**Subject:** Attended noise monitoring at Sunnyside and Rocglen Coal Mines

Hi Simon,

As you are aware Sunnyside Coal Mine (EPL 12957) has transitioned to closure from coaling and transporting operation to rehabilitation. Bulk earthwork operation will be concluded early September 2020 with only minor follow up planting and clean-up activities being undertaken during day time. Section M8.1 of EPL 12957 requires quarterly attended noise monitoring to be undertaken, going forward there will be no activities on site so attended noise monitoring will be redundant, and not undertaken.

Also as a follow up an amendment to Rocglen Coal Mine EPL 12870 regarding noise monitoring was submitted on the 19<sup>th</sup> February 2020., with initial draft received by Whitehaven Coal on the 6<sup>th</sup> April 2020. I will be appreciated if the licence amendment can be concluded.

Let me know if there are any issues with no longer carry out quarterly attended noise monitoring at Sunnyside Coal Mine.

Regards,

**Andrew Raal**
