Dear Robert

**Re: Integra Underground, Project Approval 08\_0101 – Rehabilitation Management Plan**

HV Coking Coal Pty Limited, operating as Integra Underground, currently holds a Mining Operations Plan (MOP) approved to 31 December 2021 for activities associated with longwall mining in the Middle Liddell seam. This MOP includes the Rehabilitation Management Plan required by Project Approval 08\_0101 for the mine. This MOP was originally prepared in 2018 following the approval of Modification 8 to this Project Approval to include the related activities and requirements.

Integra Underground has prepared an amendment to this approved MOP to include additional mining tenements recently granted by the NSW Government. HV Coking Coal Pty Limited now holds the following mining tenements: CL 382; ML 1437; ML 1518; ML 1525; ML 1551; ML 1676; ML 1786; ML 1740; ML 1742. This MOP revision is administrative in nature and no changes to the rehabilitation cost estimate are required. All changes to this MOP are stated in Section 1.1.6 of the document. Please find enclosed a copy of the MOP Amendment B document and associated MOP Plans.

Integra Underground seeks any comments Environment, Energy and Science may have on this MOP. A response to this correspondence by 6 November 2020 would be greatly appreciated. Please contact me via 02 6577 4241 or [Chloe.Piggford@glencore.com.au](mailto:Chloe.Piggford@glencore.com.au) should you wish to discuss this matter.

Yours sincerely

Chloe Piggford
