ELEC MEMO – CHANGE OF SOLAR PANEL LOCATION

PROJECT NAME: New Primary School in Edmondson Park
PROJECT NUMBER: 210104
ATTENTION: Daniel Vidovic
FROM: John Stefani

Re: Elec Memo – Change of Solar Panel Location.

This Elec Memo addresses the Electrical impact due to change of solar panel location on the proposed New Primary School in Edmondson Park.

The project team proposed to amend the location of the roof solar panel from Hall Building to Building A (near Faulkner Way) with additional 20kW of PV panels to the system..

JHA confirms this modification **will not** bring negative impacts on the performance of the solar panel system. Suitable designs are in place for inverter locations and PV board accounting for required cabling distances, additionally the access and maintenance requirements have been addressed with the wider team and discussed with SI stakeholders.

Yours sincerely,

John Stefani
