Hi Luke,

See below from Perry.

Hi Mark,

I have search a few selective nurseries, Trees impact being one and others are Alpine.

There is not a lot of 400lt native trees around in the market.
As mentioned last week, the reason being is that normally this specific size is not an off the shelf common size for Natives.
Thus 400lt would require a pre-grow.
Trees in 400lt is a common size for Deciduous stock if the client is willing to plant these, we have a selection of good 400lt available
That I could list.

See below some evergreen trees I have so far available;

- Waterhousea ameroo 400lt – 50 available.
- Eleaeocarpus Eumundii 400lt – 50 available
- Tristaniopsis laurina 'luscious' 400lt – 19 ready December
- Ficus hilli 400lt – 17 available.

Sourced items;

- Acmena firescreen 300lt
- Eucalyptus moluccana 400lt
- Lophostemon confertus 300lt
- Syncarpia gloulifera 300lt

Let me know how you go your end.

Kind regards

Good morning Anna

The following is a list of 300L, 400L and 500L native trees from which we can supply a matched set of 10.

The dimensions shown below and images attached reflect their size and appearance as at May 2020. (Use batch numbers to cross reference images.)

Let me know if any of these are of interest and I will send a formal quote. (Also let me know if you need current images of any of the options listed.)

Regards
Ross
