further information about this AHIP is also set out after the Dictionary.

CONDITIONS

The conditions of this AHIP specify the actions that are permitted and/or required in relation to areas and Aboriginal objects, which are detailed in the Schedules that follow.

Administrative Conditions

Responsibility for compliance with conditions of AHIP

1. The AHIP holder must ensure that all activities comply with the conditions of this AHIP and the *Aboriginal Cultural Heritage Management Plan Mount Pleasant Coal Mine (DA92/97)* (ACHMP) and works only commence on lands either owned by the AHIP holder or where the property owner has provided their consent.

2. The AHIP holder must ensure that all persons involved in actions or works covered by this AHIP (whether employees, contractors, sub-contractors, agents or invitees) are made aware of and comply with the conditions of this AHIP.

Project manager to oversee the actions relating to this AHIP

3. A suitably qualified and experienced individual must be appointed as a project manager who is responsible for overseeing, for and on behalf of the AHIP holder, all the actions relating to this AHIP.

4. The individual appointed as project manager must be the project manager nominated in the application form.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

5. If an alternative to the nominated project manager is appointed, OEH must be notified of their contact details within 14 days of this appointment.

Actions must be in accordance with AHIP application

6. All actions on the land must be carried out in accordance with the application except as otherwise expressly provided by a condition of this AHIP.

Operational Conditions

Certain Aboriginal objects must not be harmed

7. All human remains in, on or under the land must not be harmed, other than any human remains identified in Schedule B4.

8. The Aboriginal objects described in Schedule A must not be harmed.

9. To ensure that the Aboriginal objects described in Schedule A are not harmed, the following measures must be implemented as soon as practicable and complied with:

   (a) Visual markers must be installed to clearly indicate the location of the Aboriginal objects and 'no-harm area' described in Schedule A, to any person on foot or in a vehicle in the vicinity,

   (b) Visual barriers will be erected along the boundary of areas not shaded yellow and identified as the "Mount Pleasant AHIP Area" within ML1645, as shown in Map 1 in Appendix C, to clearly demarcate 'No entry areas' whenever vehicles and /or heavy machinery is required to operate adjacent to or near parts of the mine lease not included under this AHIP.

   (c) Persons entering the land such as employees, contractors, sub-contractors, agents and invitees must be provided with a copy of any Map referred to in Schedule A,

   (d) Appropriate sediment control measures must be installed, operated and maintained so as to prevent harm to the Aboriginal objects and 'no-harm areas' described in Schedule A,

   (e) Vehicles must not be driven on or in the immediate vicinity of an Aboriginal object described in Schedule A,

   (f) Vehicles must not be driven on any part of a 'no-harm area' described in Schedule A,

   (g) Plant, equipment or any materials including fill, must not be stored on any part of a 'no-harm area' described in Schedule A.

10. To ensure that the Aboriginal objects described in Schedule A are not harmed, the ACHMP must be implemented as soon as practicable and complied with, subject to the following modifications:

    (a) The AHIP holder will protect Aboriginal sites of moderate or high significance within the conveyor area, as detailed in DA 92/97 Condition 8(a), Schedule 2 of the Administrative Conditions of the approved Modification 1, granted on the 19 September 2011.

    (b) The AHIP holder will protect all Aboriginal sites listed within Schedule B until salvage and/or collection is required. The salvage and/or collection authorised at each site may

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

not commence more than 6 months prior to the site location being required for development works.

(c) All newly identified Aboriginal sites, not registered on the AHIMS database, that are located within the AHIP application area must be protected with a 20m buffer around the site, until the AHIP holder and the Registered Aboriginal Parties have determined the site(s) value(s) and also classified which management strategy schedule in the ACHMP is the most appropriate for managing the site. An OEH site card is to be completed for each newly identified site prior to commencing the salvage and/or collection at that site. The AHIP holder is to complete an Aboriginal Site Impact Record (ASIR) form, as per Condition 36 after the salvage and/or collection of the site.

(d) The AHIP holder will make all reasonable attempts to protect Aboriginal sites identified to have moderate or high archaeological significance, and where avoidance is not possible, the AHIP holder will mitigate impacts through salvage excavations as per the conditions in this AHIP.

Salvage excavations

11. Salvage excavations may be carried out in, on or under each excavation area described in Schedule B2.

12. Aboriginal objects that are recovered during the excavations may be analysed on-site and/or may be taken off-site for further analysis.

13. The excavations and analysis of Aboriginal objects identified as having moderate or high values, must be carried out in accordance with the methodology in the ACHMP with the following modifications:

    (a) If the archaeologist concludes scientific investigations are required, then the methodology employed must be in accordance with clauses 3, 4, 7, 8, 9 and 11 of Requirement 16 of the Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales.

    (b) The scientific investigations may cease, when either the extent of the feature is investigated, or no additional scientific information is obtainable.

14. The excavations must be completed in an area before any harm of Aboriginal objects described in Schedule C can commence in that same area.

Community collection

15. The Registered Aboriginal Parties must be provided with an opportunity to collect Aboriginal objects within the 'Mt Pleasant AHIP application area' described in Schedule B3.

16. The opportunity for community collection must be provided:

    (a) in accordance with the methodology in the ACHMP and

    (b) before any harm of Aboriginal objects described in Schedule C can commence in the area.

17. Aboriginal objects that are recovered during the community collection may be analysed on-site and/or may be taken off-site for further analysis as decided by the Registered Aboriginal Parties.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

18. If an opportunity for community collection has been provided and this collection does not occur, the AHIP holder may proceed with any actions to harm Aboriginal objects described in Schedule C, in accordance with the conditions of this AHIP.

Harm of certain Aboriginal objects through the proposed works

19. The Aboriginal objects described in Schedule C may be harmed. Nothing in this condition authorises harm to Aboriginal objects described in Schedule A (whether human remains, Aboriginal objects or 'no-harm areas').

20. Aboriginal objects described in Schedule C must not be harmed unless:

    (a) all movement of Aboriginal objects described in Schedule B1 has occurred in the area,

    (b) all excavations described in Schedule B2 have been completed in the area, and

    (c) all opportunities for community collection of Aboriginal objects described in Schedule B3 have been provided in the area.

Temporary storage of certain Aboriginal objects

21. Any Aboriginal objects that are removed from the land by actions authorised by this AHIP, must be moved as soon as practicable to the temporary storage location in the table below, pending any agreement reached about the long term management of the Aboriginal objects.

22. The temporary storage location is as follows:

Location name:	Broomfield Homestead
Address:	1100 Wybong Rd, Mount Pleasant
Storage particulars:	Within a locked temporary storage facility for cultural heritage items only.

23. Any Aboriginal objects stored at the temporary storage location must not be further harmed, except in accordance with the conditions of this AHIP.

Long term management of certain Aboriginal objects

24. When a decision is made in relation to the establishment of the conservation area in accordance with condition 33 and 34 of the approved DA 92/97 Modification granted 19 September 2011, the AHIP holder will notify the OEH office and provide details including the location of the conservation area and whether Aboriginal objects removed from the AHIP area will be moved to the conservation area.

25. If long term protection has not been established 6 months before this AHIP expires, the AHIP holder will consult with each Registered Aboriginal Party regarding long term storage options, and apply to OEH for the preferred Care Agreement option prior to the expiry of this AHIP.

26. Requirement 26 "Stone artefact deposition and storage" in the *Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (24 September 2010, available online at: http://www.environment.nsw.gov.au/licences/archinvestigations.htm) must be complied with.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Access routes

27. Where practicable, existing access routes to parts of the land where actions relating to this AHIP are to be carried out must be used.

Notification and Reporting Conditions

Notification of commencement and completion of actions

28. Written notice must be provided to the OEH office at least 7 days prior to the commencement of actions authorised by this AHIP.

29. Written notice must be provided to the OEH office within 7 days of the completion of actions authorised by this AHIP.

Copy of this AHIP and notices to be provided to Registered Aboriginal Parties

30. A copy of this AHIP must be provided to each Registered Aboriginal Party, within 14 days of receipt of the AHIP from OEH.

31. Where this AHIP is varied or transferred, a copy of the AHIP variation or transfer notice must be provided to each Registered Aboriginal Party, within 14 days of receipt of the notice.

Human remains

32. If any human remains are discovered and/or harmed in, on or under the land, the AHIP holder must:

    (a) not further harm these remains

    (b) immediately cease all work at the particular location

    (c) secure the area so as to avoid further harm to the remains

    (d) notify the local police and OEH's Environment Line on 131 555 as soon as practicable and provide any available details of the remains and their location, and

    (e) not recommence any work at the particular location unless authorised in writing by OEH.

Incidents which may breach the Act or AHIP

33. The AHIP holder must notify the OEH office in writing as soon as practicable after becoming aware of:

    (a) any contravention of s.86 of the Act not authorised by an AHIP, and/or

    (b) any contravention of the conditions of this AHIP.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Reports about incidents which may breach the Act or AHIP

34. Where OEH suspects that an incident has occurred which may have breached the Act or AHIP, OEH may request a written incident report, which includes the following:

    (a) the nature of the incident

    (b) the actual or likely impact of the incident on Aboriginal objects and/or Aboriginal places

    (c) the nature and location of these Aboriginal objects and/or Aboriginal places, referring to and providing maps and photos where appropriate

    (d) any conditions of an AHIP which may have been breached, and

    (e) the measures which have been taken or will be taken to prevent a recurrence of the incident.

35. The incident report must be provided to the OEH office within the timeframe specified in the request.

Provision of Aboriginal Site Impact Recording Form

36. An Aboriginal Site Impact Recording Form must be completed and submitted to the AHIMS Registrar, for each AHIMS site identified in Schedules B and C, within 6 months of the completion of the actions at each site, as authorised by this AHIP.

    Note:

    (i) The Aboriginal Site Impact Recording Form can be found on the OEH website:

    http://www.environment.nsw.gov.au/licences/DECCAHIMSSiteRecordingForm.htm

    (ii) Contact details for the AHIMS Registrar can be found on the OEH website:

    http://www.environment.nsw.gov.au/contact/AHIMSRegistrar.htm

Report about harm to Aboriginal objects Mt Pleasant Coal Mine Stage 1 Salvage Report)

37. Reporting of all excavations conducted in accordance with the *Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (24 September 2010, available online at: http://www.environment.nsw.gov.au/licences/archinvestigations.htm) will be written in accordance with Requirement 11 of the Code of Practice for Archaeological Investigation.

38. A Mt Pleasant Coal Mine Stage 1 Salvage Report must be prepared about the actions relating to the harm of Aboriginal objects (as permitted by this AHIP). The report must:

    (a) include a short summary of the report

    (b) describe any ongoing consultation with or involvement of representatives of Registered Aboriginal Parties in relation to this AHIP

    (c) describe how any Aboriginal objects or 'no-harm areas' described in Schedule A were managed during the period covered by the AHIP

    (d) provide details of the Aboriginal objects which were fully or partially harmed in the course of undertaking the actions

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

(e) if any salvage excavations were authorised by this AHIP, provide a description of the methods and results of the salvage excavation

(f) detail any community collection of Aboriginal objects undertaken by the Registered Aboriginal Parties

(g) comment on the effectiveness of any mitigation measures that were implemented

(h) comment on the effectiveness of any management plan which was in place

(i) if any Aboriginal objects were moved to a temporary storage location, a description of the nature and types of Aboriginal objects which are now at that location

(j) detail the results of any analysis of Aboriginal objects

(k) detail the long term management arrangements for any Aboriginal objects, and

(l) include a statement confirming that all Aboriginal Site Impact Recording Forms have been completed and submitted to the AHIMS Registrar.

39. The Mt Pleasant Coal Mine Stage 1 Salvage Report must be submitted to the OEH office within 6 months of the completion of the actions authorised by this AHIP.

40. A copy of the Mt Pleasant Coal Mine Stage 1 Salvage Report, including a summary of the report in plain English, must be sent by registered post to each Registered Aboriginal Party within 14 days of the report being submitted to OEH

General Conditions

Indemnity

41. The AHIP holder agrees to indemnify and keep indemnified, the Crown in right of NSW, the Minister administering the Act, the Director-General of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from and against all actions, demands, claims, proceedings, losses, damages, costs (including legal costs), charges or expenses suffered or incurred by them resulting from:

(a) any damage or destruction to any real or personal property; and

(b) injury suffered or sustained (including death) by any persons arising out of or in connection with any actions undertaken pursuant to this AHIP.

Release

42. The AHIP holder agrees to release to the full extent permitted by law, the Crown in right of NSW, the Minister administering the Act, the Director-General of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from all suits, actions, demands and claims of every kind resulting from:

(a) any damage or destruction to any real or personal property; and

(b) injury suffered or sustained (including death) by any persons arising from or in connection with any actions undertaken pursuant to this AHIP.

Written notice

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

43. Any requirement to provide written notice to the OEH office in this AHIP may be complied with by faxing the notice to the OEH office's fax number or by sending by registered post to the OEH office's address. The OEH office's contact details are specified at the front of this AHIP.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

SCHEDULES

The following schedules identify the areas and Aboriginal objects that are subject to the conditions of this AHIP.

Schedule A: Aboriginal objects which must not be harmed

A1 Human remains

All human remains in, on or under the land must not be harmed, other than any human remains identified in Schedule B4, as specified by the conditions of this AHIP.

A2 Aboriginal objects that are identified on AHIMS

A3 No-harm areas

Not applicable

Schedule B: Aboriginal objects that may be harmed through certain actions

B1 Movement only

Not applicable

B2 Salvage excavations

Excavations may be carried out in the Aboriginal sites, identified within Schedule 8 of the ACHMP and reproduced in Appendix B of this AHIP, or any newly identified sites within the AHIP application area which is identified as moderate or high significance.

The AHIP holder will ensure Excavations must only be in accordance with the conditions of this AHIP and the conditions of approval of DA92/97 as modified and granted by the Department of Planning and Infrastructure on the 19 September 2011.

B3 Community collection

Community collection may be carried out in the "Mt Pleasant AHIP application area", as marked in the maps included in Appendix C of this AHIP, in accordance with the conditions of this AHIP.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Collection methods of all sites identified in Appendix B of this AHIP, must be in accordance with the relevant schedule of the ACHMP. All newly identified sites within the AHIP application area must be managed in accordance with the conditions in this AHIP.

B4 Other

Not applicable

Schedule C: Aboriginal objects which may be harmed through the proposed works

The Aboriginal objects described in this schedule may be harmed, but only in accordance with the conditions of this AHIP (excluding any Aboriginal objects described in Schedule A).

C1 Harm of Aboriginal objects identified on AHIMS

The Aboriginal objects described in Appendix B may be harmed, but only in accordance with the conditions of this AHIP (excluding any Aboriginal objects described in Schedule A).

C2 Areas where harm of Aboriginal objects is authorised

Not applicable

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

DICTIONARY

In this AHIP, unless the contrary is indicated the terms below have the following meanings:

Aboriginal object	has the same meaning as in the Act.
Act	means the *National Parks and Wildlife Act* 1974.
ACHMP	means *Aboriginal Cultural Heritage Management Plan Mount Pleasant Coal Mine (DA92/97)*
AHIMS	means the Aboriginal Heritage Information Management System maintained by OEH, as defined in s.90Q of the Act.
AHIP	means Aboriginal Heritage Impact Permit
AHIP holder	means the entity or person listed on the cover page under the heading "AHIP issued to".
Application	means the completed application form and all other documents in written or electronic form which accompanied the application when it was lodged or which were subsequently submitted in support of the application.
Community collection	means the collection of Aboriginal objects by one or all Registered Aboriginal Parties or their representatives.
Community collection area	means an area described as a community collection area in Schedule B3
DPC	Department of Premier and Cabinet (NSW).
Director-General	means the Director-General of the Department of Premier and Cabinet (NSW).
EPRG	means Environment Protection and Regulation Group (in OEH)
Harm	has the same meaning as in the Act. In relation to Aboriginal objects, harm means the movement, damage, defacement and/or destruction of Aboriginal objects. In relation to an Aboriginal place, harm means the damage, defacement and/or destruction of the Aboriginal place.
Land	means the land described under the heading "Land to which this AHIP applies".
No-harm areas	means those areas described in Schedule A3.
OEH	Office of Environment and Heritage within the Department of Premier and Cabinet (NSW).
OEH office	means the office listed on the cover page of this AHIP.
Proposed works	means the works described under the heading "D. Proposed Works" at the front of this AHIP.
Public register	means the public register established under s.188F of the Act, that contains details of AHIPs issued by the Director-General DPC, as described under the heading "Information about this AHIP".
Registered Aboriginal Parties	means the Registered Aboriginal Parties listed in the application.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

Salvage excavation	means an archaeological excavation carried out in accordance with the methodology accompanying the application, as modified by the conditions of this AHIP. The purpose of salvage excavation is to recover a sample of Aboriginal objects as an archival record of Aboriginal life from a site that will be destroyed.
Salvage excavation area	means any area described as a salvage excavation area in Schedule B2.
Test excavation	means an archaeological excavation carried out in accordance with methodology accompanying the application, as modified by the conditions of this AHIP. The purpose of test excavation is to collect a sample of Aboriginal objects, in order to establish the nature and extent of sub-surface Aboriginal objects and to assist in the assessment of management options for the site.
Test excavation area	means any area described as a test excavation area in Schedule B2

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

INFORMATION ABOUT THIS AHIP

Public Register

Under section 188F of the Act, the Director-General is required to keep a public register containing the details of each AHIP issued. The details of this AHIP that will be published on the public register are outlined on the front page of this AHIP. The public register is available online at www.environment.nsw.gov.au

Appeals

Under section 90L of the Act, the AHIP holder may appeal to the Land and Environment Court if they are dissatisfied with any condition of this AHIP. The appeal must be lodged within 21 days of the date this AHIP was issued.

Penalties for breach of the Act or AHIP condition

Significant penalties can be imposed by the Land and Environment Court for harm to an Aboriginal object or Aboriginal Place other than as authorised by a condition of an AHIP, or for a breach of an AHIP condition. OEH can also issue penalty notices for a breach of the Act or AHIP condition.

Responsibility for obtaining all approvals and compliance with applicable laws

The AHIP holder is responsible for obtaining and complying with all approvals necessary to lawfully carry out the work referred to in this AHIP, including but not limited to development consents.

Other relevant provisions of the *National Parks and Wildlife Act*

Newly identified Aboriginal objects must be notified to the Director-General under s.89A of the Act using the form available online at www.environment.nsw.gov.au Stop work orders, interim protection orders and remediation directions may be issued in certain circumstances to protect Aboriginal objects or places.

Obligation to report Aboriginal remains under Commonwealth laws

The AHIP holder may have additional obligations to report any discovery of Aboriginal remains under the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984.*

Exercise of investigation and compliance powers

Officers appointed or authorised under the Act may exercise certain powers and functions, including the power to enter land.

Duration of AHIP

This AHIP remains in force for the period specified in the AHIP.

Variation of AHIP

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

The AHIP holder may apply to the OEH office for a variation of any conditions of an AHIP, using the AHIP variation application form available online at www.environment.nsw.gov.au. Requests for significant variations must be accompanied by evidence of further consultation with Registered Aboriginal Parties and may include payment of fees.

The conditions of an AHIP may be varied at any time by the Director General in order to correct a typographical error or to resolve an inconsistency between conditions. The AHIP holder may appeal a decision of the Director General to vary the conditions of the AHIP.

Transfer of AHIP

The AHIP holder may apply to transfer this AHIP to another person by using the AHIP transfer application form available online at www.environment.nsw.gov.au.

Surrender of AHIP

The AHIP holder may apply to surrender this AHIP by using the AHIP surrender application form available online at www.environment.nsw.gov.au. The surrender must be approved by the Director-General and may be subject to conditions.

Suspension and revocation of AHIP

An AHIP may be suspended or revoked at any time at the discretion of the Director-General. Prior to suspending or revoking the AHIP, the AHIP holder will be given notice and an opportunity to make submissions. The AHIP holder will be notified in writing of the final decision. The AHIP holder may appeal a decision to revoke the AHIP.

Entry to land

An AHIP does not automatically entitle its holder to enter land for the purpose of conducting work related to the AHIP. The AHIP holder is responsible for obtaining permission to enter land from the owner and/or occupier of the land.

Disclosure of information pursuant to lawful requirement

This AHIP does not prevent the disclosure of any information or document in OEH's possession in accordance with any lawful requirement.

Making copies of reports

By providing a report, the AHIP holder acknowledges that OEH can use the information in that report to inform its regulatory functions, note details of that report in AHIMS and include a copy of the report in its library which may be available to members of the public.

OEH is able to make copies of any reports provided to OEH under this AHIP.

CONFIDENTIAL Chris.lauritzen @ bigpond.com 2016-05-05 23:20 GMT

APPENDIX A: Restricted AHIMS Sites

Important note about Appendix A:

Appendix A will not be provided publicly by OEH unless the person requesting the information is able to demonstrate a genuine need for it. This is because the Aboriginal community has specified that information access restrictions apply to the Aboriginal objects described in this Appendix, as specified on AHIMS.

The AHIP holder must make the whole AHIP, including this Appendix, available to all persons involved in actions or works covered by this AHIP (whether employees, contractors, sub-contractors, agents or invitees). However, the AHIP holder must not broadly disseminate or publish this Appendix without permission from the Knowledge Holders or Nominated Trustees listed on the relevant AHIMS site recording forms.

Transfer of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT | Office of Environment & Heritage

Your reference:	Transfer of AHIP # 11311247 from RTCA to MACH Energy
Our reference:	DOC16/401192
Notice number:	C0002092
Contact:	Nicole Davis, 4927 3156

Mr Chris Lauritzen
General Manager – Resource Development
MACH Energy Australia Pty Ltd
Level 2, 179 Grey Street
BRISBANE QLD 4101

NOTICE OF TRANSER OF ABORIGINAL HERITIAGE IMPACT PERMIT 11311247

NOTICE TO NEW AHIP HOLDER

Issued pursuant to section 90C (4) *National Parks and Wildlife Act 1974*

BACKGROUND

A. Coal & Allied Operations Pty Ltd applied to the Office of Environment and Heritage (OEH) under section 90B of the *National Parks and Wildlife Act 1974* (NPW Act) for the transfer of an Aboriginal Heritage Impact Permit (AHIP) 11311274.

B. OEH received the application on 11 August 2016.

C. OEH has considered the matters set out in section 90K of the NPW Act.

TRANSFER OF AHIP

1. You are advised that OEH has granted the transfer of the AHIP 11311247 from Coal & Allied Operations Pty Ltd to MACH Energy Australia Pty Ltd.
2. The transferred AHIP now becomes AHIP # C0000247. This transferred AHIP is enclosed. You are subject to all the conditions of this AHIP.
3. The effective date of the transfer will be 8 September 2016.
4. You must provide a copy of this AHIP transfer notice to each Registered Aboriginal Party within 14 days from the date of this notice, to inform these parties that you are the new AHIP holder. You must obtain a list of Registered Aboriginal Parties from the previous AHIP holder.

SOUTH BANK QLD 4101

NOTICE OF VARIATION OF ABORIGINAL HERITAGE IMPACT PERMIT NO. C0000247

Issued pursuant to section 90D (5) *National Parks and Wildlife Act 1974* (NPW Act)

BACKGROUND

A. The Office of Environment and Heritage (OEH) transferred Aboriginal Heritage Impact Permit (AHIP) No. 11311274 to MACH Energy Australia Pty Ltd on 8 September 2016 (new notice No. C0000247).

B. MACH Energy Australia Pty Ltd has applied to OEH to vary AHIP No. C0000247. The applicant to seeking to extend the time period of the AHIP to bring the AHIP in line with the current Mount Pleasant Operation Development Approval 92/97. The applicant has applied to have the AHIP extend from the current expiring date of 23 December 2016 to 23 December 2020.

C. OEH supports the request for the time frame extension of AHIP No. C0000247.

D. OEH has considered the matters set out in section 90K of the NPW Act.

VARIATION OF ABORIGINAL HERITAGE IMPACT PERMIT

OEH has decided to grant this variation. By this notice OEH varies AHIP No. C0000247 in the following manner:

Variation

- AHIP C0000247 is now valid until **23 December 2020**.

Variation of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT | Office of Environment & Heritage

Note: You must provide a copy of this AHIP variation notice to each Registered Aboriginal Party referenced in AHIP No. C0000247, within 14 days.

Senior Team Leader Planning, Hunter Central Coast Region

Regional Operations

(By Delegation)

Date: 24 November 2016

INFORMATION ABOUT THIS VARIATION NOTICE

- Details provided in this notice will be available on OEH's Public Register in accordance with section 188F of the NPW Act.
- You should read this Variation Notice carefully and ensure 8 September 2016 that you continue to comply with **all** conditions of the original AHIP C0000247 issued on 8 September 2016, **as amended** by this Variation Notice. The format of this Variation Notice requires that it must be read in conjunction with the original AHIP.

When this notice begins to operate

- The variations to the AHIP specified in this notice begin to operate immediately from the date of this Variation Notice, unless another date is specified in this notice.

Variation of this notice

- This Variation Notice may only be varied by subsequent notices issued by OEH.

Appeals against this decision

- You can appeal against this decision to the Land and Environment Court. The deadline for lodging the appeal is 21 days after the date that this notice was issued.

Variation of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT | Office of Environment & Heritage

Your reference: AHIP Variation for C0002092
Our reference: AHIMS No. 4005 / DOC17/289090-1
Notice number: C0002653
Contact: Nicole Davis, 4927 3156

Mr Chris Lauritzen
General Manager
MACH Energy Australia Pty Ltd
GPO Box 94
BRISBANE QLD 4001

NOTICE OF VARIATION OF ABORIGINAL HERITAGE IMPACT PERMIT NO. C0002092

Issued pursuant to section 90D (5) *National Parks and Wildlife Act 1974* (NPW Act)

BACKGROUND

A. The Office of Environment and Heritage (OEH) *transferred* Aboriginal Heritage Impact Permit (AHIP) No. 11311247 from Coal & Allied Operations Pty Ltd to MACH Energy Australia Pty Ltd on 8 September 2016, which became AHIP No. C0002092.

B. MACH Energy Australia Pty Ltd has now applied to OEH to *vary* AHIP No. C0002092 (the AHIP) granted under section 90D of the NPW Act. The AHIP authorises the carrying out of mining activities within the Mount Pleasant Coal Mine Lease – ML 1645, ML 1709, ML 1708, Wybong and Kayuga Roads, Mount Pleasant NSW 2333. Specifically, the AHIP permits harm to Aboriginal Objects through;

- Phased Salvage excavations as required;
- Community collection as required;
- Harm to certain Aboriginal objects through the proposed works; &
- Harm to all unknown Aboriginal objects within the AHIP Application Area.

C. MACH Energy Australia Pty Ltd is seeking to *vary* AHIP C0002092 by significantly reducing the current AHIP footprint. Figure 1 (page 2 of this AHIP variation) shows the reduced AHIP boundary that is now applicable to AHIP C0002092.

D. OEH supports the AHIP variation application as it significantly reduces the impact and harm to Aboriginal objects within the Mount Pleasant Coal Mine Lease – ML 1645, ML 1709, ML 1708, Wybong and Kayuga Roads, Mount Pleasant NSW 2333

E. OEH received the application on 16 March 2017.

F. OEH has considered the matters set out in section 90K of the NPW Act.

Variation of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT | Office of Environment & Heritage

VARIATION OF ABORIGINAL HERITAGE IMPACT PERMIT

OEH has decided to grant this variation. By this notice OEH varies AHIP No. C0002092 in the following manner:

Variation (1)

APPENDIX B: Sites that may be harmed by proposed works (pages 35-63 of AHIP 1131247)

Is replaced by:

Schedule C: Aboriginal objects which may be harmed through the proposed works

The Aboriginal objects described in this schedule may be harmed, but only in accordance with the conditions of this AHIP (excluding any Aboriginal objects described in Schedule A).

C1 Harm of Aboriginal objects identified on AHIMS

Variation of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

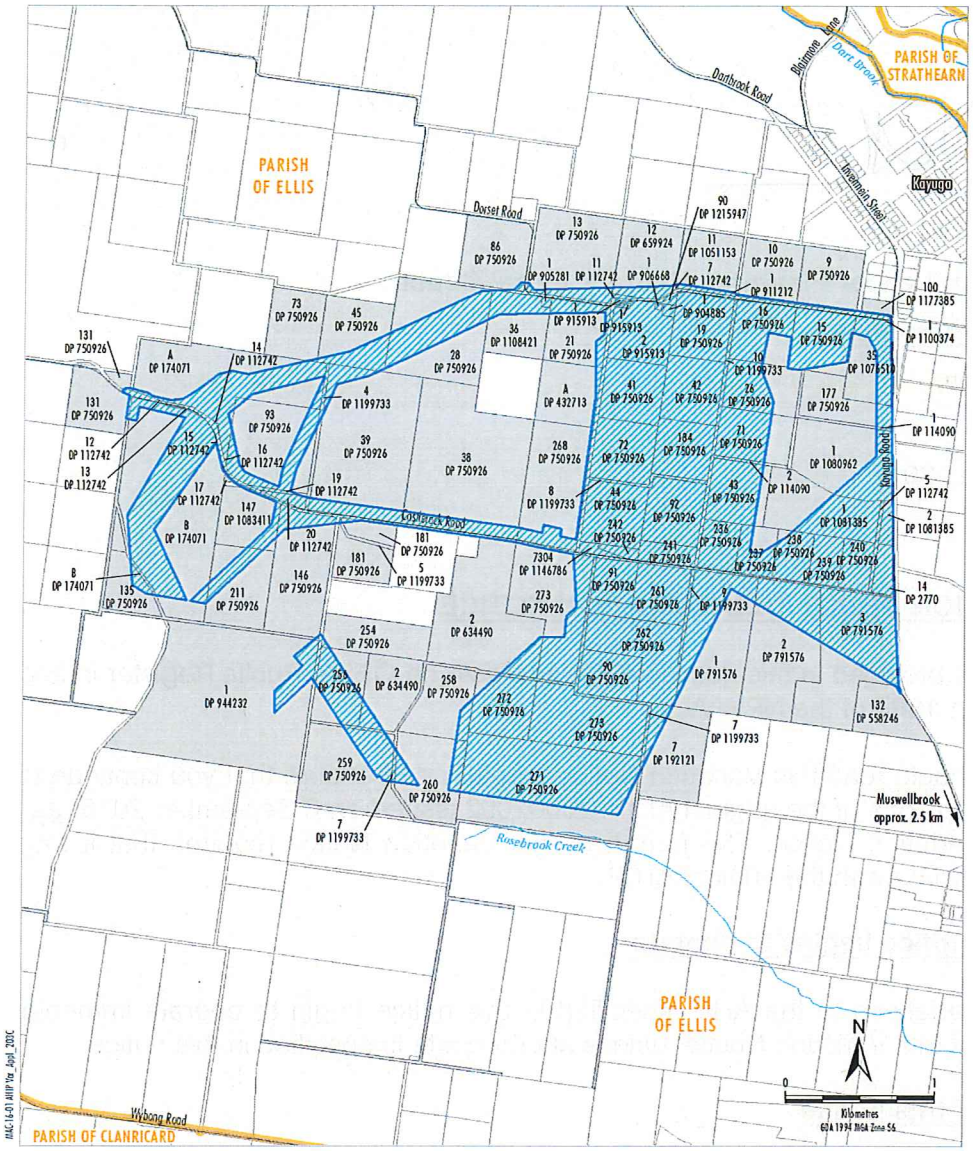
Variation (2)

APPENDIX C – Maps referenced in the AHIP 1131247 (pages 64-67)

Is replaced by:

Figure (1) The lands to which AHIP C0002092 now applies are shown below.



Variation of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

Office of Environment & Heritage

Note: You must provide a copy of this AHIP variation notice to each Registered Aboriginal Party referenced in AHIP number 11311247 which became AHIP number C0002092, within 14 days.

RICHARD BATH

Senior Team Leader Planning, Hunter Central Coast

Regional Operations

(By Delegation)

Date: 23 May 2017

INFORMATION ABOUT THIS VARIATION NOTICE

- Details provided in this notice will be available on OEH's Public Register in accordance with section 188F of the NPW Act.
- You should read this Variation Notice carefully and ensure that you continue to comply with **all** conditions of the original AHIP C0002092 issued on 8 September 2016, **as amended** by this Variation Notice. The format of this Variation Notice requires that it must be read in conjunction with the original AHIP.

When this notice begins to operate

- The variations to the AHIP specified in this notice begin to operate immediately from the date of this Variation Notice, unless another date is specified in this notice.

Variation of this notice

- This Variation Notice may only be varied by subsequent notices issued by OEH.

Appeals against this decision

- You can appeal against this decision to the Land and Environment Court. The deadline for lodging the appeal is 21 days after the date that this notice was issued.

Mr. Josh Peters, Resource Strategies, jpeters@ResourceStrategies.com.au

NOTICE OF THE ISSUE OF

ABORIGINAL HERITAGE IMPACT PERMIT C0004783

Issued pursuant to section 90C (4) of the *National Parks and Wildlife Act 1974*

BACKGROUND

A. MACH Energy Australia Pty Ltd (the applicant), applied to the Office of Environment and Heritage (OEH) under section 90A of the *National Parks and Wildlife Act 1974* (NPW Act) for an Aboriginal Heritage Impact Permit (AHIP). The AHIP application is required as a result of the approved Mount Pleasant Operation Rail Modification (Modification 4 of DA 92/97), approved under section 75W of the NSW *Environmental Planning and Assessment Act, 1979* in November 2018.

B. The works associated with the Mount Pleasant Operation Modification 4 includes the installation of rail infrastructure, water and power supply, and the demolition and removal of redundant infrastructure once the new rail, product loading and water supply infrastructure has been commissioned and is fully operational.

C. There are two (2) AHIMS registered Aboriginal sites located within the modification footprint that will be impacted by the proposed works:

1. AHIMS site # 33-2-0028 (MPO 2017/4)
2. AHIMS Site # 33-2-0029 (MPO 2017/5)

D. The applicant, MACH Energy, is seeking an AHIP to be valid for 20 years (in line with the current mining lease approval) which will permit:

- Certain Aboriginal objects must not be harmed;
- Community collection;
- Harm to certain Aboriginal objects through the proposed works;
- Harm to all unknown Aboriginal objects (except human remains) within the application area.

E. OEH supports the AHIP application and the management recommendations proposed by the applicant, MACH Energy to mitigate any further harm to AHIMS site # 33-2-0028 (MPO 2017/4) & AHIMS Site # 33-2-0029 (MPO 2017/5), that are located within the modification footprint. It should be noted that AHIMS # 33-2-0026 (MPO 2017/2), for which impacts will be avoided, has been included in the AHIP as *'Certain Aboriginal objects must not be harmed'.*

F. OEH received the application on 14 March 2019 and further information was received on 18 April 2019 and 5 June 2019.

ISSUE OF ABORIGINAL HERITAGE IMPACT PERMIT

1. OEH has considered the application and supporting information provided and matters under section 90K of the NPW Act and has decided to issue an **AHIP C0004783** subject to conditions.
2. The AHIP is attached.
3. You should read the AHIP carefully and ensure you comply with its conditions.

It is an offence under section 90J of the NPW Act to fail to comply with the conditions of the AHIP. The maximum penalty that a court may impose on a corporation for failing to comply with this AHIP is $1,100,000.00. OEH can also issue penalty notices for this offence.

Issue of Aboriginal Heritage Impact Permit

National Parks and Wildlife Act 1974

NSW GOVERNMENT Office of Environment & Heritage

INFORMATION ABOUT THIS NOTICE

- Details provided in this notice will be available on OEH's Public Register in accordance with section 188F of the NPW Act.

Variation of this AHIP

- This AHIP may only be varied on application by the AHIP holder or by OEH to correct typographical errors or resolve inconsistencies between conditions of the AHIP. A permit can only be varied by subsequent variation notices.

Appeals against this decision

- You can appeal to the Land and Environment Court against this decision. The deadline for lodging the appeal is 21 days after you were given notice of this decision.

AHIP TO HARM ABORIGINAL OBJECTS

A. Background

I. On 14 March 2019, an application was made to the Chief Executive of the Office of Environment and Heritage (OEH) for an Aboriginal Heritage Impact Permit (AHIP) pursuant to s.90 of the *National Parks and Wildlife Act 1974* (the Act).

II. The AHIP application is required as a result of the approved Mount Pleasant Operation Rail Modification (Modification 4 of DA 92/97), approved under section 75W of the NSW Environmental Planning and Assessment Act, 1979 in November 2018.

III. The works associated with the Mount Pleasant Operation Modification 4 includes the installation of rail infrastructure, water and power supply, and the demolition and removal of redundant infrastructure once the new rail, product loading and water supply infrastructure has been commissioned and is fully operational.

IV. There are two (2) AHIMS registered Aboriginal sites located within the modification footprint that will be impacted by the proposed works:

- AHIMS site # 33-2-0028 (MPO 2017/4);
- AHIMS site # 33-2-0029 (MPO 2017/5).

V. The applicant, MACH Energy, is seeking an AHIP to be valid for 20 years (in line with the current mining lease approval) which will permit 'harm' by means of:

- Certain Aboriginal objects must not be harmed;
- Community collection;
- Harm to certain Aboriginal objects through the proposed works; &
- Harm to all unknown Aboriginal objects (except human remains) within the application area.

VI. OEH supports the AHIP application and the management recommendations proposed by the applicant, MACH Energy to mitigate any further harm to AHIMS site # 33-2-0028 (MPO 2017/4) & AHIMS Site # 33-2-0029 (MPO 2017/5), that are located within the modification footprint. It should be noted that AHIMS # 33-2-0026 (MPO 2017/2), for which impacts will be avoided, has been included in the AHIP as '*certain Aboriginal objects must not be harmed'.*

VII. OEH considered the application and supporting information provided and matters under section 90K of the Act and decided to issue an AHIP subject to conditions.

B. AHIP issued subject to conditions

An AHIP is issued to harm Aboriginal objects identified in Schedules B and C, in accordance with the conditions of this AHIP.

This AHIP is issued pursuant to section 90 of the Act.

C. Commencement and duration of AHIP

This AHIP commences on the date it is signed unless otherwise provided by this AHIP.

Unless otherwise revoked in writing, this AHIP remains in force for:

(i) from the date of commencement, that is, until **6 June 2039**.

D. Proposed Works

The Modification (MOD 4) will involve the following proposed works:

- Duplication of the approved rail spur, rail loop and associated conveyor and rail load-out facility.
- Duplication of the Hunter River water supply pump station (including power supply) and associated water pipeline that currently follows the rail spur alignment.
- Demolition and removal of the redundant approved infrastructure within the extent of the Bengalla Mine once the new rail, product loading and water supply infrastructure has been commissioned and is fully operational.

Note: A Dictionary at the end of the AHIP defines terms used in this document. Further information about this AHIP is also set out after the Dictionary.

INFORMATION ABOUT THIS AHIP 14

LAND TO WHICH THIS AHIP APPLIES

Figure (1) The lands to which this AHIP applies - AHIP extent for MACH Energy, Mount Pleasant Operation, Modification 4, Wybong Road, Muswellbrook NSW 2333 (Page 13 of this AHIP). OEH holds the relevant shapefiles for the AHIP Application Area, OEH CM9 EF18/46567, DOC19/211996-4.

CONDITIONS

The conditions of this AHIP specify the actions that are permitted and/or required in relation to areas and Aboriginal objects, which are detailed in the Schedules that follow.

Administrative Conditions

Responsibility for compliance with conditions of AHIP

1. The AHIP holder must ensure that all persons involved in actions or works covered by this AHIP (whether employees, contractors, sub-contractors, agents or invitees) are made aware of and comply with the conditions of this AHIP.

Project manager to oversee the actions relating to this AHIP

2. A suitably qualified and experienced individual must be appointed as a project manager who is responsible for overseeing, for and on behalf of the AHIP holder, all the actions relating to this AHIP.
3. The individual appointed as project manager must be the Mount Pleasant Environment and Community Manager (or equivalent).
4. If an alternative to the nominated project manager is appointed, OEH must be notified of their contact details within 14 days of this appointment.

Actions must be in accordance with AHIP application

5. All actions on the land must be carried out in accordance with the application except as otherwise expressly provided by a condition of this AHIP.

Operational Conditions

Certain Aboriginal objects must not be harmed

6. All human remains in, on or under the land must not be harmed.
7. The Aboriginal objects described in Schedule A must not be harmed.
8. To ensure that the Aboriginal objects described in Schedule A are not harmed, the following measures must be implemented as soon as practicable and complied with:

a. Visual markers must be installed to clearly indicate the location of the Aboriginal objects and 'no-harm area' (with an approximately 10 metre buffer) described in Schedule A, to any person on foot or in a vehicle in the vicinity;

b. Appropriate sediment control measures must be installed, operated and maintained so as to prevent harm to the Aboriginal objects and 'no-harm areas' described in Schedule A;

c. Vehicles must not be driven on or in the immediate vicinity of an Aboriginal object described in Schedule A;

d. Vehicles must not be driven on any part of a 'no-harm area' described in Schedule A;

e. Plant, equipment or any materials including fill, must not be stored on any part of a 'no-harm area' described in Schedule A.

Community collection

9. The Registered Aboriginal Parties must be provided with the opportunity to collect Aboriginal objects within the AHIP application area (if required).

10. The opportunity for community collection must be provided in accordance with the methodology that was provided with the application.

    (a) before any harm of Aboriginal objects described in Schedule C can commence in the area.

11. Aboriginal objects that are recovered during the community collection may be analysed on-site and/or may be taken off-site for further analysis as decided by the Registered Aboriginal Parties.

12. If an opportunity for community collection has been provided and this collection does not occur, the AHIP holder may proceed with any actions to harm Aboriginal objects described in Schedule C, in accordance with the conditions of this AHIP.

Harm of certain Aboriginal objects through the proposed works

13. The Aboriginal objects described in Schedule C may be harmed. Nothing in this condition authorised harm to Aboriginal objects described in Schedule A (whether human remains, Aboriginal objects or 'no-harm areas').

14. Aboriginal objects described in Schedule C must not be harmed unless:

    (a) all opportunities for community collection of Aboriginal objects described in Schedule B3 have been provided in the area.

Temporary storage of certain Aboriginal objects

15. Any Aboriginal objects that are removed from the land by actions authorised by this AHIP, must be moved as soon as practicable to the temporary storage location in the table below, pending any agreement reached about the long-term management of the Aboriginal objects.

16. The temporary storage location is as follows:

Location	Mount Pleasant Operation

name:	Broomfield Homestead Complex
Address:	1100 Wybong Road Mount Pleasant NSW 2333
Storage particulars:	Secure locked facility

17. Any Aboriginal objects stored at the temporary storage location must not be further harmed, except in accordance with the conditions of this AHIP.

Long term management of certain Aboriginal objects

18. Requirement 26 "Stone artefact deposition and storage" in the *Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (24 September 2010, available online at: http://www.environment.nsw.gov.au/licences/archinvestigations.htm) must be complied with.

Notification and Reporting Conditions

Notification of commencement and completion of actions

19. Written notice must be provided to the OEH office 7 days prior to the commencement of actions authorised by this AHIP. Written notice of commencement may be emailed to rog.hcc@environment.nsw.gov.au

20. Written notice must be provided to the OEH office within 7 days of the completion of actions authorised by this AHIP. Written notice of completion may be emailed to rog.hcc@environment.nsw.gov.au

Human remains

21. If any human remains are discovered and/or harmed in, on or under the land, the AHIP holder must:

    (a) not further harm these remains

    (b) immediately cease all work at the particular location

    (c) secure the area so as to avoid further harm to the remains

    (d) notify the local police and OEH's Environment Line on 131 555 as soon as practicable and provide any available details of the remains and their location, and

    (e) not recommence any work at the particular location unless authorised in writing by OEH.

Incidents which may breach the Act or AHIP

22. The AHIP holder must notify the OEH office in writing as soon as practicable after becoming aware of:

    (a) any contravention of s.86 of the Act not authorised by an AHIP, and/or

    (b) any contravention of the conditions of this AHIP.

Reports about incidents which may breach the Act or AHIP

23. Where OEH suspects that an incident has occurred, which may have breached the Act or AHIP, OEH may request a written incident report, which includes the following:
    (a) the nature of the incident
    (b) the actual or likely impact of the incident on Aboriginal objects and/or Aboriginal places
    (c) the nature and location of these Aboriginal objects and/or Aboriginal places, referring to and providing maps and photos where appropriate
    (d) any conditions of an AHIP which may have been breached, and
    (e) the measures which have been taken or will be taken to prevent a recurrence of the incident.
24. The incident report must be provided to the OEH office within the timeframe specified in the request.

Provision of Aboriginal Site Impact Recording Form

25. An Aboriginal Site Impact Recording Form must be completed and submitted to the AHIMS Registrar, for each AHIMS site identified in Schedules B and C, within 6 months of the completion of the actions authorised by this AHIP.

    Note:
    (i) The Aboriginal Site Impact Recording Form can be found on the OEH website: http://www.environment.nsw.gov.au/licences/DECCAHIMSSiteRecordingForm.htm
    (ii) Contact details for the AHIMS Registrar can be found on the OEH website: http://www.environment.nsw.gov.au/contact/AHIMSRegistrar.htm

General Conditions

Indemnity

26. The AHIP holder agrees to indemnify and keep indemnified, the Crown in right of NSW, the Minister administering the Act, the Chief Executive of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from and against all actions, demands, claims, proceedings, losses, damages, costs (including legal costs), charges or expenses suffered or incurred by them resulting from:
    (a) any damage or destruction to any real or personal property; and
    (b) injury suffered or sustained (including death) by any persons arising out of or in connection with any actions undertaken pursuant to this AHIP.

Release

27. The AHIP holder agrees to release to the full extent permitted by law, the Crown in right of NSW, the Minister administering the Act, the Chief Executive of OEH, and their employees, agents and contractors, in the absence of any willful misconduct or negligence on their part, from all suits, actions, demands and claims of every kind resulting from:

(a) any damage or destruction to any real or personal property; and

(b) injury suffered or sustained (including death) by any persons arising from or in connection with any actions undertaken pursuant to this AHIP.

Written notice

28. Any requirement to provide written notice to the OEH office in this AHIP may be complied with by emailing notice to the OEH office's email address. The OEH office's contact details are specified at the front of this AHIP

SCHEDULES

The following schedules identify the areas and Aboriginal objects that are subject to the conditions of this AHIP.

Schedule A: Aboriginal objects which must not be harmed

A1 Human remains

All human remains in, on or under the land must not be harmed as specified by the conditions of this AHIP.

A2 Aboriginal objects that are identified on AHIMS

The following Aboriginal objects identified on AHIMS must not be harmed, as specified by the conditions of this AHIP.

Portion of Site (whole or part)	**AHIMS Site ID**	**Site Feature**	**Site Name**	**Information access restriction?** (Y/N)	**Easting**	**Northing**	**Datum**
Whole	33-2-0026	Isolated Artefact	MPO 2017/2	*No*	297938	6427683	GDA

A3 No-harm areas

Not applicable

Schedule B: Aboriginal objects that may be harmed through the certain actions

B1 Movement only

Not applicable

B2 Test/Salvage excavations

Not applicable

B3 Community collection

Community collection may be carried out (as required) across the AHIP application area, in accordance with the conditions of this AHIP.

The community collection area includes the following known Aboriginal objects, as identified on AHIMS (excluding any Aboriginal objects described in Schedule A):

Portion of Site (whole or part)	**AHIMS Site ID**	**Site Feature**	**Site Name**	**Information access restriction?** (Y/N)	**Easting**	**Northing**	**Datum**
Whole	33-2-0028	Artefact Scatter	MPO 2017/4	*No*	297881	6427124	GDA
Whole	33-2-0029	Isolated Artefact	MPO 2017/5	*No*	297638	6427371	GDA

Schedule C: Aboriginal objects which may be harmed through the proposed works

The Aboriginal objects described in this schedule may be harmed, but only in accordance with the conditions of this AHIP (excluding any Aboriginal objects described in Schedule A).

C1 Harm of Aboriginal objects identified on AHIMS

Portion of Site (whole or part)	**AHIMS Site ID**	**Site Feature**	**Site Name**	**Information access restriction?** (Y/N)	**Easting**	**Northing**	**Datum**
Whole	33-2-0028	Artefact Scatter	MPO 2017/4	*No*	297881	6427124	GDA
Whole	33-2-0029	Isolated Artefact	MPO 2017/5	*No*	297638	6427371	GDA

C2 Areas where harm of Aboriginal objects is authorised

All Aboriginal objects in, on or under the land which is identified on the Figure (1) AHIP Application Area (page 13 of this AHIP) may be harmed, but only in accordance with the conditions of this AHIP (excluding any Aboriginal objects described in Schedule A).

Figure (1)

The lands to which this AHIP applies - AHIP extent for MACH Energy, Mount Pleasant Operation, Modification 4, Wybong Road, Muswellbrook NSW 2333 (shown hatched in green), and is defined by GPS coordinates listed in Table (1) & (2), pp.14-18 of this AHIP.

DICTIONARY

In this AHIP, unless the contrary is indicated the terms below have the following meanings:

Aboriginal object	has the same meaning as in the Act.
Act	means the *National Parks and Wildlife Act 1974*.
AHIMS	means the Aboriginal Heritage Information Management System maintained by OEH, as defined in s.90Q of the Act.
AHIP	means Aboriginal Heritage Impact Permit
AHIP holder	means the entity or person listed on the cover page under the heading "AHIP issued to".
Application	means the completed application form and all other documents in written or electronic form which accompanied the application when it was lodged or which were subsequently submitted in support of the application.
Community collection	means the collection of Aboriginal objects by one or all Registered Aboriginal Parties or their representatives.
Community collection area	means an area described as a community collection area in Schedule B3
Harm	has the same meaning as in the Act. In relation to Aboriginal objects, harm means the movement, damage, defacement and/or destruction of Aboriginal objects. In relation to an Aboriginal place, harm means the damage, defacement and/or destruction of the Aboriginal place.
Land	means the land described under the heading "Land to which this AHIP applies".
No-harm areas	means those areas described in Schedule A3.
OEH	Office of Environment and Heritage (NSW).
OEH office	means the office listed on the cover page of this AHIP.
Proposed works	means the works described under the heading "D. Proposed Works" at the front of this AHIP.
Public register	means the public register established under s.188F of the Act, that contains details of AHIPs issued by the Chief Executive of OEH, as described under the heading "Information about this AHIP".
Registered Aboriginal Parties	means the Registered Aboriginal Parties listed in the application.
Salvage excavation	means an archaeological excavation carried out in accordance with the methodology accompanying the application, as modified by the conditions of this AHIP. The purpose of salvage excavation is to recover a sample of Aboriginal objects as an archival record of Aboriginal life from a site that will be destroyed.
Salvage excavation area	means any area described as a salvage excavation area in Schedule B2.
Test excavation	means an archaeological excavation carried out in accordance with methodology accompanying the application, as modified by the

	conditions of this AHIP. The purpose of test excavation is to collect a sample of Aboriginal objects, in order to establish the nature and extent of sub-surface Aboriginal objects and to assist in the assessment of management options for the site.
Test excavation area	means any area described as a test excavation area in Schedule B2

INFORMATION ABOUT THIS AHIP

Public Register

Under section 188F of the Act, the Chief Executive of OEH is required to keep a public register containing the details of each AHIP issued. The details of this AHIP that will be published on the public register are outlined on the front page of this AHIP.

The public register is available online at www.environment.nsw.gov.au

Appeals

Under section 90L of the Act, the AHIP holder may appeal to the Land and Environment Court if they are dissatisfied with any condition of this AHIP. The appeal must be lodged within 21 days of the date this AHIP was issued.

Penalties for breach of the Act or AHIP condition

Significant penalties can be imposed by the Land and Environment Court for harm to an Aboriginal object or Aboriginal Place other than as authorised by a condition of an AHIP, or for a breach of an AHIP condition. OEH can also issue penalty notices for a breach of the Act or AHIP condition.

Responsibility for obtaining all approvals and compliance with applicable laws

The AHIP holder is responsible for obtaining and complying with all approvals necessary to lawfully carry out the work referred to in this AHIP, including but not limited to development consents.

Other relevant provisions of the *National Parks and Wildlife Act*

Newly identified Aboriginal objects must be notified to the Chief Executive of OEH under s.89A of the Act using the form available online at www.environment.nsw.gov.au

Stop work orders, interim protection orders and remediation directions may be issued in certain circumstances to protect Aboriginal objects or places.

Obligation to report Aboriginal remains under Commonwealth laws

The AHIP holder may have additional obligations to report any discovery of Aboriginal remains under the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*.

Exercise of investigation and compliance powers

Officers appointed or authorised under the Act may exercise certain powers and functions, including the power to enter land.

Duration of AHIP

This AHIP remains in force for the period specified in the AHIP.

Variation of AHIP

The AHIP holder may apply to the OEH office for a variation of any conditions of an AHIP, using the AHIP variation application form available online at www.environment.nsw.gov.au. Requests for significant variations must be accompanied by evidence of further consultation with Registered Aboriginal Parties and may include payment of fees.

The conditions of an AHIP may be varied at any time by the Chief Executive of OEH in order to correct a typographical error or to resolve an inconsistency between conditions. The AHIP holder may appeal a decision of the Chief Executive of OEH to vary the conditions of the AHIP.

Transfer of AHIP

The AHIP holder may apply to transfer this AHIP to another person by using the AHIP transfer application form available online at www.environment.nsw.gov.au.

Surrender of AHIP

The AHIP holder may apply to surrender this AHIP by using the AHIP surrender application form available online at www.environment.nsw.gov.au. The surrender must be approved by the Chief Executive of OEH and may be subject to conditions.

Suspension and revocation of AHIP

An AHIP may be suspended or revoked at any time at the discretion of the Chief Executive of OEH. Prior to suspending or revoking the AHIP, the AHIP holder will be given notice and an opportunity to make submissions. The AHIP holder will be notified in writing of the final decision. The AHIP holder may appeal a decision to revoke the AHIP.

Entry to land

An AHIP does not automatically entitle its holder to enter land for the purpose of conducting work related to the AHIP. The AHIP holder is responsible for obtaining permission to enter land from the owner and/or occupier of the land.

Disclosure of information pursuant to lawful requirement

This AHIP does not prevent the disclosure of any information or document in OEH's possession in accordance with any lawful requirement.

Making copies of reports

By providing a report, the AHIP holder acknowledges that OEH can use the information in that report to inform its regulatory functions, note details of that report in AHIMS and include a copy of the report in its library which may be available to members of the public.

OEH is able to make copies of any reports provided to OEH under this AHIP.

Aboriginal Cultural Heritage Management Plan – State Significant Development

Proposal: Mt Pleasant Optimisation Project

Major Project reference: SSD-10418-PA-16

Received: 19 February 2024

Dear Joe

Thank you for your referral seeking advice on the Mt Pleasant Operation Aboriginal Cultural Heritage Management Plan (Draft for Consultation).

The Aboriginal Cultural Heritage Management Plan is provided in draft format only and does not contain evidence of review by the Registered Aboriginal Parties. On this basis alone, the Aboriginal Cultural Heritage Management Plan does not meet the requirements of the relevant conditions of consent. However, Heritage NSW has also identified additional matters to be addressed to ensure that the Aboriginal Cultural Heritage Management Plan meets the relevant requirements. These are listed in **Attachment A**.

Following revision of the Aboriginal Cultural Heritage Management Plan to address the matters identified in this letter, please provide the Plan to Heritage NSW for additional review and comment.

If you have any questions regarding these comments, please contact Nicola Roche, Principal Assessments Officer, at Heritage NSW at nicola.roche@environment.nsw.gov.au.

Yours sincerely

Nicole Davis

Attachment A – Additional matters to be addressed prior to finalisation of Aboriginal Cultural Heritage Management Plan (ACHMP)

Registered Aboriginal Party Consultation

- As previously referenced, the ACHMP must be provided to all Registered Aboriginal Parties for review and comment. MACH Energy Australia Pty Ltd must respond to all comments provided by Registered Aboriginal Parties and ensure that the comments are addressed in the revised ACHMP.
- The revised ACHMP must provide evidence of Registered Aboriginal Party consultation including (but not limited to) evidence of provision of the draft ACHMP for review and copies of any responses received.
- Heritage NSW notes that the current ACHMP was approved in 2019. Please ensure that the revised ACHMP demonstrates that consultation with the Registered Aboriginal Parties has remained ongoing since this time with no lapses in consultation of greater than 6 months duration.
- In relation to the process set out in Section 3 regarding ongoing involvement of Aboriginal parties, please note that the *Aboriginal Community Consultation Requirements for Proponents 2010* do not establish criteria for a competitive selection process for Registered Aboriginal Parties. The criteria referenced in that document relate to provision of cultural knowledge not commercial engagement or provision of administrative services. Please adjust text in ACHMP accordingly.
- Please adjust dot point 5 on p22 to identify that the Registered Aboriginal Parties must be provided with draft copies of salvage reports for review and comment prior to finalisation. This is critical to ensuring that cultural considerations are adequately addressed in any salvage report.
- Dot point 6 on page 22 states that Registered Aboriginal Party comments on survey work and/or assessment provided within 15 business days will be considered. This is inconsistent with Heritage NSW requirements which specify a minimum review period of 28 days. Please adjust accordingly.

Aboriginal and Torres Strait Islander Heritage Protection Act Application

- The ACHMP area is subject to consideration under Section 9 and 10 of the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*. The notice of application published 29/3/2023 notes that the application seeks preservation of the area as a 'significant Aboriginal area'. Heritage NSW acknowledges that this application has not been determined but recommends that the application be acknowledged in the ACHMP.

Accuracy of Aboriginal sites database and information in Appendix E

- There are issues in relation to site data presented in Appendix E, as outlined below.
    - Discrepancies with current AHIMS data including:
        - Site status. For example, 43 sites are listed in Appendix E as salvaged under AHIP #C0002092 but are listed in AHIMS as valid. Conversely, 181 sites are listed in Appendix E as in-situ but recorded in AHIMS as destroyed;
        - site registration, with 77 sites listed in Appendix E not registered on AHIMS.

- The number of sites referenced in Appendix E does not encompass all sites within the SSD area. The ACHMP references that it does not consider sites located to the south of Wybong Rd and outside the approved AHIP boundaries because these sites are managed as part of the Bengalla Mine Operation. However, to ensure that the ACHMP complies with relevant conditions, it should reference management of all sites within the SSD area. These sites should be included in Appendix E but can be referenced as 'managed under SSD-5170.'
- It appears that the management strategies for sites listed in Appendix E do not correlate with those specified in the approved Aboriginal Cultural Heritage Assessment Report (ACHAR). For example, Appendix E does not include any sites subject to harm under SSD-10418 other than those approved under the existing AHIPs.

- To correct the above, Heritage NSW recommends that the following be undertaken and incorporated into the revised ACHMP:
  - an audit of the Mt Pleasant Operation Aboriginal Site Database with reference to AHIMS records and the information presented in the approved ACHAR. Address any discrepancies between the three datasets and ensure that the management actions recorded in the database reflect those specified in the approved ACHAR or that any variation is clearly documented;
  - revise the table of identified sites in Appendix E to ensure that all sites within the SSD area are included and the management actions specified for each site are consistent with those referenced in the approved ACHAR and/or the reason for a change in proposed management actions are provided (eg site no longer impacted, site reassessed as per ACHAR and provide new management activity etc); and
  - provide copy of Mount Pleasant Operation Aboriginal Site Database (including shapefiles for extent of sites) to accompany ACHMP review for the purposes of data comparison.

Visual presentation of sites data

- Given the volume of sites, mapping of sites within the ACHMP should be presented at an appropriate scale and include the known extent of extant sites rather than single point data only.

Context of SSD/DA approval applicability

- Please clarify the date at which operation under SSD-10418 commenced and provide the likely date for surrender of DA92/97.
- Heritage NSW recommends that AHIPs linked to DA92/97 be surrendered concurrently with surrender of the DA, noting that the ACHMP must include requirements to satisfy all outstanding conditions the AHIPs including site management requirements, consultation with Registered Aboriginal Parties and submission of relevant reports and site recording forms.

Management of Conservation Areas

- The relationship of the ACHMP to the management of Aboriginal Heritage Conservation Areas is unclear. Section 1.1 states that the ACHMP applies to the MPO Area and, for the

purposes of the ACHMP, the MPO area comprises the Modified Development Consent Boundary and the Aboriginal Heritage Conservation Areas. However, Section 2.7 says the ACHMP does not include sites in Aboriginal Heritage Conservation Areas outside the approval areas (both SSD and DA). Please clarify.

- Section 4 also does not provide specific management recommendations regarding the management of works that may be required within Conservation Areas. Please confirm whether these will be provided as part of the separate Aboriginal Cultural Heritage Conservation Strategy and/or include appropriate measures for the management of activities (such as road maintenance or construction, fencing, weed management etc) within Conservation Areas in the revised ACHMP.
- Please confirm whether the Conservation Management Plan for Conservation Area A has been approved by the relevant agencies, including Heritage NSW. If Conservation Area A is subject to a separate approved plan, consideration should be given to whether Section 4.2.3 duplicates information from the Conservation Management Plan and may cause confusion.
- Please provide further clarification regarding how the management of the Minnamurra Grinding Grooves site will address the intent of Condition 33 of DA 82/97 given that the site is located within an area already set aside as a biodiversity conservation offset area, is a site type not found within MPO, is located out of Country and is already subject to protection under legislation.
- The options listed in Section 4.2.4 are very general and there is no clear indication of whether these activities will occur or the likely timing. This should be addressed in the revised ACHMP.
- Please provide dates for the development and provision of a finalised Aboriginal Cultural Heritage Management Strategy including any specific management requirements for Ascot Farm and Munmurra River Grinding Grooves (if these are not addressed in the revised ACHMP).

Management Actions

- Section 5.3 indicates that all archaeological excavation under the relevant AHIPs has been completed and Appendix E does not identify any known sites for which salvage excavation is required. However, the ACHAR identifies that test/salvage excavation will be required at a number of locations if subject to impact following detailed design. Please clarify.
- Please provide a single summary table in Section 5 that lists the applicable management strategies and the sites within the area subject to the ACHMP to which that management strategy applies.
- Paragraph 2 on page 18 indicates that the management requirements for sites may change from those listed in Appendix E. Please note that Condition B69 (d)(vi) requires that management actions are in accordance with commitments made in ACHAR and therefore any change should only occur whether the level of harm is reduced from that detailed in the ACHAR.
- Paragraph 2 of Section 5.3 should be revised to recognise that test excavation must be conducted where necessary to clarify the nature, extent and/or significance of a site (in accordance with the requirements of the *Code of Practice for the Investigation of Aboriginal*

Objects in NSW) for which management actions under a previous AHIP or the project ACHAR have not been approved.

- The excavation methodology should include provision for the assessment of cultural significance as well as archaeological significance and a mechanism to manage any diversion between these two measures of significance.
- The initial sub-surface testing methodology provides allowance for all aspects of the methodology to be revised based on input from the archaeologist. The methodology should be reviewed to ensure general consistency with reference the requirements of the *Code of Practice for the Investigation of Aboriginal Objects in NSW* and must provide sufficient certainty of process for all parties, including Heritage NSW and the Registered Aboriginal Parties.
- The archaeological excavation methodology must be revised to include consideration of a potential conservation outcome for sites of high significance and/or additional consultation with Heritage NSW and the Registered Aboriginal Parties where impacts must occur to a site of high significance.
- The controlled salvage excavation methodology does not provide any clear guidance on how the maximum area of salvage excavation will be defined. Please provide clear criteria for ceasing excavation expansion.
- Section 5.3.3 does not provide clear and measurable criteria for where surface scrapes will be undertaken. Please identify the criteria under which surface scrapes will be deemed 'appropriate'.
- Section 5.4 does not provide clear guidance on where artefacts will or will not be subject to further analysis and the level of analysis applied. The statement 'may be subject to further analysis' does not provide sufficient surety of process and should be revised.
- Section 5.8 must specifically outline the process that will apply where ancillary works require harm to sites that have been previously recorded and have an existing requirement to be managed in-situ in accordance with the approved ACHMP.
- Section 5.8.2 refers to undertaking due diligence inspections and seeking an AHIP where works occur outside the extent of the approved AHIPs. This requires clarification regarding whether it is a reference to works outside the approved SSD boundary or to works within the approved SSD boundary. Where it is works within the approved SSD boundary, AHIPs will not be required, and the sites must be managed under the provisions of the ACHMP.
- Section 5.10 provides a procedure for managing previously unidentified sites. Dot point 3 must include provision for test excavation generally in accordance with the *Code of Practice for the Investigation of Aboriginal Objects in NSW* where required to determine nature, extent and significance of the site. This section also identifies that impact should not occur until approvals are in place. However, once enacted, the ACHMP will act as the guidance document for management of sites within the SSD area and therefore this section must provide clarity on potential management outcomes and/or must trigger a requirement for additional consultation with the Registered Aboriginal Parties and Heritage NSW regarding appropriate site management.

- The recommendations for management in Section 5.10.1 are inconsistent with the requirements of the relevant AHIPs, both of which specify that sites of low significance should be subject to surface collection. Please revise accordingly.
- In relation to management of newly identified sites, Section 5.10.1 should include provision for additional consultation with the Registered Aboriginal Parties and Heritage NSW in relation to the management of any site type other than scarred trees and open artefact sites. Sites of these types are not predicted to occur within the SSD area and are likely to have high significance and specific management requirements, warranting further review of the proposed management strategy by the Registered Aboriginal Parties and Heritage NSW.
- Section 5.13 should be revised to note that approval for harm is not limited to AHIPs but includes approved harm conducted in accordance with the provisions of the ACHMP. This should be noted wherever relevant throughout the document.

Artefact management and storage

- Section 5.5. and 5.12 specify that artefacts will be managed in accordance with Requirement 26 of the *Code of Practice for the Investigation of Aboriginal Objects in NSW*. This requirement primarily relates to artefacts being returned to their original location. Please clarify that the intent is to follow the documentation and recording aspects of Requirement 26 but for the artefacts to be subject to long-term storage at Ascot Farm.
- Section 5.6 must include provision for conservation of scarred trees, where feasible.

Reporting on actions undertaken under AHIPs/ACHMP

- Section 5.7 must include requirements for the submission of Aboriginal site impact recording forms for all site cards impacted under approval (as opposed to those specifically impacted under an AHIP).
- On the basis that AHIPs issued for works approved under DA92/97 may be surrendered, Section 5.7 must include provision for completion of salvage reporting that is generally in accordance with the requirements of each AHIP but also includes reporting on salvage of sites conducted under the ACHMP only. Given the number of sites and area subject to approval, provision should be made for periodic reporting to ensure all information is appropriately documented within 2 years of the completion of actions in each staged portion of the approval area (eg. post-construction of new infrastructure, following completion of salvage requirements in each defined pit area).

ACHMP Review

- In relation to Section 9.2, Heritage NSW recommends that any review of the ACHMP that results in substantive changes (such as changes to proposed management strategies, changes to project impact footprint or changes to consultation approach) must be undertaken in consultation with the Registered Aboriginal Parties.

Aboriginal Cultural Heritage Management Plan (SSD 10418) – Response to Consultation Comments (Heritage NSW)

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
Part B, Condition B69(c)	**Registered Aboriginal Party Consultation** As previously referenced, the ACHMP must be provided to all Registered Aboriginal Parties for review and comment. MACH Energy Australia Pty Ltd must respond to all comments provided by Registered Aboriginal Parties and ensure that the comments are addressed in the revised ACHMP.	Section 1.3.2	The ACHMP was provided to the RAPs for consultation on 19 February 2024. No comments were received which required change to the ACHMP.
Part B, Condition B69(c)	The revised ACHMP must provide evidence of Registered Aboriginal Party consultation including (but not limited to) evidence of provision of the draft ACHMP for review and copies of any responses received.	Section 1.3.2	Evidence of RAP consultation (postage tracking details, email correspondence) will be compiled into Appendix J (Consultee Log).
-	Heritage NSW notes that the current ACHMP was approved in 2019. Please ensure that the revised ACHMP demonstrates that consultation with the Registered Aboriginal Parties has remained ongoing since this time with no lapses in consultation of greater than 6 months duration.	-	MACH Energy maintains an open and ongoing dialogue with RAPs. Contact details for MACH Energy are available to the RAPs and all correspondence (written or verbal) is responded to in a timely manner. MACH Energy's annual RAP meeting (described in Section 3.2 of the ACHMP) provide a formal and regular forum for RAPs to raise any concerns or questions regarding the management of heritage at the MPO. In addition, MACH Energy holds regular meetings with the Wanaruah Local Aboriginal Land Council (generally monthly), which provides an opportunity to obtain feedback from the Aboriginal community. MACH's involvement with the Aboriginal Community Development Fund (ACDF) quarterly also provides a feedback mechanism with the community. RAPs are also regularly involved in inspection and salvage activities on-site at the MPO.

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			A summary of key formal correspondence with the RAPs is provided at the end of this response, which is in addition to the ongoing consultation outlined above. This summary demonstrates continuous and contiguous consultation with the RAPs since the previous approval of the ACHMP in 2019.
Part B, Condition B69(c)	In relation to the process set out in Section 3 regarding ongoing involvement of Aboriginal parties, please note that the *Aboriginal Community Consultation Requirements for Proponents 2010* do not establish criteria for a competitive selection process for Registered Aboriginal Parties. The criteria referenced in that document relate to provision of cultural knowledge not commercial engagement or provision of administrative services. Please adjust text in ACHMP accordingly.	Section 3.3.1	Section 3.3.1 has been updated to remove mention of a competitive selection process.
Part B, Condition B69(c)	Please adjust dot point 5 on p22 to identify that the Registered Aboriginal Parties must be provided with draft copies of salvage reports for review and comment prior to finalisation. This is critical to ensuring that cultural considerations are adequately addressed in any salvage report.	Section 3.3.2	Section 3.3.2 has been updated to address this recommendation.
Part B, Condition B69(c)	Dot point 6 on page 22 states that Registered Aboriginal Party comments on survey work and/or assessment provided within 15 business days will be considered. This is inconsistent with Heritage NSW requirements which specify a minimum review period of 28 days. Please adjust accordingly.	Section 3.3.2	MACH Energy is aware of a consultation timeline for ACHARs but is not aware of any minimum review period for salvage reports. The 15 day review period for salvage reports has been agreed with the MPO RAPs and is considered appropriate.
-	**Aboriginal and Torres Strait Islander Heritage Protection Act Application** The ACHMP area is subject to consideration under Section 9 and 10 of the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*. The notice of application published 29/3/2023 notes that the application seeks preservation of the area as a 'significant Aboriginal area'. Heritage NSW acknowledges that this application has not been determined but recommends that the application be acknowledged in the ACHMP.	Section 2.5	Section 2.5 has been updated to acknowledge this notice of application.
-	**Accuracy of Aboriginal sites database and information in Appendix E**	Section 2.7, Appendix E	An audit of the Mount Pleasant Operation (MPO) Aboriginal heritage site database

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response

	There are issues in relation to site data presented in Appendix E, as outlined below.
	• Discrepancies with current AHIMS data including:
	  ○ Site status. For example, 43 sites are listed in Appendix E as salvaged under AHIP #C0002092 but are listed in AHIMS as valid. Conversely, 181 sites are listed in Appendix E as in-situ but recorded in AHIMS as destroyed;
	  ○ site registration, with 77 sites listed in Appendix E not registered on AHIMS.
	• The number of sites referenced in Appendix E does not encompass all sites within the SSD area. The ACHMP references that it does not consider sites located to the south of Wybong Rd and outside the approved AHIP boundaries because these sites are managed as part of the Bengalla Mine Operation. However, to ensure that the ACHMP complies with relevant conditions, it should reference management of all sites within the SSD area. These sites should be included in Appendix E but can be referenced as 'managed under SSD-5170.'
	• It appears that the management strategies for sites listed in Appendix E do not correlate with those specified in the approved Aboriginal Cultural Heritage Assessment Report (ACHAR). For example, Appendix E does not include any sites subject to harm under SSD-10418 other than those approved under the existing AHIPs.
			against the AHIMS database and the findings of the ACHAR (South East Archaeology, 2020a, 2020b) was conducted.
			
			Appendix E has been updated to encompass all the sites included in the AHIMS database and ACHAR (South East Archaeology, 2020), in addition to consolidating any existing sites and the current status included in the previous Appendix E (but not included in the ACHAR [2020]). Any discrepancies and change to any management measures/justification has been provided in the updated MPO Aboriginal heritage site database.
			
			The management status for relevant sites in the MPO Aboriginal heritage site database/Appendix E has been updated to include the sites managed under SSD 5170 (Bengalla Mine Operation).
			
			Submission of an Aboriginal Site Impact Recording Form to update site location and site status following the audit has been included as a commitment in Section 2.7.

-	To correct the above, Heritage NSW recommends that the following be undertaken and incorporated into the revised ACHMP: • an audit of the Mt Pleasant Operation Aboriginal Site Database with reference to AHIMS records and the information presented in the approved ACHAR. Address any discrepancies between the three datasets and ensure that the management actions recorded in the database reflect those specified in the approved ACHAR or that any variation is clearly documented;		As above. A copy of the Mount Pleasant Operation Aboriginal heritage site database (including shapefiles) will be provided to Heritage NSW to accompany ACHMP review.

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
	• revise the table of identified sites in Appendix E to ensure that all sites within the SSD area are included and the management actions specified for each site are consistent with those referenced in the approved ACHAR and/or the reason for a change in proposed management actions are provided (eg site no longer impacted, site reassessed as per ACHAR and provide new management activity etc); and • provide copy of Mount Pleasant Operation Aboriginal Site Database (including shapefiles for extent of sites) to accompany ACHMP review for the purposes of data comparison.		
-	**Visual presentation of sites** Given the volume of sites, mapping of sites within the ACHMP should be presented at an appropriate scale and include the known extent of extant sites rather than single point data only.	-	The MPO Aboriginal heritage site database in GIS format rather than the figure in the ACHMP is used by MACH Energy to support the GDP process. Figures with locations shown at a small scale have not been included for cultural sensitivity reasons.
-	**Context of SSD/DA approval applicability** Please clarify the date at which operation under SSD-10418 commenced and provide the likely date for surrender of DA92/97.	Section 1.1	Section 1.1 has been updated to include the date of commencement of Development Consent SSD 10418 and the date of surrender of Development Consent DA 92/97.
-	Heritage NSW recommends that AHIPs linked to DA92/97 be surrendered concurrently with surrender of the DA, noting that the ACHMP must include requirements to satisfy all outstanding conditions the AHIPs including site management requirements, consultation with Registered Aboriginal Parties and submission of relevant reports and site recording forms.	Section 2.4	Section 2.4 discusses the surrender of the AHIPs which is linked to the surrender of Development Consent DA 92/97. More detail has been added to Section 1.1 and 2.4 to address this recommendation.
Part B, Condition B69(d)	**Management of Conservation Areas** The relationship of the ACHMP to the management of Aboriginal Heritage Conservation Areas is unclear. Section 1.1 states that the ACHMP applies to the MPO Area and, for the purposes of the ACHMP, the MPO area comprises the Modified Development Consent Boundary and the Aboriginal Heritage Conservation Areas. However, Section 2.7 says the ACHMP does not include sites in Aboriginal Heritage Conservation Areas outside the approval areas (both SSD and DA). Please clarify.	Section 4.4.1	The Aboriginal Heritage Conservation Area will be managed in a separate document. Conservation Area A will be managed under a Conservation Management Plan (once approved – currently with DPHI for review and approval). The Conservation Area A Conservation Management Plan includes the management measures for a total of

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			73 Aboriginal sites wholly or partially within Conservation Area A, comprising 48 open artefact sites and 16 open artefact sites/PADs. Once the Conservation Area A Conservation Management Plan is approved, a separate database of the sites within Conservation Area A will be created and maintained by MACH Energy (in consultation with the RAPs and Heritage NSW). In accordance with Part B, Condition B69(d)(iv), MACH Energy has elected to establish alternative conservation measures – the proposed Keeping Place, cultural centre and 'Yarning Circle' at Lot 1, DP 192121 and the Munmurra River Grinding Groove site. Section 1.1, 4,2 and 4.4.1 has been amended to address this clarification.
	Section 4 also does not provide specific management recommendations regarding the management of works that may be required within Conservation Areas. Please confirm whether these will be provided as part of the separate Aboriginal Cultural Heritage Conservation Strategy and/or include appropriate measures for the management of activities (such as road maintenance or construction, fencing, weed management etc) within Conservation Areas in the revised ACHMP.	Section 4	Specific management recommendations regarding the management of works required within Conservation Area A is provided in a separate management plan which was provided to the RAPs for consultation and is currently with DPHI for review/approval.
Part B, Condition B69(d)	Please confirm whether the Conservation Management Plan for Conservation Area A has been approved by the relevant agencies, including Heritage NSW. If Conservation Area A is subject to a separate approved plan, consideration should be given to whether Section 4.2.3 duplicates information from the Conservation Management Plan and may cause confusion.	Section 4.4	Conservation Area A is subjected to a separate management plan. The Conservation Area A Conservation Management Plan was submitted to DPE (now DPHI), Heritage NSW and RAPs for consultation in November 2022. The information from Section 4.2.3 of the ACHMP has directly been sourced from the

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			Conservation Area A Conservation Management Plan. Section 4.2.3 has been updated to avoid confusion.
	Please provide further clarification regarding how the management of the Minnamurra Grinding Grooves site will address the intent of Condition 33 of DA 82/97 given that the site is located within an area already set aside as a biodiversity conservation offset area, is a site type not found within MPO, is located out of Country and is already subject to protection under legislation.		The intent of Condition 33 (DA 92/97) is primarily met by Conservation Area A and proposed Keeping Place, cultural centre and 'Yarning Circle' at Lot 1, DP 192121. The additional step of identifying cultural heritage sites on MACH's existing offsets land was proposed by Heritage NSW in October 2021, and the Munmurra River Grinding Grooves site is consistent with Heritage NSW's previous advice. The management of the Munmurra Grinding Grooves site has also received support from the RAPs through the consultation process to develop alternative conservation measures. It is noted there are no grinding grooves in the MPO area, as this is a rarer site type. The Munmurra Grinding Grooves site has been assessed to have high cultural, scientific and aesthetic values (Niche, 2024), noting: • The site is notable for a high number of grooves (total = 87). • It is situated within an archaeologically sensitive landform (waterways i.e. Munmurra River) and the area was likely a high-activity area. • The site has research value as grinding groove analysis could be undertaken on a

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			number of the grooves with potential research investigating use-wear and residues. • The site contains elevated outcrops that allow for a view of mountain ranges and landscape feature focal points within the broader landscape in addition to the vista of the upstream and downstream of the Munmurra River. The Munmurra River Grinding Groove site was unregistered and unknown prior to the inspection commissioned by MACH Energy on Heritage NSW's advice. The surrounding area has been historically disturbed through vehicular access, associated tracks and farming (cattle). The demarcation (fencing) of the site and registration with AHIMS by MACH Energy, as a result of its identification, will increase the protection of this site both immediately in the long-term. The site has teaching and educational value that would not be realised through protection of the area for biodiversity alone. Section 4.4.1 has been updated to address this.

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
	The options listed in Section 4.2.4 are very general and there is no clear indication of whether these activities will occur or the likely timing. This should be addressed in the revised ACHMP.	Section 4.2.4	Section 4.2.4 has been updated to address this recommendation.
	Please provide dates for the development and provision of a finalised Aboriginal Cultural Heritage Management Strategy including any specific management requirements for Ascot Farm and Munmurra River Grinding Grooves (if these are not addressed in the revised ACHMP).	Section 4	The Aboriginal Heritage Conservation Strategy refers to Section 4 of the ACHMP (not a separate/standalone document). The Aboriginal Heritage Conservation Strategy has been developed in a staged process and outlines the strategy to establish and conserve an off-site conservation area and describes the measures that would be implemented to provide an appropriate long-term security for the proposed conservation areas. Conservation Area A, the Keeping Place, cultural centre and 'Yarning Circle' (Lot 1, DP 192121) and the Munmurra River Grinding Groove form the Aboriginal Heritage Conservation Strategy for the MPO. As the Keeping Place, cultural centre and 'Yarning Circle' and the Munmurra River Grinding Groove site are still undergoing consultation with the RAPs, once specific management measures have been developed, the ACHMP will be updated accordingly, and conservation management plan(s) will be developed for these sites.
	Management Actions Section 5.3 indicates that all archaeological excavation under the relevant AHIPs has been completed and Appendix E does not identify any known sites for which salvage excavation is required. However, the ACHAR identifies that	Section 5.3	Section 5.3 has been updated.

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
	test/salvage excavation will be required at a number of locations if subject to impact following detailed design. Please clarify.		
	Please provide a single summary table in Section 5 that lists the applicable management strategies and the sites within the area subject to the ACHMP to which that management strategy applies.	Section 4, Appendix E	Applicable management strategies at the MPO include: - Conservation Area A: 48 open artefact sites and 16 open artefact sites/PADs and six scarred trees; - Munmurra River Grinding Groove site; - the Keeping Place (Lot 1, DP 192121); - relevant AHIPs (prior to the surrender of DA 92/97); and - management of sites in accordance with the SSD ACHMP (consistent with South East Archaeology [2020a, 2020b]). These applicable management strategies are already discussed in Section 4 of the ACHMP. Appendix E has been updated to include all the applicable Aboriginal heritage management sites within the MPO boundary, the management measures from the ACHAR (South East Archaeology, 2020a, 2020b) and an audit has been undertaken with review to the AHIMS database.
	Paragraph 2 on page 18 indicates that the management requirements for sites may change from those listed in Appendix E. Please note that Condition B69 (d)(vi) requires that management actions are in accordance with commitments made in ACHAR and therefore any change should only occur whether the level of harm is reduced from that detailed in the ACHAR.	Section 2.7	This section has been updated to include that the management actions are in accordance with the ACHA (South East Archaeology, 2020a, 2020b) and therefore any change should only occur whether the level of harm is reduced from that detailed in the ACHA.
	Paragraph 2 of Section 5.3 should be revised to recognise that test excavation must be conducted where necessary to clarify the nature, extent and/or significance of a site (in accordance with the requirements of the	Section 5.3	Section 5.3 has been updated to address this recommendation.

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
	Code of Practice for the Investigation of Aboriginal Objects in NSW) for which management actions under a previous AHIP or the project ACHAR have not been approved.		
	The excavation methodology should include provision for the assessment of cultural significance as well as archaeological significance and a mechanism to manage any diversion between these two measures of significance.	Section 5.3.1	Additional text added to Section 5.3.1 to include provision for assessment of cultural significance and measure to conduct consultation with RAPs and Heritage NSW to manage disparity between cultural and archaeological significance.
	The initial sub-surface testing methodology provides allowance for all aspects of the methodology to be revised based on input from the archaeologist. The methodology should be reviewed to ensure general consistency with reference the requirements of the *Code of Practice for the Investigation of Aboriginal Objects in NSW* and must provide sufficient certainty of process for all parties, including Heritage NSW and the Registered Aboriginal Parties.	Section 5.3.1	The initial sub-surface testing methodology has been developed in accordance with the requirements of the *Code of Practice for the Investigation of Aboriginal Objects in NSW* and has been reviewed by the endorsed specialist. Section 5.3 outlines that all relevant parties (RAPs and Heritage NSW) will be consulted during this process. Text has also been added confirming significance determined in consultation with the RAPS (Section 5.3.1).
	The archaeological excavation methodology must be revised to include consideration of a potential conservation outcome for sites of high significance and/or additional consultation with Heritage NSW and the Registered Aboriginal Parties where impacts must occur to a site of high significance.	Section 5.3.2	Section 5.3.2 has been updated to address this recommendation.
	The controlled salvage excavation methodology does not provide any clear guidance on how the maximum area of salvage excavation will be defined. Please provide clear criteria for ceasing excavation expansion.	Section 5.3.2	Section 5.3.2 has been updated to address this recommendation.
	Section 5.3.3 does not provide clear and measurable criteria for where surface scrapes will be undertaken. Please identify the criteria under which surface scrapes will be deemed 'appropriate'.	Section 5.3.3	Section 5.3.3 has been updated to address this recommendation. Surface scrapes will be conducted when a high density of artefacts (more than 50 per m^2) has been identified

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			during the test excavation or salvage excavation.
	Section 5.4 does not provide clear guidance on where artefacts will or will not be subject to further analysis and the level of analysis applied. The statement 'may be subject to further analysis' does not provide sufficient surety of process and should be revised.	Section 5.4	Section 5.4 has been updated accordingly.
	Section 5.8 must specifically outline the process that will apply where ancillary works require harm to sites that have been previously recorded and have an existing requirement to be managed in-situ in accordance with the approved ACHMP.	Section 5.8.1	Section 5.8.1 has been updated to include the in-situ management of previously recorded sites.
	Section 5.8.2 refers to undertaking due diligence inspections and seeking an AHIP where works occur outside the extent of the approved AHIPs. This requires clarification regarding whether it is a reference to works outside the approved SSD boundary or to works within the approved SSD boundary. Where it is works within the approved SSD boundary, AHIPs will not be required, and the sites must be managed under the provisions of the ACHMP.	Section 5.8.2	In accordance with DA 92/97, if works are required outside the extent of the approved AHIP(s), MACH will apply for a new AHIP. However, as MACH has commenced under SSD 10418, MACH will be required to surrender DA 92/97 within 12 months. As such, MACH can apply for a new AHIP (prior to the surrender of DA 92/97) or if DA/92/97 is surrendered, then the sites will be managed under the provisions of the approved ACHMP under SSD 10418. Section 5.8.2 has been updated to address this transitional period.
	Section 5.10 provides a procedure for managing previously unidentified sites. Dot point 3 must include provision for test excavation generally in accordance with the *Code of Practice for the Investigation of Aboriginal Objects in NSW* where required to determine nature, extent and significance of the site. This section also identifies that impact should not occur until approvals are in place. However, once enacted, the ACHMP will act as the guidance document for management of sites within the SSD area and therefore this section must provide clarity on potential management outcomes and/or must trigger a requirement for additional consultation with	Section 5.10	Section 5.10.2 has been updated to include the provision for test excavation generally in accordance with the *Code of Practice for the Investigation of Aboriginal Objects in NSW* where required to determine nature, extent and significance of the site. A commitment (Section 5.10.2) has been included to address the additional

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
	the Registered Aboriginal Parties and Heritage NSW regarding appropriate site management.		consultation requirement with RAPs and Heritage NSW.
	The recommendations for management in Section 5.10.1 are inconsistent with the requirements of the relevant AHIPs, both of which specify that sites of low significance should be subject to surface collection. Please revise accordingly.	Section 5.10.1 and Section 5.2.2	AHIPs #C0002092, #C0004783 and #C0002053 does not specify that sites of <u>low</u> significance should be subject to surface collection. Surface collection is addressed in Section 5.2.2 of the ACHMP and has been proposed in accordance with relevant AHIPs Conditions 9 and 10 of AHIP #C0004783 and Conditions 11 and 12 of AHIP #C0002053.
	In relation to management of newly identified sites, Section 5.10.1 should include provision for additional consultation with the Registered Aboriginal Parties and Heritage NSW in relation to the management of any site type other than scarred trees and open artefact sites. Sites of these types are not predicted to occur within the SSD area and are likely to have high significance and specific management requirements, warranting further review of the proposed management strategy by the Registered Aboriginal Parties and Heritage NSW.	Section 5.10.1	Section 5.10.1 has been updated to include consultation with RAPs and Heritage NSW in relation to specific management measures proposed for the newly identified sites.
	Section 5.13 should be revised to note that approval for harm is not limited to AHIPs but includes approved harm conducted in accordance with the provisions of the ACHMP. This should be noted wherever relevant throughout the document.	Section 5.13	Section 5.10.1 has been updated accordingly.
	Artefact management and storage Section 5.5. and 5.12 specify that artefacts will be managed in accordance with Requirement 26 of the *Code of Practice for the Investigation of Aboriginal Objects in NSW*. This requirement primarily relates to artefacts being returned to their original location. Please clarify that the intent is to follow the documentation and recording aspects of Requirement 26 but for the artefacts to be subject to long-term storage at Ascot Farm.	Section 5.5 and 5.12	Section 5.5 and 5.12 has been updated accordingly to discuss artefact management and storage at the Keeping Place.
	Section 5.6 must include provision for conservation of scarred trees, where feasible.	Section 5.6	Section 5.6 has been updated to reference the conservation of scarred trees in accordance with the procedures detailed in

Aboriginal Cultural Heritage Management Plan (SSD 10418) – Response to Consultation Comments (Heritage NSW)

Relevant Development Consent SSD 10418 Condition	Comment Received	Relevant Section in the ACHMP	MACH Response
			Section 5.8.3 (fencing of certain Aboriginal heritage sites).
	Reporting on actions undertaken under AHIPs/ACHMP Section 5.7 must include requirements for the submission of Aboriginal site impact recording forms for all site cards impacted under approval (as opposed to those specifically impacted under an AHIP).	Section 5.7	Section 5.7 has been updated to include the requirement of the submission of Aboriginal site impact recording forms for all site cards impacted under Development Consent SSD 10418.
	On the basis that AHIPs issued for works approved under DA92/97 may be surrendered, Section 5.7 must include provision for completion of salvage reporting that is generally in accordance with the requirements of each AHIP but also includes reporting on salvage of sites conducted under the ACHMP only. Given the number of sites and area subject to approval, provision should be made for periodic reporting to ensure all information is appropriately documented within 2 years of the completion of actions in each staged portion of the approval area (eg. post-construction of new infrastructure, following completion of salvage requirements in each defined pit area).	Section 5.7	Section 5.7 has been updated to address these recommendations and also to include the salvage reporting requirements that are generally in accordance with the AHIPs.
	ACHMP Review In relation to Section 9.2, Heritage NSW recommends that any review of the ACHMP that results in substantive changes (such as changes to proposed management strategies, changes to project impact footprint or changes to consultation approach) must be undertaken in consultation with the Registered Aboriginal Parties.	Section 9.2	Section 9.2 states that MACH Energy may submit a revised ACHMP for approval without undertaking consultation with the RAPs in instances where the changes proposed to this ACHMP are not material in nature. This section has been updated to incorporate the recommendation.

Table A1: Mount Pleasant Operation Aboriginal Heritage Consultation Timeline (June 2019 – current)

Date	Details
3 June 2024	MOD 7 Draft ACHA and Information Session 2
21 May 2024	MOD 7 Draft ACHA provided to RAPs for consultation.

19 February 2024

Dear Aboriginal Registered Stakeholder,

RE: MOUNT PLEASANT OPERATION – ABORIGINAL CULTURAL HERITAGE MANAGEMENT PLAN

As you may be aware, MACH Energy Australia Pty Ltd (MACH Energy) has been granted approval for the Mount Pleasant Optimisation Project under Development Consent SSD 10418 by the Independent Planning Commission in September 2022. MACH Energy commenced development under Development Consent SSD 10418 on Monday 12 February 2024.

MACH Energy will operate the Mount Pleasant Operation in accordance with Development Consent SSD 10418 and Development Consent DA 92/97 (until its surrender). In accordance with Part A, Condition A15 of Development Consent SSD 10418, the conditions of Development Consent SSD 10418 prevail to the extent of any inconsistency with the conditions of those consents.

Following commencement under Development Consent SSD 10418, MACH Energy has undertaken a review and revision of the existing Aboriginal Cultural Heritage Management Plan (ACHMP).

This revised ACHMP has been prepared to address the management of the Aboriginal heritage at the Mount Pleasant Operation in accordance with the relevant conditions of Development Consent DA 92/97 (until its surrender, Development Consent SSD 10418 and the approved Aboriginal Heritage Impact Permits (AHIP) #C0004783, #C0002053 and #C0002092.

Please find enclosed, for the purpose of consultation, a proposed revision of the ACHMP (dated February 2024) for the Mount Pleasant Operation.

Additionally, the ACHMP can be viewed at the link below:

MPO Aboriginal Cultural Heritage Management Plan

A copy of the revised ACHMP has also been forwarded to Heritage NSW for the purpose of consultation.

MACH Energy would appreciate any comments you would like to make on the enclosed ACHMP. Please provide any comments via the following contact details:

MACH Energy Australia Pty Ltd
C/- Mariah Lane
Email: mariah.lane@machenergy.com.au
Mobile: 0427 163 165

Please provide any comments you may have on the ACHMP (either verbally or in writing) by **5.00pm on Tuesday 19 March 2024.**

MACH Energy Australia Pty Ltd
PO Box 407, Newcastle NSW 2300
ABN 34 608 495 441

t: +61 2 5517 1150
e: info@machenergyaustralia.com.au
www.machenergyaustralia.com.au

Following this date, the revised ACHMP will be provided to the NSW Department of Planning, Housing and Infrastructure for their consideration, as well as a copy of all comments received and how those comments have been considered.

Yours sincerely,

Andrew Reid
Environmental Superintendent (Operations)
Mount Pleasant Operation

Consultation - ACHMP (Version 3) - March 2024

Subject: RE: Mount Pleasant Operation - Draft Aboriginal Cultural Heritage Management Plan (SSD 10418) - Consultation

Good Morning Mariah

Thank you for supply us with the Draft Aboriginal Cultural Heritage Management Plan.

I have shared this for comment with our Board of Directors who represent our membership base and they have reviewed the plan. We have also printed a copy for members to view when they attend the LALC.

The Board have asked me to thank MachEnergy for their ongoing commitment to Aboriginal Cultural Management.

Please call me if you have any further questions. Thanks

De-anne

Subject: FW: Mount Pleasant Operation - Draft Aboriginal Cultural Heritage Management Plan (SSD 10418) - Consultation

Hi Dee,

Hope you have been well.

I would like to follow up on the consultation for the revised Mount Pleasant Operation Aboriginal Cultural Heritage Management Plan.

Could you please confirm this document has been reviewed by the Wanaruah Lands Council and its members and there have been no further comments or questions regarding the Aboriginal Cultural Heritage Management at Mount Pleasant Operations?

If you have no further comments, a simple one liner stating the council and members has reviewed the revised management plan would be greatly appreciated.

Kind Regards,

MARIAH LANE
