Subject: Request for Additional Information

Dear Mr Boutry

I refer to the assessment for the Baldon Wind Farm (SSD-40138508). After careful consideration, the Department is requesting that you provide additional information.

You are requested to submit additional information that effectively addresses the issues identified in **Attachment 1**.

You are requested to provide the information to the Department by **Friday 27 June 2025**. If you cannot meet this deadline, please advise the Department via the NSW planning portal.

The assessment period ceases to run between the date of this letter and the date you provide the additional information (or notification that the information will not be provided), in accordance with Part 4 Division 4 of the *Environmental Planning and Assessment Regulation 2021*.

The Submissions Report is currently with agencies for review. Following their review, further requests for information may be provided as part of the assessment process.

If you have any questions, please contact David Way on 02 8275 1324 or via email at David.Way@planning.nsw.gov.au.

Yours sincerely,

A handwritten signature in blue ink, appearing to be "Nicole Brewer", with a horizontal line extending to the right.

Nicole Brewer
Director
Energy Assessments

Attachment 1

Item	Comments
Contamination	• Provide a preliminary investigation for contamination in accordance with the <i>State Environmental Planning Policy (Resilience and Hazards) 2021</i>, Chapter 4.
Accommodation Camp	• Provide details on the accommodation requirements for the construction workforce required to establish the proposed accommodation camp. • Provide details on the proposed health and welfare services to be provided during construction of the project to meet the needs of construction staff (e.g. on-site nursing practitioners, registered nurse, telehealth services etc.), noting the peak construction workforce of 400 personnel.
Quarries	• Provide the following information in regard to the onsite quarry ○ quantities of material that would be extracted from each quarry site including tonnes in total and tonnes per year; ○ the approximate depth of extraction and nature of voids created; ○ assessment of air, noise, vibration and blasting impacts; ○ assessment of impacts to quality and quantity of existing surface water and groundwater considering the relevant guidelines and cumulative impacts with the wind farm; ○ any quarry specific mitigation measures, in particular for the management of dust and surface water quality; and ○ proposed rehabilitation strategy for the quarry site.
Noise impact Assessments	• Where intersection upgrades are proposed in NSW, provide an assessment of the construction noise impacts on nearby receivers. In particular this should include the intersections upgrades at 54 Market Street Balranald and Murray Valley Highway onto Sturt Highway at Eusto, NSW.
