- ✓ Conducted over 1300 audits covering Quality, Environmental and WHS Management systems of major construction projects;
- ✓ Consulting advice in Project Management Systems.

EXPERIENCE SUMMARY

Since graduation in 1982 Ken has obtained design, construction and operational experience in a wide range of disciplines and industries. This has involved civil infrastructure, heavy industrial, materials handling and commercial building developments.

Ken has been at the forefront of the development and implementation of Quality, WHS and Environmental Management Systems across a wide range of industry sectors. This has included road and bridge construction, railway, airports, pipelines, hospitals, schools, correctional institutions, industrial and commercial building developments.

Ken has been involved in the development, review and implementation of management systems covering quality (since 1991), environment (since 1996) and WHS (since 1999). He has provided consultant advice in management system development to both the government and private sectors.

Ken has developed and implemented strategic review and consulting services across a range of multidisciplinary projects addressing all phases of Project Delivery. He has substantial experience in the delivery of infrastructure projects, and in the auditing of all phases of the project lifecycle covering Quality, WHS, Safety in Design and Environmental requirements.

Ken has reviewed the application of environmental management systems since 1998 across a diverse range of infrastructure projects covering design, construction and operations.

He has experience in all aspects of pipeline operations, including pipeline management systems, integrity management, emergency response, site safety and environmental management.

Ken is an Adjunct Lecturer for the School of Project Management at the University of Sydney
