Re: SSI 8896-Belmont Desalination Water Treatment Plant - Environmental Representative Endorsement - Construction Noise and Vibration Management Sub-Plan Rev 2

Dear Tommy,

Following a review of the documents provided for the Construction Noise and Vibration Management Sub-Plan (CNVMSP) Rev 2, including all Appendices, I can provide the following endorsement.

The CNVMSP Rev 2 has been reviewed against the Conditions of Approval, in particular, C10, C11, C19, updated mitigation measures from IA411110_BelmontDesal_RF12_V003_R001 and DPHI comments. No agency consultation was required to be undertaken for this plan.

Following discussion with the project team in relation to consultation with the community (C19g and C19h) it is understood to only be required to develop mitigation measures for high noise generating works. No high noise generating works were identified or approved in the modification, and none have been identified in the construction methodology to date. A procedure is included in the plan for undertaking consultation prior to any high noise generating works being undertaken where impacts to the receivers are predicted.

All other conditions of approval and mitigation measures are considered to be contained in the CNVMSP Rev 2.

The document is endorsed for submission to DPHI for approval.

Yours sincerely

David Bone
Independent Environmental Representative
