Subject: Request for Additional Information

Dear Mr Blair

I refer to the Amended Development Report (ADR) for the Prestons Waste Treatment Facility (SSD-9346594). After careful consideration, the Department is requesting that you provide additional information.

The Department notes the ADR proposes to discharge up to 60.8 ML/pa of water to the sewer under a Trade Waste Agreement with Sydney Water and this application process has commenced. As a contingency measure, in the event the Trade Waste Agreement cannot be obtained, for all or part of the proposed discharge volumes, the Applicant proposes that the treated trade waste would be collected with tankers and removed off-site for disposal.

Section 5.3.5 of the ADR states that traffic impacts associated with trucking water offsite, as a contingency measure, was assessed under the Response to Submissions (RTS) package. The Department has considered the references to the RTS provided.

You are requested to submit the following additional information:

- provide evidence of the outcome of consultation with Sydney Water regarding the trade waste and feasibility applications
- demonstrate that traffic impacts associated with trucking water offsite was considered in the Traffic Impact Assessment in the RTS

You are requested to provide the information, or notification that the information will not be provided, to the Department by **Thursday, 17 October 2024**. If you cannot meet this deadline or do not intend to provide the additional information, please advise the department via the NSW planning portal.

The assessment period ceases to run between the date of this letter and the date you provide the additional information (or notification that the information will not be provided), in accordance with Part 4 Division 4 of the Environmental Planning and Assessment Regulation 2021.
